H.R. 12580. An act to extend and improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the unemployment compensation provisions of such act; and for other purposes;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidences of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 12993. An act to amend the District of Columbia Teachers' Salary Act of 1955, as amended;

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended;

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia; and

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes.

On September 14, 1960:

H.R. 816. An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes;

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 4306. An act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.;

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10087. An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corporation of the Church of Jesus Christ of Latter-day Saints;

H.R. 10960. An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and for other purposes;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12536. An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price;

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the United States Constitution One Hundred and Seventy-fifth Anniversary Commission shall report to Congress and including certain amendments relating to housing.

On September 15, 1960:

H.R. 2565. An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 12659. An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes;

H.J. Res. 402. Joint resolution granting the consent and approval of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, District of Columbia metropolitan area, and for other purposes; and

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.

On September 16, 1960:

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipe stems on the free list.

HOUSE BILLS AND JOINT RESOLUTIONS DISAPPROVED AFTER SINE DIE ADJOURNMENT

The message further announced that the President had disapproved of the following bills and joint resolutions of the House of the following titles:

STABILIZE MINING OF LEAD AND ZINC

H.R. 8860. I have withheld approval of H.R. 8860, "to stabilize the mining of lead and zinc by small domestic producers on public, Indian, and other lands, and for other purposes."

H.R. 8860 authorizes lead and zinc subsidies based on the difference between market prices and a price of 17 cents per pound for lead and 14½ cents per pound for zinc. The subsidies would be paid on the output of mines producing not more than 2,000 tons annually of each commodity.

The problems of our lead and zinc miners have caused me concern for some time. To help solve these problems, the administration has taken administrative actions and has twice proposed legislation which the Congress did not enact. Thereafter, in October of 1958, I reduced imports by imposing quantitative controls.

Now the Congress has enacted H.R. 8860, but unfortunately it would harm rather than help the lead-zinc industry. It would negate the progress of recent years, increase the problems of lead-zinc producers, subject the market to instability, and burden our taxpayers with unsound subsidies. Apart from the fact that the appropriations authorized by the bill would be completely inadequate to pay the proposed subsidies—with the result that the bill's intended beneficiaries could be misled into production for which they would not receive the promised subsidies—the bill has these fatal defects:

First, H.R. 8860 would intensify the industry's problems by generating substantial additional production at the expense of other miners' jobs. Its subsidies would induce the opening for full-time production of many mines which are not now operating, some of which have operated only intermittently in the past. The substantial additions to supply would depress lead and zinc prices and thus cause cutbacks and layoffs of mineworkers in the unsubsidized mines.

Second, the subsidized production induced by this bill would complicate, even frustrate, programs now in effect that are gradually bringing the production and demand of these commodities into balance. As a result of existing import controls and continuing international cooperation, the volume of imports is at the lowest levels, and constitutes the smallest percentage of total lead-zinc in supply, in nearly a decade. This has made it possible during 1959 for domestic lead and zinc producers to reduce excess stocks and to increase mine output. While consumption of these two metals has been at disappointing levels, the domestic industry should, with increased demand, again move rapidly forward to normal and stable operation at reasonable prices. The depressed prices that would result from the subsidy program would represent a backward step. A lasting solution can best be achieved through a worldwide balance of production and consumption, and that is the object of past and current international consultations.

Third, approval of H.R. 8860 would generate demands for equal treatment and similar subsidies from other producers of lead and zinc as well as producers of many other minerals. Such a system of subsidies would make a substantial portion of domestic mining totally dependent on Federal appropriations and would thereby lessen incentives for the technological improvement vital to the continued health of American mining.

For these reasons, I am compelled to withhold my approval of H.R. 8860.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 2, 1960.*

TARIFF—MARKING OF IMPORTED ARTICLES AND CONTAINERS

H.R. 5054. I am withholding my approval from H.R. 5054, "to amend the Tariff Act of 1930 with respect to the marking of imported articles and containers."

The bill would provide that new packaging for articles imported in containers

required by present law to be marked with the name of the country of origin must be similarly marked by the repackager, whether the importer, distributor, retailer, or other handler of the merchandise. Goods in packages not so marked would be subject to seizure and forfeiture. The requirement could be waived only where found to necessitate such substantial changes in customary trade practices as to cause undue hardship.

H.R. 5054 runs counter to one of our major foreign policy objectives—the reduction of unnecessary barriers and hindrances to trade. The burdens the bill would impose are unnecessary because the Federal Trade Commission requires the disclosure of the foreign origin of repackaged imported articles when it is in the public interest to do so.

The United States and other principal trading nations of the world have recognized that burdensome marking requirements can be a hindrance to trade and have agreed to the principle that such hindrances should be reduced to a minimum. H.R. 5054 might well result in successive domestic handlers requiring written assurances of proper marking in order to avoid the severe penalty of seizure and forfeiture. The cost and the complications involved in such cumbersome paperwork would tend to discourage such imports. Moreover, this measure could prove ultimately damaging to our export-expansion efforts, for needlessly restrictive action on our part could readily lead to similarly restrictive action by other countries against American goods.

In addition, the bill would unnecessarily extend the Bureau of Customs into new areas by requiring the Bureau to follow goods after they have entered the stream of domestic commerce and to act against handlers of merchandise who are not importers. The Bureau would be required to determine the nature of customary trade practices and the possibility of undue hardship in a field outside its normal competence. Aside from the unnecessary additional expense, these new responsibilities would be most awkward for the Bureau to administer.

For these reasons I am withholding my approval of H.R. 5054.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 5, 1960.*

H.R. 6767, RAYMOND BAURKOT

I have withheld my approval from H.R. 6767, for the relief of Raymond Baurkot.

This bill would permit the filing of a tax refund claim that was in fact filed after the deadline date set by law.

Public Law 85–859 provided for the refund of internal revenue taxes paid on certain liquors lost as the result of a major disaster occurring prior to the date of enactment, September 2, 1958. It required that claims be filed on or before March 2, 1959. The claimant filed on March 16, 1959, for a refund of $382.10 paid in taxes on beer destroyed in a 1955 flood. He asserted that he had telephoned the branch office of the district director's office in Easton, Pa., on February 26, 1959, and was informed by an unidentified person that he had a "couple of months" in which to file.

The Easton branch office has no record of any such request for information from Mr. Baurkot. That office, moreover, does not itself handle alcohol-tax problems. Its standard procedure is to refer such inquiries to the assistant regional commissioner's office in Philadelphia which has general supervision over such matters.

Information concerning Public Law 85–859 and its filing requirements were widely disseminated to the liquor industry by the Internal Revenue Service. It appears that the claimant received the industry circular published by the Service but thereafter misplaced it. This circular set forth the March 2 deadline and specifically provided that inquiries regarding claims should be addressed to the assistant regional commissioner's office.

Under these circumstances I am unable to approve this bill. The statutory period of limitations, which the Congress has included in the revenue system as a matter of sound policy, is essential to the achievement of finality in tax administration. Efficient administration of the tax laws is dependent upon taxpayers meeting statutory deadlines. To grant special relief in this case would be to discriminate against other similarly situated taxpayers and to create an undesirable precedent.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 8, 1960.*

H.R. 7242, BANKRUPTCY ACT—STATUTORY LIENS

I have withheld my approval of H.R. 7242, to amend sections 1, 57j, 64a(5), 67b, 67c, and 70c of the Bankruptcy Act, and for other further purposes.

I recognize the need for legislation to solve certain problems regarding the priority of liens in bankruptcy, but this bill is not a satisfactory solution. It would unduly and unnecessarily prejudice the sound administration of Federal tax laws. In some cases, for example, mortgages would be given an unwarranted priority over Federal tax liens even though the mortgage is recorded after the filing of the tax lien.

This and other defects of the bill can, I believe, be corrected without compromising its primary and commendable purpose. The Treasury Department and the proponents of H.R. 7242 have been working toward solution of recognized problems in present law. Further cooperative efforts should produce satisfactory legislation that would avoid the undesirable effects of this bill.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 8, 1960.*

H.R. 2074, ERIC AND IDA MAE HJERPE

I am withholding my approval from H.R. 2074, for the relief of Eric and Ida Mae Hjerpe.

In their income tax return for 1952 these taxpayers reported as income certain disability payments received by Mr. Hjerpe from his employer. During 1952, however, the Court of Appeals for the Seventh Circuit had held such disability payments excludable from gross income, even though the Internal Revenue Service had ruled to the contrary, and in 1957 the U.S. Supreme Court affirmed.

The taxpayers' claim for refund, based upon the excludability of the disability pay received by Mr. Hjerpe, was filed almost 4 years after the 1952 return had been filed and approximately 10½ months after the expiration of the applicable 3-year statutory period of limitations. The claim was accordingly disallowed.

The last Congress enacted legislation to grant general relief, on a nondiscriminatory basis, to taxpayers who had paid income tax on disability pay excludable from gross income under the Supreme Court decision. Relief was not provided, however, for taxpayers who, as in the case at hand, had not attempted to protect their rights by filing timely claims for refund.

H.R. 2074 would direct the payment to Mr. and Mrs. Hjerpe of $1,096.48 as a refund notwithstanding their late filing and failure to qualify under the general relief legislation. The bill is similar to several others from which I have withheld my approval in the past.

The statutory period of limitations, which the Congress has included in the revenue system as a matter of sound policy, is essential in order to achieve finality in tax administration. A substantial number of taxpayers paid income tax on disability payments received by them and failed to file timely claims for refund. To grant special relief in this case, where a refund was not claimed within the time prescribed by law, would constitute a discrimination against other similarly situated taxpayers and would create an undesirable precedent.

Under the circumstances, therefore, I am compelled to withhold my approval of the bill.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 14, 1960.*

H.R. 7618, H. P. LAMBERT CO., INC., AND SOUTHEASTERN DRILLING CORP.

I am withholding my approval from H.R. 7618, a bill for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.

The bill would waive the applicable statute of limitations and permit a claim for refund of duty paid on certain nondutiable equipment imported into the United States.

The claimants requested that certain oilfield equipment be entered under provisions of the tariff act affording duty-free status to property originally manufactured in the United States. The equipment was admitted duty-free after the Lambert Co., the brokerage firm in the case, had posted a bond to assure production of the documentation required to establish U.S. origin. At the request of the brokerage firm, the time covered by the bond was extended on several occasions. At the end of 2 years,

and when no further request for extension had been received, customs officials personally contacted the firm and advised that the duty would be payable if the requisite documentation were not furnished promptly. Despite this notice and despite a subsequent assessment of the duty, of which the brokerage firm was apprised and which it could have protested within 60 days, the Lambert Co. failed to produce proof of U.S. origin until after its consideration was barred by applicable law and regulations.

Statutes of limitations should be set aside only when justified by compelling equitable considerations. No such considerations appear here. The only extenuating circumstance advanced in this case is that the notice of the assessment of duty was sent to the wrong party. I am advised, however, that the notice was properly sent to the brokerage firm as the party liable for the payment of duty. Furthermore, the firm, presumably wellversed in the customs laws, had not only been given repeated extensions on the bond it posted but had also been specifically advised of the imminence of an assessment of duty.

For these reasons I am unable to approve this bill.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *September 14, 1960.*

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2431. A letter from the Secretary of the Interior, transmitting a copy of a report entitled "Project Twenty-Twelve," which is a program for the Bureau of Land Management until the year 2012; to the Committee on Interior and Insular Affairs.

2432. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 3, 1960, submitting a report, together with accompanying papers and an illustration, on an interim report on Raritan River, N.J., requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted November 13, 1945 (H. Doc. No. 455); to the Committee on Public Works and ordered to be printed with one illustration.

2433. A letter from the Assistant Secretary of the Interior, relative to reporting that an adequate soil survey and land classification of the lands in the Weber Basin project, Utah, has been completed as a part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

2434. A letter from the Deputy Administrator, Veterans' Administration, transmitting a report of the tort claims paid by the Veterans' Administration during the fiscal year which ended June 30, 1960, pursuant to Public Law 601, 79th Congress; to the Committee on the Judiciary.

2435. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated August 25, 1960, submitting a report, together with accompanying papers and illustrations, on a cooperative beach erosion control study of San Diego County, Calif., appendix IV, phase 2, prepared under the provisions of section 2 of the River and Harbor Act approved July 3, 1930, as amended and supplemented, and in compliance with Public Law 525, 79th Congress and Public Law 85-500 (H. Doc. No. 456); to the Committee on Public Works and ordered to be printed with 14 illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS of Louisiana: Committee on Science and Astronautics. Report on activities of the Committee on Science and Astronautics; without amendment (Rept. No. 2215). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 12720. A bill to amend the Agricultural Trade Development and Assistance Act of 1954; with amendment (Rept. No. 2216). Referred to the Committee of the Whole House on the State of the Union.

Mr. WILLIAMS: Committee on Interstate and Foreign Commerce. H.R. 7937. A bill to amend section 1(14)(a) of the Interstate Commerce Act to insure the adequacy of the national railroad freight car supply, and for other purposes; without amendment (Rept. No. 2217). Referred to the Committee of the Whole House on the State of the Union.

Mr. MORGAN: Committee on Foreign Affairs. Report on relations of United States with Panama (Rept. No. 2218). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Twenty-sixth report of the Committee on Government Operations (Rept. No. 2219). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Twenty-seventh report of the Committee on Government Operations (Rept. No. 2220). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government operations. Twenty-eighth report of the Committee on Government Operations (Rept. No. 2221). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee of conference. H.R. 2565. A bill to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations (Rept. No. 2222). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRADEMAS:

H.R. 13236. A bill to amend the Internal Revenue Code of 1954 to make certain technical revisions in the income, excise, and administrative provisions, and for other purposes; to the Committee on Ways and Means.

By Mr. BROWN of Missouri:

H.R. 13237. A bill to provide for adjustments in the lands or interests therein acquired for the Bull Shoals Reservoir project, Arkansas-Missouri, by the reconveyance of certain lands or interests therein to the former owners thereof, their heirs or assigns; to the Committee on Public Works.

By Mr. DERWINSKI:

H.R. 13238. A bill to amend the Mutual Security Act of 1954 to authorize the donation of not to exceed $1 million of surplus agricultural commodities and other property surplus to the needs of the United States for relief of flood victims in Poland; to the Committee on Foreign Affairs.

By Mr. HARMON:

H.R. 13239. A bill to amend section 4369 of title 39, United States Code, to provide that each newspaper shall regularly file with the Postmaster General, and publish a report detailing the space devoted in such newspaper to each candidate for public office and to each political party; to the Committee on Post Office and Civil Service.

By Mr. LINDSAY:

H.R. 13240. A bill to amend title V of the Social Security Act to strengthen and improve the child-welfare services program; to the Committee on Ways and Means.

By Mr. MASON:

H.R. 13241. A bill to supplement the Internal Revenue Code of 1954; to complete economic freedom and thus remove the cause of the "class struggle" between employers and employees; to solve the tax-wage-price-profit problem; to pay cash aid to the needy to enable them to buy food, clothing and shelter, and to pay their medical bills; and to solve the farm problem and thus reduce the high cost of eating; to the Committee on Ways and Means.

By Mr. MEADER:

H.R. 13242. A bill providing that the President shall issue a proclamation in every even-numbered year calling upon the American people to display the flag of the United States on election day; to the Committee on the Judiciary.

H.R. 13243. A bill to amend the Budget and Accounting Act, 1921, to require that full information concerning executive departments and agencies be furnished congressional committees; to the Committee on Government Operations.

By Mr. MONAGAN:

H.R. 13244. A bill to provide for the establishment, under the National Science Foundation, of a National Science Academy; to the Committee on Science and Astronautics.

By Mr. OLIVER:

H.R. 13245. A bill to provide for the conveyance to the State of Maine of certain lands located in such State; to the Committee on Armed Services.

By Mr. ROBISON:

H.R. 13246. A bill to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy and for the training and development of leaders in a total political war; to the Committee on Un-American Activities.

By Mr. ROGERS of Florida:

H.R. 13247. A bill to amend the Sugar Act of 1948; to the Committee on Agriculture.

By Mr. THOMPSON of New Jersey:

H.R. 13248. A bill to implement the Agreement on the Importation of Educational, Scientific and Cultural Materials, opened for signature at Lake Success on November 22, 1950; to the Committee on Ways and Means.

By Mr. WIER:

H.R. 13249. A bill to amend section 33 of the Federal Employees' Compensation Act so as to provide a system of safety rules, regulations, and safety inspection and training, and for other purposes. (This act may be cited as the Federal Employees Safety Act); to the Committee on Education and Labor.

By Mr. WILLIAMS (by request):

H.R. 13250. A bill to amend the Interstate Commerce Act to provide that disabled persons meeting certain requirements may not

be prohibited from operating motor vehicles in interstate or foreign commerce under certain rules and regulations of the Interstate Commerce Commission; to the Committee on Interstate and Foreign Commerce.

By Mr. BECKWORTH:

H.R. 13251. A bill to amend title II of the Social Security Act to provide coverage under the old-age, survivors, and disability insurance system for self-employed tree farmers; to the Committee on Ways and Means.

By Mr. BENNETT of Michigan:

H.R. 13252. A bill to amend title II of the Social Security Act to provide that, for purposes of disability insurance benefits and the disability freeze, quarters of coverage may be determined on the basis of the period during which wages were earned rather than the period during which paid; to the Committee on Ways and Means.

By Mr. CLARK:

H.R. 13253. A bill to amend the National Housing Act to assist in providing rental housing specially tailored to the needs of elderly persons under a program which is separate and distinct from the regular rental housing program contained in section 207 of that act; to the Committee on Banking and Currency.

By Mr. COLLIER:

H.R. 13254. A bill to amend the Internal Revenue Code of 1954 to permit taxpayers to depreciate tangible property over a 60-month period; to the Committee on Ways and Means.

By Mr. FLOOD:

H.R. 13255. A bill to amend title 38, United States Code, to provide for the furnishing of institutional convalescent, and nursing home care for certain disabled veterans, to authorize the construction of facilities for the furnishing of such care, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. HALPERN:

H.R. 13256. A bill to provide for grants-in-aid to the States for the treatment of narcotic drug addicts in closed institutions; to the Committee on Interstate and Foreign Commerce.

H.R. 13257. A bill to increase the penalties for the sale and distribution of narcotic drugs in violation of the Federal narcotics laws; to the Committee on Ways and Means.

By Mr. JUDD:

H.R. 13258. A bill to authorize a contribution to the Government of the Ryukyu Islands for the purpose of providing compensation for use of private property and damage to persons and property arising from acts of the U.S. Forces before the entry into force of the Japanese Peace Treaty; to the Committee on Foreign Affairs.

By Mr. McCORMACK (by request):

H.R. 13259. A bill to amend paragraph 1102 of the Tariff Act of 1930, as amended, with respect to the duties on hair of the Cashmere goat; to the Committee on Ways and Means.

By Mr. MERROW:

H.R. 13260. A bill for the relief of the State of New Hampshire; to the Committee on the Judiciary.

By Mr. MULTER:

H.R. 13261. A bill to amend part I of title III of the Communications Act of 1934, to make it unlawful for broadcasters to make unauthorized deletions from certain matters submitted for broadcasting; to the Committee on Interstate and Foreign Commerce.

H.R. 13262. A bill to amend section 1346 of title 28, United States Code, to permit suits against the United States arising out of contracts entered into by nonappropriated fund activities of or under departments and agencies of the United States; to the Committee on the Judiciary.

By Mr. PILLION:

H.R. 13263. A bill to increase from $600 to $700 the personal income tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemptions for old age and blindness); to the Committee on Ways and Means.

H.R. 13264. A bill to increase from $600 to $800 the personal income tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemptions for old age and blindness); to the Committee on Ways and Means.

By Mr. PUCINSKI:

H.R. 13265. A bill to provide for the establishment of a U.S. Academy of Advanced Sciences and Research Coordination; to the Committee on Education and Labor.

By Mr. STRATTON:

H.R. 13266. A bill to amend the Internal Revenue Code of 1954 to provide that employers having pension plans under which payments are correlated with social security benefits shall be subject to an additional tax in cases where increases in such benefits result in a reduction in their own contributions under such plans and are not passed on to their retired employees; to the Committee on Ways and Means.

By Mr. WOLF:

H.R. 13267. A bill to amend section 7 of the Trade Agreements Extension Act of 1951, as amended; to the Committee on Ways and Means.

By Mr. ZELENKO:

H.R. 13268. A bill to provide compensation for disability or death resulting from injury to employees in employment which expose employees to radioactive materiel, and for other purposes; to the Committee on Education and Labor.

By Mr. CURTIS of Massachusetts:

H.R. 13269. A bill to amend the act of July 31, 1947 (61 Stat. 682), relating to the consent and approval of Congress to an interstate compact relating to control and reduction of pollution in the waters of the New England States; to the Committee on Public Works.

By Mr. TEAGUE of Texas:

H.R. 13270. A bill to provide that three Members of the House of Representatives and three Members of the Senate shall be members of the American Battle Monuments Commission; to the Committee on Foreign Affairs.

By Mr. CURTIS of Missouri:

H.R. 13271. A bill to authorize the establishment of the Ozark Rivers National Monument in the State of Missouri, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. GEORGE:

H.R. 13272. A bill to amend the Labor-Management Reporting and Disclosure Act of 1959; to the Committee on Education and Labor.

By Mr. OSTERTAG:

H.R. 13273. A bill to amend the Internal Revenue Code of 1954 to provide that volunteer fire companies which are exempt from tax under section 501 of such code shall be subject to tax on their unrelated business income but shall not lose their exemption because of such income; to the Committee on Ways and Means.

By Mr. PILLION:

H.R. 13274. A bill to amend the Internal Revenue Code of 1954 to provide that volunteer fire companies which are exempt from tax under section 501 of such code shall be subject to tax on their unrelated business income but shall not lose their exemption because of such income; to the Committee on Ways and Means.

By Mr. WALTER:

H.R. 13275. A bill to provide for adjusting conditions of competition between certain domestic industries and foreign industries with respect to the level of wages and the working conditions in the production of articles imported into the United States; to the Committee on Ways and Means.

By Mrs. WEIS:

H.R. 13276. A bill to amend the Internal Revenue Code of 1954 to provide that volunteer fire companies which are exempt from tax under section 501 of such code shall be subject to tax on their unrelated business income but shall not lose their exemption because of such income; to the Committee on Ways and Means.

By Mr. O'KONSKI:

H.R. 13277. A bill to eliminate the prohibition contained in section 1613 of title 38, United States Code, against affording education or training to an eligible veteran of the Korean conflict beyond 8 years after his discharge; and, to make January 31, 1965, the uniform deadline beyond which such education or training may not be afforded; to the Committee on Veterans' Affairs.

By Mr. TOLLEFSON:

QUARTERLY REPORTS

The following quarterly reports were submitted for the second calendar quarter 1960:

(NOTE.—The form used for reports is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19------ ←

REPORT

PURSUANT TO FEDERAL REGULATIONS OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipatted expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.←

AFFIDAVIT

[Omitted in printing]

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302 (a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D5" (received for services) and "D12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D13" and "D14," since the amount has already been reported under "D5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter

5. $_____Received for services (e.g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")

7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter

12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors? Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E."—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E6") and travel, food, lodging, and entertainment (Item "E7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures

9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year

11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blatten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Claris Adams, 1701 K Street NW., Washington, D.C.
B. American Life Convention, 230 North Michigan Avenue, Chicago, Ill.

A. V. J. Adduci, 610 Shoreham Building, Washington, D.C.

REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1960:

(NOTE.—The form used for registration is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19------ ◀

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Descripition, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.◀

EXTENSIONS OF REMARKS

The 86th Congress

EXTENSION OF REMARKS
OF

HON. GEORGE M. RHODES

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RHODES of Pennsylvania. Mr. Speaker, it is quite obvious that many persons do not realize how closely their welfare, their opportunities for jobs, for education, health services, old age and disability pensions, and a decent livelihood are affected by decisions of the Congress and the President, or by the failure of the Congress and the President to act on important and essential issues.

WHAT CONGRESS MEANS TO YOU

The power of the Federal Government is divided among the executive branch under the President, the legislative branch under the Congress, and the judicial branch under the courts. It is not possible to properly understand your Congress without understanding its relationship with the executive department. Because decisions or indecision by Congress and the President and his Cabinet officers affect each and every citizen, it is of extreme importance for all of us to know our Government and to know how it functions, and to understand the basic issues which have a far-reaching impact on every citizen.

YOUR HELP NEEDED

Good government depends to a large extent upon the interest and the participation of our citizens in political and governmental affairs. In the complexities of our modern society it is often difficult for the average citizen to understand how government actually affects him. Congress determines our Federal income and corporation tax rates, veterans' programs, social security benefits, farm programs, public works, minimum wages, foreign trade, and hundreds of other matters. The executive department, headed by the President, administers the laws, formulates basic economic and fiscal policies, foreign policy, collects taxes, enforces Federal laws, and directs the expenditures of public funds for programs voted by Congress.

RESPONSIBILITY

When one political party has control of both the legislative and executive branches, as has usually been the case in our history, it is quite evident where the responsibility lies. During the past 5 years, however, control of the Federal Government has been divided between the Republican executive and the Democratic legislative branches.

This is further complicated by another important factor which is very confusing unless one follows closely political and Government matters. Congress has been dominated by a coalition of Republicans and Southern Democrats for more than 10 years. These two groups most often vote together on matters affecting social welfare programs, economic issues, education, and other programs of vast importance to the average citizen. In the 86th Congress, the conservative coalition was successful in blocking or watering down many legislative proposals offered by liberal Democrats which include all Northern and Western Democrats and some progressive Southern members.

POWER OF PRESIDENT

The coalition of Republicans and extreme conservative Southern Democrats is an important force in strengthening the hand of the President, since a two-thirds vote, in both the House and Senate, is necessary to override a Presidential veto. This gives President Eisenhower and his associates the power to block progressive and humanitarian legislation sponsored by regular Democrats.

But aside from the control of Congress by the President and his coalition leaders, the President and his Cabinet officers have great powers in their own right. The power of the executive department is strongly felt in the administration of laws passed by Congress.

COALITION POWER

In the past decade there has been no real change in the control of Congress which has been, and still is, dominated by the Republican-Dixiecrat coalition. The only real change came in control of the executive department when President Eisenhower replaced President Truman. It was this change that brought the conservative hard money and high interest rate policies, the laxity in the enforcement of laws dealing with monopolies and tax collections, and the unsympathetic administration of many liberal and progressive programs which have been historically opposed by reactionary interests.

Administration policies which affect the average citizen most are high interest, hard money and curtailment policies.

These policies give vast power to a relatively few persons and determines to a large extent, the rate of the Nation's economic growth and how fairly the average family will share in the Nation's wealth and productivity. On no other issue is the real difference between the two great political parties so pronounced, as on this money issue.

TRICKLE-DOWN

The hard money and high interest rate policy of the President and his coalition leaders, reflects the thinking and philosophy of big financial interests which support and advocate fiscal and economic policies often referred to as the trickle-down philosophy championed by former President Herbert Hoover and President Eisenhower's close friend and White House adviser, Mr. George Humphrey. Humphrey, who is former Secretary of the Treasury, was instrumental in sponsoring and pushing the high interest rate policy of the Eisenhower administration.

The trickle-down theory is in sharp conflict with the liberal Democratic philosophy of building prosperity from the bottom up. High interest rates have funneled a heavy share of the Nation's wealth to fewer hands, and have produced a top-heavy economy, spurred inflation, curtailed economic growth, and resulted in two recessions, unemployment, and much suffering which Democrats contend is unnecessary and unjust. Democrats seek to strengthen the econ-

omy at the base and would make the average citizen more prosperous with programs for public works, schools, hospitals, better social security, and the like.

SPENDING ISSUE

In opposing liberal and progressive legislation, administration and Republican congressional leaders charge that such programs are inflationary and that Democrats are wasteful spenders. Yet the big spending program of the Federal Government today is for high interest rates, big business subsidies, and defense—not for these liberal programs.

The President gets big headlines in denouncing Government spending, yet Congress has actually cut the President's budget request by billions of dollars. As a matter of fact, the Eisenhower administration has broken all previous spending records. Its big spending has benefited but a very few. Little of it has trickled down to help the average citizen. The national debt has risen by more than $20 billion in the past 6 years, although there was a solemn pledge by the President to reduce it.

The record shows that in 7 years under President Eisenhower, Federal spending totaled $497 billion. This amount, spent by Eisenhower in 7 years, is larger than the total spending for 12 years of $373 billion under Franklin Roosevelt, which included the cost of World War II and the New Deal programs which followed the big depression during the Hoover administration. The official record shows that in 7 Eisenhower years, the Government spent $124 billion more than in those 12 Roosevelt years.

RECORD SPENDING

Another example of big spending is in the Department of Agriculture by Secretary Ezra Benson. Benson has spent $31 billion in 7 years as Secretary of Agriculture in the Eisenhower Cabinet. The official record shows that all other Secretaries of Agriculture, since the Department was formed in 1861, spent a total of $27½ billion. In 7 years, as the record clearly shows, Benson spent over $3 billion more than the total of all his predecessors combined in the last 100 years.

The record also shows that Benson has piled surpluses mountain high. Storage costs of farm surpluses are now more than a million dollars a day, or five times as much as that spent by Benson's predecessor. Mr. Benson is a vocal advocate of Government economy. But the official record shows that in practice he has increased the number of employees in his Department of Agriculture from 67,000 in 1952 to 98,000 in 1959—an increase of 31,000. It also shows that the farm income since 1953 is down one-fifth and food prices are up 5 percent.

Beneficiaries of these policies of the Department of Agriculture are not the farmers and not the public, but the speculators and gamblers in the commodity market, who never before had it so good. Benson has been protected by friendly columnists, commentators, and wire services, who have kept the shocking cost of his policies from the taxpayers. Few people have access to these facts for this is the sort of information which few columnists or commentators report.

FEDERAL AID TO SPECIAL INTERESTS

Subsidies, tax write-offs, and tax loopholes, which are very costly to the public, fit in with the overall fiscal, hard money, and trickle-down policies of the administration. One good example is the million-dollar-a-month postal subsidy to the Luce publications. No mention is made of such subsidies in the administration proposal to raise letter postage rates from 4 cents to 5 cents. While benefiting immensely from Federal aid in the form of postal subsidies, big magazines such as Life and Reader's Digest oppose spending for progressive and humanitarian programs as inflationary while they support costly high-interest rates, hard money, and trickle-down policies.

Immigration Law Revisions

EXTENSION OF REMARKS

OF

HON. HIRAM L. FONG

OF HAWAII

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. FONG. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a letter, written by me, addressed to Hon. FRANCIS E. WALTER, chairman, Immigration and Nationality Subcommittee, House of Representatives, relating to discrimination against the peoples of Asia in immigation matters.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SEPTEMBER 1, 1960.

The Honorable FRANCIS E. WALTER,
Chairman, Immigration and Nationality Subcommittee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of June 14, 1960, which appeared in the CONGRESSIONAL RECORD of July 1 and in which you commented on certain statements contained in my article on the discrimination against the peoples of Asia in our present immigration policy, which appeared in the Honolulu Advertiser of May 22, 1960, and the CONGRESSIONAL RECORD of June 1.

There is no question that the McCarran-Walter Act, in 1952, meant a significant step forward in the treatment of the peoples of Asia under our immigration laws. The honors you mention as having been bestowed upon you and Senator McCarran were well deserved. Eight years have passed meanwhile. In these 8 years, great changes have taken place. The atomic age and the jet age have arrived. New nations are emerging in Asia and Africa. The ideological conflict between communism and the free world has become a matter of survival.

The United States must demonstrate its leadership of the free world by deeds and not only by words. This is the reason impelling me to seek amendments of the immigration laws to complete the development which you and Senator McCarran initiated in 1952.

I do not wish to repeat all the facts stated in my article of May 22, but should like to stress again the following points:

1. It is offensive to the peoples of Asia and the Pacific that they should be accountable to quotas by race when other immigrants are accountable to quotas by their place of birth. We cannot justify this provision of our law by pointing to the more discriminatory laws which existed prior to 1952.

2. It is difficult to explain to any person, whether Asian or not, why an immigrant of Russian or Swiss parentage born in Brazil may come to the United States without quota restrictions, while an immigrant born in Brazil with 50 percent or more Japanese or Indian blood in his veins must be charged to a heavily oversubscribed quota of the Asia-Pacific triangle.

3. Not even our best friends in the Far East can understand why the creation of a new country in Asia with a quota of its own necessitates the reduction of the minimum quotas of all other countries in the Asia-Pacific triangle so that their total never exceeds 2,000.

4. Under the McCarran-Walter Act an Asian family will be separated in migration if the wife is accountable to an oversubscribed quota although her husband is chargeable to an open quota. On the other hand, a non-Asian wife accountable to an oversubscribed quota may be given the quota of her immigrant husband if he is fortunate enough to have access to an open quota. It is embarrassing for me as a Member of the United States Senate to answer the question why the traditional policy of the Congress to keep families united in migration does not apply to an Asian family.

I agree with you that the quotas of Burma, Cambodia, Malaya, Laos, Nepal, Vietnam, and Thailand are open and unused, as these are countries which generally have not sought migration for their peoples beyond their own borders. However, the quota report of the Department of State dated April 1, 1960, to which you refer lists as heavily oversubscribed the quotas of China, India, Indonesia, Japan, Korea, Pakistan, and the Philippines. The quotas of these countries are so heavily oversubscribed that nonpreference quota immigrants have to anticipate an indefinite waiting period. The same list shows that the so-called Asian-Pacific quota is backlogged for 6 years. The State Department quota list dated August 1, 1960, which has just come to my attention, shows that the quota for Chinese persons, 1 month after the beginning of the new fiscal year, is already completely exhausted for the remaining 11 months.

India, Japan, and the Philippines, and the other countries just referred to, have traditionally sought immigration to the United States. They are the countries which will influence more than some others the future of the world. The friendship of their peoples is crucial to all those who are fighting for the preservation of freedom.

I strongly believe that the problem of immigration is no longer just a domestic issue but seriously affects our stand in the world. I believe we should tackle it on a nonpartisan basis to strengthen our posture among free nations. I appeal to you for your cooperation.

Very truly yours,

HIRAM L. FONG.

My Record of Important Votes in the 86th Congress

EXTENSION OF REMARKS

OF

HON. WAYNE L. HAYS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HAYS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include my voting record on 22 of the

most important bills to come before the House of Representatives during the 86th Congress. I have done this every 2 years since I have been in Congress and mailed out copies so that my constituents could have a convenient method of checking my record. As voters in the 18th Congressional District they have the right to know how their Congressman represented them in Washington and how I voted on the major issues.

The record follows:

My vote	Issue	Result
Yes	Extension of mutual security program for 1 year with emphasis on economic assistance	Became law.
Yes	U.S. participation in international program for resettlement of European refugees	Became law.
Yes	Federal loans and grants for industrial redevelopment in depressed areas	Vetoed.
Yes	Increase Federal minimum wage	Passed House
Yes	Federal aid for primary and secondary highway systems	Became law.
Yes	Permits income tax deduction of medical expenses incurred by taxpayer in care of dependent parent over 65	Became law.
Yes	Extends direct and guaranteed loans to veterans for homes, farms, or business	Became law.
Yes	Public works projects on rivers and harbors for flood control and improvement of navigation	Became law.
Yes	Increases grants to local governments for sewage treatment works for water pollution control	Vetoed.
Yes	Civil Rights Act of 1960	Became law.
Yes	Grants for Federal-State program of medical care for aged; liberalizes and extends coverage under the Social Security Act	Became law.
Yes	Labor-management reform bill	Became law.
Yes	Aid to school districts for school construction	Passed House
Yes	Establishes system of licensing and control over manufacture of narcotic drugs	Became law.
Yes	Extends special milk program for children	Became law.
Yes	Resolution proposing constitutional amendment giving the District of Columbia citizens the right to vote for President and Vice President	Adopted.
Yes	New veterans pension law	Became law.
Yes	Raise Small Business Administration's authority to make business loans by $150,000,000	Passed House
No	Increases Federal gasoline tax	Became law.
Yes	Restores authority of Administrator of Rural Electrification Administration to approve loans without supervision by Secretary of Agriculture	Vetoed.
Yes	Preferential immigration status to relatives of citizens and permanent residents of the United States	Became law.
Yes	Authorizes President to designate Captive Nations Week for prayer for freedom of people behind Iron Curtain	Became law.

Industrial Racketeers

EXTENSION OF REMARKS

OF

HON. DALE ALFORD

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ALFORD. Mr. Speaker, I have recently read an article which calls attention to the fact that millions of dollars are being paid out every year by companies to racketeers using tried and true gyp artist methods, and that the swindlers are on the increase.

In this survey, conducted by Purchasing magazine, it is pointed out that a large number of industrial purchasing agents reported their companies had been victimized by slick operators during the past year, and that most of these operators had gone scot free.

The exclusive feature, "Industrial Racketeers," appearing July 18 in Conover-Mast's Purchasing, discloses alarming facts: First, industry is losing millions of dollars each year in swindles; second, 20 percent of the purchasing agents interviewed said they had been approached by shady operators within the past 12 months; third, 17 percent said these frauds were on the rise; fourth, 15 percent admitted their own companies had been victimized in the past.

Detection of these unscrupulous or illegal rackets is made doubly difficult since companies often prefer to pay off rather than go through embarrassing publicity.

Unfortunately—

Says Purchasing—

a surprisingly large number of companies let themselves be bullied into making payment just to get out of an unpleasant situation.

Some of the moneymaking frauds are: The stationery sob story, the phony error racket, the warehouse closing, the bargain pencil racket, and the low bid racket.

Though each of these highly profitable rackets varies in technique, they have one common denominator. In each case the purchaser falls for the scheme because he is interested in saving money for his company. He is, therefore, susceptible to offers of bargains, which more often than not turn out to be well-organized gyp schemes, costing the company a great deal more than legitimate services or products would have cost.

Congressional Investigations

EXTENSION OF REMARKS

OF

HON. A. PAUL KITCHIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. KITCHIN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address by Hon. L. H. FOUNTAIN, of North Carolina:

CONGRESSIONAL INVESTIGATIONS

(Address by Congressman L. H. FOUNTAIN, of North Carolina, before the 62d annual meeting of the North Carolina Bar Association at Myrtle Beach, S.C., June 16, 1960)

I deem it a high privilege and a great honor to be able to speak to you, my distinguished colleagues of the North Carolina Bar Association, on the occasion of our 62d annual meeting.

No experience gives me a greater source of pride and joy than that of being and meeting with members of my own profession, especially those from my home State. I am proud of the North Carolina bar because I believe it has no peer in any State of the Union.

In fact, the longer I am in public life, the prouder I am of the legal profession and the great part it has played and is still playing in building, strengthening, and preserving our American way of life. However, your president invited me to speak, not about our great profession, but on the subject of congressional investigations.

In spite of the prominent coverage being given by the press to the travel expenses of some congressional committees and individual members thereof, I hope we will not lose sight of the essential and very necessary jobs being performed by congressional committees; for it is a known fact that their hard work results in savings of not just millions, but billions of dollars to the taxpayers and in greater efficiency of governmental operation.

As chairman of a House Government Operations Subcommittee which has the responsibility of following our appropriated dollars within certain departments and agencies in the interest of economy and efficiency, I am certainly opposed to extravagance or waste in the use of public funds by any branch of government, whether by means of travel expenses or otherwise.

At the same time, it would be most unfortunate if the kind of criticism contained in the press accounts to which I have referred were to deter appropriate Members of the Congress from making necessary and valuable investigative trips.

I am quite confident that the authors of those travel-expense stories, based upon their own knowledge of congressional investigations, if questioned, would quickly admit both the necessity and the value of congressional committee investigations to the taxpayers of America.

While on this particular subject, let me assure you that on the few occasions when the subcommittee of which I am chairman has found it necessary to travel our hotel accommodations and other expenses related to our travel have been very modest, and at times even austere.

Although the subject of congressional investigations does not today evoke as emotional and heated a reaction as during the 83d Congress, investigations by committees of the Congress, aside from their costs, are still very much in the news and constitute a matter of great and continuing importance. The use of this investigative power, unfortunately, is frequently misunderstood and sometimes misrepresented. To better understand the role of the congressional investigation, perhaps it would be helpful to trace briefly the origin and development of this institution as we know it today.

The legislative investigation originated in 17th-century England at a time when Parliament was engaged in limiting the royal prerogative and establishing the rule of law. In consonance with the English experience, the American settlers quite naturally endowed their colonial assemblies with the power of legislative investigation, and this tradition was passed on to the new Republic.

While not explicitly stated in the Constitution, the power of investigation is generally considered to be, and has been so held by the Supreme Court, inherent in the legislative powers conferred on the Congress by article I, section I.

The investigative powers of Congress were asserted for the first time in 1792 when the House created a select committee to inquire into the disaster of the St. Clair Expedition against the Indians. While the power of Congress to investigate has not been seriously questioned since the early days of the Republic, the scope of that power has been, and continues to be, a matter of some dispute.

It is interesting to observe that the concern of congressional investigations has tended pretty much to follow the growth of our Government and its responsibilities. In the early years, investigations were relatively infrequent and were concerned mostly with the conduct of Government agencies and officials. The War Between the States was accompanied by investigations of the conduct of military operations. Then, with the extensive development of commerce in the 1870's, investigations were directed to business and later to the affairs of the banking and financial community. In the 1920's the investigative spotlight was used to expose instances of national corruption, including the infamous Teapot Dome scandal.

The great depression of the thirties, as we all know, focused legislative attention largely on economic problems. This was followed in the past two decades by numerous investigations concerned with national security and the loyalty of private citizens and, more recently, with labor and management problems. The recent emphasis of investigations on the affairs of private individuals and groups, along with the traditional congressional interest in the conduct of public agencies and officials, has created concern in some quarters about committee procedures and the rights of witnesses.

What, it might be asked at this point, is the purpose of a congressional investigation? First, it should be recognized that Congress could not legislate wisely without first obtaining adequate knowledge of the conditions necessitating correction or regulation. The use of committees to obtain the facts, to enable interested parties to be heard, and to recommend desirable courses of action, is the only practical method of operation for a large legislative body.

Second, and of equal importance, is the use of the investigative machinery to check on the administration of the laws by the executive branch. This is a responsibility of the Congress which is performed principally by each Chamber's Committee on Government Operations, of which I am a member in the House. The power to investigate is an essential tool of the Congress, not alone to determine the needs of the various executive departments, but also for holding the executive accountable for the proper and efficient administration of the laws and for the prevention of misconduct in the executive branch.

Congressional investigations are ordinarily conducted by a committee or one of its subcommittees. It may be one of the standing committees of the House or Senate or a special or select committee created for the purpose of making a specific inquiry. The standing committees and their powers and duties are prescribed by the rules of the House and Senate in accordance with the Legislative Reorganization Act of 1946. A special committee, by contrast, derives its authority from a resolution which serves as the committee's charter.

While the Congress possesses great latitude for undertaking investigations in connection with its legislative function—the Court has held that any areas in which Congress can properly legislate is an area subject to congressional investigation [1]—this power is not unlimited. And while the Supreme Court has not acted to specifically define these limits, it has repeatedly declared that limits do exist. The nature of such limits is perhaps most clearly expressed in the Quinn case [2] in these words:

"The power to investigate, broad as it may be, is also subject to recognized limitations. It cannot be used to inquire into private affairs unrelated to valid legislative purposes. Nor does it extend to an area in which Congress is forbidden to legislate. Similarly, the power to investigate must not be confused with any of the powers of law enforcement; those powers are assigned under our Constitution to the executive and the judiciary. Still further limitations on the power to investigate are found in the specific individual guarantees of the Bill of Rights, such as the fifth amendment privilege against self-incrimination."

The much publicized Watkins case [3] added the caution that "investigations conducted for the personal aggrandizement of the investigators or to punish those investigated are indefensible. There is no congressional power to expose solely for the sake of exposure."

In the main, the Court has recognized under the separation of powers the authority and responsibility of the Congress itself to regulate its use of the power of investigation. It has been advocated by some observers, however, that the courts should require the proceedings of a congressional investigation to meet the requirements of substantive due process.

There can be no serious questioning of the obligation of investigating committees to conduct themselves with fairness and restraint. Differences of opinion relate, rather, to the nature of the specific procedural guarantees, and the extent to which these should be formalized and by whom.

I am reminded here of the sage words contained in the Federalist Paper No. 51, which is attributed by historians to either Madison or Hamilton. In advocating the doctrine of the separation of powers, the author observes:

"It may be a reflection on human nature that such devices should be necessary to control the abuses of government. But what is government itself but the greatest of all reflections on human nature? If men were angels, no government would be necessary. If angels were to govern men, neither external nor internal controls on government would be necessary. In framing a government which is to be administered by men over men, the great difficulty lies in this: you must first enable the government to control the governed; and in the next place oblige it to control itself."

What, we may ask, are the essential conditions for the fair and responsible conduct of investigations? While committee procedure in general is prescribed by House and Senate rules, discretion necessarily plays a large part in determining how investigations are carried on.

Surely we should expect investigations to be conducted in a nonpartisan manner and reasonably confined to the matters under consideration. Adequate advance notice of hearings and their purpose should and is now required to be given to members of the committee, and active participation even encouraged on the part of the minority as well as the majority members. I am happy to say that in the Intergovernmental Relations Subcommittee, of which I have the honor to be chairman, we have never knowingly or consciously used investigations for partisan purposes and, as a consequence, the subcommittee's findings and recommendations are usually adopted unanimously.

I would like to say at this point that the responsibility and cooperative attitude of the minority members of the subcommittee during the 85th and 86th Congresses contributed substantially to the nonpartisan and constructive spirit in which our work was carried on.

We make it a practice, also, to prepare for hearings as thoroughly as possible in order to obtain complete and concise information for the record without wasting the time of witnesses or committee members. The really constructive hearings are seldom spontaneous—they are almost always the result of many hours and even weeks or months of careful preliminary work by the committee chairman and his staff.

Because of the nature and importance of the responsibilities assigned to our Committee on Government Operations, it is one of the few House committees which may sit, hold hearings, and act without special permission while the House is in session. This authority has been extended also to the Intergovernmental Relations Subcommittee, with the result that committee members sometimes find themselves engaged in hearings or other committee business when the roll is called on the floor of the House. Unfortunately, the reason for their absence is not always readily apparent to visiting constituents in the gallery or from examination of the CONGRESSIONAL RECORD. The subcommittee has also been granted the authority to issue subpenas requiring the attendance of witnesses and the production of papers, documents, and books in connection with its investigations. We have used this power very sparingly.

Except for a few unusual instances, such as when our subcommittee was concerned about the possibility of damaging the reputation of a witness in a conflict of interest investigation, we have made it a practice to hold open hearings and to make information about our activities freely available. I believe strongly that those of us in the Congress who are chairmen of committees have been entrusted with serious and important responsibilities and the public has a right to know how we are performing them. For this reason, most of our hearings and all our reports are printed and can be obtained by interested persons without charge. However, the great majority of our citizens learn about congressional investigations only through news reports.

By and large, the newsmen who cover Capitol Hill do a very commendable job of handling a tough assignment. However, the pressure of deadlines and the great volume and technical nature of committee work make it extremely difficult for reporters to present complex issues clearly and fully. Sensational sidelights, unfortunately, sometimes seem to crowd out more significant matters.

While a legislative investigation differs greatly from a judicial proceeding and is neither required nor expected to follow court procedures, I believe that procedural safeguards for the witness should be adhered to as far as is practicable. For example, a witness appearing before a committee should be permitted to be accompanied by his own counsel and should always be given an opportunity to fully state his case for the record. An accurate stenographic record should be kept of the hearing, with a copy made available for the witness' inspection. With respect to television, radio, and photographic coverage in the committee hearing room, as in the courtroom, the advantage of wider news coverage must be balanced against the possibility of disrupting orderly and dignified procedures.

While neither the House nor the Senate has adopted a rule governing the televising of hearings, it appears that a witness may effectively object to testifying before cameras. In the case of *U.S.* v. *Kleinman* (1952) (107 F. Supp. 407) where the facts indicated that a defendant was confronted with "television

[1] *McGrain* v. *Daughtery* (273 U.S. 135 (1927)).

[2] *Quinn* v. *United States* (349 U.S. 155 (1955)).

[3] *Watkins* v. *United States* (354 U.S. 178 (1956)).

and newsreel cameras, news photographers with their concomitant flashbulbs, radio microphones, a large and crowded hearing room with spectators standing along the walls," the court held that the refusal of a defendant to testify was justified. It should be pointed out that it is the policy of the Speaker of the House that committee hearings may not be televised.

Many of you will recall the widespread criticism of congressional investigations that was prevalent not long ago and the various measures for reform proposed by the American Bar Association, lawyers, journalists, Members of Congress, and others. As a result of this public concern, the House amended its rules in 1955 in order to clarify and spell out certain provisions relating to committee procedures and the rights of witnesses. Included in these amendments were a prohibition against one-man subcommittees, and a statement of the right of a witness at an investigative hearing to be accompanied by his own counsel.

In the work of the Government Operations Committee, we are concerned principally with appraising the administrative performance of the Federal departments and agencies. This has given rise to a special investigative problem that should be mentioned—that of the occasional refusal of a Federal department to furnish information or records essential for evaluating its work. This highly controversial problem of Executive privilege, however, is much too large and complicated a subject for inclusion in this discussion.

In closing, I think it appropriate and useful to recall some words written nearly 2,000 years ago: "Blame not before thou has examined; understand first and then rebuke. Answer not before thou hast heard; interrupt not in the midst of a speech." This wisdom of the ages might well serve as the foundation of a sound policy for all investigations.

Foreign Propaganda and Federal Censorship

EXTENSION OF REMARKS
OF
HON. BYRON L. JOHNSON
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. JOHNSON of Colorado. Mr. Speaker, in light of the widespread interest in the bill H.R. 12753, approved by the House on August 22, which would amend the Subversive Activities Control Act, I call several items to the attention of any person who may be interested.

There were hearings on similar bills, H.R. 4105 and S. 1273, before Subcommittee No. 3 of the House Committee on the Judiciary in the 84th Congress, 2d session, July 9, 1956, serial 27.

Editorials with respect to that bill appeared in the New York Times on July 9, 1956, and in the Washington Post on July 14, 1956, and a news story in the Washington Star on July 10, 1956.

A complete legal review of the issues can be found in the University of Pennsylvania Law Review for March 1959 and April 1959, volume 107, Nos. 5 and 6.

Unfortunately, none of these materials were used during the discussion here on the floor on August 22. I trust that the Members of the Senate or other Members of the House who may be interested will familiarize themselves with such material in order that Members may have more complete background with respect to this topic before we are again called upon to vote on such legislation.

The Rising Tide of Violence

EXTENSION OF REMARKS
OF
HON. WILLIAM M. COLMER
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. COLMER. Mr. Speaker, the rising tide of violence in the world is a matter that gives us all deep concern. The reversion to savagery in the Congo and the ugly campaign of hate in Cuba are recent examples.

Our able and distinguished colleague, Hon. MARTHA W. GRIFFITHS, of Michigan, at the annual banquet of the National Association of Women Lawyers here in Washington on August 27 took notice of this rising trend toward a return to the law of the jungle. I believe her comments are worthy of the consideration of every Member of this House, and under leave to extend my remarks, I submit her speech as follows:

When I accepted the invitation to speak here this evening I had originally intended to confine my remarks to the congressional problem of dealing with trade between nations, more particularly, trade between this Nation and Cuba; but since that time a more fundamental problem has been turned loose upon the world, and I would like first to address myself, however briefly, to the rising tide of violence in the world. One of the most amazing examples was the inability of the established government of an old and long civilized country, Japan, to guarantee the safety of our President from youth gangs.

The Belgian Congo, frightening as it may be to the leadership of nations the world over, presents to lawyers, in my judgment, the most interesting, if not the most primitive legal problem of many centuries, that is the almost total lack of law and order; and the real lack of sufficient foreseeable leadership to establish a government capable of operating in the 20th century on an equal footing with the governments of great industralized states.

It is hardly conceivable that the descriptions of horror emanating from reporters on the scene in the Congo could have been written on any other continent in the world in the past 2 centuries. One reporter from Leopoldville writes: "I will not soon forget the scenes of villages burned to the ground, of women raped and then cut into pieces, or heaps of hands and feet gathered together as trophies of victory. And I did not see the worst; the scenes of cannibalism. Everywhere, this conflict is dragging the youth down to the barbarism of their fathers."

We who are the inheritors of the slow-building, century-by-century, of the common law; we who took as commonplace the passing of monarchies; the replacement of one government by the revolutionary forces of another government must now realize in fascinated horror, first, that law and order is established by reasonable men; and second, that such reasonable men must apply sufficient power or force to maintain order.

All of us, even those of you who may have sympathized with the cry "Africa for the Africans" must now reawaken to the painful knowledge that a nation cannot be maintained, even if established, unless it can guarantee the peace within its own boundaries, and the safety, not only of its own nationals, but of visitors within its domain.

The great powers of the earth may be able to guarantee the borders of small nations against invasions but it remains to be seen whether they can help create and guarantee internal order within a small nation.

The question posed by the Belgian Congo is whether men of the 20th century working in cooperation can bring men of the Stone Age into the 20th century or whether the cooperation will be replaced by a war so calamitous that the 20th century will be pulled back into the Stone Age.

There are those who in their despair or in their superficial reasoning would now like to blame Belgium. Either Belgium should have trained more Congolese to take over the reins of government, or Belgium should not have left the Congo. Let us examine both theses.

Belgium went into the Congo in 1877. Belgium had a population of a little over 5 million at that time. In 1891 there were 425 Belgians in the Congo and over 27 million natives.

During at least the first 50 years of Belgium rule the prevailing ideas of the rulers of the Western World were that colored people could not be educated to white men's standards. It is therefore, in my judgment, not really surprising that Belgium did not proceed at its own cost to set up schools and colleges and force higher education upon the Congolese, or even to offer it to them. I might remind you that in this respect we had an almost impossible time getting our own National Congress to enact a scholarship program for our own people. Indeed, we did not do it until we called it a defense program. Isn't it, therefore, ridiculous to belittle a civilized group of Europeans of 50 years ago for failing to train a group of savages thousands of miles away from them.

In all honesty it must be admitted that colonial experiments were not carried on for the benefit of the colony. They were to enrich the life of the mother country. It is largely incidental that they did, as a matter of fact, enrich the colony.

Suppose we consider the second alternative. Why did Belgium grant the freedom so quickly? Frankly, I don't know; but I would assume that they felt the problem of keeping order, squashing riots, maintaining peace was not worth the price it would cost them. Consider, for instance, the fantastic price to France of maintaining Algiers. Even if Belgium had remained in the Congo, if it had been necessary for them to deal with local riots and rebellions, could they have relied upon the sympathetic understanding of the rest of Africa, of the rest of the world? Of course not. Shakespeare's romantic and dramatic "All of the world's a stage" has become "All of the world is an audience" and all of the audience is prepared to throw rotten tomatoes some of which might be loaded with hydrogen bombs.

At the present time it would be delightful to say of the entire Congo situation "Let them have it. Let's all go home." But we can't say that. We can't do that. The Soviets won't go home. It could be expected that they would immediately extend their rule to this richest mineral area of the Continent of Africa. This we cannot tolerate. The Congo is rich in uranium and we are the chief purchaser. We certainly would not willingly abandon our opportunity for this trade. But, more importantly, we are now apparently irrevocably committed to the policy of government, if not necessarily by the consent of the governed, at least by nationals of the majority group of the country governed.

While we cannot enforce this behind the Iron Curtain, we have certainly gone sled length in the remaining free world. Thus, the war in Korea, the great applause for the

withdrawal of the British Empire from her oversea dominions, the Dutch from Indonesia plus the demands by this administration that Israel, France, and England withdraw from the Suez. This will be but prelude to the demand that the United States leave Panama. I repeat "all of the world is an audience."

Let me suggest, we are viewing now as lawyers or as legislators, if you will, the comparatively simple problem of maintaining order in a nation.

Order, such as it was, had been maintained by the old system of colonialism. As that system has passed, it has opened for the Soviets, the most militant power in the world, an unparalleled opportunity to establish its own system of order. If they have been turned back by war in Korea and by measures short of war, such as the Berlin airlift from actually taking over a country, they have not been idle in other ways.

The modern world which demands new hosts of independent countries—15 new governments having come into being in the past 12 months—demands by the very nature of its industry a greater interdependence among nations economically.

The Soviets have not conspicuously contributed to the problem of maintaining order in the emerging nations. Rather, their purposes have been best served by adding confusion, by stirring up the old hatreds and arousing old prejudices. They have, however, happily moved in to tie nations to them with trade. In that connection, let us now consider Cuba.

For more than 60 years Cuba has supplied sugar to this Nation, ranging in amounts up to one-half of our total annual supply. It is true that since the Jones-Laughlin Sugar Act we have paid them more than the world price. However, this has been done largely to protect our own sugar growers who produce the world's highest priced sugar. Part of the price paid for the foreign sugar has come back to us in tariff which has been sufficient to pay all of the subsidies to our own beet and cane growers.

In the Sugar Act of 1956, we arranged to purchase approximately one-third of our sugar from Cuba. We did this partially because of our longstanding friendship for Cuba. But we should face reality. We also did this because Cuba was a heavy purchaser of American made products, ranking not less than eighth in the world. We were also serving our own interests, therefore, when we purchased from Cuba.

With the coming to power of Castro and his "Hate America" campaign, the situation changed. This time the government, which certainly seemed to be capable of maintaining order, deliberately set about making life unpleasant for visiting Americans. The result was that an annual $40 million of American tourist business dwindled to nothing. Cuban luxury hotels stand empty of guests.

American nationals had large holdings in Cuba. (Please consider that a large part of American foreign policy is geared to the encouragement of private investment, as well as public investment, in underdeveloped countries.) This had occurred voluntarily in Cuba over the past three decades. It did not solve the problem. Those investments became part of the problem. Now, Castro threatened confiscation of American holdings. The American Sugar Act was up for renewal in Congress this year. The American public and the American Government became restive. Democracies are not geared to speedy action. They grope their way toward laws and trade relations that their people will support. But even a democracy must finally act. At this point the President asked Congress for the sole power to cut the Cuban sugar quota. Congress cut the Cuban quota completely and gave the President the power to restore such part as he deemed in the national interest.

Then, in roughly this sequence, the following events transpired: Russia, the largest producer of sugar in the world, who had been purchasing sugar from Cuba for 5 years with fanfare, pomp and ceremony dramatically doubled her largest previous order. Castro began the confiscation of American oil refineries and sugar plantations. He had, of course, played his last card.

There remained little hope that our continued purchase of sugar from that nation could help us. We had to take our business elsewhere—among friends, or at least among nations that understood that the first principle of a good business deal is "Don't spit on the customers." The President then cut drastically the Cuban sugar quota. Russia stepped in to increase their sugar purchases in exchange for crude oil, shipped in Red China's tankers.

In this series of events—who won and who lost? In my judgment—Cuba and the United States lost—Russia won.

The standard of living in both Cuba and the United States was or will be diminished in each country by the amount of trade that was lost, which cannot be replaced elsewhere. Russia gained trade and prestige. She helped another nation win a hate campaign against us. As long as she can continue to put the blame on us for Cuba's lowered standard of living, while herself profiting from their trade, she will continue to win.

What can we do and the free world do to establish and maintain order in nations like the Congo and to survive the hate campaigns in nations like Cuba?

The right of Cuba and the Congo to select their own Government is the right among other rights, to create disorder, to set up a different standard of values, a different view of crime; and is the right finally to aid in pulling the rest of the world into poverty, chaos, and death.

Against the aggressive actions of political immaturity and hatred the free world moves by slow and painful steps to protect itself.

The United Nations by creating a climate of world opinion aids in creating a standard of performance of nations, to the heroic efforts of that organization in the Congo we are undoubtedly indebted for peace today.

The World Bank; the International Development Association and the Inter-American Development Bank are made up of many member nations attempting to answer the great need for capital in the underdeveloped countries, while trying to avoid the result of Cuba's reaction to American investment.

The World Health Organization, composed of 87 sovereign nations cooperates to prevent the spread of communicable diseases. It gives dramatic emphasis to the value of cooperation.

The Organization of American States is an effort of this hemisphere to iron out its own problems.

When enumerated these efforts all sound so hopeful and so easy. They are hopeful, but they are not easy. They have been attained by years of patient, painful, and frustrating effort of innumerable men and women throughout the free world; men and women who have sat in committees composed of delegates from the nations of the world presenting the problems of each nation; seeking a common solution; men and women who have sat in legislative bodies listening patiently to the explanation of the laws needed to effect such cooperation, then explaining in turn to their constituencies the problem and the solution. And when the effort was completed, sometimes the solution has become a problem or has failed in its mission and the whole process has to be started again.

The road to peace, filled with quagmires, will be walked together by men of many nations who have forgiven and forgotten the bond of slave and master, of exploiter and exploited, which bound their forefathers in bitter enmity; but the old road, over which man has traveled for centuries, unrecognized by man for what it is, still calls us back. The hatred of man for man and nation for nation, so easy to instill, so hard to overcome, remains the true hope of the Soviets. Through the arousing and the exploitation of our latent and mutual hatreds, they expect to win the world to communism.

Man has come a long way upon his course, accompanied in the last few years by the shadow of the bomb, which but emphasizes the urgency under which we must seek a better understanding of the problems of our world and their solutions—and in that problem solving, this nation must lead the way.

Immigration and Politics

EXTENSION OF REMARKS
OF
HON. FRANCIS E. WALTER
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the text of a letter I wrote the Honorable CHESTER BOWLES, of Connecticut:

AUGUST 8, 1960.

HON. CHESTER BOWLES,
House Office Building,
Washington, D.C.

DEAR CHESTER: On July 2, 1960, I wrote you regarding the immigration plank of the Democratic platform and I attached a proposal of such plank stressing that it would have great humanitarian appeal and at the same time alleviate the fears of a great many Americans who are plagued with chronic unemployment problems evident in many areas of our country, including the area I come from.

For the record, I wish to repeat the text of my proposal:

"HUMANE IMMIGRATION POLICY

"The large increase of population of the United States revealed by the 1960 census, together with the accelerated shift of our population from rural into urban and suburban centers, as well as the trend of mass movements from the East to the West and the Southwest, has created economic and social problems as yet not resolved. The inadequacy of urban housing, educational and health facilities, and the relocation of manufacturing establishments are the main facts of this complex picture.

"It is imperative that these factors be considered in connection with our immigration policy. Automatic numerical additions to our country's annual intake of immigrants will result in aggravation of the problems faced by our own population and result in regrettable hardship to the newcomer, who seeks economic betterment in America and not a continuation of the harsh life in the depressed economies of the homeland he decided to leave.

"The traditional American policy of hospitality for the immigrant and a safe haven for the oppressed shall, however, not be altered. That policy was implemented in the last 15 years when, under Democratic leadership, a series of laws were enacted, providing for the continuation of immigration policies, enabling the United States to receive refugees from persecution on account of race, religion, or political beliefs. Sound immigration policy was similarly implemented by legislation sponsored and channeled through the Congress by Democrats,

which enabled immigrant families to remain united or to reunite in cases where they became separated in the course of their migrations.

"We likewise believe that it is imperative that our immigration policy provide sound safeguards to prevent the admission to these shores of Communist agents or other subversives who threaten our internal security. We believe that immigration policy preventing the separation of immigrant families and permitting speedy reunion of families is greatly advantageous not only to the immigrants themselves, but to the welfare of the United States and its citizens as well, inasmuch as it facilitates social and political assimilation and enhances economic integration especially when the immigrant enters into a home established by his close relative in this country. We pledge ourselves to the implementation of these policies."

Unfortunately, the immigration plank of the Democratic platform prepared by your committee and approved at the Los Angeles convention bears very little similarity, if any, to my proposal. No pride of authorship is involved, believe me. But as a man who for the last 12 years has been responsible for most that has been done in the field of immigration domestically, and in the field of migration internationally, I cannot refrain from expressing my deep disappointment at what was made a part of our platform as far as immigration is concerned.

Frankly, what appears in the platform are a few excerpts from speeches made quite some time ago by individuals advocating special immigration privileges and selected groups. The old material has not even been reviewed in the light of legislation enacted in the last few years. The result is that what our platform presents to the voters is out of date, not borne out by facts, and insincere. It is simply phony.

Let me explain in detail what I have in mind and let me go over the immigration plank point by point.

Platform: "We shall adjust our immigration, nationality and refugee policies to eliminate discrimination and to enable members of scattered families abroad to be united with relatives already in our midst."

Facts: The Congress has exercised continuous watchfulness over the needs of refugees and scattered families and the result of it is that since the end of World War II this country has never been left without an active refugee immigration program such as embodied in the Displaced Persons Acts of 1948 and 1950, the Refugee Relief Act of 1953, and the act of September 11, 1957.

In addition to that, the permanent immigration law, the Walter-McCarran Act, has equipped this country to deal with emergency problems such as typified by the exodus of Hungarians following the abortive Budapest uprising of 1956. Under the provisions of section 212(d)(5) of the Immigration and Nationality Act, the doors of this country remain open to those who need a safe haven in a hurry, when Congress is not in session, or where legislative action could not meet the requirements of time. Thus, the Congress has seen to it that the United States is at all times in possession of adequate instrumentality to maintain the position of leadership our country has assumed in granting asylum and permanent homes to displaced persons and refugees.

Similarly, the Congress has seen to it that relief legislation designed to reunite immigrant families and bring into the United States alien members of those who became U.S. citizens or permanent residents of this country be continuously on the statute books as the needs arose. The above-cited act of September 11, 1957 (secs. 5, 6, 9, 11, and 12), as well as the acts of September 9, 1959, and September 22, 1959, eloquently testify that the problem of separated families has been not only constantly in our minds, but that it has been satisfactorily solved.

The fallacious character of the immigration plank is even more evident in the light of the fact that on July 14, 1960, while our convention was still in session, the President signed Public Law 86-648 under which an additional number of refugees will be able to enter the United States. Bear in mind, please, that, on the date of the enactment of this new refugee law, the Department of State still had immigrant visas available for refugees pursuant to the law enacted on September 11, 1957 (a law which I sponsored jointly with our candidate, JACK KENNEDY). Thus, we have seen to it that there is no hiatus in the admission of refugees.

Platform: "In this World Refugee Year it is our hope to achieve admission of our fair share of refugees. We will institute policies to alleviate suffering among the homeless wherever we are able to extend our aid."

Facts: Part of what I said above applies to this empty, pious statement, but let me stress that, during the entire World Refugee Year, the United States has been admitting refugees pursuant to existing law (sec. 15 of the act of Sept. 11, 1957). In addition to that, the United States has contributed $5 million to the funds administered by the United Nations High Commissioner for Refugees in connection with the World Refugee Year. The enactment of the act of July 14, 1960, implements in a more than adequate way our pledges made in accepting the U.S. participation in the World Refugee Year and determines our "fair share" in the resettlement of the remaining refugees. It is so held by the United Nations High Commissioner for Refugees and the Intergovernmental Committee for European Migration. The World Refugee Year ended before the platform promise was made.

Platform: "We must remove the distinctions between native-born and naturalized citizens to assure full protection of our laws to all. There is no place in the United States for second-class citizenship."

Facts: There are no second-class citizens under the naturalization and nationality laws of the United States. This blatant lie has been invented by Communists who seek the elimination of a statutory provision under which a naturalized citizen who, within 10 years following his naturalization, engages in subversive activities may face the rescission of his naturalization by judicial (not administrative) action. Does the Democratic Party advocate the repeal of that provision of the law?

As far as rights and privileges of citizens are concerned, persons born and persons naturalized in the United States are placed on an exact equality by the Constitution. No law has, or could, change that. The only distinction between citizenship by birth and citizenship by naturalization affects eligibility to being elected to, or to assume the office of the President of the United States. This provision is contained in the Constitution, not in any of our naturalization or nationality statutes.

What the present law does, continuing the provisions of all nationality laws enacted since the erection of this Republic, is to provide for loss of citizenship by those who shortly after naturalization elect to return to the country of their nationality, or live permanently in some other foreign country. Exceptions from this old, general rule were greatly enlarged by the Walter-McCarran Act, and further enlarged by the act of August 4, 1959.

As to the general principle involved, let me quote the following:

"Citizenship is membership in a political society and implies the duties of allegiance on the part of the member and a duty of protection on the part of the society. These are reciprocal obligations, one a compensation for the other. * * * (But) the clearest implication those (naturalization) laws show that it was not intended that naturalization could be secured thereunder by an alien whose purpose was to escape the duties of his native allegiance without taking upon himself those of citizenship here, or by one whose purpose was to reside permanently in a foreign country and to use his naturalization as a shield against the imposition of duties there, while by his absence he was avoiding his duties here. Naturalization secured with such a purpose was wanting in one of its most essential elements—good faith on the part of the applicant. It involved a wrongful use of a beneficent law. * * * That the taking up of a permanent residence in a foreign country shortly following naturalization has a bearing upon the purpose with which the latter was sought and affords some reason for presuming that there was an absence of intention at the time to reside permanently in the United States is not debatable."

These words are not mine. The Supreme Court of the United States said that on October 20, 1913 (*Luria* v. *United States*, 231 U.S. 9). Has the Democratic Party a case to make against this?

Platform: "The national-origins quota system of limiting immigration contradicts the founding principles of this Nation. It is inconsistent with our belief in the rights of man. This system was instituted after World War I as a policy of deliberate discrimination by a Republican administration and Congress."

Facts: The national-origins quota system was embodied in the law in 1924, and has served as the basic formula for the distribution of quota immigrant visas since that time. Except by critics catering politically to minority groups and special interests, the national origins quota system is generally considered to have worked well and served very well the national interests of the United States.

The national-origins quota system is not predicated upon race, culture, morality, intelligence, physical attributes or other characteristics of the people in any foreign country. Our quota system is based on the image of our own people. It is like a mirror held up before the American people, reflecting the proportions of their various national foreign origins. The main purpose of it is to permit the speedy assimilation of the newcomer and his absorption into our social, political, and economic system more readily than if the immigrants would arrive in numbers disproportionate to the national orgins of the people who receive them and make them a part of their own.

Let me quote this: "In formulating a permanent policy two considerations are of prime importance. The first is that the country has the right to say who shall and who shall not come in. It is not for any foreign country to determine our immigration policy. The second is that the basis of restriction must be chosen with a view not to the interest of any group or groups in this country, whether racial or religious, but rather with a view to the country's best interests as a whole. The great test is assimilability. Will the newcomers fit into the American life readily? Is their culture sufficiently akin to our own to make it possible for them easily to take their place among us? There is no question of superior or inferior races, or of Nordics, or of prejudice, or of racial egotism. Certain groups not only do not fuse easily, but consistently endeavor to keep alive their racial distinctions when they settle among us. They perpetuate the 'hyphen' which is but another way of saying that they seek to create foreign blocs in our midst."

Again, these are not my words. They are taken verbatim from an editorial printed in the New York Times on March 1, 1924, a few weeks before the principle of national origin was selected as the distribution formula of the immigration laws of the United States.

However, what is even more important than the consideration of the fairness and the logic of the national-origins quota system is the fact that our basic immigration quotas are nothing but a base upon which our laws operate. The quota has actually no bearing on the number of immigrants entering our country. First, for reasons of hemispheric comity, the quotas do not apply to our neighbors of the Americas. Second, mindful of the humane aspects of immigration and realizing the impact of our immigration policy upon our foreign relations, the Congress has at all times provided for the entry of immigrants outside of the basic immigration quotas, including refugees and relatives of U.S. citizens and permanently residing aliens.

Thus, while in the decade 1930–39, the total of immigrants who entered the United States was 699,375; during the following decade, 1940–49, such total was 856,608; and, in the decade 1950–59, the total rose to 2,499,268.

Here are the figures illustrating the entry of quota and nonquota immigrants since the enactment of the Walter-McCarran Act:

Fiscal year	Quota	Nonquota
1953	84,175	86,259
1954	94,098	114,079
1955	82,232	155,558
1956	80,310	232,315
1957	97,178	229,689
1958	102,153	151,112
1959	97,657	163,029
Total	646,803	1,132,041

Platform: "The protections provided by due process, right of appeal, and statutes of limitation, can be extended to non-citizens without hampering the security of our Nation."

Facts: Under the Immigration and Nationality Act, full protection of all rights is provided to aliens, even to those who have entered this country illegally. Neither due process of law nor judicial review of administrative decisions is curtailed or limited by any provisions of the law. Administrative procedures prescribed in the Immigration and Nationality Act have been extensively tested in the courts, including the Supreme Court of the United States, and they withstood the tests with flying colors—including attacks on their constitutionality.

As to statutes of limitation, the law moves even beyond what is normally so termed. The law contains numerous provisions providing relief for immigrants guilty of reprehensible or outright criminal conduct where such relief was never available to them prior to the enactment of the law presently in effect. Our motif in writing these provisions was the desire not to disrupt family units. One of those relief provisions contains even a statute of limitation on membership in subversive organizations, a provision entirely novel in our immigration laws (secs. 212(a)(28)(I), 244(a)(5), 313 (c) and (d) of the basic code, and sec. 5 of Public Law 85–316).

Hoping that I have adequately dealt with details, let me say, in summing up, that I am genuinely sorry that, having included in the platform a set of wornout slogans and meaningless promises to do things which have already been done, we are now facing our voters without any outline of what our immigration policy is or what it should be.

We may find some consolation in the fact that our Republican opponents have similarly not overexercised themselves. They simply stated that they want to double the number of immigrants entering our country annually. They did not say where they are going to find jobs for them. This, however, does not surprise me as they did not say where they are going to find jobs for those already in this country, either.

Sincerely yours,

FRANCIS E. WALTER,
Chairman, Subcommittee No. 1, Committee on the Judiciary.

Some Aspects of American Foreign Policy—Address by Senator Fulbright Before American Bar Association

EXTENSION OF REMARKS
OF
HON. MIKE MANSFIELD
OF MONTANA
IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. MANSFIELD. Mr. President, at this moment the distinguished chairman of the Senate Foreign Relations Committee, the Senator from Arkansas [Mr. FULBRIGHT], is making an address before the American Bar Association in the city of Washington, D.C. I have had an opportunity to read the address. I think it is broad and comprehensive. It indicates the thought which the chairman of the Foreign Relations Committee always gives to his foreign policy pronouncements. It shows the high degree of intelligence he has and the deep knowledge he possesses in the field of foreign affairs.

Because of its timeliness and the scope which it encompasses, I ask unanimous consent that it be printed in the RECORD. I express the hope that Members of the Senate and the House will, during the time available, read the speech, because it is worthy of the consideration of each and every one of us. It is a speech which I commend, because it is in the usual vein in which the chairman of the Senate Foreign Relations Committee makes his pronouncements, and I think it indicates deep study and great intelligence.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SOME ASPECTS OF AMERICAN FOREIGN POLICY

(Address of Senator J. W. FULBRIGHT, chairman, Senate Foreign Relations Committee, before American Bar Association, Washington, Sept. 1, 1960)

Mr. Chairman and distinguished guests, I am honored to be included on your program and to have the opportunity to share with you some of my thoughts and hopes regarding our position in the world.

According to the press, both of our American political parties seem agreed that foreign policy is the main issue in the coming election. However, foreign policy is not a thing apart. To a degree not fully appreciated by our people, our foreign policy is the summation of all our policies. Our Nation's foreign policy is so dependent upon our strength and competence in other fields that it is merely one aspect of our defense policy, our economic policy, our agricultural policy and, above all, our educational policy. It is, in short, a reflection of our national conception of ourselves and our role in the world.

Failure fully to appreciate this fact accounts, I think, for a curious ambivalence in the American approach to national policy. I emphasize national policy as distinguished from foreign policy or the various segments of domestic policy. If one looks at the United States by itself, one sees an economy which, though it still contains isolated pockets of deplorable poverty, has nevertheless achieved a hitherto unknown level of abundance and productivity.

Yet, if one probes more deeply beneath the chrome-plated surface of American life, he comes inescapably to the conclusion that the American people, by and large, are not happy. The incidence of mental illness and of physical ailments associated with emotional stress is increasing rapidly. American doctors last year wrote almost 50 million prescriptions for the various drugs that come under the general heading of tranquilizers. Every year the waiting lists of psychiatrists, psychoanalysts, and psychotherapists get longer. It has occurred to me that perhaps one of the difficulties is not in ourselves as individuals but in ourselves in our collective capacity as a nation. It would be helpful, I think, if the developing science of psychiatry could make a study of national egos and motives and personalities; for it seems to me that nations have quite as hard a time understanding themselves as do individuals.

I believe that such a study would conclude that America's trouble is basically one of aimlessness at home and frustration abroad. Webster defines "frustration" as a state which results when one has been prevented from attaining a purpose. The American people have attained their private purposes almost too well at home; but beyond their personal material needs they have not yet recognized an objective or purpose which inspires their real interest.

In their relations with the rest of the world, many Americans feel that we have done all the right, decent, and noble things to no avail. In two decades we have fought two wars, one global and one limited to Korea; we have poured out $78 billion in foreign aid of one kind or another; we have sent our sons to places many of us had never even heard of. Yet we find our Vice President stoned in Caracas, our President kept from Tokyo by howling mobs, and our flag trampled in the dust in Panama, in La Paz, and elsewhere.

Above all, we find the lengthening shadow of the hammer and sickle creeping forward through Asia, through Africa, and even into the Caribbean. How and why this has occurred is surely a natural and legitimate question.

Now, as I suggested earlier, I do not think we can find separate solutions to our problems at home and to our problems abroad. They are all really facets of the same problem. And this problem is one which is common to the West, though it is perhaps more acute in the United States than elsewhere.

It is a paradox that we suffer both from aimlessness, or lack of purpose, and from frustration, or failure to achieve a purpose. This unfortunate condition results, in part at least, from confusion regarding our purposes and our objectives specially in our relations with other nations. I think we have tended to set our goals too low at home and too high abroad. We have tended to expect either too little of ourselves, so that the accomplishment of it gives us no great satisfaction, or too much, so that failure results in severe frustration.

May I elaborate upon this latter aspect of our affliction. Historically, our excursions into foreign affairs have been primarily military—painful experiences which were to be gone through as quickly as possible so that we could return to life and business as usual. Even when we are not dealing with strictly

military matters, we still use military terminology. We talk about the cold war and about psychological warfare, in—to use a cliché which I am thoroughly sick of—the battle for the minds and hearts of men. I think we still tend to regard the cold war as an episode rather than an era, although it is already a mighty long episode.

Our frustration results from the discovery that we are not able to fix things up quickly; that in spite of our prodigious efforts, a peaceful, free, secure, and prosperous world has not resulted. The flaw in our approach is the time span in which we have sought to achieve these objectives.

If I may illustrate: It is not uncommon these days to hear brave words about instituting the rule of law among nations and that a great conference should be held to promote it. It seems to me to be a little unrealistic to expect this when we are not able to persuade two-thirds of the Senate to repeal the Connally amendment. It is difficult for me to believe that other nations will take us seriously when we speak of the rule of law among nations so long as we retain the Connally reservation.

I recognize, of course, that there are honest and sincere men among us who view the Connally reservation as the last bulwark of our national sovereignty, as one of our last defenses against the encroachments of a strange and hostile world. To these, I can only say that they misread, in my judgment, the meaning of the times in which we live. As much as some Americans may dislike it, the United States has been thrust into the center of world affairs. Either we move to strengthen the mechanisms of world peace—of which the World Court is a conspicuous example—or we continue to suffer increasingly the frustrations of a world in which there is no real peace.

It has been said so often that it is trite, but it seems not fully to have penetrated our consciousness: We live in an era of unprecedented change and upheaval. The only predictable thing about it is that the velocity and the violence of the change is likely to increase.

Our world is in a period of genuine transition. This transition began with World War I, which in its turn marked the beginning of the end of that earlier, more stable era characterized by domination of the world by the nations of Western Europe. Not only were these powers preeminent in industry and in the arts and sciences, but their economic and political power was worldwide. Their colonial empires were more vast than their homelands.

During the years since World War I and the present, we have seen the liquidation of the old colonial empires and the emergence of a new authoritarian empire under the leadership of the Soviet Union. It is difficult for the West to adjust to this unprecedented rapid growth of the Communist power. Since the outbreak of the First World War they have gained control of 40 percent of the world's population, 27 percent of its territory and 30 percent of its industrial capacity. This should be enough to cause any thinking person to suspect that all is not well within the Western World and yet any significant change in our traditional methods of doing business is grudgingly considered and reluctantly accepted, if it is not rejected outright.

One significant change fraught with yet unknown consequences, is the enormous expansion of the number of independent nations and their admission in the United Nations. In 1945 there were 51 members. Today there are 82, with 15 recommended by the Security Council and awaiting only General Assembly approval and there are more on the way.

I do not wish to imply that all these developments are bad, although some appear to be premature and threaten to end in chaos. However that may be, these changes have resulted in a fluid, unstable situation among the non-Communist peoples. Such a situation, if we have the imagination and the desire, presents us with an opportunity to play a constructive role in the development of these societies. However, if we neglect these opportunities these unstable communities could easily fall prey to chaos and to communism.

In contrast to these unstable conditions in the former colonial areas, the Communists have managed to consolidate and to stabilize their empire. I do not overlook the centrifugal tendencies that may develop between the Chinese Communists and the Russians. Nor do I minimize the fact that the Soviet Union, no less than the West, is subject to the pressures of social and technological change. But it is a fact that since the ruthless suppression of the Hungarian revolt, there have been no violent upheavals in the Soviet Empire. Certainly it would be dangerous if we were to base our policies on the hope, or the expectation, that internal stresses and strains in the Soviet bloc will eventually destroy its monolithic structure.

Furthermore, we will be courting disaster if we underestimate the abilities of the Soviet Union and its satellites in the fields of industrial production, science, education, or even the production of consumer goods. And we had better not underestimate the appeal which communism seems to have for the underdeveloped and newly independent peoples of the earth. We do not like this, but it is a fact that oftentimes newly independent peoples, faced by overwhelming problems and at the same time spurred by demands for immediate improvement in living conditions, succumb rather easily to Communist promises of plenty and, perhaps even more importantly, of self-respect.

I suppose it is characteristic of human beings, especially if they are reasonably comfortable, to be reluctant to recognize change. And even when change is apparent, to adapt to it. Evolution and the survival of the fittest are concepts we understand when applied to plants and animals, but somehow we never seem to recognize that these concepts apply to us. Thus, I daresay that, as we grow older, we are not as likely to realize that we are becoming hard of hearing, as we are likely to believe that people just don't talk loudly enough.

Nevertheless, we can discern some factors which may enable us to begin to comprehend our relationship to the world and avoid some further frustrations. For example, we should recognize that the Soviet Union is here to stay for some time, in my opinion. We should acknowledge that the Soviet Union has demonstrated strength and staying power far greater than we had anticipated. We should acknowledge—much as we dislike it—that communism has an appeal to newly independent poverty-stricken peoples.

But I should say the most important thing for us to recognize is that the period of change which is now under way will be with us for a long time. Whether we describe this period as one of cold war or peaceful coexistence, it will not be brought to an end by the development of any short-range, overnight panacea. It will be decades before stability will be a characteristic of the new nations. It will be decades before we solve, or control, the population problem and the food problems so closely associated with it in these new nations. It may be a long time in these new states before the need for a strong and stable government can be reconciled with the desire and the need for freedom of the individual citizen. We believe we have the correct formula in our constitutional democratic form of government; but it becomes more evident every day that illiterate, destitute peoples do not have the background, the civic consciousness, the resources, to apply successfully such a system to the conditions which confront them.

It will be years before the emerging nations of Asia and Africa and the older nations of Latin America develop the economic institutions and accumulate the capital necessary to give them a self-sustaining rate of economic growth. Yet we in the United States continue to approach this problem as though it were susceptible to a year-to-year solution. There are still many Americans, some of them in the Congress, who hope that somehow—maybe by next year—we will be able drastically to reduce our mutual security program or perhaps to eliminate it altogether.

We are treating our relationship to the world of the 20th century like a quack doctor who prescribes aspirin for tuberculosis—and we are likely to end up not only frustrated but having paid more for quack remedies than we would have paid for a long-range treatment designed to bring about a cure.

Because we as a people have not accepted the idea that we are involved in a long-term struggle, we have failed to plan ahead, and as a result we have lost many precious years with improvised superficial short-term projects. Two years ago the Committee on Foreign Relations proposed that the Development Loan Fund should be given adequate resources and the authority to plan ahead for 5 years. Its proposal was defeated in the Senate with the aid of the administration.

What business in this Nation could succeed if it were denied the right to plan ahead more than 1 year? Such a business would not be able to recruit employees more skilled than migratory help. Yet that is the framework into which we force this Government's competitive struggle with the Soviet Union for the allegiance of the peoples of this world.

A willingness to develop policies for the long pull would enable us to determine the quality and size of our programs instead of pursuing policies of an emergency nature conceived as reactions to Soviet initiatives. A recent example of such an emergency reaction which can be very expensive, is the proposal for Latin America, submitted to the Congress a few days ago.

We ought, for example, to be given more thought, in concert with our friends in Great Britain and in Continental Europe, to ways and means of better harnessing our resources to achieve common objectives. We in the United States have been gratified by the great economic progress Europe has made since the war. We have been encouraged by the steady growth of European economic and political institutions. Whatever strengthens Western Europe strengthens freedom, and we therefore welcome it even though it means keener competition for our own businesses. We do not fear straightforward commercial competition. We do, however, object to discrimination, and we are worried about some signs that the European Common Market may turn into an instrument of discrimination and protection rather than an instrument for further increasing trade, production, and economic growth.

Discussions have already been held on ways and means of concerting Western policies and programs in the worldwide struggle, not only to preserve but also to promote, the human values which are important to the West. These efforts must be pressed forward. The threat we face is not a threat against the United States alone, or against Great Britain alone, or against France alone. It is a threat to all of us; and if we do not meet it together, we shall assuredly suffer separately. Surely unless we pull together economically, we will not be able to compete economically with the Soviet bloc which has managed to eliminate trade barriers extending from the Baltic to the Pacific. We have experienced

instances of severe Soviet competition in recent years in tin, in aluminum, in benzene, and, more recently, in oil.

To resist effectively the ever increasing pressure of the Communist world, it seems to me the free world must develop the machinery for coordinating its military, its economic and its political activities. What an incalculable waste of manpower, brains, and wealth is involved in our policy of requiring the British and the French to duplicate so much of our defense hardware. Even more extravagant are the separate research and development programs in the field of missiles and nuclear physics. The divergent and often conflicting policies of the several nations of the free world are at a disadvantage over the long pull against the united power and purpose of the Communist world. The free world, by a large margin, excels the Communists in material resources and trained manpower. What it lacks is the acceptance by its people of a common purpose and the means to put such a purpose into effect. It is true that we have the common purpose of preventing a third world war, a very worthy purpose indeed. But to achieve such a purpose we must maintain the strength of the free world relative to the Communist world at all times or we will tempt the Kremlin into taking a rash and dangerous adventure.

As we have been in the past, we are still in the present—frustrated. We are confounded and frustrated by a dilemma which demands that either we move positively and boldly in the creation of common policies for the free world, which is repugnant to our traditional, historical isolationism, and also certainly will be costly, or we sit by and watch the Communists extend their power and influence, as they have in Eastern Europe, in Asia, in Cuba, in Latin America, and today in Africa.

Sooner or later, I am sure, the pressure of expanding Communist influence will force us to recognize the necessity for much closer coordination of our policies and our resources. I am only suggesting that if we delay it will be more costly and more painful than if we start now. The North Atlantic Treaty Organization brought hope and confidence to the nations of Europe, and it has prevented a war in that area. The expansion of the same principles into the economic and political fields and among additional nations will, in a like manner, bring hope and confidence to all free peoples. And, perhaps, most important of all, it will prevent another world war. A large number of weak, disunited and unstable democratic nations is an invitation to aggression.

Whenever a public official mentions uniting the free world our super patriots immediately shout that he is a "One Worlder" and therefore a crackpot not to be trusted. Obviously it is not likely to be one world in the foreseeable future if only because a third of it is already in the Communist camp. I do not deny that the concept of a united free world is a difficult one to envision under the circumstances of the present. However, it seems to me that it should not be beyond the capacity of ourselves and our friends who cherish human liberty, first to agree upon a long-term objective of common markets, common defense and research programs and a high degree of coordination of political policies in other fields; and, second, to formulate plans and to take steps toward implementing these objectives without delay.

The problem of reconciling the ideas of unity and diversity within a society is an old one. Each free country has found some kind of solution to this problem in its own particular manner, some more successfully than others. It should not be impossible out of the vast experience of these nations to find precedents and methods which might apply on a broader scale. In any case, the free world needs a unifying purpose, an objective worthy of great sacrifice and self-discipline. We need it not only for our own sake, but we also need it if we are to inspire the newly created nations with confidence in us and in our future.

Perhaps the most persuasive clue to the proper policy for us is to be found in the fears of the Soviet Union. Russia's greatest fear is that the great democracies of the free world will act in a united and constructive manner, or will in fact become united under some new and closer arrangement. This is clear from their persistent efforts to divide us, to drive a wedge between this and that free nation.

Our task, as champions of human liberty, is to draw closer together in all fields of international activity and at the same time to preserve the essentials of human freedom. Recently a distinguished Spaniard, Senor de Madariaga, put it quite well when he wrote:

"The trouble today is that the Communist world understands unity but not liberty, while the free world understands liberty but not unity. Eventual victory may be won by the first of the two sides to achieve the synthesis of both liberty and unity."

Voting and Attendance Record of Congressman Walter Norblad, of Oregon

EXTENSION OF REMARKS
OF
HON. WALTER NORBLAD
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. NORBLAD. Mr. Speaker, under leave to extend my remarks, I include a report to the people of the First Congressional District of Oregon of my voting and attendance record during the 2d session of the 86th Congress.

The record includes all rollcall votes and all quorum calls. The description of bills is for the purpose of identification only; space limitations make it impossible to describe the bills completely or elaborate on the issues involved.

The purpose of this report is to collect in one place information which is scattered through thousands of pages of the CONGRESSIONAL RECORD. I want to be able to provide any interested constituent with a simple compilation of my voting and attendance record.

With the exception of two periods when I was in Oregon—once attending the late Senator Neuberger's funeral and subsequently attending my father's funeral—my attendance record on rollcall votes is 100 percent. On the same basis my record on quorum calls is 99-plus percent—missed only 1 during the entire session. My record is as follows:

Rollcall No.	Date 1960	Measure, question, and result	Vote
1	Jan. 6	Quorum	Present.
2	Feb. 2	H.R. 1217, to provide for free importation of amorphous graphite: Suspend rules and pass. (Passed 278 to 116)	Yea.
3	Feb. 2	H. Con. Res. 459, any variation in traditional interpretation of treaties between the United States and Panama may only be made pursuant to treaty: On motion suspend rules and agree to resolution. (Passed 382 to 12)	Yea.
4	Feb. 2	H. Con. Res. 465, expressing indignation of Congress at recent desecrations of houses of worship and other sacred sites: Suspend rules and pass. (Passed 393 to 0)	Yea.
5	Feb. 17	H.R. 3151, withholding, for purpose of income tax imposed by certain cities on the pay of Federal employees: On passage. (Passed 222 to 160)	Yea.
6	Feb. 25	H.R. 3610, so-called Water Pollution Control Act to increase to $900,000,000 Federal grants to cities to build sewage works: On passage over veto of President. (Defeated 249 to 157)	Nay.
7	Feb. 29	H.R. 10743, supplemental appropriations for fiscal year ending June 30, 1960: Amendment to increase appropriations by $50,000,000. (Defeated 158 to 187)	Nay.
8	Mar. 1	Quorum call	Present.
9	Mar. 7	Quorum call	Present.

A Report on the 86th Congress

EXTENSION OF REMARKS
OF

HON. GEORGE M. WALLHAUSER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WALLHAUSER. Mr. Speaker, the 86th Congress has come to a close, and I wish to express my sincere thanks to the citizens of the 12th District of New Jersey for granting me the high privilege of being their Representative.

The first session, which ended on September 15, 1959, was the longest peacetime session in 19 years, but its record was unimpressive. Controversial legislation was not concluded because of the knowledge that 1960, being a presidential-election year, would provide a better political showcase.

The duties of a Representative are many and varied, and, in general, fall into three categories. The first is the responsibility to legislate; the second, to serve the needs and wishes of the constituents of the district; and the third, to provide a forum for our citizens to express opinions and views on legislative and administrative matters.

I have diligently attempted to devote myself to all three of these responsibilities. It is worth noting that I was present at more than 95 percent of all quorum calls and votes. Some of my infrequent absences were officially excused by the Speaker because of attention to other official duties.

COMMITTEE WORK

I had the honor to serve on two committees, the Post Office and Civil Service Committee and the Government Operations Committee. The House of Representatives does much of its work in committee, and I found this method, from personal observation, to be very satisfactory. Hearings of witnesses and research by professional staffs enable us to consider bills intelligently before they are voted out for House approval and save time-wasting debate before the entire body in its attempt to write satisfactory legislation.

I served on various subcommittees of each general committee and particularly wish to stress the work of the Subcommittee on Postal Operations, which many have credited with triggering the national interest in the effort to stamp out the evil of obscene literature and pornography, which is a cancerous sore in our national life. This subcommittee, in close cooperation with, and in support of, the Post Office Department, held extensive hearings in various parts of the country and shaped legislation that would assist the Department in its fight against this evil. Further, we encouraged citizen groups in various areas to be active and assisted by helping to provide them with the knowledge and tools to enter the fray.

The Subcommittee on Government Activities devoted time and attention, with considerable success, in an attempt to assure efficient and economical administration of various governmental agencies. I am indebted to my colleagues on both sides of the aisle and the committee staffs for their constructive assistance in my committee work.

FISCAL RESPONSIBILITY

You will recall that one major conflict within the 86th Congress was the effort to balance the budget and preserve fiscal integrity. Believing, as I do, that a vigorous economy depends in large measure on the prevention of runaway inflation, I voted against measures that would unbalance the budget without accomplishing the aims for which the spending was designed. In this category, I list my vote against the enlarged Federal subsidy for airport construction and the effort to reduce it to the amount recommended in the budget. The vote to uphold the President's veto on the second public works bill is another example.

At the same time, I tried to avoid a viewpoint that would be too narrow by carefully considering measures that would be of benefit to the 12th District as well as the public at large. In this category, I voted for the housing bill because it contained an amount that would be realistic for urban renewal, so vital to the decadent districts of some of our larger cities. I voted for the postal workers and other Federal employees pay raise because, as a member of the committee that studied and reported the problem, I became convinced that the loyal workers on the Federal payroll had not been kept abreast of the cost of living increase, forcing many to hold second employment, with a consequent reduction in efficiency to the Government.

LEGISLATIVE ACTION

I was a strong advocate of civil rights legislation that was passed in this Congress, and voted for every strengthening, and against every weakening, amendment. I also was recorded in favor of effective management-labor legislation.

My vote against the depressed area bill was not a negative one but a positive one, because it is my belief that the administration bill would have done more for the really depressed areas than did the bill passed by Congress but not signed into law. This comes about because the extended committee bill held out the probability that areas not really depressed would be so benefited that they would attract industries from districts such as ours. It seems clear to me that the administration bill was a realistic approach to help those severely afflicted.

BOBTAIL SESSION

There does not seem to be much point to attempt to analyze the postconvention, bobtail session just completed. The public press and informed persons have pretty well agreed that no real accomplishments have been achieved and that it was charged from the very beginning with political impulses. Most of the "musts" that were supposed to be so important to the country could have been passed in the previous session if the majority party had the will to do so, because it certainly had the votes. In any event, the 87th Congress will soon convene and measures that may be for the common

good can be thoroughly debated and considered, after full hearings, in the early part of the first session.

ACCOMPLISHMENTS AND FAILURES

There were some genuine accomplishments by the 86th Congress. The admission of Hawaii as our 50th State is one. The passage of the civil rights legislation to more properly insure the basic voting privilege of all human beings is another; and in many minds, the passage of effective management-labor legislation is another.

Among the failures that I believe are fundamental is the nonsolution of the 20-year farm problem. Neither political party will assume the blame, but it seems clear to me that with a 2 to 1 voting majority, the majority party could have brought out a constructive program if it had one to offer.

NEW LOCAL POST OFFICES

During the session, I participated in ceremonies which included the dedication of the new Essex Fells Post Office, the new Irvington branch of the Newark Post Office, and the new south station of the Newark Post Office. The Livingston Post Office was also dedicated but, unfortunately, I was away on official business and could not participate.

All of these new structures will not only add to the beauty of the communities, but will aid in a more efficient postal service.

NATO COOPERATION

One of the most rewarding experiences of my tenure was that of having been chosen as an official delegate from the House of Representatives to the Atlantic Congress in June 1959. There were 650 leading citizens of the NATO countries who participated in meetings, the purpose of which was to seek ways of further developing cooperation among the NATO members and to assist in the improvement of the economic, cultural, scientific, and political lives of the underprivileged nations of the world. Positive benefit has been derived. The free world has been awakened to the problem of containing communism by strengthening weak nations to resist it. A commission has been authorized by the Congress to study and recommend means for further action. All of our efforts were and are being directed toward the strengthening of the NATO alliance which has proved to be militarily the savior of the free world from the Soviet challenge.

BILLS INTRODUCED

In addition to my voting record, my interest in legislation can be illustrated by some of the bills introduced by me. These include one to increase the amount of outside earnings permitted under social security from $1,200 to $1,800; a bill to amend the Interstate Commerce Act to assist in the solution of the railroad commuter problem; one to extend social security coverage to self-employed physicians; a bill to strengthen the Post Office Department's authority in the fight against obscene literature in the mails; and one to establish a commission to study and recommend regarding the need for a U.S. Science Academy.

As the 86th Congress comes to a close, there are many questions unanswered and left hanging in the air, but before a positive solution can be found to them, it is important that serious and skilled presentations of various viewpoints be held before the committees of the Senate and the House.

In conclusion, I would like to say that I have honestly and conscientiously tried to use my best judgment in voting on vital issues presented to us, and that I have been diligent in my committee work and attendance at the sessions. It has been a rich experience and I am grateful for the opportunity to serve in the Congress given to me by my constituents.

Ukrainians Still Yearn for Freedom From Communist Yoke

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. PRICE. Mr. Speaker, this fall the Ukrainian Congress Committee of America is celebrating its 20th anniversary with observances of the occasion by local chapters and member organizations. It is appropriate for this House to pause to recognize the occasion.

Americans with little knowledge of the history of the Soviet Union may not be aware of the persistence of a nationalistic tradition among the 42 million Ukrainians—a tradition so strong that immediately after the Communist revolution, even Lenin's controlling group in Moscow was willing to recognize the existence of the Ukraine as a separate state.

That recognition proved to be a scrap of paper, or even less than that. By 1923 Trotsky's Red Army had moved into the Ukraine and forcibly swallowed it up into the so-called Union of Socialist Republics. The Red Army picked off other independent peoples that originally had been guaranteed separate status and added them to the union. The people of the Ukraine, like the people of Poland, have been forced to endure long generations of captivity within various forms of the imperialistic Russian Empire—but, like the people of Poland, they have continued to yearn for their birthright of national freedom and sovereignty.

Dr. Lev E. Dobriansky, chairman of the Ukrainian Congress Committee of America, Inc., is authority for the statement that the nationalistic aspirations of the Ukrainians have so persisted that "each decade since the twenties has seen serious friction, resistance, even open rebellion, scald the hand of their Moscow masters."

There are some 2.5 million Americans of Ukrainian ancestry, and the group of which Dr. Dobriansky is chairman has sought to reflect accurately their sentiments about the captivity in which the land of their ancestors is held by the Soviets.

The committee is purely educational in its objectives. By virtue of their background and interests, Dr. Dobriansky and his colleagues can legitimately claim to be American citizens who are knowledgeable in the affairs of the Soviet Union. They list a fourfold aim for themselves: First, to point out the strategic value of the Ukraine, and other captive areas inside the Soviet Union itself; second, to inform other Americans of the existence of these non-Russian nationalities within the Soviet Union; third, to expose the myths of Soviet unity that are denied by the captive peoples themselves; and, fourth, to propose ways and means to defeat the psychopolitical propaganda drives of the Moscow imperialists in the cold war.

In our own multicultured society, which embraces free men and women of all ancestries, individual groups may often make a contribution for which they are especially equipped. The Americans of Ukrainian ancestry are seeking through their committee to educate, to inform, to stimulate an awareness of certain facts of the modern world that otherwise might be overlooked. They are seeking, and seeking effectively, to keep alive a truth that might become obscured. In the struggle between this free nation and the Soviet Union, truth is an asset that can work most powerfully in the preservation of the ideal of freedom.

St. Anthony of Padua School Opens in Passaic, N.J.

EXTENSION OF REMARKS
OF
HON. GORDON CANFIELD
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. CANFIELD. Mr. Speaker, next week a new school will open in Passaic, N.J., after years of dedicated effort and planning. It will be the 2-story, 11-classroom St. Anthony of Padua School.

A recent article in the Passaic, N.J., Herald-News, August 24, 1960, brought the opening to my attention. It reported the year-long search of a dear friend, the Reverend Paschal Caccavelle, OFM, CAP, pastor of St. Anthony's R.C. Church, and others to find properly zoned and reasonably priced property. At times, the problem seemed insoluable, but construction finally began last September at Chestnut and Tulip Streets.

The contemporary building has an exterior of light blue ceramic tile. A cafeteria with all modern equipment and ovens will accommodate 550 children.

Next week a kindergarten through fifth grade will open, and an additional grade will be added each year until the school reaches eight grades. There are 1,352 families in the parish, and the new school was built to accommodate 800 pupils on its 70- by 160-foot plot. The construction cost was $423,000.

Principal and mother superior of the school will be Sister Anthony Mary. Sisters Daniel Mary and Mary Johnette have been assigned to the school. Assistant pastor at St. Anthony's is the Reverend Innocent Amore, OFM, CAP.

I extend best wishes to all those who helped bring the St. Anthony of Padua School into being, and I trust it will serve its parish and the community well in the years ahead.

Report to the People of the 14th District of Pennsylvania

EXTENSION OF REMARKS
OF

HON. GEORGE M. RHODES

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RHODES of Pennsylvania. Mr. Speaker, I again take this opportunity of reporting to my constituents, the people of Berks County, the 14th Congressional District of Pennsylvania.

PURPOSE OF REPORT

This report summarizes my activities during the 86th Congress, the position I have taken on important issues coming before the Congress, and the record of the Congress itself. It supplements my radio broadcasts, news reports and newsletters.

History will record that this Congress has worked under extremely difficult circumstances to draft laws which would best meet the urgent needs of the American people and survive the threat of a veto. A working coalition between conservative Democrats and the Republican minority combined to develop control over the legislative output. Liberal hopes to legislate on the problems of unemployment, sluggish economic growth, high interest rates, urban blight, social security, and the crucial medical problems of the aged, were put aside.

The President's veto threat hung ominously over the Congress throughout its deliberations and was often employed to cut the substance from worthwhile measures.

SOCIAL SECURITY

Frustrated in efforts to obtain the legislative strength to pass a worthwhile medical care program for the aged as a part of social security coverage, Congress was forced to accept a compromise which merely increased the Federal share of medical care provided by the States to the indigent and to the needy aged.

Social security recipients, who must work to survive while in retirement, will gain a slight advantage from a new provision in which the earnings limitation is raised from $1,200 to $1,500 annually under a complicated formula. For every $2 earned over $1,200 up to $1,500, the recipient will lose $1 of benefits. If he earns over $1,500, he will lose $1 of benefits for every $1 earned. This provision eliminates the former language under which a recipient would forfeit a month's pay if he earned $1 additional. Another section of the new law removes the age limitation on eligibility for total disability.

The 1960 changes in the social security program are only a small part of the tremendous work that must be done to bring the social security program up to date. In improving medical benefits for the indigent, the legislation serves to provide them with better medical services than the thrifty, low income, near indigent can afford. The new Congress must make it possible for all recipients of social security to qualify for health benefits in retirement as a matter of earned right, without charity or proof of poverty by prepayment of premium during their working years. In addition, steps must be taken to substantially increase the limitations on allowable income to permit a decent standard of living in retirement. Steps must also be taken to reduce the retirement age of men and women to 60 years.

BALANCED BUDGET MYTH

Much has and will be said about the balanced budget which was achieved in fiscal 1960. Completely obscured to the public will be the fact that during the past 8 years, $29.4 billion have been added to the Federal debt.

It may be entirely coincidental that budget surpluses occurred in fiscal 1956, 1957 and 1960, conveniently for the national elections involved. The 8-year total gives the true picture of a debt increase of more than $29 billion.

In analyzing the fiscal operations of the Government, the American people should also be aware of the fact that the surplus for fiscal 1960 was in no small part due to the extraordinary contribution to the Federal Treasury by the so-called "independent" Federal Reserve Bank.

In fiscal 1959, when the Nation was facing a $12½ billion deficit, the bank could only make a $491 million contribution. In 1960, however, this contribution was multiplied to $1,093 million. Thus, in order to balance the budget for fiscal 1960 and in order to show a political surplus, the Treasury had to call on the Federal Reserve Board to double its previous contribution. At the same time, heavy defense spending was deferred until July 1, 1960, the beginning of fiscal 1961.

When the true circumstances are brought to light, the 1960 "balanced budget" will prove to have been a fraud on the American people.

TAXES AND LOOPHOLES

The burden of State, Federal, and local taxes has become one of the most critical problems of our times. During recent years, State and local taxes have risen sharply to provide our growing population with better highways, better schools, and better cities.

Criticism has been directed toward Federal expenditures, most of which are spent for the national security. The great Federal debt of $289 billion results principally from the unpaid balance due on the cost of World War II and the Korean conflict. It is regrettable that wartime profits were not adequately taxed at that time. It is also significant that the debt was increased by almost $30 billion during the past 8 years. This resulted more from tax loopholes created by the Revenue Act of 1954 than it did from the high cost of the Korean conflict.

Most Americans fail to recognize that of the total Federal expenditure of over $77 billion in fiscal year 1960, almost $42 billion were spent for national defense, $3½ billion for the foreign aid program which related to the national security, $2½ billion for atomic energy development and research, $5½ billion for the cost of services to veterans, present, past, and future. In addition, $9.2 billion were spent in fiscal 1960 to pay interest on the Federal debt which had almost doubled from $5.8 billion in 1952 because of administration policies which favored more return on the dollar to the lenders.

Therefore, after $5½ billion had been spent on the farm support program, slightly over $10 billion remained for all of the other important functions of the Federal Government including its frequently criticized welfare programs.

In my judgment the American people cannot expect any substantial Federal tax reduction until our Nation's leadership can develop foreign policies which can permit a reduction in the costly program of national defense and the frequently wasteful program of foreign spending. If world conditions could have permitted a $10 billion reduction in defense spending, the Nation would have been on its way to debt reduction and a more secure domestic economy.

As long as our Nation faces an angry and upset world and contributes to this international delinquency, there is little hope for Federal tax reduction. For this reason, I have diligently opposed tax loopholes and resisted tax favors for special groups.

PERSONAL DIPLOMACY

Personal diplomacy which characterized American foreign policy for the past 8 years provides headlines and glamour for its participants, but seldom in history has it proven to be a capable substitute for positive policies of state developed in orderly process.

The personal magnetism of the President operating with firmly established policies of state could not stem the tide of bitterness developing against America.

Throughout the world people pray for a stable peace and the machinery which can insure it. Our policy of supporting friendly dictators has lost us other worthwhile friends. Our belated awareness of the plight of the Latin American Republics now threatens inter-American solidarity.

American foreign policy has too often and in too many places been associated with American investment for high and quick profits. It is no surprise that our official representatives should be jeered and even stoned in Latin American countries, when American funds find their way into investment at fantastic interest rates which range from 20 percent in Peru, 24 percent in Chili, to 36 percent and 40 percent in Brazil and Argentina. Such exorbitant rates of interest in the underdeveloped areas of the world, can do this Nation a grave disservice which no "policies of state" can correct.

If we are to return to our former position of world leadership, we must reaffirm our devotion toward world peace, make manifest our concern for the underdeveloped, the underprivileged, the

suppressed, the neglected, the forgotten people, who constitute most of the population of the world. Dollar diplomacy must give way to human diplomacy. Dollar profit alone has no place in this program. "Good will" can help our Nation much more. The reconstruction of our foreign policy must be the No. 1 goal of a new administration.

NATIONAL DEFENSE

American superiority is unquestioned in many fields. The atomic submarine and the great polar adventures it has made possible are unexcelled. The U–2 incident proved American ingenuity of world observation by "man in flight." The development of rocket warfare, however, raises serious doubt about the usefulness of big Navy carriers and the effectiveness of expansive military bases throughout the free world.

The bitter fact is that the defense lag in America has resulted mainly from administration policies. Defense contracts have frequently been let to provide economic stabilization for industry rather than to fulfill essential defense needs. Large production contracts were repeatedly granted for obsolete military hardware, when production should have been halted with the development of the prototype weapon. Billions of dollars of this obsolete military hardware have been shipped to our bases abroad and to our allies in the free world, frequently to remove the stockpiles of obsolescence from the American scene.

The deterioration of leadership in the Department of Defense is the most tragic circumstance of all. In this special area we had the right to expect the most from our President, particularly in view of his military experience. In this field, where the greatest economies and efficiencies could have been effected, America has been let down. The high office of Secretary of Defense has been passed around as though it were a smalltown postmastership. It is inconceivable that anyone could have occupied this vital position without an unflinching obligation to see the job through the President's term or terms. How can responsible administration result when there have been three different secretaries and eight different deputy secretaries assigned to this task, each with his own policies, each with his own set of advisers, each with his limited experience.

OVERHAUL NEEDED

The complete overhaul of the Department of Defense is of the highest priority. The head of the Department should under all circumstances pledge to remain at his post as long as he is needed by the Executive who appointed him. The continuity of command decisions must not be interrupted. Wasteful practices and procurement must be abolished. Contracts must be granted competitively under procedures established by law without abusing the privilege of suspending proper laws through an emergency declaration which has characterized procurement during the past 8 years.

Such production as is needed must be carried on at the lowest possible cost to the taxpayer, using publicly owned plants and facilities as are available. Emphasis must be upon such defense procurement as is truly needed for the defense of America, rather than for the stabilization or the profit of giant monopolies friendly to the administration.

Furthermore, the $4½ billion spent by the Federal Government in research and development which has considerable civilian value, should be made available to all of the productive forces of America. It is not the private property of the defense contractor who is adequately compensated for this work.

BILLS INTRODUCED

I have introduced bills to raise social security benefits, lower age requirements to 62 for men and 60 for women, and to make disability benefits available regardless of age.

My proposals called for improvements in the Railroad Retirement Act, health benefits for retired postal and Federal employees, and legislation to encourage the hiring of middle-aged and older workers.

Other bills I have introduced were to prevent wholesale abandonment of passenger train service, to limit publishers' second-class mail subsidies, and to expand the public health training program.

Some of my proposals were approved and passed by Congress. Others were enacted in compromise form. Those which were not approved were given consideration which improved chances for favorable action in the near future.

COMMITTEE WORK

I have served on the Interstate and Foreign Commerce Committee and the Committee on House Administration. The Commerce Committee has wide jurisdiction over transportation, communication, public health, railroad retirement, and matters affecting Federal regulatory agencies. I am also a member of the Health and Safety Subcommittee.

BOOSTING BERKS

Berks Countians are particularly interested in the many Federal projects and programs in our area, all of which directly benefit our local economy and our people.

Each month an estimated 25,285 Berks County residents receive social security benefit checks totaling $1,653,-111. Thousands more receive railroad retirement benefits and veterans' pensions. Unemployment compensation also helped several thousand unemployed Berks workers and their families.

Federally guaranteed home loans have been obtained by many Berks residents. Small business loans have been made to a number of firms to improve and expand their business. Requests for help for industry in Berks County have had my full cooperation. Planning and construction work on several federally assisted highway projects has moved forward.

In Reading, the Walnut Street urban renewal project has become a reality, while the Cherry and Court Streets projects are moving ahead in their planning stages. The Reading Housing Authority's aged housing project has been started. All are being assisted by Federal funds. The new $650,000 Naval and Marine Corps Training Center in Reading has been opened, while a National Guard Armory in Kutztown has been constructed. Two hundred and seventy-five thousand dollars in Federal funds will go for construction of a new terminal building at the Reading Municipal Airport.

A number of Berks' townships and boroughs have received Federal funds for planning construction of sanitary-sewer systems and water-supply systems. Berks' industry continues to receive a considerable amount of defense contract and subcontract work.

ECONOMIC GROWTH CURBED

Administration fiscal and curtailment policies slowed down our rate of economic growth. Meanwhile, inflation has continued to bring economic distress to millions of Americans on fixed incomes. The cost of living has risen to a record high. Two recessions have wasted irreplaceable productivity, while unemployment has continued at a high level in many areas bringing hardship and suffering to millions of families. The legal requirement to promote "full employment and an expanding economy" has been ignored by the administration.

CIVIL RIGHTS

Congress enacted a civil rights bill aimed at safeguarding the voting rights of all Americans, the second civil rights measure in the past 3 years. Republicans refused to assist liberal Democrats to bring the legislation to the House floor after it was stalled by the Rules Committee coalition. They teamed up with Southern Democrats in an effort to water down or block the bill which was finally passed.

HEALTH AND MEDICAL RESEARCH

Congress again overrode administration objections and increased funds for health and medical research to find the cure for such killing and crippling diseases as cancer, heart disease, arthritis, and mental illness. Congress extended the Hill-Rhodes Act to step up training of needed public health doctors, nurses, and engineers. Congress passed my public health bill, H.R. 6871 shortly before adjournment.

AREA REDEVELOPMENT

For the second time in 3 years President Eisenhower vetoed legislation to help distressed economic areas to help themselves solve the problem of chronic unemployment. Many of these distressed areas are in Pennsylvania, West Virginia, Kentucky, New England, and other parts of the country.

In this instance as in others, the veto power of the President prevented Congress meeting this important problem of economic distress.

I supported and voted for this important area redevelopment legislation, of vital concern to Berks County and other areas of Pennsylvania.

AVAILABLE FOR MEETINGS

This report obviously cannot discuss each of the measures mentioned in much detail. Other issues before Congress have not been dealt with because of space requirements. As in past years, I again welcome the opportunity to appear before any group in Berks County to

speak and answer questions on any issue which may be of interest. Contact my office in the Reading Post Office Building with any such request or on any other matter with which you are concerned.

The Port Authority Disclaims Statements of Federal Jurisdiction

EXTENSION OF REMARKS
OF
HON. ALFRED E. SANTANGELO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SANTANGELO. Mr. Speaker, the Port of New York Authority has written to me stating that my statements on the floor of the House of Representatives during the debate in connection with the citation for contempt of the three port authority's representatives were incorrect. I repeat that my statements were correct. However, in all fairness to the viewpoint of the port authority, I believe that it is my duty to bring to the attention of the House the correspondence between myself and the attorney for the port authority which contains our respective viewpoints and positions. The correspondence follows:

THE PORT OF NEW YORK AUTHORITY,
New York, N.Y., August 30, 1960.

Hon. ALFRED E. SANTANGELO,
New House Building,
Washington, D.C.

DEAR CONGRESSMAN SANTANGELO: In the CONGRESSIONAL RECORD of Tuesday, August 23, you are recorded as having informed your colleagues in the House of Representatives that in 1954 when you were a member of the New York State Senate you introduced a resolution asking for an investigation of the Port of New York Authority but your resolution was killed in committee on the basis of representations by the port authority that because it was a bistate agency it should be "investigated by the Federal Government and not by the State."

I am confident that you will wish to correct this undoubtedly inadvertent misstatement of the facts once you have refreshed your recollection by reference to the enclosed memorandum of the Port of New York Authority dated February 8, 1954. This is the memorandum which was filed by the port authority with the finance committee of the New York State Senate, to which had been referred your resolution (Senate Resolution 46, introduced February 2, 1954) calling for the creation of a committee to make a study of the feasibility of reducing tolls on port authority bridges and tunnels. A copy of this memorandum was furnished to you at the time of filing with the committee and on February 18, in accordance with a telephoned request from your office, additional copies of the memorandum were transmitted to you at your New York City office.

Nowhere in this memorandum of the basis for the port authority's opposition to your resolution is there any statement or suggestion that the State legislature lacked power to adopt your resolution. It contains no reference whatsoever to the Federal Government. On the contrary, the memorandum is replete with such acknowledgments of State authority as "the legislatures of both States have full and complete control of projects to be undertaken by the port authority, the port authority has followed in every instance the direct mandate of the Governors and Legislatures of the States of New York and New Jersey" and "the comptroller of the State of New York is authorized by statute to examine the books of the port authority at any time he sees fit."

The port authority memorandum included express assurance that you and your fellow members of the State legislature would be afforded every courtesy and every facility for examination of port authority records and consultation with port authority officials and "to review any and all phases of our operations."

Fully acknowledging the authority of the State legislature to adopt your proposal, the port authority's memorandum in opposition to it was addressed to its substance. The facts set forth therein apparently satisfied the Finance Committee that your proposal was without sufficient merit to warrant its being reported out of committee.

As I said at the outset, I am confident that you will not wish to let the RECORD stand uncorrected now that you have had an opportunity to refresh your recollection as to the facts. Because, during the same floor discussion last Tuesday, Congressman WAINWRIGHT repeated your incorrect statement and Congressman HARRISON, of Virginia, subsequently stated that he had been influenced in his vote by your remarks, I am also transmitting copies of the port authority's 1954 memorandum directly to them. A copy is also being sent to Congressman TABER, of New York, who, I understand, has expressed concern that, because of time limitations imposed on the debate, mistaken and unfounded charges against the port authority could not be corrected at the time.

Sincerely,

SIDNEY GOLDSTEIN,
General Counsel.

MEMORANDUM IN OPPOSITION TO RESOLUTION REGARDING THE PORT OF NEW YORK AUTHORITY

(In assembly, by Mr. Mangan, January 12, 1954, No. 17; in Senate, by Mr. SANTANGELO, February 2, 1954, No. 46)

To the Committee on Ways and Means of the Assembly:

To the Committee on Finance of the Senate:

This memorandum is respectfully submitted by the Port of New York Authority to your honorable committees in opposition to the above resolution.

This resolution, substantially similar to ones introduced at each session of the legislature since 1949, none of which were reported by these committees, to which they were referred, again requests that a legislative committee be appointed "to inquire into the toll charges collected by the Port of New York Authority for the use of the bridges and tunnels operated by said authority," and appropriates $15,000 for the expenses of such committee.

The port authority has made repeated and careful studies of the toll structure of its tunnels and bridges. As a result of these studies, and despite the rising costs of operations, the port authority in the past few years initiated two methods whereby users of the tunnels and bridges may effect substantial savings in tolls. The first of these is the 25-trip ticket, good for 2 years after the year in which purchased, which provides a rate of 40 cents per trip, and therefore an 80-cent round trip, or a reduction of 20 percent. The second is the 40-trip commutation ticket, normally valid for a 30-day period, which provides a 25-cent rate per trip and a round trip of 50 cents, or a 50-percent reduction. At the most recent meeting of the board of commissioners of the port authority on January 14, 1954, these commutation tickets were made more readily available to the general public when the board authorized their sale by designated sales agencies such as banks and service stations as well as at the facility toll booths and port authority main office where previously purchased. This arrangement will also help eliminate long delays at the toll plazas caused by patrons purchasing books and trip tickets at the booths. Furthermore, commutation tickets purchased from these outside agencies will be valid for a 35-day period instead of the usual 30-day period.

It is the considered judgment of the commissioners, who are charged by the two States with responsibility for the credit and financial stability of the port program in the Port of New York District, of which these facilities are a part, that any further reduction in tolls on port authority crossings is unwarranted at this time.

The proposed resolution states that unfair advantage is being taken of the motorist in the expenditure of port authority revenues. A very brief catalog of the many things already done in the recent past and those projected for the immediate future to improve the vehicular facilities operated by the port authority demonstrates the fallacy of this statement.

In passing, it is well to remember that anything that benefits the port district as a whole benefits every resident of the port district, whether he be a motorist or not, but nevertheless the motorist has received by far the greatest benefit from port authority activities. As just one example, the port authority bus terminal, with it direct ramp approaches to the Lincoln Tunnel, has greatly benefited the motorist by removing from the congested streets of the city of New York about 5,000 interstate bus movements per business day. Recent studies indicated that about 90 percent of the intercity buses departing from the congested mid-Manhattan area never touch city streets through use of the bus terminal.

As was recently announced in the public press, the port authority anticipates a minimum expenditure of $250 million within the next 10 years on traffic facilities in the New York-New Jersey port district.

The port authority now has under construction the third tube of the Lincoln Tunnel, estimated to cost almost $100 million. To the end of 1953, engineering contracts totaling more than $32 million had already been awarded. When completed in 1957, the availity of the third tube will increase the Lincoln Tunnel's annual capacity by 50 percent and double its peak-hour capacity in the direction of the heavier movement of traffic.

Beyond that—

(a) During the past November the new ramp connection from the Manhattan exit of the George Washington Bridge to the Henry Hudson Parkway, constructed jointly with the Triborough Bridge and Tunnel Authority at a cost of $1,300,000, was completed and opened to traffic.

(b) On the New Jersey side of the George Washington Bridge a $5,163,000 bridge plaza and approaches improvement is presently in progress. The majority of this project, including widening of the main toll plaza, and new direct connections to the Palisades Interstate Parkway, will be completed in the spring.

(c) A block-long, six-lane $805,000 bridge over the New York Central tracks west of 10th Avenue, between 40th and 41st Streets, New York City, was completed and opened in August to provide an additional approach to the New Jersey-bound tube of the Lincoln Tunnel.

(d) The 179th Street Tunnel on the New York side of the George Washington Bridge was opened to traffic in 1952. This facility cost in the neighborhood of $9 million and has increased the operating expenses of the George Washington Bridge because of the necessity for ventilation, additional policing, general maintenance, and repair.

(e) At the Holland Tunnel extensive expansion and improvement of the New Jersey Plaza at a cost of $340,000 is currently in progress.

(f) The new exit viaduct on the New Jersey side of the Holland Tunnel, completed by the port authority at a cost of approximately $3,200,000, was opened to the public in 1951 and has substantially eased traffic at that point.

(g) Permanent connections between the approaches to the Lincoln Tunnel and the New Jersey Turnpike, costing about $4 million, have been in use since the opening of the turnpike.

Traffic analysts are unanimous in declaring that an improvement in traffic conditions in one portion of an integrated area benefits all portions of that area.

The legislatures of both States clearly recognized this fact when they said (ch. 47, Laws of New York, 1931; ch. 4, Laws of New Jersey, 1931, sec. 1):

"The States of New York and New Jersey hereby declare and agree that the vehicular traffic moving across the interstate waters within the Port of New York District * * * constitutes a general movement of traffic which follows the most accessible and practicable routes, and that the users of each bridge or tunnel over or under the said waters benefit by the existence of every other bridge or tunnel, since all such bridges and tunnels as a group facilitate the movement of such traffic and relieve congestion at each of the several bridges and tunnels."

It is obvious, therefore, that the port authority has not neglected, and does not intend to neglect, the interests of the motorists of the port district—and this includes constant consideration of the possibility of toll reduction. Of course, everybody would like to pay lower tolls, just as everybody would like to pay lower taxes. But, for the public official, the question of responsibility is one of the ultimate best interest of the entire metropolitan community, with all that the necessary and continuing development of the bridges, tunnels, terminals, docks, and airports mean to the welfare and prosperity of business and employment here.

Among other preambles in the resolution, is one which would seem to indicate that the sponsors have a mistaken idea of the purposes for which the port authority was created by the two States, and of the duties imposed upon it by the Legislatures of the States of New York and New Jersey.

The sponsors state that the "revenues collected by the port authority from motorists for the use of interstate bridges and tunnels are being diverted from such original purposes and are being accumulated by the said port authority in order to finance projects entirely unrelated to the operation of such bridges and tunnels."

If the port authority were a mere toll collecting agency authorized only to construct vehicular crossings and thereafter to operate them as individual units, there might be some validity to this argument. But nothing could be further from the fact.

The port authority was created to carry forward a comprehensive plan for the development of the greatest port in the world. In order to accomplish this, and to do so without burden to the general taxpayers of either the city of New York or the States of New York and New Jersey, it was obviously necessary to pledge all of the revenues of the port authority's facilities in one reserve fund.

The States recognized this not only in the compact and in the comprehensive plan, but in 1931 the two States enacted the so-called Unification Act (ch. 47, Laws of New York, 1931; ch. 4, Laws of New Jersey, 1931) in which the States adopted the policy that the revenues accruing from the operation of bridges and tunnel within the port district should be pooled. By statutes enacted in the same year the revenues from all port authority transportation and terminal facilities were similarly pledged (ch. 48, Laws of New York, 1931; ch. 5, Laws of New Jersey, 1931).

As is evidenced by subsequent legislation, it was the intent of the legislatures to utilize all revenue of the port authority for the orderly and economic development of all terminal and transportation facilities in the Port of New York District, without burden to the general taxpayer.

Moreover, the legislatures of both States have full and complete control of projects to be undertaken by the port authority, and, in every instance, the legislatures have specifically authorized the pledge of the general reserve fund for the redemption of bonds issued for the construction of port authority facilities. Even a cursory review of the compiled statutes of the Port of New York Authority clearly indicates that each and every project undertaken by the port authority was authorized either by specific legislation, or by legislation making the bonds issued for the construction of the project legal for investment, and therefore secured by the general reserve fund.

It seems somewhat anomalous to accuse the port authority of diverting funds to purposes unrelated to that for which the port authority was created, when it is self-evident that the port authority has followed in every instance the direct mandate of the Governors and Legislatures of the States of New York and New Jersey.

It is difficult to see what can be gained by a legislative investigation. The comptroller of the State of New York is authorized by statute to examine the books of the port authority at any time he sees fit (ch. 648, Laws of New York, 1929). Any responsible public official is afforded at all times such opportunity as he may wish to examine our books, to consult with our officials, and to review any and all phases of our operations. The port authority assures your honorable committees that every courtesy and every facility for any such examination or consultation will be afforded Assemblyman Mangan and Senator Santangelo, or any of their duly designated representatives at their convenience.

The port authority stands ready at all times to discuss this matter with Assemblyman Mangan and Senator Santangelo, and to give them any information whatsoever which they may desire.

It is respectfully submitted that the resolution should not be reported.

Respectfully submitted.

THE PORT OF NEW YORK AUTHORITY,
AUSTIN J. TOBIN,
Executive Director.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 31, 1960.

Mr. SIDNEY GOLDSTEIN,
General Counsel,
The Port of New York Authority,
New York, N.Y.

DEAR MR. GOLDSTEIN: I acknowledge receipt of your letter of August 30, 1960, with an enclosure of a memorandum which the port authority forwarded to me at the time I introduced the resolution to investigate the activities of the port authority in 1954.

You are in error as to the fact that you forwarded to me additional copies of the memorandum to my office pursuant to a telephone call. My telephone conversation requested copies of your reports, and those were forwarded to me, and not additional copies of the memorandum.

I repeat my statement that it was represented to me at the time of the introduction of the bill that the port authority was a bistate agency and subject to Federal control. During the debate on the floor in connection with the citation of the three representatives of the port authority, I indicated to the body that your representative informed me that I must have been misinformed in 1954. I have no doubt of the accuracy of my statement. I do not withdraw it, and I repeat it.

In all fairness to the port authority, and for a full disclosure of the facts, I am putting into the CONGRESSIONAL RECORD your letter to me asserting that I am in error, your memorandum, and a copy of my letter to you of this day.

Very truly yours,

ALFRED E. SANTANGELO,
Member of Congress.

Puerto Rican-American Cooperation in Atomic Energy Development

EXTENSION OF REMARKS
OF
HON. CHET HOLIFIELD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. HOLIFIELD. Mr. Speaker, on August 23, I had the honor of being invited to speak in Puerto Rico, at the ground-breaking for a nuclear-powered reactor which will produce electrical power for the people of that island. I include under unanimous consent my remarks on that occasion in the RECORD:

PUERTO RICAN-AMERICAN COOPERATION IN ATOMIC ENERGY DEVELOPMENT

(Remarks by Hon. CHET HOLIFIELD of the Joint Committee on Atomic Energy, at the dedication of the Puerto Rican atomic powerplant, August 23, 1960)

Upon behalf of the Joint Congressional Committee on Atomic Energy, I want to extend congratulations to our fellow citizens of Puerto Rico, to Governor Muñoz-Marín, and to the Puerto Rico Water Resources Authority on the occasion of the dedication of this atomic power project.

It is routine procedure for speakers at a dedication ceremony to declare that it is indeed an historic occasion. However, in this case, I sincerely believe that we are taking note today of a quite remarkable occasion. Let me explain why this dedication of a nuclear power project in Puerto Rico seems an important event to me.

This atomic powerplant, and the Puerto Rican nuclear center, signify several important milestones in United States atomic development and U.S.-Latin American relationships. First, on their merits they will be a significant part of the research and development effort of the United States in the field of atomic power and basic research in atomic energy. Secondly, they show how the democratic process (and I use a little "d" although this is an election year) works to achieve real progress, in contrast to the dictatorial approach used in places not so far from here. Finally, and hopefully, it is possible that what we have learned—and are learning—here may have application throughout Latin America, and elsewhere in areas of the world which are in need of development.

For only a few decades ago, Puerto Rico certainly qualified as an underdeveloped area. We became aware of your problems of poverty, and lack of food, clothing, housing, and gainful work. In those days there seemed to be not much hope for the future.

However, the years of the New Deal for the United States included a New Deal for Puerto Rico, and out of this beginning has grown your Operation Bootstrap. I have

been much impressed by what I have heard and read about your success, under able leadership, in raising the standard of living, developing and attracting new industry, improving education, building decent housing, and carrying forward all of the other activities required for achieving a life of decency and dignity for the people of Puerto Rico.

One of the absolutely essential factors in achieving what you have achieved so far, and in continuing with your remarkable progress, is an abundant supply of electric power at a reasonable cost. I congratulate you and your Puerto Rico Water Resources Authority for the zeal, courage, and competence with which you have overcome many obstacles to provide the ever-increasing amounts of power required for Operation Bootstrap. I understand that the authority is one of the fastest, if not the fastest, growing electric utility systems in the United States. I am informed that in less than 20 years you have succeeded in increasing your production of power by more than 10 times; that from a peakload of 18,000 kilowatts in 1941, your authority is now planning for a peak demand of more than 500,000 kilowatts within the next 2 years.

This is amazing growth and an amazing achievement even in the rapidly growing electric power industry. It is especially noteworthy because, in addition to the usual problems of very rapidly expanding electric power systems, the authority has faced acute shortages of technically trained personnel and a lack of local fuel supplies.

Today, less than 20 years after the creation of the authority, only 12 years after the inauguration of Operation Bootstrap, and 8 years after your attaining Commonwealth status with a new constitution, Puerto Rico is stepping forward into another new frontier—the frontier of atomic power, beyond which if we are successful lies a new and immense source of low-cost energy for the people of the world.

I would think this a less notable occasion if this nuclear plant were simply being built here by the Federal Government as a showpiece, with little or no direct participation by the people of Puerto Rico and the engineers of your water resources authority. The fact is, of course, that quite the contrary is true.

That this project is now to go forward is due in large part to the leadership, the initiative and the persistent efforts of Gov. Luis Muñoz Marín (chairman of the board of the authority) and Mr. S. L. Descartes, until recently the executive director of the authority. Equally important, authority engineers have contributed very substantially to the detailed conception and design of what will be a pioneering reactor in the advancing technology of atomic power. We know that for a number of years the authority has sent its bright young engineers to our great atomic laboratories at Argonne and Oak Ridge and elsewhere for training.

This, it seems to me, is a matter of great importance, because in Latin America and in other areas of the world live millions of people who are engaged in a similar struggle to industrialize their countries and raise miserably low living standards. To do this, they must have power, just as Puerto Rico has to have more and more power—for your homes, your new industries, and rural electrification. Puerto Rico's rapid progress must be greatly encouraging to these other peoples. If you now show that it is possible in so short a period of time also to begin to develop and exploit this new source of energy from the atom, the value of Puerto Rico as a demonstration and as a center for training and information for underdeveloped areas everywhere will acquire a new and exciting facet.

Now I do not wish to give anyone the impression that atomic power development, as such, will be the panacea for the ills of underdeveloped countries. For most areas the utilization of increased energy from conventional sources—waterpower, oil, and coal where available—will make the most sense economically as the first step. But we have found that just the competitive threat of atomic power has had a beneficial effect on conventional fuel costs. And there is no doubt that a long-range atomic power development program, tied in with basic scientific research in all fields of atomic energy, will ultimately pay off.

And let me say that I have no doubts about your ability to make an important contribution in this new endeavor.

If I were not convinced that you will succeed, and succeed impressively, there would be no nuclear power project to dedicate today. We who are on the congressional Joint Committee on Atomic Energy do not recommend an atomic power project as an act of charity or as a ceremonial gesture of good will. We believe strongly that public funds should be invested in a nuclear power project only if there is a clear promise that the investment will result in substantial and important contributions to technical knowledge.

As you know, atomic power today is expensive. It is not yet competitive from an economic standpoint for civilian use. The basic objective of our Federal atomic power program is not now and never has been simply to build kilowatts of atomic power capacity. The objective is to develop and build facilities and to finance research through which the scientists and the engineers can learn how, as expeditiously as possible, to build commercial atomic powerplants that will produce electricity at low cost, safely and reliably.

This project in Puerto Rico offers a good example of the Joint Committee's policies in respect to atomic power. The Atomic Energy Commission first proposed a nuclear powerplant in Puerto Rico in early 1957, following an announcement by Dr. Milton Eisenhower in 1956, to be part of your nuclear energy training center for Latin America. The Joint Committee turned turned down this recommendation because the Atomic Energy Commission proposed constructing a type of reactor which we already knew how to build. It would have contributed nothing to advancing the technology, although it might have been a nice showpiece. The Joint Committee indicated it would be interested only in a proposal which promised a further step ahead in power reactor technology.

In all honesty, I must say that that probably would have been the end of the project if the Puerto Rico Water Resources Authority at that point had not shown some rather remarkable initiative. Your authority selected one of America's best qualified reactor engineering firms under the direction of Dr. Walter H. Zinn, who is perhaps our most distinguished reactor designer. As a result of this collaboration, the concept for the nuclear superheat reactor was developed which now is to be built and operated here.

The authority took the initiative also in convincing the Atomic Energy Commission and the Joint Committee that the concept was sound, and that the project would indeed contribute greatly to power reactor technology. The fact is that this will be one of only two reactors in our entire program to explore the vitally important field of nuclear superheating. Furthermore, this reactor is to be designed and built as a truly experimental facility—not just a power producer—so that many valuable experiments can be performed with it to increase our understanding of how to design more efficient, more economical atomic powerplants as time goes by.

This facility, therefore, is important not just to Puerto Rico and, indeed, not just to Latin America as a new training facility. It is important to the total U.S. program for atomic power development. We expect great technical contributions from this plant and from the engineers of your authority which will operate the plant and conduct many of the experiments.

I cannot resist the opportunity to say that the Joint Committee on Atomic Energy claims considerable credit for this project. We not only insisted that a project be undertaken which would contribute very importantly to our technical development program. We also actively supported the authority's proposal once it was clear that the authority was recommending a technically valuable type of facility and, equally important, possessed the engineering competence to do a good job of operating the plant once it was built.

At the request of Chairman CARL DURHAM and myself in June 1958, the Commission submitted a report to the Joint Committee on the authority proposal. The Joint Committee, on its own initiative, recommended, and Congress later that year approved, funds for engineering studies of the authority concept. The studies made good progress and the concept looked increasingly promising. We were surprised and disappointed, consequently, when the AEC informed the Joint Committee in April of 1959 that the proposed reactor was too exotic and that there were doubts about building it at a distant point like Puerto Rico.

Senator CLINTON ANDERSON, who became chairman of the Joint Committee again in January 1959, and I both urged the AEC to reconsider, since we felt quite strongly that this was a worthwhile undertaking and should certainly proceed without further delay. I can tell you, too, that Commissioner John Graham, who is with us today, has also been an invaluable friend and supporter of this project in the Commission.

In June 1959 Congress accepted the Joint Committee's recommendation and authorized the design and construction of a reactor superheat project. The location and sponsor was left up to the Atomic Energy Commission to decide on technical grounds. For a month or so it was nip and tuck as to whether we could get the necessary appropriations enacted, and then whether the Budget Bureau would let AEC begin to spend them. It was at this time that AEC Commissioner Graham made a trip down here for firsthand discussions. I am delighted that further studies since then have confirmed our belief that this is a desirable step forward and that the negotiations between AEC and the authority on the joint financing of this project met with success.

I might also say that the project represents to me a most desirable and wholesome type of partnership between public agencies for the public benefit. All of the information developed from the research program with the reactor will be made available to the public. All of the patents obtained will be available to industry, private and public, on a royalty-free nonexclusive basis. This is as it should be from the expenditure of public funds.

This is not the first occasion, of course, for this type of collaboration between public agencies in Puerto Rico. Your authority and the Rural Electrification Administration have worked together for years in your highly successful and still expanding program for bringing the blessings of electricity to the rural people of the island. I understand that your authority has called upon the Department of Interior and Tennessee Valley Authority for advice and assistance in planning and designing your ever-growing generating and transmission system. This is the kind of fruitful collaboration which should go on, and I am glad that now, in the newest frontier of the power industry, we have brought in the Atomic Energy Commission as a new partner in Puerto Rico's outstanding power program.

This nuclear facility which we are dedicating today, like so much that is being done by the Commonwealth of Puerto Rico, has a larger significance than its contribution to the progress of the island economy and to the effectiveness of the American atomic power program. Beyond this, and certainly of equal importance, it will be an important element in the nuclear energy center here for all of Latin America. This project and this center will be another demonstration for this region and for the world of how a free people, operating through the institutions of a freely elected and democratic government, can apply effectively our modern technology to improve and advance the general welfare.

I had occasion yesterday to fly over a nearby troubled island which is apparently trying another approach to developing its resources—through the method of authoritarian control, playing the dangerous game of flirting with communistic advisers. I am sure that the differences in the Democratic and Communist ways of life will become very strikingly demonstrated in these islands of the Caribbean. The people of many nations are watching this demonstration of two opposing philosophies.

Under the dedicated leadership of Governor Muñoz-Marín, Puerto Rico is demonstrating in a dramatic way the vitality and the vigor with which the people of a progressive democratic society can build for themselves a better way of life.

As a fellow American, I am proud of Puerto Rico and I wish you well in your new endeavors.

Sell 8,000 Acres of Bull Shoals Land to Former Owners

EXTENSION OF REMARKS
OF

HON. CHARLES H. BROWN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BROWN of Missouri. Mr. Speaker, for 3 years now I have been urging the Corps of Engineers to release some 8,000 acres not needed for public purposes in the Bull Shoals Reservoir, Arkansas-Missouri, and let private owners farm it, or develop it.

We have had numerous headaches over the handling of the agricultural leasing of this land; and I have contended for years that the present Bull Shoals land policy is wrong. First, the Government should have acquired a flowage easement instead of fee title to these acres in the first place; second, there is no equitable or satisfactory way to handle leasing of such land; and, third, unnecessary Government holding of these scenic lakefront acres is stunting the development of our beautiful Bull Shoals area.

It is important to note that the corps follows a different policy in the Table Rock Reservoir area, adjoining Bull Shoals. Landowners in the Table Rock area were permitted to retain title to their lakefront, and granted the U.S. Government only a flowage easement to the land that might be inundated by unusual floods.

All along, I have pleaded for the corps to apply the same land policy to the two reservoir areas. Whatever portions of the Bull Shoals lakefront that are not needed should be sold back to former owners who want it. But the corps has steadfastly maintained the position that such revestment would not be in the best interest of the public.

We have now had experience with the new easement policy applied in the Table Rock area; and it is apparent that it is far superior to the acquisition-leasing policy applied to the Bull Shoals area.

So, on the basis of this new and persuasive evidence, I am renewing our district's request for the corps to sell back excess acres to former owners or their heirs or assigns in the Bull Shoals area, thereby making the two areas consistent.

I have today introduced a bill to accomplish this result in a fair and equitable manner. By introducing the bill now, we are giving the corps ample time to take another look and report back to the Congress early next year on the principle of revestment.

This bill would authorize the Secretary of the Army to sell back to former owners, their heirs or assigns, such portions of land in the Bull Shoals area as are not required for public purposes. Estimates are that some 8,000 acres are involved.

Here is how it would work for John Jones, who owned a 400-acre tract in the reservoir area, when the Corps of Engineers were acquiring land for Bull Shoals Lake. The corps bought 200 acres, the bottom land of the farm, from Jones. Jones still farms the upland. But the Bull Shoals Lake covers only 100 acres of the bottom land bought from Jones. The other 100 acres, owned by the Government as protection against unusual flood conditions, is leased for agricultural purposes to the highest bidder.

Jones himself would like to farm that 100 acres of bottomland. He would never have sold it to the Government, except that they insisted they had to have it for the reservoir.

My bill would authorize the Secretary of the Army to sell back the 100 acres of excess land to Jones, the original owner, his heirs, or assigns.

As it is now, Jones runs cattle on his upland, has to get an easement to take the cattle to the lake for water across bottomland he used to farm, and would like to farm now but was compelled by the Government to relinquish. Yet, the Government does not need it and is leasing it out to someone else to farm.

Or take this example of John Smith. The Government acquired title to Smith's "bluff" land, high above the line where the water level could possibly reach. Smith would like to build a tourist court, if he had a lakefront view. But now he cannot, because Uncle Sam holds the most valuable part of his property, the lakefront. So, Smith cannot develop the property. Yet Uncle Sam does not need the lakefront for project purposes.

Under my bill, the former owner, his heirs, or assigns, could buy back this excess land for the price the Government paid for it in the first place, plus a fair value for any improvements made by the Government, minus any damage done by the Government and any decrease in property values resulting from the terms of the resale—such as flowage easement, rights-of-way, and so forth.

The effect of this bill would be to bring the Bull Shoals land policy up to date with the present policy that the corps has applied to the newer Table Rock Reservoir. And the new policy is far superior to the old.

First. Under this bill, we would get out from under the continual headaches of leasing this excess land for agricultural purposes; second, we would stimulate development of the Bull Shoals lake area through private investment; and, third, we would be giving priority of purchase to those who deserve it, the original owners or their heirs or assigns.

I include herewith a letter from the Corps of Engineers outlining their objections to revestment of this excess land. I think this new legislation overcomes the corps' objection regarding "private properties adjacent to present reservoir boundaries have been developed with private capital, and sale of this property between this development and the power pool to other parties would work a hardship on these private investors."

Under my bill, the Secretary is not authorized to sell to other parties. He could sell only to those former owners, their heirs or assigns, who apply for purchase.

The matter of depriving counties of their share of income derived from agricultural leases is not a valid objection, in my opinion. The tax income to the counties from owners who will develop the land should more than offset any loss in revenue from the discontinuance of agricultural leases.

Again, I urge the corps to reevaluate their land policy on Bull Shoals Reservoir. I sincerely hope that what has happened in the Table Rock area will prompt the corps to support this new legislation to make Bull Shoals land policy the same as Table Rock land policy.

I hope we can get this matter to a hearing early in the next session, and the distinguished chairman of the Public Works Committee, of which I am a member, assures me that we will have his full cooperation.

Under the unanimous consent, I insert herewith a letter from the U.S. Corps of Engineers pertaining to this subject:

U.S. ARMY ENGINEER,
CORPS OF ENGINEERS,
Little Rock, Ark., April 24, 1958.

Hon. CHARLES H. BROWN,
House of Representatives,
Washington, D.C.

DEAR MR. BROWN: Reference is made to our conversation in your office on April 10, 1958, concerning the possible revestment of land at the Bull Shoals Reservoir project, Arkansas and Missouri, and my interim reply of April 15. After having investigated this matter in some detail, I am pleased to furnish you the following information. For comparison purposes, a discussion of the acquisition policies at Table Rock Reservoir is included.

The acquisition of land for the Bull Shoals Reservoir project was based on a taking line blocked out along regular land subdivisions or property ownership lines to include all land lying below the 700-foot mean sea level contour, which is the controlling elevation for land acquisition and represents the maximum elevation subject to flooding by the operation of this reservoir. The nominal top of flood control pool is at elevation 695 feet, mean sea level, and the additional 5 feet of elevation is required to permit wave

action, erosion, and surcharge storage during maximum flood conditions.

The acquisition of land in the Table Rock Reservoir area is being accomplished in accordance with the new joint policy for reservoir acquisition as agreed to between the Department of the Army and the Department of the Interior in the fall of 1953. Briefly, this policy provides for the acquisition in fee of all lands subject to inundation on an average of once in 5 years by "blocking out" a taking line along regular land subdivisions or property ownerships below this elevation. In the Table Rock Reservoir area, this controlling contour for fee acquisition is 923 feet mean sea level. The maximum controlling elevation for land acquisition is established as 936 feet, mean sea level, 5 feet above the nominal top of the flood control pool. Where feasible, the area between the blocked-out taking line for fee acquisition and the maximum elevation subject to inundation is acquired by flowage easement rather than in fee.

I would like to point out in this connection that in reservoirs such as Bull Shoals and Table Rock the extreme ruggedness of the topography and the relatively small horizontal distances between the 5-year flood contour and the maximum area subject to inundation, in many cases, preclude the taking of flowage easements since by the normal process of "blocking-out" along regular land subdivisions or property ownerships, the area to be acquired in fee results in the taking of all land necessary for the project. As a result, a comparatively small portion of the Table Rock Reservoir area is being acquired by flowage easement.

No land in the Bull Shoals Reservoir is considered excess to the project needs. However, in the event the new land acquisition policy were to be applied to the land previously acquired for the Bull Shoals project, approximately 8,000 acres would be available for revestment, subject to the retention of flowage easements by the Government on that portion below elevation 700 feet, ms 1. This action would place the two projects in a comparable status insofar as ownership by the Government is concerned. I would like to point out that some of the larger areas in the Bull Shoals Reservoir which were acquired above the 700-foot contour are public domain land which was set aside for use of this project by Executive order, and these areas would not be subject to disposal in the same manner as that acquired from private ownership.

With reference to the question of water rights in the reservoir areas, the policy which is being applied at Table Rock permits the landowner to retain an easement across the Government-owned land for the purpose of furnishing livestock access to the waters of the lake, unless granting such an easement is contrary to public interest. This easement may be reserved at the time the land is acquired by the Government.

Since no such authority existed at the time of acquisition of lands in the Bull Shoals Reservoir, those landowners who lost water rights through acquisition of their land were compensated for this loss as a part of the severance damage paid them. Of course, the agricultural leasing program in the Bull Shoals Reservoir area permits lessees to occupy the Government-owned land and to have access to the waters of the lake as a part of the leasehold agreement. Livestock access to the waters of Bull Shoals lake has not been a problem in the Little Rock district, since the many tributaries of the main lake, which extend beyond the reservoir boundaries, have permitted livestock watering except in periods of extreme drought. In exceptional cases, adjacent landowners could obtain an easement right for access to the lake for livestock-watering purposes under outgrant procedures.

There are some disadvantages to revesting lands at Bull Shoals Reservoir. In many instances, private properties adjacent to present reservoir boundaries have been developed with private capital, and sale of the property between this development and the power pool to other parties would work a hardship on these private investors. Furthermore, those portions of the reservoir which are subject to intermittent flooding above the top of power pool are at present leased to individuals for agricultural and grazing purposes. As you know, 75 percent of the income derived from these leases is returned to the counties in which the land is located. Disposal of the Government-owned land at Bull Shoals would considerably reduce the return to the counties from this operation. Many lessees in the areas have obtained their leases without competition, and are content to pay rent in lieu of taxes.

In view of the circumstances mentioned above, I am of the opinion that revestment of lands in the Bull Shoals Reservoir area so as to make it conform to the more recent land acquisition policy would not be in the best interest of the public. I hope the above information is sufficient for your needs; however, if you desire any further information in connection therewith, I will be pleased to furnish it to you.

Sincerely yours,

A. M. JACOBY,
Colonel, Corps of Engineers,
District Engineer.

The Interstate Commerce Commission Has the Responsibility To Determine the Rules, Regulations, and Facilities Necessary To Prevent Accidents at Railroad Crossings

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. VAN ZANDT. Mr. Speaker, it was appalling to learn of a decision by the Interstate Commerce Commission which was brought to my attention only last Tuesday. In my opinion the resulting situation is so serious as to require an immediate report to Congress and a full-dress investigation by Congress of the apparent disregard for human life and safety displayed by the ICC in making this latest pronouncement.

The Commission, by an order in No. 33440, "Prevention of Rail-Highway Grade-Crossing Accidents Involving Railway Trains and Motor Vehicles," has denied a petition filed May 11 on behalf of five railway labor unions for a general investigation to determine what rules, regulations, facilities, or other measures were necessary to prevent accidents at railroad crossings between railway trains and motor vehicles carrying petroleum, petroleum products, and similar dangerous flammable liquids.

On March 1, 1960, at a point near Bakersfield, Calif., the San Francisco Chief, one of the crack trains operated by the Santa Fe Railway, crashed into a tank truck carrying some 7,000 gallons of crude petroleum. This collision caused the immediate death by fire of the engineer and the fireman of the train, of the driver of the truck, and of 11 others who were passengers on the train. In addition to these 14 painful deaths by fire, there were 109 others injured, some of whom were critically injured or permanently disabled. Accompanying this tragic loss of life and personal injury there was property damage in excess of $1,500,000, and the liability for damages resulting from such deaths and injuries was estimated at another $1½ million.

Only a few days thereafter a freight train operated over the Missouri-Kansas-Texas Railway at a point near Chanute, Kans., rammed a tank truck loaded with gasoline at a grade crossing, resulting in the fiery death of the locomotive engineer and the locomotive fireman, who, by coincidence, were father and son.

These incidents followed literally dozens of similar inexcusable collisions by trains with tank trucks or other vehicles carrying cargoes, the very nature of which makes their operation over streets, highways, and railway crossings a menace to the public.

Shortly after these incidents the five brotherhoods of railway employees engaged in operating trains joined together and filed with the Interstate Commerce Commission the petition I mentioned a moment ago, asking that body to inaugurate a general investigation of the frequency, causes, and results of collisions between trains and vehicles transporting petroleum and similar dangerous liquids "to determine what rules, regulations, facilities, or other action is feasible and necessary to prevent such collisions."

These labor organizations, namely the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors and Brakemen of America, the Brotherhood of Railroad Trainmen, and the Switchmen's Union of North America were entirely constructive in their request to the ICC for assistance. They suggested that the Commission could readily obtain the sincere cooperation of State officials and Federal agencies and of organizations of shippers and carriers engaged in trucking these dangerous commodities. They asserted that the principal purpose of such investigation should be to prevent such accidents in the future rather than to place blame for those of the past.

If my memory serves me correctly, Congress went so far as to include in the appropriation to the ICC special funds adequate to cover the cost of the investigation sought by these railroad men as well as several other proceedings to be carried on by the Commission.

And what happened to this entirely reasonable prayer for the assistance of the ICC in preventing these horrible accidents?

By this decision dated August 15, 1960, but not released until August 29, only a few days before Congress is to adjourn, the ICC turned down this petition and, like Pontius Pilate, washed its hands of responsibility for the pain and death and destruction which is bound to follow. I am informed that this is the third time the ICC has arbitrarily turned down such a request, the third time it has closed its

eyes and refused to make any effort to find out what it might be able to do to help prevent the constant and tragic repetition of tank trucks failing to stop at railroad crossings, and thus causing the almost certain cremation of the head-end crews on the trains that strike them with sickening and increasing frequency.

In June of this year, after this petition had been filed, there were two more such collisions near Jacksonville, Fla., in which five more men were cremated and again, only last August 8, just outside Birmingham, Ala., in another of such collisions three of the train crew and the truckdriver were killed in a fiery explosion.

The railroad companies supported their employees in their request for this investigation but they were opposed by two groups which now appear to have had strange and unusual influence upon the conscience of the Commissioners, namely the National Tank Truck Carriers, Inc., and the Central Committee on Highway Transportation of the American Petroleum Institute.

It should be remembered that Congress has assigned to the Interstate Commerce Commission primary responsibility for the safety of operation of trains and of trucks including both those operated for-hire and not-for-hire. By doing so it has deprived the several States of much of the power they might otherwise have exercised to prevent these fiery deaths. But from what I can learn the Interstate Commerce Commission has failed miserably in its fundamental obligation to assure safety. Its present action makes it apparent that it is afraid to face the fact that such accidents do occur and that it is not interested in writing or enforcing new and stronger regulations to prevent them or in recommending to Congress that it should act to do so.

About all the Interstate Commerce Commission has done to supervise the safety of tank trucks is to lay down a set of rules and regulations pertaining to their equipment and operation and requiring them to stop before crossing railroad tracks at common grade. I am unable to learn of any special action by the Commission or any of its force to see that these stops are made. Neither can I find that the Commission has any knowledge as to whether or not the States or local authorities are enforcing these requirements to stop or any other of the safety regulations pertaining to operations under its jurisdiction.

In its order refusing to take action the ICC gave as one of its reasons its belief that the encouragement of uniform safety laws and regulations by the several States appears "to be the most effective present means of improvement of the situation." This completely irresponsible buckpassing statement is made without special inquiry as to the power of the States, the contents of State laws, or the degree of effectiveness with which they are enforced.

It would be difficult for anyone to understand why an organization of those companies which own and operate gasoline trucks or why a committee representing oil companies which ship gasoline in tank trucks over the streets and highways would allow themselves to be accused of opposing an honest, good faith effort to find out what can be done by Government or industry or labor to prevent this tragic murder at the grade crossings. Surely they do not want their own men killed and certainly they do not want railroad men or passengers on trains or others to be cremated in horrible tragic collisions with their trucks which are supposed to stop at grade crossings, but have not done so.

Then, too, for the life of me I cannot understand the crass indifference to death and pain and suffering nor the craven disregard to responsibility which would cause members of the Interstate Commerce Commission to refuse to try to find means of improvement when asked to do so by groups of men such as those employed in the railroad industry and who have every legitimate reason to be concerned.

I understand that one Commissioner, Freas, voted for the investigation; that three Commissioners were absent, and not voting, namely, Walrath, Hutchinson, and McPherson; and that those Commissioners who voted to deny the petition for general investigation were Tuggle, Winchell, Herring, Murphy, Goff, and Webb. I wonder how many of those Commissioners have ever seen a man die in flames. I wonder how many of them have experienced the smell of burning flesh. I hope the agonized eyes of these dying men and those who will die in the future will not haunt them in their sleep.

Mr. Speaker, I am so concerned about this situation that when the next Congress convenes one of the first things I will propose is a full-dress investigation of grade-crossing accidents and what the ICC is doing to eliminate them.

The Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. DANTE B. FASCELL
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. FASCELL. Mr. Speaker, soon to be celebrated will be the 20th anniversary of the founding of the Ukrainian Congress Committee of America.

The insidious means which the Russians are employing seek to absorb freedom-loving people into the Communist regime without a grand-scale war. The highly developed tactics used in this cold war attack must be counteracted through the use of a continual truth campaign.

The Ukrainian Congress Committee has set for itself this basic goal. This organization is a uniquely important one dedicated to alerting the world to the plight of the captive nations dominated by Russia. They have highlighted the heinous crimes and the treachery of the Communist movement spearheaded by Russia. While the Ukrainian Congress Committee reflects the sentiments of some 2½ million Americans of Ukrainian extraction in the United States, it represents and works in behalf of all nations struggling under Communist domination.

Peace-loving people throughout the world are grateful for the objectives of the Ukrainian Congress Committee of America and its wonderful endeavors.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. CHARLES A. BUCKLEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BUCKLEY. Mr. Speaker, this fall marks the 20th anniversary of the founding of the Ukrainian Congress Committee of America. This committee is a uniquely united national organization which reflects the thoughts, hopes, and ideas of some two and a half million Americans of Ukrainian ancestry.

I am proud to rise on the floor of the House this day to salute this outstanding organization and its distinguished chairman, Dr. Lev E. Dobriansky, of Georgetown University and its Institute of Ethnic Studies. Dr. Dobriansky is an authority on the Soviet Union and the menace of world communism. His views have been widely quoted in many leading newspapers and governmental studies throughout the free world.

The Ukrainian Congress Committee, under the leadership of Dr. Dobriansky, has dedicated itself, first, to the proposition of protecting the interests of the United States of America in its continuing struggle in the cold war with Red communism, and secondly, and I might say even more importantly, to preserving the integrity, security, and freedom of the United States of America. It has done this by constant vigilance in presenting to the American public and to the leaders of the free world the fact that there are behind the Iron Curtain today enslaved millions who have been overrun by the force of communism and who are still striving desperately in their silent struggle for the freedom which is rightly theirs.

The Ukrainian Congress Committee represents a noble heritage—for the people of the Ukraine, some 42 million in number, comprise the largest of the non-Russian nations within the Soviet Union. These people have a long and devoted heritage of dedication to those principles of freedom that are the very foundation stone of our Government. They, along with the other enslaved nations of Europe stretching from the far northern regions of that continent down to the southernmost tip of Europe, are at the present time unable to help themselves. But the Ukrainian Congress Committee is attempting to help not only the people of the Ukraine but all the enslaved nations of Europe by constantly placing before the eyes of the

free world the plight of these people. They are performing a service to this country which I believe is invaluable in the psycho-political and propagandist area of the cold war in which we are now engaged.

Mr. Speaker, I believe that through the force of such organizations as the Ukrainian Congress Committee, some day in the not too distant future all these enslaved countries now under communistic rule and the people within them will have the right to self-determination and to their own form of government.

I trust that the Ukrainian Congress Committee will continue its fine work of informing the free world of the problems faced by these people, and that on its 20th anniversary it will continue to flourish and grow as it has during the past 20 years.

Equal Opportunity for Employment

EXTENSION OF REMARKS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. RABAUT. Mr. Speaker, in all the controversy and discussion over civil rights that has taken place in recent years, I believe that John Q. Public has tended to identify civil rights with racial equality alone. He has thought of civil rights in terms of school desegregation, lunch counter "sit-ins," bus boycotts and the like. While all this has certainly been true, it would be a great mistake indeed to exclude from the concept of civil rights the many other areas that fall within the much broader connotation of that term. For in addition to discrimination based upon color, there is also prevalent discrimination based upon race, religion and national origin. Furthermore, discrimination rears its ugly head in many different areas of everyday life: In voting, in education, at lunch counters, in housing, in the administration of justice, in employment. It is this last area, employment, with which I wish to concern myself today. Equal opportunity for employment—an opportunity open to all citizens—is not widely enough recognized as the true civil rights issue that it actually is. If anything, Mr. Speaker, this is an even more pressing aspect of civil rights than what is at stake in the lunch counter "sit-ins," because discrimination in the area of employment directly affects the ability of a man to support himself and feed and clothe his family. Discrimination in employment can deny a man the opportunity—and thus the right—to live among his fellow men in a manner commensurate with simple human dignity. Few issues, therefore, reach to a more fundamental level than the question of discrimination in employment and the opportunity therefor.

In addition to the discriminatory considerations of race, color, religion and national origin, discrimination in employment is often based also on age and sex. As the 1960 Democratic Party platform points out: "Unemployment strikes hardest at workers over 40, minority groups, young people and women. We will not achieve full employment until prejudice against these workers is wiped out." This is indeed a sad commentary on the current temper of our society, but it is nonetheless true. And it must be corrected and eliminated entirely and permanently from our great Nation.

One may ask how this is to be done. The answer is spiritual, moral and intellectual honesty in facing the problem squarely and acting in a bold and positive fashion within the framework of our Constitution and our inherent belief in the equality of all men. This is how it is to be done—not by talk but by action; not with bitterness but with conviction in the right of what must be done; not with contempt or disregard for the traditions and sentiments of some of our fellow citizens but with dedication and adherence to the broader principles for which this whole Nation stands.

The Democratic platform for 1960 is poignantly entitled "The Rights of Man." Time and again it takes full cognizance of the importance of the right to equal opportunity for employment. The civil rights plank of that platform states specifically:

> The new Democratic administration will support Federal legislation establishing a Fair Employment Practices Commission to secure effectively for everyone the right to equal opportunity for employment.

Here is concrete evidence that the Democratic Party plans to take action and not merely to deal with this problem in forensic platitudes. It is this type of clear thinking and positive action that has time and time again over the years made me proud to be a Democrat and I would only hope that I shall be able to transmit this pride and the reasons for it to the many, wonderful John Q. Publics I am privileged to represent.

The Cape Cod National Seashore Proposal

EXTENSION OF REMARKS
OF
HON. HASTINGS KEITH
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KEITH. Mr. Speaker, early next session, the Congress will be called upon to consider legislation of great significance to my district and to the Nation—the Cape Cod national seashore proposal.

I am hopeful that when this measure comes to the floor for action, many Members of the House will be able to contribute to the debate and cast their votes with the foresight which can only come from personal knowledge of the area.

Cape Cod is known as one of America's favorite vacationlands. It is renowned for its natural and historic significances. I take this opportunity to invite all my colleagues who have never visited the Cape to spend "Indian summer" with us.

Freedom Academy Bill

EXTENSION OF REMARKS
OF
HON. JACK WESTLAND
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. WESTLAND. I am gratified that the Senate has passed S. 1689 which I believe potentially is a potent weapon against world communism. This bill, better known as the Freedom Academy bill, is identical to the bill I introduced, H.R. 13227, which would create a Freedom Commission for the development of the science needed to counteract the world Communist conspiracy and for training leaders necessary for total political war.

I intend to introduce this bill again in the 87th Congress and to work for its passage because I believe that in our constant battle against communism this academy will be one of our greatest weapons.

The cold war is political war, and the Soviets accept it as a total war to be won with all resources at their command. Russia had trained tens of thousands in specialized institutions to wage its ideological and political warfare against the free peoples of the earth.

America and the free nations are up against an enemy who has mastered social, political, ideological, psychological, and economic warfare. This enemy has used these tools to infiltrate rear areas of our military defenses and to sway the uncertain and timid to his side.

At our doorstep, less than 100 miles from our shores, the Communists have captured a popular revolution in a Catholic country. The overwhelming majority of Cubans followed Fidel Castro on his victory march into Havana, but instead of a freedom from tyranny it is now under the thumb of a Communist minority. This country, once friendly to America, is the staging area for Communist expansion into Latin America.

This is but one of the problems we face in the cold war today because our enemy has professionals pitted against our irregulars. By passage of S. 1689, we could have taken a step forward toward overcoming our deficiencies.

Mr. Speaker, the Honorable WALTER H. JUDD, of Minnesota, in his keynote speech at the Republican Convention said we have a good strategy for holding, but we cannot hope to win in the end by just holding. We must develop a strategy for victory.

Vice President RICHARD M. NIXON elaborated on this theme in his acceptance speech when he said:

> The Communists proclaim over and over again that their aim is the victory of communism throughout the world. It is not enough for us to reply that our aim is to contain communism, to defend the free

world against communism, to hold the line against communism; the only answer to a strategy of victory for the Communist world is a strategy of victory for the free world.

The gentleman from Minnesota and the Vice President have ably stated the course we must follow to survive. Both have given considerable support in time and energy to the Freedom Academy bill, a concept which provides the framework for building the strategy for victory.

I consider the bill to be one of the most important pieces of legislation that came before the 86th Congress. Mr. Speaker, I am hopeful that in the 87th Congress both the House and the Senate will act on this measure and enact it into law so that we will have available what could prove to be the deciding factor in who will win the cold war.

Further Irregularities Revealed in Long Beach Case

EXTENSION OF REMARKS
OF
HON. CECIL R. KING
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KING of California. Mr. Speaker, another campaign payoff is being engineered for RICHARD NIXON, only this time a Government agency is directing the insidious job and the little people are footing the bill. A Long Beach, Calif., law firm, headed by NIXON's campaign manager in the area, has been given a lucrative retainer by the Federal Home Loan Bank Board in connection with its unjustified and irregular seizure of the $100 million Long Beach Savings & Loan Association.

For the first 2 months of this arrangement, the firm of Clock, Waestman & Clock drew nearly $8,000 in fees, and the total has by now probably reached 3 or 4 times that amount. The potential importance of this political payola can be seen from the fact that a 10-year fight on another matter involving this same association and this same Federal agency has racked up attorneys' fees that may amount to as much as $400,000.

Details on this deal have just been disclosed in hearings of a special subcommittee of the House of Representatives headed by Representative JOHN E. Moss that is investigating the Home Loan Bank Board's seizure last April 22 of the Long Beach institution. In the same hearings, it was proved that the White House itself has become so deeply involved in the fight over the seizure that a proposed settlement was apparently vetoed by one of the President's top aides. This is an almost identical parallel to the highly improper influence brought to bear upon another agency of the Government in the notorious Dixon-Yates case. Congress vests in the Home Loan Bank Board complete authority to make decisions based on the facts and the law in each case and it has been declared time and again highly improper if not criminal for outside influences of any kind whatsoever to be brought to bear on the members of such boards with respect to their decisions. The undue influence exerted upon this Board has now created an awkward situation indeed for this administration. It has been proven they have improperly entered the case and how to extricate themselves will now present a sticky problem.

Here are the details on the administration's latest deal:

Early this year the Chairman of the Federal Home Loan Bank Board discussed with David W. Kendall, Special Counsel to the President, the Board's plans to seize the Long Beach institution. On Friday, April 22, 10 minutes before closing time, Board agents marched into the association and seized it. When the institution opened its doors the following Monday, long lines of frantic depositors were waiting, and in the next 2 weeks more than $26 million was withdrawn. Full details on this operation, and the potential destruction of the institution, are available in the special subcommittee's report issued last July.

Meanwhile, the Board members realized what a mess they had got themselves into and decided to get some extra legal talent to help fight off the courts and the depositors. Naturally, they turned to NIXON's office and asked for recommendations. A Board member talked it over with Robert H. Finch, administrative assistant to NIXON and now his national campaign manager, and who for years has been associated and involved in the building and loan association industry. And, interestingly, Finch suggested the Long Beach firm whose head by coincidence is handling NIXON's campaign in the area.

All this took only a few days, and in one of the fastest negotiations on record the Long Beach firm got a contract providing a rate of $40 an hour for a partner and $30 an hour for an associate; and $250 a day for court appearances, unless two attorneys were involved, when the rate would go to $400 a day.

So far this has paid off for NIXON's campaign manager at the rate of almost $4,000 a month.

After several weeks, the bank board decided to try to negotiate a settlement, and over the period of a month reached near agreement several times. But then the White House stepped in. The Board Chairman consulted with Mr. Kendall, the President's Special Counsel, and the tentative agreement was reversed. Albert J. Robertson, Chairman of the Federal Home Loan Bank Board, admitted in the hearings that he met with Kendall to discuss the situation, but he refused to disclose what was said. However, the president of the seized association testified under oath that he was told by another Board member that Kendall had vetoed the settlement.

These facts are clear from the evidence of the hearings. The bank was seized with notably weak and faulty reasoning, but once the deed was done the White House and NIXON determined not to let the action become a political liability. While the White House sabotaged all possible chances of a settlement that could not help but reveal the stupidity and capriciousness of the seizure action, NIXON's office made sure that his friend and campaign manager would profit as long as the fight continued.

The principal ones to suffer from such political duplicity are the thousands of depositors in the Long Beach institution whose savings and interest earnings are being consumed by lawyers' fees and useless litigation.

This seizure, precipitated by incompetent politically motivated hacks, is now compounded by political opportunists at the highest level. The result is a scandal that must and will be thoroughly investigated, with the guilty persons brought to the bar of public opinion, if not to justice.

A Plea for Tolerance in the 1960 Presidential Election

EXTENSION OF REMARKS
OF
HON. FRANK KOWALSKI
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, American citizens who are 21 years of age or over will have the privilege of voting for a candidate for the President of the United States on November 8, 1960. Between now and November it is possible that the basic issues of our time will be eclipsed by the heavy shadows of bigotry, hate, and intolerance. In recent weeks the religious issue has been wound up like a mechanical monster and sent down the political avenue spreading in its path literature, remarks, and innuendoes that are completely un-American.

It is absolutely necessary that between now and November all voters become increasingly aware of the qualifications of our candidates. But it is the responsibility of those same voters to drive out any items of hate which could cause the freedom of religion in our land to crumble in a sorry heap at the feet of democracy. The future peace of the world cannot be advanced if any potential head of our Nation is to be caught in the vise of religious hatred.

May I make one point entirely clear at the very outset. That point, simply stated, is: Religious neutrality of the Government does not imply personal religious indifference of its individual citizens. As the late Justice Rutledge once stated, there is a double price Americans pay for religious liberty—one is the self-restraint of the Government in noninterference with a man's creed; the other is the ban on the use of governmental machinery by or for any church.

Three centuries ago men fled with their families from European shores to find freedom on the fertile earth of the new world. Here on a promising continent they toiled for it, died for it, established it. Here, they forged a nation, which guarantees equal consideration to all men.

Our forefathers believed in the God revealed in the Bible. They wanted and loved freedom more than anything else. They knew exactly what it was they wanted and they defined it.

Foremost among the men who made America possible was John Winthrop, one of the founders of the Massachusetts Bay Colony, and its first Governor. Without his character and integrity, his good judgment and nobility of mind, the colony might never have come to pass, and, once founded, might have failed miserably. An Englishman, he was a believer in liberty. The following quoted document attests his profound understanding of the meaning of liberty. His words are:

> There are two kinds of liberty. One is natural liberty, common to man and beast alike, which is incompatible with authority and cannot endure restraint. This liberty, if unrestrained, makes men grow more evil, and it is the great enemy of truth and peace, needing the laws of God and man to restrain and subdue it.
>
> The other kind of liberty, I call civil, or federal; it may also be termed moral, in reference to the covenant between God and man, in the moral law, and the politic covenants and constitutions amongst men themselves. This liberty is the proper end and object of authority, and cannot subsist without it; and it is a liberty to do that only which is good, just, and honest.

It would seem that the two kinds of liberty John Winthrop defined so clearly are being confused in the political campaign of 1960. Unrestrained—enemy of truth and peace—needing the laws of God. These phrases apply themselves readily to the type of hate literature that has been and continues to be circulated concerning a Catholic who is a candidate for public office.

Religious liberty is perhaps the greatest contribution America has made both in the realm of politics and of religion. Are we to cut this contribution from the arm of America and drift out on the sea of ignorance and hatred?

Ours has been the "Faith of Our Fathers"—Washington, Jefferson, and Lincoln. Their religious attitudes contained one essential which we have come to believe has pervaded the American ideology, and that is the insistence on freedom of conscience—not toleration as a concession, but equal liberty as a right.

Washington wrote to the Baptists in Virginia:

> I have often expressed my sentiments, that every man, conducting himself as a good citizen, and being accountable to God alone for his religious opinions, ought to be protected in worshipping the Deity according to the dictates of his own conscience.

Jefferson considered his success in promoting religious liberty one of his greatest achievements. In his first inaugural address he declared:

> Freedom of religion I deem [one of the] essential principles of our Government and, consequently, [one] which ought to shape its administration.

Lincoln declared the "establishing and maintaining civil and religious liberty" to be "the noblest of causes."

Here, briefly, is the ideology, truly American, which the founders and builders of our Nation have espoused. It is fundamental in the religious thinking and experiences of Christians, Jews, and Deists—Protestants and Catholics.

Let us move on into the trend in our time, into a period where we have passed the halfway mark in the 20th century.

At the conclusions of both national conventions of our two great political parties, in July, both RICHARD M. NIXON and JOHN F. KENNEDY announced no remarks of intolerance or bigotry in the area of religion would come from them.

What has happened within the last few weeks? Here are a few of the organized efforts of American citizens to smear the presidential candidate who is of Catholic faith:

A group of 25 local ministers in one of our Southern States adopted a resolution pledging to—and I quote—"oppose with all the powers at our command the election of a Catholic to the Presidency of the United States."

The executive director of the Fair Campaign Practices Committee, a national, nonpartisan, and nonprofit educational organization, was forced to state:

> The circulation of rabidly anti-Catholic material already is many times greater than we have ever seen it. We think at this point there is a substantial danger the campaign in 1960 will be dirtier on the religious issue than it was in 1928.

Recently two southern churchmen said in interviews with the Nashville Tennessean that preachers and ministers in their denomination will use their pulpits to oppose Senator KENNEDY for President.

The president of the 9 million member Southern Baptist Convention has said:

> Since the Roman Catholic Church is not only a church but a political entity, we feel we are justified in making an attack upon Mr. KENNEDY on that basis.

The editor of the Church of Christ publication, said the Church of Christ is against Senator KENNEDY because "he owes his allegiance to the Pope."

On August 20 at Greenville, S.C., the South Carolina Conference of the Southern Methodist Church went on record as opposing election of a Roman Catholic to the Presidency.

The Washington Evening Star on August 25, in an Associated Press article, reported that the Fair Campaign Practices Committee, backed by both major political parties, has been screening questionable material received throughout the country. With the campaign barely under way, experience suggests a deluge of hate literature. The attacks are becoming more virulent and overt.

These are unpleasant facts to report, and they are also facts that many worthy citizens will wish to shove under the nearest rug. Yet they are facts. Consider, for example, the following excerpts from a recent sermon by the pastor of the First Baptist Church of Dallas, Tex.:

> Roman Catholicism is not only a religion, it is a political tyranny. It is a political system that, like an octopus, covers the entire world and threatens those basic freedoms * * * for which our forefathers died. If you have ever seen the symbol of the Pope of Rome, he has two keys; one is the key of religious supremacy and the other is the key of sovereign political power. He claims to possess both * * * [even] if KENNEDY wins with strong emphasis on the separation of church and state, then the door is open for another Roman Catholic later on who gives the Pope * * * recognition of one church above all others in America. Then religious liberty has also died in America * * * as it has died wherever the Roman Catholic hierarchy has the ableness and power to shut down and destroy it in death.

It was reported by Joseph Alsop in his column in the Washington Post on August 29, 1960, that "hundreds of thousands of copies" of the sermon, containing the above comments, have been sent out at the request of "preachers, business groups and other people" for circulation.

RICHARD M. NIXON has issued a general directive forbidding all his campaign workers even to discuss the so-called religious issue. He has had nothing whatever to do with the anti-Catholic agitation that is now growing stronger by the day. If the attacks were on the religion of Mr. NIXON, I am certain Mr. KENNEDY would issue a like directive.

This puts the center of current hatred and bigotry, not in the offices of the two political parties, but with private citizens, who themselves claim to know all there is to know about freedom of religion. Early in this century Israel Zangwill gave to this country a beautiful and poetic ideal in the phrase "the melting pot." This phrase, at least as it was interpreted in the minds of many, brought about a false idea. Many felt that melting pot meant that every group should, under the fire of American life, be liquefied in a mass and then cast into a single type. This is a misconception. Allow me to use the following illustration. There is a process known as smelting and refining. Various lead ores are taken from the various parts of the earth, smelt in a furnace and refined in a pot, and then cast into bars, each identically the same as the other. Before getting this exact sameness, this uniformity, all the gold and silver must be removed, that is, the precious metals.

In the same way, if we were to try to mold everyone in this country to the same pattern we should have to remove the precious elements of individual initiative and individual idealism. This misconception of the melting pot idea is the basis of narrow movements. The finer ideal for the advancement of humanity is to permit liberty for the individual and for his group, and at the same time to do two things: first, to promote cooperative community enterprises, and, second, to educate for mutual understanding.

Man's inhumanity to man is largely traceable to intergroup intolerance and actual hatred. Since the dawn of history wars, internal strife, cruelties in human relationship have been caused, to a large extent, by misunderstanding and envy. The religious hatreds and persecutions in the Old World resulted in the colonization of this country, and when its people formed a government of their

own they did so with the very definite idea of making it a nation where people of different views and traditions could not only live in harmony, but also bring forth a great nation dedicated to equal opportunity for all and service to humanity.

Religion and democracy should go hand in hand. Each protects and complements the other. Each helps to bring about a better, finer life for all decent men and women.

At a time in our national life when we are crying for peace and understanding, the American voter can learn a valuable lesson from the past. He can learn not to fall for vicious and spurious notions that people of one faith are inferior to those of another. He can learn to suspect stories or rumors or implications that are too pat, or unauthenticated, or just plain inflammatory.

The hard fight of a political campaign that is so much a part of the American scene should go forward—not on the religious issue, but on the issues which pertain to national economy, foreign aid, the fight against communism, our entire foreign policy program, the peace of the world, and the challenges of the space age.

I call on the American voter to pay more attention to politics, to learn more about how his Nation and the States and communities that comprise it are governed. He should come to know the candidate for public office for what he is. Then, and only then, citizens sufficiently interested in politics and government will not have time to fan the fires of bigotry and hatred.

In the Christian Century of February 10, 1960, the director of the school of religion at one of our large midwestern universities wrote an article entitled "Religion and the Presidency." Among the comments in the article are the following:

> Perhaps above all we may draw the conclusion that in choosing a man for the greatest responsibility any American—or possibly any human being—can assume, it is far more important to look to his experience in human relations, his record in the rough and tumble of the political arena as well as in public office, to assess his instincts, his sensibilities, his sympathies, than it is to scrutinize his religious affiliation. This is not to suggest that religious affiliation will have no relation to these matters. It may be very significant or it may carry little weight.
>
> Many a self-styled political independent has loudly and proudly proclaimed the old statement which seems to be so full of virtue, "I vote for the man not the party." On the question of religion and the Presidency, perhaps a paraphrase of that statement is in order: "Vote for the man, not the church."

These words were written prior to the two political conventions and prior to the point where hate literature began smearing our national integrity.

"When we understand each other, we find it difficult to cut one another's throats," wrote Van Wyck Brooks. This epitomizes America's need during the 1960 presidential election.

In the 3⅓ centuries since our shores were settled we have come to believe that Americans have learned a great deal about tolerance. In the final analysis, the voter who is intolerant and the citizen who is misgoverned have only themselves to blame for their plight. The realization of that fact is our hope for the future of the United States of America.

Retirement of a Distinguished Government Official Who Battled for the Consumer

EXTENSION OF REMARKS
OF

HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. SULLIVAN. Mr. Speaker, I do not believe I have ever met Dr. Albert R. Miller, who has headed the Meat Inspection Service in the Department of Agriculture since 1944, but I am thoroughly familiar with the outstanding work he has done over the years in protecting the American consumer. The Meat Inspection Division has an enviable reputation among Government agencies which have been set up to protect the public interest, because it has been willing to fight to protect the integrity of its programs despite pressures often exerted upon it from within and outside the Department.

Dr. Miller has now retired from the Department after nearly 35 years of service in meat inspection. I learned this upon reading a Department of Agriculture announcement of the appointment of Dr. Clarence H. Pals to succeed Mr. Miller as head of meat inspection in the Agricultural Research Service. I sincerely hope Dr. Pals maintains the high standards of consumer interest demonstrated by his predecessor.

CONSUMERS' BATTLE NEVER ENDS

For it is certain, Mr. Speaker, that the best of laws can be undermined by reluctant administration. The battle to protect the consumer interest is a never-ending one. After the long legislative fight to enact badly needed laws to protect the consumer, we have too often seen those laws repealed, as it were, by administrative neglect or official antagonism. Too often, I am sorry to say, Government agencies charged with the responsibility of protecting the consumer interest are pushed or pressured into playing the game of the very commercial interests they are supposed to regulate or discipline.

As sponsor of the legislation to establish for the first time compulsory inspection of poultry, I have seen at firsthand how important it is for the regulatory agency to be able to hold fast against pressures to weaken the administration of the law. The poultry inspection work is done as part of the Department of Agriculture's Marketing Service, which is producer oriented; meat inspection is under the Agricultural Research Service, which is, in my opinion, more oriented to the consumer interest. It makes quite a difference.

MEAT AND POULTRY INSPECTION DIFFER

When meat inspection officials decide that certain substances should not be used in or on meat carcasses, or in the processing of food, they make their orders stick despite the pressures. When poultry inspection officials make similar decisions, they are more readily overruled within the Department. All up and down the line, for instance, the poultry inspection people insisted several years ago that the kidneys should be required to be removed from cut up poultry; the producers got to Secretary Benson and the Secretary overruled his own experts, and that was all there was to it.

Again, when certain interests fought to limit the inspection process in both meat and poultry processing to the initial slaughter stage, so that further processors would not have Federal inspection of their products, Agricultural Research Service people fought this raid on their program's integrity and won; the Agricultural Marketing Service people, on the other hand, went along with the weakening proposal and put up no fight at all; we in the Congress had to make the fight for them to prevent a serious weakening—the opening of a big loophole—in the act. I should not blame the people in poultry inspection for going along with their superiors even when they feel their superiors are wrong; they have to go along.

FIGHTING FOR WHAT IS RIGHT

On the other hand, I like and admire the way the meat inspection people under Dr. Miller have stood up for the integrity of their program at every step of the way, and apparently have had the backing of the Agricultural Research Service in doing so—more power to ARS for that.

Mr. Speaker, although, as I said, I have never met Dr. Miller personally, all of these thoughts flashed through my mind when I read of his retirement, and I felt, as a Member of Congress interested primarily in consumer issues, that I could not let this occasion pass without thanking Dr. Miller on behalf of America's consumers for his lifetime of service in their behalf. Consequently, I addressed the following letter to him:

(LEONOR K. (Mrs. JOHN B.) SULLIVAN, Third District, Missouri; Committees: Banking and Currency, Merchant Marine and Fisheries; chairman, Subcommittee on Panama Canal. Home office: Old Federal Building, Eighth and Olive Streets, St. Louis, Mo.)

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 31, 1960.

Dr. ALBERT R. MILLER,
Falls Church, Va.

DEAR DR. MILLER: Although I am terribly jammed up with last minute duties, responsibilities, and problems in connection with the imminent adjournment of Congress and the delayed start of my reelection campaign, I cannot leave Washington without extending to you my best wishes upon your retirement from Government, and my sincere thanks for the fine service you have given to the American consumer as head of the Meat Inspection Division.

For reasons with which you may or may not be familiar, I try to keep up with Department of Agriculture releases, trying to glance over the daily summary to see which

releases I want to obtain and read, and in that way learned of the appointment of Dr. Pals as your successor. I then had the Department send over the actual release and read with interest the honors which have been accorded you since joining the Meat Inspection Service in 1926.

During the four terms I have served in Congress, I have been in an almost perpetual battle with the Department of Agriculture over one thing or another but I have never, during that period, had any reason to have anything but the highest regard for the Meat Inspection Division. I had hoped to see poultry inspection handled as well as you have handled meat inspection, and at least wanted it in the Agricultural Research Service. I have admired the way you have maintained the integrity of meat inspection under what I am sure must sometimes have been heavy pressures, and I congratulate you for it.

Good luck and much happiness to you and Mrs. Miller in the years ahead.

With kindest regards, I am,

Sincerely yours,

LEONOR K. (Mrs. JOHN B.) SULLIVAN,
Member of Congress,
Third District, Missouri.

PRESS RELEASE ON DR. MILLER'S RETIREMENT

Mr. Speaker, I also submit at this point the official press release from the Department of Agriculture on Dr. Miller's retirement and the appointment of his successor, as follows:

DR. CLARENCE H. PALS NAMED HEAD OF FEDERAL MEAT INSPECTION

U.S. DEPARTMENT OF AGRICULTURE,
Washington, August 11, 1960.

Appointment of Dr. Clarence H. Pals as Director of the Meat Inspection Division in the Agricultural Research Service of the U.S. Department of Agriculture was announced today by ARS Administrator Byron T. Shaw. The appointment is effective September 1, 1960.

Dr. Pals succeeds Dr. Albert R. Miller, who is retiring after a distinguished career embracing almost 35 years of service in the Department. Dr. Miller has headed the Federal Meat Inspection Service since 1944. Under his guidance, and that of his predecessors, this Service has become internationally recognized for its work in assuring American consumers that meats available to them at grocery and meat stores throughout the country are unexcelled in wholesomeness. The standards of this Service which observed its golden anniversary in 1956, have set a pattern for the entire world.

Dr. Pals also has had a distinguished career in the Department. He joined USDA in November 1932 as a veterinary meat inspector at Chicago. Subsequent field assignments took him to Fort Dodge, Iowa (1934–39), to Esterville, Iowa (1939–40), and Sioux City, Iowa (1940), as assistant inspector in charge. In 1941, he went to New York, as assistant inspector in charge. Dr. Pals came to Washington in June 1944 as assistant to the chief of the Meat Inspection Service in the former Bureau of Animal Industry, and in November of the same year was named chief of the trade label and standardization section.

Like his predecessor, Dr. Pals also is a recipient of the USDA Superior Service Award, granted in 1955. He is vice president of the International Association of Veterinary Food Hygienists, past chairman of the food hygiene committee of the American Veterinary Medical Association, and a member of the Commission for Foreign Veterinary Graduates. He was born in Meservey, Iowa, in 1907, and grew up on a general livestock farm. He attended public schools and Iowa State Teachers College and taught rural school in Iowa from 1925 to 1926.

In 1928 Dr. Pals entered Iowa State College, where he was awarded a doctor's degree in veterinary medicine in 1932. Dr. and Mrs. Pals live at 2338 South Ode Street, Arlington, Va.

The retirement of Dr. Miller will be effective at the end of August. Aside from a Superior Service Award granted by USDA in 1948, he also received the Award of Honor given jointly by the Association of Food and Drug Officials of the United States, the Food Laws Institute, and the Association of Official Agricultural Chemists in 1956. Iowa State College presented him with its Alumni Merit Award in 1952. He is author of an authoritative textbook "Meat Hygiene," widely used in colleges of veterinary medicine.

Dr. Miller is a native of Pennsylvania. He received his doctor of veterinary medicine degree from Iowa State College in 1924 and an LL.B. degree from Georgetown University Law School in 1940. He entered USDA as a veterinary meat inspector in 1926, spending 10 years in the field—in Chicago, New Jersey, New York City, and South Kortright, N.Y.—before coming to Washington.

Dr. and Mrs. Miller live at 366 North Washington Street, Falls Church, Va.

VFW Gold Medal of Merit Award Goes to John Daly

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. TEAGUE of Texas. Mr. Speaker, over the past 18 months we have heard a great deal of criticism of the television industry. This has tended to cause us to overlook the many fine services which this industry has given to the American public not only in the entertainment field but also in the field of public affairs.

I am therefore pleased to commend the Veterans of Foreign Wars for the recognition which they have given to one of the Nation's best-known and well-regarded commentators and newsmen, Mr. John Daly, vice president of the American Broadcasting Co.

On August 24, 1960, in Detroit, Mich., during the course of the Veterans of Foreign Wars' 61st annual convention, Mr. Daly was awarded the Veterans of Foreign Wars Commander in Chief's Gold Medal of Merit for his outstanding achievement in the field of newscasting by Lewis G. Feldmann, of Hazleton, Pa. As Mr. Daly entered the convention hall to receive the award, he was given a standing ovation by the 10,000 delegates present.

In announcing the award Commander Feldmann said:

> For many years now we of the VFW have been watching with great interest the efforts of Mr. Daly, and have been happy to note the great emphasis he has placed on our Nation's defense program. There is no question that through his efforts we have today a far better informed public and hence a more secure Nation.

The Commander in Chief's Gold Medal Merit Award is one of the highest the organization can present to any individual. The citation of the award stated that it was given to Mr. Daly "in recognition of his distinguished public service in the field of information, and especially for his consistently objective reporting of events affecting the everyday lives of the American people."

The Back Door to the Treasury—Front Door to Financial Ruin

EXTENSION OF REMARKS
OF
HON. CLARENCE CANNON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. CANNON. Mr. Speaker, when the 87th Congress convenes next January, it could render no greater service to the people and the country than to immediately revise the Rules of the House to conclusively define, once and for all, in harmony with the constitutional meaning, the appropriating jurisdiction in the House of Representatives. It is a compelling national necessity made urgent by indefensible rulings of the Chair and the practices of the legislative committees in the House and the Senate. We are on the highroad to financial ruin and at least we ought to be in position to know when we get there.

The statement is justified by the facts and figures in today's RECORD, pages 19128–19134. They are reinforced by similar data in the CONGRESSIONAL RECORD, volume 105, part 15, pages 19822–19825, and the CONGRESSIONAL RECORD, volume 104, part 15, particularly pages 19692–19693.

The RECORD of September 1, 1960, conclusively shows that, in comport with tradition, the regular annual appropriation bills processed under our established system are within the budget requests. They are below the budget—not enough below, but nevertheless below. And they represent the combined judgment of the two Houses, not the judgment of the Committee on Appropriations. But while they are below the corresponding budget requests for appropriations by $211,638,498, not counting loan authorizations set out in the tabular material, the "back door" appropriation bills of the session exceed the Executive requests by $830 million, so that in the aggregate the budget is exceeded by an identified $618 million. Other budgetary actions, or failure of action such as the postal rate proposition and certain tax suggestions not adopted, affect the budget totals.

It is safe to say that only a handful of Members were aware of this outcome until they saw the RECORD today after the House had closed for the year. The Committee on Appropriations had many inquiries from Members, the press, and others, in the closing days of the session as to action on the budget. We told them the budget had been cut in the appropriation bills. What we could not tell them, because we did not and could not know, was what had happened, or was about to happen as a result of the enactment of the back-door bills. The number of back-door bills declined from

the flood of last year and the year before, but that is relatively immaterial.

The practice is reprehensible. Last year, the back-door bills totaled $5,701 million and of course exceeded the budget.

In 1958, they totaled $4,542 million—and exceeded the budget by $1,192 million. That was the year the Senate originated 10 back-door bills and adopted back-door bills totaling $9,226 million, covering the fields of housing, banking, small business, community facilities, depressed areas, minerals stabilization, airport grants, highways, veterans loans, and defense production.

Mr. Speaker, it is high time the House got this vital business of appropriations back on the track. Billions of dollars flow through the back doors and side doors of the Treasury which have been breached by devices ingeniously designed to circumvent the time-tested annual congressional review of demands on the Treasury. Under such diffused practices, how can the House, the Senate, the press, or the people be expected to know what is happening to the taxpayers' pocketbooks? If the Members of Congress and the people are to clearly know what is going on, all the budgetary actions ought to go through one procedure, one system, under the same set of rules. There should be only one door—the front door—through which money is removed from the Treasury.

Under the rules of the House, exclusive jurisdiction over appropriations rests with the Committee on Appropriations. That has been the rule since 1920, when power to report bills carrying appropriations was taken from the legislative committees. The purpose was clear; namely, to have a single committee handling appropriations so as to get better control of spending. No one committee had responsibility for overall review of the appropriation requests. Each committee was concerned only with its limited part of the total. The left hand didn't know what the right hand was doing. There was no single committee to look at the whole appropriations picture and weigh relative urgencies of all requests in light of the conditions, available revenues, and annual needs.

The House wanted to improve its system of checks and balances because, with defined and limited jurisdiction, legislative committees are in the nature of special pleaders with respect to funds to carry out legislation which these same committees have previously sponsored. The demand was for a single committee, institutionally unbiased and objective.

The most ingenious and frequently used back-door technique is the so-called public debt transaction, whereby an agency can borrow money from the Treasury and commit it to a function or purpose of government. This is nothing more or less than an appropriation because it permits withdrawal of money from the Treasury without further legislative action. Indefensible rulings of the Chair, notably in the instance of the Housing Act of 1949, have held this device not to be an appropriation within the meaning of the rules. Therefore, the legislative committees, which are specifically inhibited from including appropriations in bills they report, can include such gimmicks in bills without running afoul of the injunction against appropriations.

Another form is the contract authority device which to all intents and purposes is an appropriation because a contract, once made, must be honored; the subsequent action of appropriation to pay off the contract is essentially foreordained.

The interpretation is wholly unsound and clearly contrary to the rules change in 1920. The Constitution specifically states that the only way money can be drawn from the Treasury is by appropriation made by law. Constitutionally, therefore, any language in a legislative enactment which permits money to be separated from the Treasury is an appropriation—the form, method, or the words used being wholly immaterial. To permit such devices as the public debt transaction in legislative bills, thus bypassing the established appropriations process, is nothing short of cutting the heart out of the 1920 rules change. And such a decision is clearly at odds with the rule of reason.

Of all the legislative prerogatives, the powers to tax and appropriate are the most vital. Not a wheel of Government can turn without the motivation of an appropriation by the Congress. And the act of appropriation is essentially a nullity until money to fulfill it is in the Treasury. So, every function, every action of the Government is dependent on the two cardinal powers of taxation and appropriation. The Constitution wisely committed these powers to the exclusive province of the House of Representatives. It was the plan, the purpose, and the expectation that the immediate representatives of the people, those closest to them, would have the key voice in these matters. The framers delegated these powers to the House in order to assure full, frequent and effective accountability to the direct representatives of the people as to the public business and the public funds. It is the Members of the House, not the Senate, not the spending departments, who bear the first responsibility for unpopular or excessive taxation and extravagant appropriations. And this fundamental and all-important principle of our form of government has from the beginning been jealously envied, assaulted from all sides, and often disputed beyond the Hall of the House of Representatives. There has never been a time when the departments of Government were not ready and eager to assume the prerogative to say how much and how fast, and for what purpose, tax funds should be removed from the Treasury and committed to myriad purposes of expenditure.

Directly involved also is the fundamental question of the prerogatives of the House as the body closest to the people The precedents are heavy with the record of attempts by the Senate to preempt the exclusive powers of the House to originate tax and appropriation legislation. In the RECORD pages cited earlier, the tabular material on backdoor appropriation bills will disclose that many of them originated in the Senate. And the legislative committees of the House, with the encouragement of the leadership, insist on concurring in this short-circuiting process. They have never willingly conceded in the other body that the makers of the Constitution were somewhat explicit about who should draw the money bills. Some have gone farther and sought to deduce a distinction in the Constitution between taxing legislation and appropriation legislation. No such differentiation is there. What would be the purpose of raising taxes that were not to be spent?

The Government was not established to make or accumulate money. Taxation fulfills the purpose of appropriation, not the other way around. If there is no need for appropriation, then there is no need for taxation. The two are inseparable.

The executive branch and the Congress for some years have lodged more and more budgetary determinations outside the traditional annual appropriations process. The spenders and the special pleaders are the instigators. There is a race to see how much, and in how many different ways, and under how many different guises money can be extracted from the Treasury. The devices assume several forms but they are all for one purpose, and that is to get money from the Treasury without having to pass the acid test of annual congressional scrutiny. The one continuing procedure for congressional control of the activities of Government within the framework of basic statutes is the annual program review and provision of funds which the annual appropriations process was designed to secure. Through annual check, this opportunity to periodically reassess the financial needs and requirements in light of ever-changing conditions and the wishes of the people constitute a foremost responsibility of the House, and of the Committee on Appropriations as a servant of the House.

Many of the programs financed through backdoor appropriation bills, often extending several years into the future, perpetuate expenditures that often might not otherwise stand the test of annual congressional scrutiny. Instances have been documented in recent years where certain back-door bills have been jammed through because the proponents felt they could not make their case through the regular routine.

Mr. Speaker, we are not talking about the merits of the purposes for which the backdoor appropriations are made. That is not the point. The point is that we need to comply with common sense, the rule of reason, and the intent of the rules established 40 years ago. The left hand needs to know what the right hand is doing. The people need to know what we are proposing in money matters. They do not and cannot know under the loose and irresponsible methods followed today. It is high time the House took action. The House must insist—and without exception—on its exclusive constitutional prerogatives by slamming back to the other body the back-door bills which they originate. The alternative is to open the way to virtual destruction of a privilege and a responsibility as old as the House itself. You can

rest assured that if the practice is not stopped, and stopped at the earliest moment, it will grow. I have cited pages of the RECORD containing abundant proof of that fact.

It is imperative that the rules be changed or decisions reversed so as to reinforce effective control of the purse-strings. These end-run devices tend to perpetuate—encourage perpetuation—of programs and expenditures that might not otherwise stand the acid test of annual congressional scrutiny. They are tailormade for that purpose and they often result in staking us out so far into the future as to tie the hands of future Congresses.

The distinguished gentleman from Virginia [Mr. SMITH], introduced House Resolution 161 in the 86th Congress embodying a proposed rules change to correct this reprehensive practice. It should be adopted.

Scout Award to Bruce Simpson, of Prospect Harbor, Maine

EXTENSION OF REMARKS
OF
HON. CLIFFORD G. McINTIRE
OF MAINE
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. McINTIRE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to say that courage is an ingredient that is applauded by everyone, and particularly when it is evidenced in one who is young in years.

I insert into the RECORD an article from the Bangor Daily News that deals with the heroic demonstration of a youth from my congressional district, a deed of which I am justly proud.

Vice President NIXON has also seen fit to commend this valorous act, and in conjunction with the newsclipping concerned, this letter, too, I submit to the RECORD:

[From the Bangor Daily News, June 25–26, 1960]

CUB SCOUT TO RECEIVE AWARD FOR RESCUING CHILD FROM POND

PROSPECT HARBOR, July 11.—Bruce Simpson, 11-year-old son of Mr. and Mrs. Francis Simpson of Prospect Harbor, will be given a special award for quick thinking and spontaneous action in rescuing a 7-year-old girl from Flanders Pond.

While playing on the wharf at the East Sullivan Pond early this summer, little Rhonda Ross fell into the water. Young Simpson, who was swimming close by, observed the accident and noted that she did not come to surface.

He dived into the water, which was about 7 feet deep, brought her to surface and set her back on the wharf.

Rhonda is the daughter of Mr. and Mrs. Robert Ross, who were residing at West Gouldsboro. The family has gone to Morocco, North Africa, where Mr. Ross is continuing to serve as communications chief in the U.S. Navy.

Simpson is a Cub Scout of Den 2 of the Gouldsboro Pack, and will receive the award for his action in the fall. Cubmaster is James McKinna.

OFFICE OF THE VICE PRESIDENT,
Washington, D.C., August 11, 1960.

Master BRUCE SIMPSON,
Prospect Harbor, Maine.

DEAR BRUCE: I just had the pleasure of reading about your recent exploit and I wanted to get this note off to congratulate you on your courageous act in rescuing a young girl from drowning.

Your bravery in saving her life is a splendid example for all of us. The ability which you demonstrated to think quickly and to act promptly in response to a critical situation has earned you the well-deserved appreciation of your fellow Americans. I am indeed proud of you for this noble achievement.

With every good wish for the future.

Sincerely,

RICHARD NIXON.

Commendation of the Ukrainian Congress Committee of America on Its 20th Anniversary

EXTENSION OF REMARKS
OF
HON. CHESTER E. MERROW
OF NEW HAMPSHIRE
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MERROW. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include therein a commendation of the Ukrainian Congress Committee of America on its 20th anniversary:

COMMENDATION OF THE UKRAINIAN CONGRESS COMMITTEE OF AMERICA ON ITS 20TH ANNIVERSARY

In these days of growing awareness of Soviet pentration into Latin America and Africa we tend to forget the other areas of the world where Communist penetration is no novelty. A danger lies in the surrendering, through a display of lack of interest, of the East European nations which, at an early stage of Soviet expansionism, were absorbed into the Soviet sphere.

The Soviets have had several allies in their attempts to snuff out the liberties and nationalistic strivings of these nations. Time has served as an enemy to the captive nations, for with time has come a tendency, often unconscious, in the free world to accept their slavery. Distance has likewise served the Communist cause, for the problems of these dozen subjected non-Russian peoples are far from us. In an era where American interests are focused on a virulent Communist threat less than 100 miles from our own beloved country we may tend to forget the further and no less virulent Communist threat several thousands of miles away in Eastern Europe.

Yet, though time, distance, and space have helped keep the Soviet tyranny in power and free from the active challenge of the free world's might, the spiritual values of our common heritage are on our side.

One could feel at times that spiritual values alone cannot fight against the mailed fist. Some feel that the only way to overcome Russian imperialism and achieve the liberation of enslaved peoples is to set loose another bloody holocaust. But war need not be a necessary ingredient in order to have an active East European policy. An organization which has been showing us how to arrive at an effective, realistic and yet bloodless policy has been the Ukrainian Congress Committee of America.

Through the 20 years of its existence the Ukrainian Congress Committee of America has been fulfilling the highly commendable function of presenting to the American people the sordid tragedy of the captive nations. Their importance to the free world in the context of our security has been continually highlighted. Its chairman, Prof. Lev E. Drobriansky and others affiliated with him were among the principal exponents of national observance of Captive Nation Week. When Congress gave its approval to its observance this year, Khrushchev was jolted, a blow for freedom mightily struck, and hope surged again in the hearts of those trapped behind the curtain of tyranny. In addition to these efforts the Ukrainian Congress Committee of America has published several excellent books and pamphlets and regularly presents its enlightening periodicals, the Ukrainian Bulletin and the Ukrainian Quarterly.

The Ukrainian Congress Committee of America, its directors, its various affiliated organizations, and its more than 2 million members are to be strongly commended for their sterling work on behalf of freedom.

A Report to My Constituents

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. VAN ZANDT. Mr. Speaker, with the adjournment of the 86th Congress, it is my desire to give an accounting of my stewardship as Congressman to the people of the 20th Congressional District of Pennsylvania, comprising the counties of Blair, Centre, and Clearfield. This report is in accordance with a long-standing policy of mine, to keep the people back home informed of their Congressman's activities.

EIGHTY-SIXTH CONGRESS

The 86th Congress convened on January 7, 1959, and adjourned September 1, 1960. The Senate was in session 280 days and the House 265 days. Both Houses filled nearly 36,000 pages of the CONGRESSIONAL RECORD. From the standpoint of legislation introduced, there were 20,164 public and private bills, joint resolutions, and so forth, introduced in the Senate and House of Representatives. Only a fraction of the bills introduced was finally approved and sent to the White House. To date, 1,130 new public laws have resulted from the work of the 86th Congress.

COMMITTEE ASSIGNMENTS

During the 86th Congress I retained my membership of many years on two important congressional committees—the Joint Congressional Committee on Atomic Energy and the House Armed Services Committee. Because of my length of service in Congress, my seniority on both of these important committees has classified me as a senior member of each. Both of my committee assignments, and especially my membership on the Joint Committee on Atomic Energy, consumed a major portion of my time and to such extent that literally for days I found myself behind closed doors involved in discussing mat-

ters pertaining to atomic energy, military defenses, and domestic and international affairs.

ATTENDANCE RECORD

During the 86th Congress despite the heavy demands on my time and because of committee assignments and visiting various Government agencies on congressional business, I achieved another near-perfect attendance record in answering all but a few quorum and rollcalls. My overall attendance record of 97 percent during my congressional career is one of the best in the history of the Congress of the United States according to Mr. Harry L. Brookshire, clerk of the minority, House of Representatives.

LARGE VOLUME OF MAIL

Throughout the 86th Congress my daily mail continued to increase in volume. Following my usual practice, I personally read every piece of mail received at my Washington and Altoona offices. In the majority of cases, I developed the information to answer inquiries. My files are full of letters of appreciation for services rendered to my constituents. These grateful expressions concerning my effort to truly represent at all times the people of this congressional district are deeply appreciated.

TAXES

With world conditions and an expanding population demanding more Government spending, congressional leaders, both Democrats and Republicans, agreed it was necessary for Congress to continue personal, and corporate income taxes as well as excise taxes because of the need for tax revenue.

In seeking means of reducing taxes, President Eisenhower continued to stress the necessity of reducing nonessential expenditures since the needs of our national defense require over 60 cents of every tax dollar.

The only tax reduction granted by the 86th Congress was a 5-percent reduction in the 10-percent rate on the transportation of persons by common carriers. The prospects of tax relief depend entirely on the cooling off of the cold war and greater economy in Government.

ECONOMY IN GOVERNMENT

Throughout the 86th Congress, in the House of Representatives the spirit of economy was constantly in evidence. The 1st session of the 86th Congress reduced the President's budget request by $1.8 billion while the 2d session added $211 million for a total reduction of $2.1 billion. I voted to reduce nonessential expenditures when I felt such action was justified in view of the fact that only through strict economy can we ever expect to reduce taxes and our national debt.

NATIONAL DEFENSE

As a member of the House Armed Services Committee and also the Joint Congressional Committee on Atomic Energy, and being constantly briefed on world conditions by officials of the State Department, Central Intelligence Agency, and the Department of Defense, I kept abreast of our needs for national security and as a result supported necessary appropriation measures.

Since we are spending about $40 billion annually on national defense, it is reassuring in view of politically inspired charges of unpreparedness to read a statement by President Eisenhower when he said on August 8, 1960:

> Once again, I assure the Congress that this Nation's military power is second to none, and will be kept that way.

Equally reassuring is the statement on the floor of the Senate August 31 by U.S. Senator DENNIS CHAVEZ, Democrat, of New Mexico, and chairman of the Defense Department Subcommittee of the Senate Appropriations Committee, who said:

> Certainly America today is militarily able—and I say this in all sincerity—to defend itself and protect the free world in nuclear combat.

Continuing he said:

> We must keep it so in the future. In so doing we shall not be swayed, I trust, by financial or partisan considerations.

In concurring in the views of President Eisenhower and Senator CHAVEZ, my support of our national defense program is based on my convictions that we must be constantly alert and ready to meet any additions and revisions necessary to produce that unmistakable margin of military supremacy upon which our national security rests.

FOREIGN AID

Viewing world conditions with grave concern and realizing the necessity of continuing our foreign aid program on a reasonable and sound basis, I joined the majority in Congress in voting for reduced appropriations. For the past several years it has been recognized that many friendly nations are experiencing economic recovery and the theory is that they should be encouraged when possible to stand on their own feet, thus taking responsibility for some of the financial burden heretofore assumed by the overburdened taxpayers of America.

I look at foreign aid as part and parcel of our national defense since it is revealed that 42 nations in all parts of the world are part of the free world's program of common defense. This program of collective security in a divided world is the free world's answer to the challenge of communism.

MEDICAL CARE FOR THE AGED AND SOCIAL SECURITY

With public attention focused on the plight of the Nation's elderly citizens through the White House Conference on Aging, the 86th Congress approved a modified plan of financial assistance to States for medical care for elderly persons with funds from general treasury revenues rather than through social security taxes.

In addition, important changes were made in various social security system provisions, primarily with respect to income limitations and the eligibility age for disability benefits.

RAILROAD RETIREMENT AND RAILROAD UNEMPLOYMENT INSURANCE ACTS

I am greatly disappointed that the 86th Congress did not approve some of my proposals to liberalize the provisions of the Railroad Retirement Act and to increase benefits. There is no type of legislation in which I am more interested than amendments to the Railroad Retirement Act and especially those concerning widows and spouses.

The 1959 amendments to the Railroad Unemployment Insurance Act provided railroad workers and their families with higher benefits. These amendments had my full support.

In reporting on my activities in the field of railroad retirement and railroad unemployment insurance, I yield to no one in the effort I put forth during the 86th Congress to liberalize the Railroad Retirement and Railroad Unemployment Insurance Acts and increase their benefits.

VETERANS AND THEIR DEPENDENTS

During the 86th Congress I continued my efforts in behalf of the veterans of all wars and their dependents, an activity that I began after my discharge from World War I in 1919. Not only have I personally assisted hundreds of veterans and their dependents in obtaining benefits to which they were entitled, but I played an active role in securing congressional approval of bills now laws, which provide and increase benefits to the veterans of all wars and their dependents.

One of the legislative disappointments of the 86th Congress was the failure to enact World War I pension legislation.

A SOUND NATIONAL FARM POLICY

During the 86th Congress, I continued my interest in agriculture by advocating a sound national farm policy for the country, the taxpayer, and the farmer. The common objectives were to relieve the Nation from the $7.3 billion stockpile of surplus commodities stored all over the country and costing over $1,000 a minute for storage alone, together with the vexing problem of a declining farm income.

Unfortunately no farm legislation was enacted during the 86th Congress because a political stalemate continued to prevail between the administration and the Democratic-controlled Congress. The latter refused to face up to the farm problem and continued to support obsolete solutions which were conceived back in 1942 as a war measure.

PROTECTING AMERICAN LABOR

In addition to voting for reasonable labor legislation, including the minimum hourly wage, I continued my efforts to restrict the importation of cheaply manufactured foreign products which are destroying the jobs of American wage earners, by sponsoring legislation designed to curb the importation not alone of foreign residual oil from the Caribbean area which has captured our eastern seaboard coal markets but to adjust conditions of competition between certain domestic and foreign industries with respect to wages and working conditions. While not successful in having the legislation approved, the administration is conscious of the plight of the ailing coal industry and has applied quota limitations on foreign residual oil in several instances. In my opinion, reciprocal trade agreements are responsible for much of the unemployment we have in central Pennsylvania in the leather,

lockwasher, gas meter, textile, coal, pottery, light bulb, brass, and railroad industries. The protection of American wage earners against the flood of cheaply manufactured foreign imports will continue to be one of my main objectives.

EFFORTS TO AID SMALL BUSINESS

Ever mindful of the fact that small business is the backbone of our economic life, I devoted much effort to aiding and assisting the businessmen of my Congressional District. Almost daily I aided various industries in the central Pennsylvania area which had problems with the Federal Government concerning contracts, small business loans, and so forth.

This effort on my part to aid business firms resulted in nearly $25 million in Government contracts and $420,000 in Small Business Administration loans. This meant continued employment for the employees of the firms I was able to assist.

It will be recalled that several years ago at my request the Small Business Administration made a survey of my Congressional District to determine the defense production capabilities of our industries so that Government procurement agencies could be guided by such information in channeling contracts aimed at assisting small business firms.

In addition, arrangements were made with officials of the Small Business Administration whereby any manufacturer or businessman in my Congressional District who needed expert advice in the field of Government contracts could secure the services of a business specialist from the Small Business Administration, who made a personal visit to the plant and evaluated its potentialities. This arrangement has paid dividends, for it has resulted in several Government contracts for my Congressional District totaling several million dollars. In a few words, I have left no stone unturned in my efforts to assist small business firms in the central Pennsylvania area.

THE COAL AND RAILROAD INDUSTRIES

Time and time again during the 86th Congress I called the attention of Congress and the Federal Government to the fact that existing Government policies are a menace to the coal and railroad industries in my Congressional District. In my appearances before congressional committees, Government agencies and the White House, I pointed out that the Government policy of subsidizing fuel substitutes such as hydropower projects as well as the importation of residual oil has virtually wrecked the economy of central Pennsylvania. I stressed the fact that since 1948 nearly 50,000 soft-coal miners have lost their jobs in Pennsylvania and that hundreds of coal mines have been abandoned or closed chiefly because of the inroads made by the importation of foreign residual oil which has captured the eastern seaboard coal markets from the soft-coal industry. In addition to my efforts to convince Congress and the Government in general that something has to be done to assist the ailing coal and railroad industries, I joined management and labor in a program designed to focus the attention of the American people on the plight of the coal and railroad industries.

Partial success of our efforts is revealed by the fact that in several instances the President has applied quota limitations on the importation of foreign residual oil. In addition, a bill which I cosponsored was enacted establishing a Coal Research and Development Commission for the purpose of increasing the use of coal.

There was also an effort made on the part of those of us who represent coal-producing areas to establish a joint committee in Congress that would have resulted in the adoption of a national fuels policy.

All of these efforts are directed toward bolstering a sagging economy by rehabilitating the coal and railroad industries and thus producing jobs.

UNEMPLOYMENT

Several years ago when unemployment developed in the central Pennsylvania area due to the closing of coal mines and the effect on related industries, especially the railroads, at my request the U.S. Department of Labor made a survey and immediately declared the great portion of my congressional district as a critical area because of surplus labor. As unemployment continued to develop because of the loss of coal business by the railroads and the fact that the end of the shooting war in Korea brought about a nationwide economic readjustment, I moved promptly at that time in an effort to alleviate the situation.

As the result of numerous conferences with experts in and out of Government service and with top officials of management and labor, it was readily apparent that the coal industry was the victim of severe competition from substitute fuels, the chief offenders being hydropower and foreign residual oil. Recognizing that the salvation of the coal industry depended upon finding new uses for coal and being told by informed sources that it would be years before a practical program of new uses for coal could be perfected, it was apparent that during the interim years new and diversified industries was the only answer to our problem of unemployment.

With the assistance of agencies of Government, community groups were encouraged to develop programs for attracting new industries. Information kits were distributed which contained specific directions on how to proceed in contacting business firms seeking new sites. In addition, from time to time, leads were furnished in the form of lists of manufacturing firms eager to build or acquire new plants. It is pleasing to report that practically every community in my Congressional District has an active industrial committee and thousands of dollars have been and are being raised to finance a realistic approach in solving the need for new industries in order to eradicate unemployment.

Meanwhile, no opportunity was lost to assist business firms in securing Government contracts; to encourage communities in my Congressional District to plan public works projects with Federal aid as provided by the Housing Act; to furnish information on Government-owned patents available to industry; to arrange for a survey by the U.S. Department of Agriculture of the forests in this congressional district to determine the economic value of our timber and the part our forests can play in providing employment opportunities; to join in the program of developing uses for strategic materials found in the central Pennsylvania area.

In addition, I arranged for a Government inventory of the defense production capabilities of our industries; and continually furnished information on employment opportunities with the Federal Government to unemployed persons and assisted hundreds of them to overcome difficulties in collecting unemployment insurance benefits. Then also, several years ago I arranged for the county commissioners in the Blair-Centre-Clearfield area to distribute Government-owned surplus commodities to those eligible for them.

In Congress I was among the first to sponsor area redevelopment legislation designed to alleviate unemployment in labor surplus areas. My efforts in support of area redevelopment legislation have earned the commendation of leaders in Congress, business, labor, and industry.

The unemployment situation in my Congressional District has greatly disturbed me and almost daily I have been asking officials of Government, business, and labor, "What additional steps can I take to alleviate unemployment in my Congressional District?" The answer is that I am doing everything within my power to find a solution to the problem.

HOUSING

During the 86th Congress, housing legislation developed into a political football with the result there was enacted during the closing hours of the second session a modified bill which extended for 1 year the home improvement program, provided $500 million in college housing loan funds, and $50 million in loans for public facilities in small communities.

In addition to the modified housing bill which had my support, several communities in the Blair-Centre-Clearfield area were aided by me in securing Federal funds for housing, urban redevelopment, sewage, water, and school projects.

HIGHWAYS

One of the largest public works measures ever presented to Congress and which had my active support is the 41,000-mile Federal Interstate Highway project costing nearly $45 billion and requiring a construction period of 16 years.

This program which includes the Keystone Shortway is being financed by Federal taxes on gasoline, fuel, rubber, and so forth, and is progressing very slowly because of increased costs and the need of additional revenue. At the present time the program has 26 projects in central Pennsylvania involving 85 miles and nearly $9 million in Federal funds.

PUBLIC HEALTH

Congress approved several bills that I supported which provided for a broader expansion of Federal public-health programs. Other legislation which had my support provided Federal aid in the

construction of public and nonprofit hospitals, diagnostic and treatment centers, rehabilitation facilities, and nursing homes. Research into health problems is also being encouraged through the National Heart Institute and the National Institute of Dental Research.

INTERNAL SECURITY

Since my discharge from the Armed Forces in 1919 following service in World War I, I have consistently opposed the philosophies of communism, socialism, or any other ism which attempts to overthrow or undermine the American system of Government. In this connection, the approval by Congress some years ago of the administration's subversive control program gives to the Department of Justice necessary weapons to be employed in its war against spies, saboteurs, traitors, and their kind. In addition, during the 83d Congress I voted for the bill to outlaw the Communist Party in the United States. This program to control subversives has always had my enthusiastic support because I am convinced there is no compromise possible with communism.

MISCELLANEOUS

In addition to rendering service to my constituents, individually and collectively, my time was devoted to the study of legislation affecting my Congressional District and the American people as a whole. When you consider the time required in attending daily sessions of Congress and committee meetings, as well as interviewing constituents and reading and answering mail, it is realized that the evening hours had to be used in studying legislation in preparation for hearings and debates on various measures. Frankly, I found myself constantly burning the midnight oil as I read volumes of the hearings of major bills pending before Congress. This action is mandatory if a Member of Congress has the best interests of his congressional district at heart and is conscientious in casting his vote in an intelligent manner.

PERSONAL SERVICE TO CONSTITUENTS

As Representative of the 20th Congressional District of Pennsylvania, I have always regarded my constituents as being in the role of my employer and that, together, we enjoy an employer-employee relationship. In an effort to give an account of my stewardship, I have tried zealously to keep in close contact with the residents of Blair, Centre, and Clearfield Counties by frequently informing them of happenings in Washington.

As many of you know, when Congress is in session I report weekly by radio and television in addition to writing a column for the daily and weekly newspapers. From time to time reprints from the CONGRESSIONAL RECORD of statements made by me in Congress have been mailed to many of you. Although my congressional duties kept me close to Washington on weekdays, I continued my policy of spending as many weekends as possible at my Altoona office and visiting other communities in Blair, Centre, and Clearfield Counties. These weekend visits made it possible for me to be available for interviews with constituents interested in legislation pending in Congress or who had problems affecting some agency of the Federal Government.

THANK YOU, CONGRESSMAN VAN ZANDT

Excerpts from letters of appreciation:

AREA REDEVELOPMENT

Thanks so much for taking time from a busy schedule to be with us this morning as we discussed matters of vital importance to Pennsylvania.

I know that you will do everything in your power to help us accomplish these goals. (David L. Lawrence, Governor, Harrisburg, Pa., July 29, 1959.)

Please accept the congratulations of the Pennsylvania Federation of Labor on your vote in favor of the area redevelopment bill.

By voting in the best interests of 11 million Pennsylvania citizens you have demonstrated a high degree of awareness of what this bill means to Pennsylvania. It may well be the single most important piece of legislation affecting this State to come before this session of Congress. (Joseph A. McDonough, president, Pennsylvania Federation of Labor, May 10, 1960.)

I would like to take this means of thanking you personally for your sustained interest in passing the area redevelopment bill. It was a long fight but a worthy one in a good cause. (Representative DANIEL J. FLOOD, Democrat, of Pennsylvania, May 9, 1960.)

ATOMIC ENERGY

Congressman VAN ZANDT has played a leading role on that committee during the entire 13 years, and I can assure you that his first-hand knowledge and interest in military and atomic matters has been an important asset to our country. (Vice Adm. H. G. Rickover, U.S. Navy, VFW 60th convention, September 3, 1959.)

BUSINESS FIRMS

I have only been in Pennsylvania a little more than a year, but based upon the contacts that I have had with you in that short a time, I feel that the people of this district are indeed fortunate in having a man of your high caliber to represent them in the Congress. (E. A. Oliphant, president, Small Tube Products, Inc., Altoona, Pa., June 30, 1959.)

CLEAN STREAMS

Conservationists all throughout America recognize your vote on the antipollution bill as an indication that you place the welfare of the people and the Nation ahead of political interests, for which we in your State are thankful, and justly proud to claim you as one of us. (Seth L. Myers, chairman, Congressional Legislative Committee, Pennsylvania Federation of Sportsmen's Clubs, Inc., Sharon, Pa., March 17, 1960.)

COAL INDUSTRY

On behalf of the bituminous coal industry, I wish to extend to you our sincere appreciation for your substantial contribution to the passage of H.R. 6596, the coal research and development bill, last Friday. (Harry LaViers, chairman, Committee on Research, National Coal Association, June 17, 1959.)

A COURAGEOUS LEGISLATOR

Representative JAMES E. VAN ZANDT is known for his straightforwardness, no pussyfooting, determined stand on national problems. His congressional record matches his war record—outstanding. (Erie (Pa.) Daily Times, 1951.)

EDITORIAL COMMENT

We doubt if there are many Congressmen in Washington with a fuller knowledge of the various phases of government than Mr. VAN ZANDT, and, with such a background of knowledge, he is able to speak with authority on a wide range of subjects, any one of which is of interest to his audience. (Editorial, the Clearfield (Pa.) Progress, Oct. 14, 1959.)

"Service Above Self." The Rotary Club claims the motto, but it is doubtful that even the international president lives it to the extent of JAMES E. VAN ZANDT, Congressman representing Blair, Centre, and Clearfield Counties in Washington. JIM is never too busy to help a constituent, whether it be through the mazes of Washington bureaucracy or to fill in a broken speaking engagement anywhere within his district. He deserves the support of every voter of his district, regardless of party affiliation. (Editorial, DuBois (Pa.) Courier-Express, Oct. 11, 1958.)

EDUCATION

I just want to send you a note of thanks for voting for the education bill, to see that the children of this country get classrooms to house them. (Paul E. Smith, secretary, National Education Association, Washington, D.C., June 7, 1960.)

FOREIGN IMPORTS

As an employee of the Pennsylvania Shoe Co. in Altoona, Pa., I am very much interested and worried about the shoe imports. We want to protect our jobs and prevent damage to the American shoe industry.

We want to congratulate you on your bill, H.R. 9841, and ask you to continue your good fight. (Miss Colleen Gibboney, 610 North 13th Street Duncansville, Pa., April 19, 1960.)

I have read your speech, "In Defense of American Industry," delivered on the floor of the House and printed in the January 28 CONGRESSIONAL RECORD.

Congratulations. You have presented the plight of domestic industry very clearly. (William F. Cox, assistant to the president, Titan Metal Manufacturing Co. Division, Bellefonte, Pa., February 11, 1960.)

HOUSING

The CIO News, in the July 19, 1948, issue on page 4 included JIMMIE VAN ZANDT on the CIO honor roll of Congressmen, who fought for action on the Taft-Ellender-Wagner bill for housing, awarding him an "A" for his efforts in behalf of housing legislation.

KEYSTONE SHORTWAY

Your valued help from time to time in behalf of our common project, has been a factor in our securing State and Federal approval of this highway as a part of the Interstate System on a 90–10 basis. (C. E. Noyes, executive director, Keystone Shortway Association, Williamsport, Pa., March 13, 1958.)

LABOR

Permit me in behalf of the Railway Labor Executives Association and the millions of people affected by the Railroad Retirement Act to thank you for your assistance on our railroad retirement benefit program. Undoubtedly by now you have been informed that your candidacy in the 20th District of Pennsylvania has been endorsed by our political league (comprising 20 standard railway labor organizations). (G. E. Leighty, chairman, Railway Labor Executives Association, July 1956.)

Labor's Nonpartisan League in endorsing JIMMIE VAN ZANDT for the 78th Congress said: "You voted against the crippling Smith amendments to the National Labor Relations Act. You voted against the amendments to the Wage and Hour Act, which would have excluded 2½ million workers from benefits of this act. You voted against the May-Connally antiunion amendments. You cooperated with the United Mine Workers to secure favorable House action on the mine safety bill."

Your outstanding voting record and your leadership in the fights to aid the coal industry and for the welfare and well-being of the ordinary citizen and taxpayer should entitle you to the vote and full support of every workingman and woman in your district. (Robert E. Howe, director, Labor's Nonpartisan League, Oct. 13, 1958.)

MINUTEMAN OF CONGRESS

Representative JAMES E. VAN ZANDT is the "Minuteman" of Congress; whether one agrees with his political philosophy it would be hard to deny that he is one of the hardest working Congressmen in history. (Richard H. Sarge, columnist, Harrisburg (Pa.) Patriot News, 1952.)

NATIONAL DEFENSE

I want to tell you how much I appreciate the assistance you have given our defense effort through your activities as a member of the House Armed Services Committee. (Thomas S. Gates, Jr., Secretary of Defense, August 26, 1960.)

If there is anyone in a Navy uniform who wants to know who is the stanchest Navy defender in Congress, I will say it is the next speaker, one of the most lovable, likeable, and friendly members of our committee, whom we are all privileged to call our friend, JIM VAN ZANDT. (Senator CLINTON P. ANDERSON, N. Mex., chairman, Joint Committee on Atomic Energy, April 15, 1959.)

ONE OF THE TEN

Selected as 1 of the 10 outstanding Members of Congress. Sponsored much veteran, military, old-age pension, and social security legislation. (Congressional Quarterly, Washington, D.C., 1949.)

PUBLIC PROJECTS

The State College League wishes to commend you for your yes vote on the Blatnik bill (H.R. 3610) providing greater Federal incentive payments to the States for allocation to local communities that are building sewage treatment facilities. (Mrs. L. H. Lattman, president, League of Women Voters, State College, Pa., February 4, 1960.)

RAILROAD RETIREMENT

I would like to thank you on behalf of myself and the Sheet Metal Workers I represent for your help in amending the Railroad Retirement and Railroad Unemployment Insurance Acts. (Ralph E. Gipprich, general chairman, Sheet Metal Workers' International Association, Altoona, Pa., May 15, 1959.)

SERVICE TO CONSTITUENTS

This is to inform you that the immigration records which you obtained for me did the job. Mr. Metro Kopilchack received over $1,700 in back social security benefits. (John Temchack, justice of the peace, Beccaria, Pa., March 16, 1960.)

The members of Lodge 287, Brotherhood of Locomotive Firemen and Enginemen, Altoona, Pa., went on record at our last monthly meeting, held on Monday evening, October 26, 1959, desiring to express our gratitude to you for your efforts in behalf of our furloughed members.

The railroad men in this district are indeed grateful to have such a friend. (Paul E. Porta, recording secretary, Altoona Lodge No. 287, Brotherhood of Locomotive Firemen and Enginemen, Altoona, Pa., November 18, 1959.)

VETERANS

The Ladies' Auxiliary, Veterans of World War I, Department of Pennsylvania, adopted a resolution at their State convention being held in Beaver Falls, Pa., July 24, 1959, to commend you for your untiring effort in behalf of World War I veterans. Our deepest appreciation to you. (Telegram, Mrs. Thelma Freed, secretary, Veterans of World War I Ladies' Auxiliary, Monaca, Pa., July 24, 1959.)

CONCLUSION

My seniority on the congressional Joint Committee on Atomic Energy and the House Committee on Armed Services, together with my legislative and administrative duties as a Member of the 86th Congress fully occupied my time during the 2-year period. My congressional duties received my constant attention and wholehearted devotion as I sought to represent my constituents with fidelity, efficiency, and honesty. I have tried in a sincere manner to meet every issue fairly and squarely, and at no time did I permit narrow, partisan views to influence or hinder me in doing what I considered my duty. I gave my undivided attention to the needs of my Congressional District and to rendering prompt and courteous service to all constituents regardless of their creed, political affiliation, or social position in life.

To the many persons who over the years have written me letters of gratitude and encouragement, I gratefully acknowledge your kind expressions and thank you for your thoughtfulness. The residents of Blair, Centre, and Clearfield Counties have my assurance that I feel highly honored to represent the 20th Congressional District of Pennsylvania in Congress. The confidence you have manifested in me is accepted as a constant challenge to continue my efforts to justify your faith in my ability to represent you in Congress.

The Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. JOHN H. RAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RAY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following message of greeting to the Ukrainian Congress Committee of America which will be celebrating its 20th anniversary this fall:

THE UKRAINIAN CONGRESS COMMITTEE OF AMERICA: FIGHTER AGAINST SOVIET TYRANNY

During the Korean war we in the West were shocked to learn of the inhumanity perpetrated by the Chinese Communists on captured American soldiers. We call this horrible action brainwashing and were revolted by it. Yet this was not a new technique of warfare; men of evil have always endeavored to change other men's minds by force.

The Soviet Union has, from the time of its conquest of the 12 non-Russian nations, assiduously tried to brainwash these heroic peoples. But long years of persecution, of terror, of murders and tortures and exile have only strengthened the resolve of the people of the Ukraine and the other captive nations not to bow down before their Soviet captors and not to surrender their spirits.

One organization which has done an incalculable amount of good in this respect is the Ukrainian Congress Committee of America. Not only has it reinvigorated the tired souls of the subject peoples but it has also channeled the interest of the free world toward a greater appreciation of the sad plight of these peoples. In a long enduring cold war every possible ally, every possible circumstance which can be turned toward our own good is of inestimable value to us. The Ukrainian Congress Committee of America has demonstrated time and time again the strategic import to our national security of these nations and offered stimulating ideas on the waging of effective psychopolitical warfare against the U.S.S.R.

It is therefore most fitting that I express on this occasion my heartiest congratulations to the Ukrainian Congress Committee of America and to its membership my heartiest commendation for their work and best of wishes for the future.

Summary of 86th Congress

EXTENSION OF REMARKS
OF
HON. NEAL SMITH
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SMITH of Iowa. Mr. Speaker, at the end of the 1959 session of this 86th Congress, I summarized my version of the year's activities. This was reprinted and mailed to constituents. Hundreds of these constituents responded asking me to do the same thing at the end of this 1960 session; therefore, I am making this summary on this last day of this session which, of course, is the soonest it could be made; and I am going to have reprints made at my expense and distributed immediately.

NATIONAL DEFENSE

The status of our national defense is still a matter of argument even among high military officials. In 1954, we decided to concentrate on small missiles and at about the same time, the Russians decided to concentrate on developing more powerful thrust for bigger and longer range missiles.

Now we have the best small arms and they have the tremendous ability to thrust huge missiles, thermonuclear war instruments, through to targets in other countries including the United States, and this is demonstrated by shoving vastly larger planets into space. Everyone agrees that we must do all we can to catch up. Faced with these facts, Congress set up an Aeronautics and Space Agency with wide authority to speed development.

DEFENSE COSTS

We are spending more than 50 percent of our total Federal taxes on defense and the facts reveal that billions of taxpayers' dollars are lost through procurement policies. Only 16 percent of all contracts are now let on lowest bid basis, and more and more smaller contractors have to become subcontractors to big contractors.

One of the subcommittees I serve on started looking into this last year. It is difficult to determine the exact remedy but by this summer, I had three bills which I believe will help greatly. One, the Anti-Kickback Act of 1960 was passed and became law but lack of time caught the other two, and they must be

pushed hard in the next Congress. I believe there is more opportunity to save taxpayers' money here, without hampering performance, than in any other category of expenditures.

AGRICULTURE

A bill to help stabilize the supply and price of fluid milk was passed last week and some minor farm bills, but the two major farm bills that had been vetoed exhibited the great difference in the views of the Congress compared to those of the Secretary of Agriculture and the administration. It seems to me that many people on both sides make conclusions and then argue from a fixed position rather than trying to be reasonable.

The Poage bill reached the floor in June of this year. It had four parts: First, let wheat farmers choose between the Farm Bureau proposal of low support and no controls or allotments with higher supports, second, give farmers of other commodities a more direct voice and way to recommend a new program or amendments to Congress, third, increased distribution of protein foods to the needy, and fourth, a payment-in-kind program for acres taken out of production. It failed by a vote of 170 to 236 divided as follows: For—9 Republicans and 161 Democrats; against—136 Republicans and 100 Democrats.

I doubt if there is any single area where more work was done and less actually accomplished. Months and months of work was lost by failure to agree. Congress could secure agreement by a majority but could not muster the two-thirds to override the vetoes. The administration could stop legislation by veto but could not muster the majority necessary to pass further amendments they desired.

FOOD DISTRIBUTION

Congress extended the surplus farm products law last year under which millions of tons of food have been distributed to other countries.

A food-stamp plan to give more food to needy families in this country and perhaps help reduce local taxes a little by reducing local welfare costs for food was passed last year, but the administration has refused to use it. This reflects a difference of opinion as to whether more food should be distributed directly to the needy.

CIVIL RIGHTS

The second civil rights law in almost 100 years was passed this year. Almost one-fourth of the total legislative time this year was spent on civil rights bills which mainly involved voting rights. In addition, the Civil Rights Commission was extended for 2 years.

LABOR-MANAGEMENT LEGISLATION

One of the most controversial pieces of legislation to pass during the 86th Congress was the Kennedy-Ervin labor bill, which most people now call the Landrum-Griffin bill. Actually, as finally adopted, it isn't either one. Both labor and management are now citing revisions they believe should be made. Most everyone favored remedial legislation that would eliminate corrupt elements without imposing punitive measures against clean unions and impair the collective bargaining process, but almost no one had the same definition of these terms when applied to a particular provision of law.

The final bill, adopted after blending the two bills together, provides for a secret ballot in union elections, financial reports for unions and employers, and some restrictions on organizing activities.

It also removed many small businesses from the category that can secure the services of the National Labor Relations Board.

HIGHWAY PROGRAM

Some additional funds were provided for the highway program. The administration asked for another one-half cent per gallon increase in the gasoline tax and asked that the 1 cent per gallon increase be continued beyond June 30, 1961, with the money going to the fund, but it did not pass. Highway users are now paying about $1.6 billion more in taxes than is used for roads, but an amendment to transfer some of this to the fund was opposed by those backing the tax increase.

An investigation into the expenditures under the program uncovered waste of funds in some States. The State highway commissions spend the money and Federal authorities were not checking very closely on waste. Some new regulations have been adopted by the administration, but there will be further investigation to seek improvements and reduce waste.

EDUCATION

A bill to provide funds to States to help with school construction and teachers' salaries passed the Senate. A similar bill limited to school construction passed the House. In the House an amendment was passed referring to integration. It did not add anything to present law but the mere reference assured that Southern Democrats on the Rules Committee would join the Republican members and oppose letting the conference adjust the differences; it then died in the Rules Committee.

With most local taxes being school taxes, and going higher each year, there is considerable sentiment to shift a part of the tax burden from real estate and give more Federal aid to States from the growth in Federal tax receipts so that real estate taxes and other local taxes can be reduced or increased school costs met through increased Federal aid to education.

POSTAL AND INTEREST RATES

The administration requested an increase in postage rates, but Congress refused to do so.

The administration also requested authority to increase Government bond interest above 4¼ percent. Although Congress increased the interest rates on the E- and H-bonds individuals can own, authority to increase the interest rates above the present legal maximum on commercial bonds was denied by Congress. Interest rates on these commercial bonds have since been going down.

AIRPORT PROGRAM

More aid for a national system of airports was approved this sesssion. It is cheaper and better to have cities use and improve airports that could be used by the military in time of war than to have a whole separate system. Des Moines and other cities in Iowa to a lesser extent are in the system and slated for more improvements to meet the requirements of modern jet planes.

INTERNATIONAL AFFAIRS

The President requested an extension and increase in foreign aid programs that have been in existence and last month requested a program for Latin America. The Latin American program was authorized in this August session. The President secured most of the foreign aid he requested; however, more and more resistance is developing to these programs and mostly because some unfortunate examples of bad judgment in administration have been exposed. Most everyone agrees that vast improvements need to be made, but I believe in supporting the President on international affairs unless I am thoroughly convinced the national interest is to the contrary. The President as Commander in Chief has access to all secret information.

HAWAII STATEHOOD

The 50th State was admitted to the Union. With the recent losses to our prestige and safety from events in Cuba, we can surely feel fortunate Hawaii is a prospering and loyal State rather than in some other category.

NATURAL RESOURCES

Bills to levelop natural resources still stir considerable controversy, but some further progress was made in this area. I feel pleased to have been the author of one of the most important bills that passed and was signed by the President. It protects against giveaway transfers of Government minerals in forest lands. Another special committee I serve on found almost unbelievable loss to the Government in transfers, primarily in Arizona and California. We are now working on legislation to protect against trading valuable Government land for worthless land. We found many cases of this. One involved a transfer of land costing a company $50,000 for Government land for which a $5 million offer had been made. It becomes more and more apparent why our forefathers provided ways for each branch of Government to check on the other branch. A recent report reveals that the U.S. Government, which is all of us, now owns $265 billion worth of property, including 722 million acres of land. It is important to protect these assets.

SOCIAL SECURITY

A new law just passed, that I believe the President will sign, broadens slightly the amount a person can earn and still receive benefits. It provides that for earnings between $1,200 and $1,500 per year, $1 will be deducted for $2 earned. Above $1,500 $1 is deducted for each $1 earned. It left unchanged the eligibility to benefits in any month in which less than $100 is earned.

The bill also will: First, remove the arbitrary age requirement for disability benefits; second, increase payments to children of deceased workers; and, third,

make more eligible by reducing the average required after 1950.

RED ROCK AND SAYLORVILLE DAMS

The first appropriation to begin construction of the Red Rock Dam passed last year over the President's veto, but he did not oppose another appropriation approved this year. The earth-breaking ceremony was held June 4 of this year and construction is now under way.

The first appropriation for surveys for the Saylorville Dam was secured last year and some more this year. I am hopeful the surveys will be complete enough in another year so construction can be started.

The minimum size of the lake at Red Rock is 6,300 acres, and I am in the process of getting the necessary protection against it ever being reduced below that size. A 1958 law that authorized a lower level at a later date is being overcome.

I have appreciated very much the cooperation Members of Congress from other areas and States have given me so we can secure these improvements. Such great improvements are hard for us in central Iowa to visualize because we have never had any such improvements before.

AUGUST SESSION

Congress reconvened for a 2-week period just ending today. Some expected more legislation to pass in this 2-week period than usually passes in a year, and, of course, that is not possible—especially because opponents of legislation can use delay tactics such as quorum calls and filibusters to keep committees from meeting and hammering out their differences.

Several appropriations bills were passed during the August session and I believe a considerable savings of taxpayers' dollars resulted from having the additional time to screen these bills for nonessential expenditures.

MEDICAL CARE

The short session passed a bill providing some medical care through welfare agencies. The bill was not a pay-as-you-go measure but was agreed to by the administration and seemed to be the only one sure of passage without being killed by a veto.

HOUSING

The short session also extended FHA loan authority for 1 year so more people could buy a home under that program. It also included college housing. An omnibus bill in 1959 included public housing, college housing, nursing homes, and urban renewal as well as FHA.

BUDGETS

Congress must spend most of its time every year working on appropriations measures, and as shown by tables I am submitting, in 1959 the President submitted spending requests totaling $74,859,008,445 and $72,977,598,352 was appropriated. In 1960, the President submitted spending requests totaling $73,845,974,490 and $73,634,335,992 was appropriated. Thus the total amount the President's spending requests were reduced by this 86th Congress is $2,093,048,591. There was a difference of opinion concerning some items, but by the time both additions and subtractions were made, the amount appropriated was less than the request.

For example, Congress increased appropriations for research and health programs, subsidies to medical schools, and so forth to a record $715 million, but did not grant all the increased bureau personnel that were requested.

I believe the 1946 law concerning budgets should be changed so the budgets submitted separate the various items and include an item for debt retirement. It is too easy to hide unnecessary expenditures under the present law and distort the true picture.

A subcommittee on which I serve started to look into this in the interest of economy and efficiency. I am very pleased that the chairman has expressed agreement with my proposal for a full study and hearings early next year. Some real savings and efficiency can come from making the budget fully reveal what we are paying and not paying for.

TOTAL RECORD OF 86TH CONGRESS

There was much more legislation passed and some very important, but I obviously cannot discuss all of the more than 300 bills that became public law this year. Some bills which I believe were worthy did not pass and a good many that were not worthy did not pass.

Although this Congress has worked for more days than most Congresses, it is not necessarily the most or the least productive. As it is about to end, many Members still have a bill they would like to call up for action, and that would still be the case no matter how long we stayed here.

Hon. Joseph F. Holt

EXTENSION OF REMARKS

OF

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RHODES of Arizona. Mr. Speaker, I was privileged to come to Congress in the same year that Congressman JOSEPH F. HOLT became a Member. One of the first firm friendships I formed in Congress was with Congressman HOLT. We served together on the House Education and Labor Committee for a period of 6 years. Also, in 1955 we went together to Russia to test the so-called Geneva spirit. We traveled through Russia at our own expense and came away with the feeling that as far as the officials of the U.S.S.R. were concerned, the "Geneva spirit" was a myth.

JOE HOLT has a capacity for work possessed by few people. Also, he possesses a keen intelligence which gives him a quick insight to almost any problem with which he is confronted. He couples these qualities with a very practical mind which allows him to present a solution to a problem, which is not only a good solution on paper but which will work.

JOE HOLT came to Congress at the age of 26. Therefore, he is still a very young man to have obtained the stature he enjoys, and to have had the experiences he has had. The United States will hear much more from Congressman HOLT in the future, whether his activities be in the world of politics or in the world of

business. I would regard him as one of the more promising young men among our colleagues in the Congress.

I will miss JOE HOLT'S presence, as will many of his other friends. Mrs. Rhodes joins me in wishing to JOE and his fine wife, Lee, the best of everything in the future and to extend to them the assurance of our continuing friendship and good will.

A Congressional Bureau of Efficiency

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. REES of Kansas. Mr. Speaker, it has been my privilege to serve in this body over a period of almost 24 years. I have always deemed it an honor and a great privilege to be permitted to represent the people of my district and the people of this Nation in the greatest legislative body in the world.

As one nears the end of his career in this great institution, he is prone to review the past in consideration of the problems being faced today and anticipated tomorrow. One of the many problems facing the American people today is the question of a responsive but efficient and economical Federal Government. It is my belief that this issue will be with us for many years to come. It is a question that has been with us for years in the past.

For example, in February of 1944, during the 78th Congress, I introduced a bill in the House that would have created a congressional Bureau of Efficiency. I include a copy of the bill with this statement. I call attention in particular to the declaration of policy in the proposed legislation. It reads:

> It is hereby declared to be in the national interest from the standpoint of efficiency, economy, and better overall management in the Federal Government to create a Bureau of Efficiency, responsible only to the Congress, to keep the Congress advised at all times with respect to the use of Federal funds, overlapping and duplication of Federal functions and activities, and nonessential Federal expenditures, so that each Member and committee of the Congress shall be completely informed, and so that the Congress may enact remedial legislation.

A further analysis of this bill indicates that some of the duties of this proposed Bureau were to investigate and recommend legislation to the Congress regarding such items as, first, nonessential Federal expenditures; second, overlapping and duplication of activities and functions; third, excessive numbers of Federal personnel; and, fourth, personnel and administrative management practices in the Federal Government.

There is today not a single Member of this body who is not interested and quite familiar with these very same items of Government operations. Needless to say, there has been considerable interest in the 16 intervening years since I first proposed a congressional Bureau of Efficiency.

It was my privilege as chairman of the House Committee on Post Office and Civil Service in 1953 to establish one of the first subcommittees in the House of Representatives to devote its efforts to a study of the utilization of manpower and the personnel management practices of the Federal Government. The first committee was under the chairmanship of our colleague from Pennsylvania, Hon. Robert J. Corbett. Since 1955 our able chairman of the Committee on Post Office and Civil Service, the Honorable TOM MURRAY, has seen fit to continue this Subcommittee on Manpower Utilization, which has been under the effective direction of Hon. JAMES C. DAVIS, of Georgia.

It is my earnest hope that this body, in the years to come, will continue to concern itself more and more with the factors leading to more effective and economical government, such as I have mentioned here. Many of you may not realize that the civilian payroll of the Federal Government has grown by leaps and bounds. Today it is in excess of $1 billion a month with all likelihood of continuing to increase in cost. The labor costs of our Government are staggering to say the least.

Our Government is today facing many significant management problems. Let us look at a few of them.

The growth of the Federal Government, both in numbers of personnel as well as in functions, has long been of vital interest to me and to many of my colleagues. There is undoubtedly a challenge to you in the Congress next year and the next to review the roles expected of our departments and agencies. We must all, the legislators, the American citizens, concern ourselves with the end results of this expansion.

In the past 20 years with the expansion of existing departments and agencies and the birth of new bureaus there has been the tendency for overlap and duplication of efforts within and among bureaus, agencies, and departments.

For some time there has been an inflationary trend in the grades and salaries of our Classification Act employees. Many different factors are causing this, but the cure will come only from aggressive congressional interest and action.

Last, we have noted a growing tendency of the departments and agencies of the Federal Government to contract out jobs and responsibilities that historically have been done within the Government. This tendency has already shown signs of affecting the morale of career Government employees, as well as the long-range economy of Government operations. There must be definitive areas of Government operations by contractors and by Government itself. Search and penetrating studies by the Congress can help materially to define these areas in Government.

All these factors dictate a new approach but still an approach to ageless problems of management in Government.

I feel today, as I did 16 years ago, that there is a real need for the Congress to interest itself in the management practices of all the Federal departments and agencies of the executive branch. I recognize the fact that each department and agency has a system of self-evaluation. I also recognize areas of responsibility of both the Bureau of the Budget and the Civil Service Commission. However, in my years of experience in this body I have found there is need—yes, a very definite need—for a group closely responsive to the electorate to objectively analyze the operations and management of our departments and agencies.

Much has been done, and is being done, not only by the Subcommittee on Manpower Utilization of the House Committee on Post Office and Civil Service, but by other committees of the House. However, the Members of this body will continue to face a significant and formidable challenge to go to the heart of our Federal Government and there separate the fanciful from the fact, determine the essential, and demand efficiency and economy.

When this has been accomplished, you, my colleagues, will receive the sincere vote of appreciation of millions of American citizens.

The bill, as I introduced it in the 78th Congress, follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

DECLARATION OF POLICY

SECTION 1. It is hereby declared to be in the national interest from the standpoints of efficiency, economy, and better overall management in the Federal Government to create a Bureau of Efficiency, responsible only to the Congress, to keep the Congress advised at all times with respect to the use of Federal funds, overlapping and duplication of Federal functions and activities, and nonessential Federal expenditures; so that each Member and committee of the Congress shall be completely informed, and so that the Congress may enact remedial legislation.

TITLE II

THE BUREAU OF EFFICIENCY

SEC. 21. There is hereby created a Congressional Bureau of Efficiency (hereinafter referred to as the "Bureau"), responsible only to the Congress. The Bureau shall be headed by a qualified Director, who shall be selected by the majority and minority leaders of both Houses of Congress and the Speaker of the House of Representatives as soon as practicable after the beginning of the first session of each new Congress, with the exception of the first Director who shall be selected within ten days after the date of enactment of this Act.

SEC. 22. (a) The Director, as soon as practicable after being selected, shall appoint three qualified Assistant Directors, not more than one of whom shall belong to the same political party as the Director.

(b) Each Assistant Director shall be in charge of, and responsible for, the work in one of the following divisions of the Bureau: (1) Division of Complaints and Investigations; (2) Division of Independent Establishments, Commissions, and War Agencies; and (3) Division of the Executive Departments, the Legislative Branch, and the Judiciary.

SEC. 23. (a) The Director shall receive compensation at the rate of $9,000 per annum and the Assistant Directors at the rate of $7,500 per annum.

(b) The Director shall appoint, without regard to the provisions of the civil-service laws, such employees (not to exceed two hundred in number) as may be necessary to carry out the functions of the Bureau under this Act. The Director shall prescribe the duties of such employees, and shall fix their compensation without regard to the Classification Act of 1923, as amended.

(c) The Bureau is authorized to utilize the services of not more than ten employees at any one time from the executive departments and agencies. The services of each such employee shall be utilized for not more than thirty days during any calendar year unless permission is granted by the head of a particular department or agency for the use of any such employee for a longer period of time; such services to be without cost to the Bureau.

TITLE III

DUTIES AND POWERS OF THE BUREAU

SEC. 31. It shall be the duty of the Bureau to investigate and recommend legislation to the Congress concerning the following matters:

(1) All nonessential Federal expenditures;

(2) Overlapping and duplication of Federal activities and functions;

(3) Excessive numbers of Federal personnel;

(4) Procurement and disposal of all Federal property;

(5) All Federal personnel and administrative management practices;

(6) All requests for appropriations;

(7) Exercise of authority and/or performance of functions in excess of constitutional or statutory authority; and

(8) Any specific problem referred to the Bureau by a joint resolution of Congress.

SEC. 32. (a) The Division of Complaints and Investigations is authorized to receive and obtain evidence for the Bureau with respect to the matters set forth in section 31.

(b) The Division of Complaints and Investigations shall receive all information furnished to the Bureau by citizens of the United States and use such information without revealing its source unless the informant has no objection to its use otherwise, and shall so state in writing.

SEC. 33. The Division of Independent Establishments, Commissions, and War Agencies, and the Division of the Executive Departments, the Legislative Branch, and the Judiciary, shall receive the reports of the Division of Complaints and Investigations in their respective fields, and shall, under supervision of the Director, analyze such reports, prepare recommendations, and suggest legislation for submission to the Congress.

SEC. 34. In carrying out the purposes of this Act, the Director or any Assistant Director of the Bureau is authorized to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures, as it deems advisable. Subpenas may be issued under the signature of the Director or any Assistant Director designated by him, and may be served by any person designated by such Director or Assistant Director. The provisions of sections 102 to 104, inclusive, of the Revised Statutes shall apply in the case of any failure of any witness to comply with any subpena or to testify when summoned under authority of this Act.

SEC. 35. In addition to other reports which it may make from time to time to the Congress, the Bureau shall make an annual report to the Congress on or before the first day of February of each calendar year. Such report shall contain, in addition to a general statement regarding the work of the Bureau, specific information, data and recommendations upon the matters set forth in section 31.

TITLE IV

APPROPRIATIONS

SEC. 41. There is hereby authorized to be appropriated for the fiscal year ending June 30, 1944, the sum of $50,000 and for each fiscal year thereafter such sum as may be necessary to carry out the purposes of this Act. So much of such fund as is necessary may be used for travel and other expenses as is authorized by the Director of the Bureau.

A Survey of the 11th Congressional District In Illinois

EXTENSION OF REMARKS

OF

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PUCINSKI. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following results of a survey which I recently conducted among constituents of my district. We received more than 20,000 replies from my constituents to the questions which follow, and this represents about a 30 percent response.

I am most gratified that my constituents show such a keen interest in the affairs of their Nation.

The results of my survey follow:

	Percent		
	Yes	No	Undecided
1. Should the United States continue its self-imposed ban on the testing of nuclear weapons?	52	40	8
2. Are you satisfied with the administration's progress in outer space research and development?	44	47	9
3. Should we merge our entire space development program with our guided missile program under one command?	76	17	7
4. Do you favor total unification of our Armed Forces to prevent duplication in defense expenditures?	83	14	3
5. Do you favor Federal aid for public elementary and high school construction?	49	48	3
6. Do you favor use of Federal funds to help improve teachers' salaries?	37	60	3
7. Do you favor use of Federal funds for long-term, interest-bearing loans to private schools for construction and renovations?	57	40	3
8. Should parents of students attending institutions of higher education be able to claim the tuition as an income-tax deduction?	72	21	7
9. Should social security benefits include surgical and hospital payments for the recipient?	75	21	4
10. Should the eligibility age for receiving social security benefits (now 65 for men and 62 for women) be lowered to 60 for men and 55 for women?	57	40	3
11. Should the $1,200 annual limitation on earnings for recipients of social security be increased to $2,400?	84	14	2
12. Do you favor my bill to permit employers to claim a full tax credit on the additional cost involved in hiring people 40 years old and older to eliminate present discrimination against the hiring of older workers?	83	13	4
13. Do you approve my bill which requires that 1 percent of each annual Federal budget hereafter must be earmarked for retirement of the national debt?	92	4	4
14. Do you approve U.S. economic and military aid to those of our allies which really need it if Congress first ascertains that unnecessary expenditures have been eliminated?	73	20	7
15. Do you believe the administration's foreign policy has helped stop the spread of international communism?	35	57	8
16. Should the United States yield to Soviet Russia's demand that we abandon our position in West Berlin?	6	90	4
17. Do you believe the United States should base its dealings with the Soviet Union on a firm and decisive demand that the captive nations of Europe be given the right to free elections?	85	9	6
18. Do you believe the Communist rulers of Soviet Russia can be trusted to keep their word on any mutual arms inspection agreements which we might negotiate for total world disarmament?	8	87	5
19. Do you favor denying further loans or other aid to Egypt until Nasser opens the Suez Canal to free access by all nations?	77	15	8
20. Have you noticed any adverse effect that increasing foreign imports into the United States are having on your business or the place where you work?	37	51	12
21. Do you have any reason to believe, on the basis of your own business or employment, that we are heading for another economic slump?	31	57	12
22. Do you favor further revision of our Federal income tax laws in favor of small and medium size business enterprises?	80	12	8
23. Do you favor passage of a uniform Federal unemployment compensation act to provide a more effective economic cushion during recessions?	66	25	9
24. Do you favor extension of the $1 minimum wage law to cover many industries and commercial ventures not now covered?	81	12	7
25. Do you favor raising the Federal minimum wage law above the present $1 an hour minimum?	63	29	8
26. Do you favor a suggestion made by the AFL–CIO for President Eisenhower to summon a White House conference of the Nation's top leaders of labor and industry as a broad national effort to improve the level of labor-management relations in America?	78	15	7
27. Do you believe Congress should remove the 4¼-percent ceiling on long-term Government bonds?	36	53	11
28. Should Congress pass a civil rights bill which will include voting guarantees for all American citizens?	83	10	7
29. Should Congress grant President Eisenhower his request to restore the Federal tax on local telephone calls?	9	75	16
30. Should Congress grant the President his request for an increase in postal rates?	38	57	5
31. Should Congress approve the President's request for a 1-cent increase in the Federal gasoline tax?	22	73	5
32. Do you favor my legislation to give the Postmaster greater powers to keep obscene and pornographic literature from going through the mails?	92	5	3
33. Do you favor my suggestion to substitute the selective service program with a well paid, professional Defense Establishment of volunteers?	62	30	8
34. Should Congress repeal that part of the law making loans available for college students which requires them to state under oath that they do not belong to or support a subversive organization?	25	66	9
35. Do you approve of the idea for me, as your Congressman, to poll my constituents in this manner on their views?	100	0	0

The Fate of the General Housing Bill

EXTENSION OF REMARKS
OF

HON. ALBERT RAINS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RAINS. Mr. Speaker, it is with a heavy heart that I discuss our inability to obtain an effective and worthwhile housing bill in this last session of the 86th Congress. And let me emphasize, Mr. Speaker, that there should be no mistake about where the blame rests—it lies squarely at the door of the Republican administration and the Republican minority in the Congress. The combination of an ever-present veto threat and the lack of a single Republican vote on the Rules Committee—these two uncompromising obstacles were just too difficult to overcome in this abbreviated session.

It is now abundantly clear that the only hope for adequate programs in the field of housing and urban renewal is the election of a Democratic President in November. With the forward-looking leadership that a Democratic administration would provide, the tremendous economic potential of America would once more be fully utilized and an adequate effort would be made to meet the goals of our national housing policy.

Ever since this administration took office, housing legislation has faced a rough and rocky road. Just 2 years ago, we ended up with no housing bill whatsoever in spite of the fact that an overwhelming majority of the Congress favored such legislation. In fact, when the housing bill was brought up near the end of the session in 1958, it came within six votes of gaining the necessary two-thirds majority to pass under suspension of the rules. Most of us are familiar with the serious problems created by the failure of that bill. FHA ran out of insurance authorization, the Urban Renewal Administration put in an unfair rationing procedure, and the low-rent public housing program was brought to a halt.

In spite of this pressing need for prompt action on a housing bill in 1959, it was not until September, after two Presidential vetoes, that we succeeded in getting any legislation on the books. The very first bill passed by the Congress, S. 57, already included a number of compromises in an effort to meet the administration's objections. In spite of this, the bill was vetoed on July 7. The Congress promptly passed another measure, S. 2539, which made further major concessions to administration opposition, but even this modest measure was vetoed. Finally, a barebones bill, S. 2654, was at long last signed into law on September 23 after the Congress had adjourned. It was clearly understood by all concerned that this last bill was only a 1-year measure designed to enable our housing and urban renewal programs to continue in operation until more comprehensive provisions could be made at the current session of the Congress.

It is incomprehensible to me why the administration persists in its stubborn opposition to sound housing and urban renewal legislation. One of the greatest tasks facing America is the rebuilding of our cities and the elimination of slums. Our national goal of "a decent home and suitable living environment for every American family" adopted under a Democratic administration has received at least token acceptance in Republican platforms. And yet, the lack of genuine warmth in that acceptance has been amply proven not only by the persistent efforts of the administration to block housing legislation, but by its failure to come up with a single constructive idea in recent years.

Today, with the end of the session at hand, we are confronted only with the choice of whether or not to accept this very modest resolution to extend the FHA title I home improvement loan program for 1 year, provide $500 million to meet the backlog of applications under the college housing loan program, and provide $50 million for the community facilities program. But for the administration's determined resistance, the Congress would have a chance to work its will on the comprehensive bill originally recommended by your Committee on Banking and Currency. I would like to describe briefly the major provisions of that bill.

First, there is an obvious and pressing need for measures to stimulate homebuilding activity. The level of housing starts in July was one-fourth below the same month last year. This was an annual rate of less than 1.2 million in contrast to a rate of 1.6 million during the early part of 1959, and in contrast to a need for more than 2 million units a year. Experience has taught us that such a drop in residential construction can well undermine the entire economy. Already severe distress is evident in the Northwest lumber industry, in appliance manufacturing, and in other industries which depend upon residential construction for an important part of their market. If allowed to go unchecked, this decline in homebuilding can add to the already serious level of unemployment.

In order to restore homebuilding activity to a high level of operation, the bill would have liberalized FHA mortgage insurance terms for home buyers. First, in order to lower monthly housing costs and partly offset the record-high interest rates on FHA loans, the bill would have extended the maximum maturity from the present 30 years to 35 years. Second, the bill would have reduced FHA downpayment requirements in all price ranges. Building on the highly successful experience of our great GI home loan program under which 2 million veterans bought homes without downpayment, the bill would have permitted FHA to insure no-downpayment loans on homes priced up to $13,500. Above that a 10-percent downpayment would have been required on any amount between $13,500 and $20,000 in place of the present law which requires 10 percent from $13,500 to only $18,000. The bill would have increased the ceiling on FHA single-family loans from $22,500 to $25,000.

There is every reason to believe that these changes would have brought many home buyers into the market. The potential demand for homeownership has proven itself to be extremely strong in this country. You will recall that the Emergency Housing Act of 1958 which did much to spark the sharp increase in new home production and sales in that year, provided, among other things, for a reduction of FHA downpayments. One needs only to recall the real estate advertisements of a year or two ago, when mortgage money was still available for no-downpayment GI loans, to realize the importance that builders attached to this feature.

Another long overdue amendment to existing law would have permitted the FHA Commissioner to reduce the mortgage insurance premium by as much as one-half under any FHA title II program. Present law requires FHA to charge at least one-half of 1 percent per annum on the outstanding balance of any loan which it insures. However, over its quarter of a century of operations, the FHA has built up reserves of some three-quarters of a billion dollars and many experts feel that the insurance premium can now be safely lowered, at least on some FHA programs. The bill would have given the Commissioner discretionary authority to do just that, thus lowering the monthly payments of home buyers.

Another important provision of the bill would have increased FHA's mortgage insurance authorization by $4 billion although the administration has been hesitant to ask for this. The recent rate of use indicates that FHA may well reach its present ceiling before the next Congress meets. In 1958 the administration failed to alert the Congress that it was rapidly nearing the limit of FHA insurance authority because it knew that this extra factor would have been enough to give us the six votes we needed to pass the general housing bill under suspension. Shortly after the Congress adjourned, FHA was forced to put into effect a stopgap system of agreements-to-insure. This highly dubious procedure was outlawed by last year's housing bill. I sincerely hope that FHA will be able to get by until the 87th Congress convenes because the adverse effect on builders' plans and homebuilding will be far more serious this time than it was in 1958.

Mr. Speaker, I will not attempt to go into all of the improvements to the FHA programs our bill would have provided. It would have made some very useful improvements in the FHA rental and cooperative housing programs. Also it would have established a new program of FHA insurance to make mortgage loans available in older residential neighborhoods, in order to encourage efforts to halt deterioration in these places before they become actually blighted.

Title II of the bill would have advanced our efforts to provide decent rental housing for our elderly citizens by making another $50 million available for the direct loan program and by eliminating the 2 percent equity requirement now contained in existing law. I take particular pride in this program

which I originally proposed several years ago. Although it was singled out for special criticism and denunciation in each of the two veto messages, it finally became law with the Housing Act of 1959. The administration continued to show its distaste for this outstanding program by refusing to request an appropriation to get it started. In spite of this, the Congress has appropriated $20 million and the first projects should be under way in a short time. This program, which provides 50-year loans at only 3½ percent interest for nonprofit sponsors of rental housing for the elderly, makes it possible to rent these units for $15 to $20 a month less than under regular FHA financing with its higher interest rate and insurance charges. This is a highly important saving to most older families and the program holds great promise of meeting our needs in this area.

Title III of the bill would have converted the FNMA secondary operation program into a central mortgage bank along the lines recommended by the National Association of Home Builders, Mortgage Bankers Association, and the National Association of Real Estate Boards. The need for some device to smooth out the flow of funds to the home mortgage market and thereby reduce the fluctuations in residential construction has long been recognized. The changes which would have been made by this bill, such as giving FNMA greater independence under a three-man board, appointed by the President with the advice and consent of the Senate, and permitting FNMA to make short-term warehousing loans on the security of mortgages, would have gone far to achieve this goal. A comparable secondary market facility for conventional loans to be operated under the Federal Home Loan Bank Board would have been provided by title IV of the bill.

In addition the bill would have made a number of changes in FNMA's special assistance program under which that agency buys mortgages on programs which the President or the Congress has designated as deserving of special aid. FNMA would have been required to pay the full face amount of any loan in these special categories instead of charging discounts as it does at present. Moreover, a limitation of 1 percent would be set on the fees and charges required by FNMA which now total 1½ percent.

Needed increases in FNMA authorizations would have been made by the bill. The general fund, to be used at the President's discretion, would have been increased by $75 million and the existing funds for cooperative housing mortgages would have been increased by $10 million with all of the money to go to true consumer cooperatives. Two new funds would have been established. The first would have provided $15 million for the purchase of FHA section 232 mortgages on nursing homes. This section was added to the National Housing Act in 1959 but potential borrowers have experienced difficulty in finding private lenders willing to make the loans as is so often the case when a new FHA program is established. The second fund, in the amount of $25 million, would have been established to assure the successful launching of the new FHA program provided in title I of the bill to make mortgage insurance available in older neighborhoods.

One of the greatest problems which will face the homebuilding industry in the next few years is the rapid increase in land prices. Already land costs have soared in most towns and cities, making it increasingly difficult for the industry to find places to build lower-cost housing. This inflation has not been due to a lack of raw land—towns and cities now take up less than 1 percent of the total land area of our country—but rather it is due to the lack of developed land available for homebuilding. An important factor in this is the difficulty which builders face in obtaining adequate mortgage credit to meet the expenses of acquiring and developing land. To meet this need, title V of the bill would have authorized FHA insurance on loans to private developers and builders to convert raw land into building sites suitable for housing construction. Because this was a new program it would have been put on a 1-year experimental basis with appropriate safeguards to prevent speculative abuse. The need for some such assistance is obvious and pressing, and action to bring down land costs is long overdue.

Title VI of the bill would have provided the college housing loan program with an additional $500 million to take care of the existing backlog and to carry the program further for 1 year. This program is one of our least controversial and most successful efforts in the field of housing.

Title VII of the bill would have provided an additional $450 million in capital grant authorization for the urban renewal program. The American Municipal Association and the U.S. Conference of Mayors have strongly urged the Congress to provide a 10-year program of $600 million a year. In spite of this, the administration requested not one cent for this vital program which holds the key to the ultimate rebuilding of our cities and the elimination of slums. I am hopeful that the administration which takes office next January will show better understanding of our needs in the field of slum clearance and urban renewal and will recommend an adequate program.

The bill would also have provided for a pilot program for the rehabilitation of existing dwellings. Local authorities would be able to acquire and repair a limited number of dwelling units which could be resold after rehabilitation. Such an approach offers hope for arresting blight before it becomes so serious that only outright clearance can cure it.

In addition, the bill would have accorded to hospitals the same advantages under the urban renewal program which were granted to colleges and universities in the Housing Act of 1959. Under the bill hospital expenditures for urban renewal could be counted as part of the local community's one-third share of the net cost of slum clearance. Other amendments in the bill would have removed impediments in existing law to urban renewal operations involving colleges and hospitals.

Mr. Speaker, one of the most important problems facing urban renewal today is the plight of families and small business firms who are displaced. By the same token, one of the most promising provisions of the bill was Title VIII: Relocation Assistance. This title would have given more equitable treatment to small business firms by permitting full payment of actual certified moving expenses thus removing the inequity that now arises in some cases when a company with heavy equipment is forced to move but cannot be fully compensated under existing law. Moreover, the bill would have provided long-term low interest rate loans—4 percent—through the Small Business Administration to enable displaced businesses to reestablish in new locations. Also, displaced businesses would have been given a reasonable opportunity to relocate in the same urban area to the maximum extent feasible.

In the case of displaced families the bill would have increased the ceiling on relocation payments from $200 to $300. A more far-reaching provision would have greatly increased the effectiveness of FHA's section 221 relocation housing program. Section 221 was designed to benefit displaced families by helping them to acquire other housing on relatively easy terms. It is generally agreed that this program has been a very limited success. In large part, its intended benefits have been nullified by the administration's high interest rate policy which have simply priced many low income families out of the market. To overcome this, the bill would have provided for section 221 loans to nonprofit corporations at 4 percent interest and for a 45-year term—under the present program financing costs total 5¾ percent and the maximum term is 40 years. These more favorable financing terms would lower monthly rentals to displaced families by as much as 15 percent.

In a further attempt to reduce the rentals which displaced families must pay under the program, the bill would have encouraged tax abatement by local communities. Where the local community is willing to exempt a project from local real estate taxes, the amount of the exemption could be counted as part of the local community's one-third share of the cost of the urban renewal project. This would reduce rentals by an additional $10 to $15 per month per unit.

To assure the availability of financing for this new type of housing for displaced families, the bill would set up a special $100 million support fund under the FNMA special assistance program.

Included in the miscellaneous section of the bill was the authorization of an additional $100 million for the highly successful public facility loan program. Under this program, priority is given to communities of 10,000 or less which need water and sewer systems. Fortunately, some funds for this program are included in the measure now before the House.

Mr. Speaker, I would like to point out one more subject which should have been

included in this year's housing legislation. That is additional authorization of units for the low-rent public housing program. I am confident that if the housing bill had been allowed to proceed along its regular course that at least some new units would have been added either on the floor of the House or in conference. As you know, the general housing bill sent over from the Senate includes 25,000 additional low-rent units. Personally I feel this number is far from adequate. You will recall that last year the House approved a total of approximately 180,000 low-rent units in the first housing bill. In the end we were forced to cut this down to a mere 37,000 units. This figure was arrived at by a careful examination of applications on hand to eliminate all deadwood. Although the administration has dragged its feet and refused to sign contracts for more than a handful of these, the balance is already fully committed in one stage or another. In fact, a backlog of applications is once again building up. This is hardly surprising in view of the great need for these units—a need which will seriously hamper our urban renewal efforts if it is not soon met.

Mr. Speaker, the general housing bill was carefully considered by the Subcommittee on Housing and by the full Banking Committee. It would have met many urgent needs in our housing and urban renewal programs. The people of our country—the home buyers and builders, the mayors, and others interested in sound and equitable measures for rebuilding our cities—have good cause to share my regret that the opposition of the administration and the Republican minority in Congress has prevented the Congress from even having an opportunity to vote on this bill. And this was the only way they could defeat the bill because, as we all know, if the Congress were given a chance to act on this bill, it would have passed by a substantial majority. As it is, we must now wait until next year when I hope and expect to see a Democratic administration which will work together with the Democratic majority in the Congress to enact sound and forward-looking housing legislation.

Relief for Cranberry Growers

EXTENSION OF REMARKS
OF
HON. HASTINGS KEITH
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KEITH. Mr. Speaker, I have devoted considerable time and effort this year to obtaining administrative relief for the cranberry growers in my district who innocently suffered financial losses from last November's cranberry scare.

As a member of the Interstate and Foreign Commerce Committee, I participated in the lengthy hearings conducted on the color additive legislation.

Having been so deeply involved in the pro's and con's of the language of the Delaney amendment, I cannot help but conclude that we have only scratched the surface in evaluating this controversial provision of the Federal Food, Drug, and Cosmetic Act.

It is my sincere hope that the 87th Congress will have occasion to further study the far-reaching effects of this clause.

Democratic Sponsorship of the Polaris Program

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. McCORMACK. Mr. Speaker, the Republican administration is not entitled to take credit for the Polaris project now that it has been tested successfully, and also attempt to claim that it fills the missile gap. The missile gap has not been filled, as yet. Responsibility for the success of the Polaris project lies more with the nonpartisan scientists and engineers in the Navy and the Atomic Energy Commission and their supporters in the Democratic Congress.

The Polaris submarine system combines the nuclear submarine with missiles armed with thermonuclear warheads propelled by solid fuels. In each of these fields it has been the congressional Democrats who have provided the necessary leadership and funds. Perhaps a look at history would be instructive.

The nuclear-powered submarine program was instituted by the Atomic Energy Commission and the Navy under the Democratic administration of President Truman. After the successful operation of the *Mark I* prototype in 1953 and the *Nautilus* in 1955, the nuclear submarine program ran into the rough waters of traditional thinking and budgetary ceiling in the Eisenhower administration.

It has been the Democrats in Congress who have supported Admiral Rickover, the "father" of the nuclear Navy. Democratic members of the Joint Congressional Committee on Atomic Energy were instrumental in preventing Admiral Rickover from being cashiered from the Navy by the administration. It was the Congress which honored him with a congressional medal after he had been deliberately snubbed by the White House.

The Democrats in Congress recognized the strategic importance of marrying missiles and nuclear submarines and led the way in assuring sufficient funds and sound administration for the program.

From the outset it was a battle with the Republican administration which placed the state of the budget ahead of the state of the art. Right now the number of programed Polaris submarine systems could be increased four times. One would suppose that the Republican platform would have recognized the need for augmentation of the Polaris program. Only the Democratic platform did that.

In 1957 the Democratic Congress pressed for acceleration of the Polaris program. Finally in 1958, after observing that persuasion would not work, the Democratic Congress appropriated $600 million more than the administration requested for the Polaris system. Under the administration plan, at that point in time, only five Polaris submarines would have been programed. The action of the Democrats in Congress almost doubled this number, but the Bureau of the Budget withheld the money except for one submarine.

Actually this 1958 action by the Democratic Congress paid off, for the moneys were released during 1959. However, the administration's release of funds was on a slower schedule.

The Polaris battle of the budget was waged again this year. The administration for fiscal 1961 requested only three submarines and funds for long leadtime procurement of three more. Congress, with its understanding of the missile gap, appropriated money for 12 Polaris submarines.

Let us look at the box score. Left to their own resources, the Republican administration at best would have programed only eight Polaris submarines and scheduled three for long leadtime procurement. As things now stand, and after a successful fight by the Democratic Congress, 14 Polaris submarines are fully funded, and 7 can be scheduled for procurement. The score is this: Democrats, 21 Polaris submarines; Republicans, 11 Polaris submarines.

Each Polaris submarine, by the way, will carry 16 missiles.

The box score with fiscal year breakdowns is presented at the conclusion of my remarks. It is plain to see from this box score that the urgency in the Polaris program has been recognized by the Democratic Congress, which has usually made available more funds than the administration proposed.

The Navy, too, has recommended more Polaris submarines than the administration was willing to approve. The Navy was restrained by the administration in two ways: First, it had to trim its budgetary sails specifically on Polaris planning; and second, it had to work within restrictive overall budget ceilings set by the administration.

The restraint on Navy planning for the Polaris may be gaged by official Navy testimony that the desired objective is 45 Polaris submarines—720 missiles—and that the rate of construction could be stepped up to 12 submarines a year with existing facilities. This is four times the role endorsed by the administration for the past several years.

It will be said by administration spokesmen that the state of the art did not justify a speedup in the Polaris program in prior years. The Democrats in Congress had more faith and confidence in the capabilities of our scientists and engineers than did the budget-conscious administration. That confidence has been fully justified. Democratic leadership kept pace with, and gave impetus to, the Polaris program. The Republican administration lagged behind.

In summary, the Democratic Congress added four Polaris submarines to the administration program in fiscal year 1959. This would have added 64 operational missiles 2 years earlier than requested by the administration. Recognizing the congressional leadership in this program, the administration yielded to a degree. It granted the Navy funds for one more than the two budgeted, to maintain a three-per-year program. It finally released the funds for the other three over a year later, in fiscal year 1960. The result was a delay of 1 year for three submarines.

Just recently, as the election nears, the administration released funds for five submarines for fiscal year 1961, instead of three. Also, by releasing funds for five of the seven partially funded submarines authorized by the Congress, it has indicated a limited program of five per year, in lieu of the former three-per-year program. Even so, the administration is holding back funds for two partially funded submarines, which cannot be begun for another year. The result is a delay of 1 year for two submarines.

The total administration deficit under the program Congress actually provided is thus 1 year's delay for five submarines, or 80 missiles, not on station during the coming years of the Nation's greatest peril.

Funding of Polaris missile submarines

Fiscal year	Number in administration budget		Number provided by Congress		Funds released (actually programed)	
	Fully funded	Partially funded (long lead time items)	Fully funded	Partially funded	Fully funded	Partially funded
1958	3		3		3	
1959	2		6		3	
1960		(3)		(3)	3	
1961	[1] 3	3	[1] 5	7	[2] 5	[2] 5
Total through fiscal year 1961	8	3	14	7	14	5
	Total requested by administration		Total provided by Congress		Total programed	
	11		21		19	

[1] Includes 3 (denoted in parentheses) partially funded in fiscal year 1960 program.
[2] As announced in Secretary Gates' letter of August 1960.

Nuclear Propulsion for Space Exploration

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BROOKS of Louisiana. Mr. Speaker, on August 31 last the announcement was made of the establishment of a joint AEC–NASA Nuclear Propulsion Office, to consolidate the work which has been carried out by organizations in each agency to develop nuclear energy for space propulsion. I think that this action is a milestone in the progress being achieved by our Government in the accomplishment of our national objectives in space. It is a milestone to mark the sound, well-considered and evaluated scientific program through which the United States intends to place man in space and to make the exploration of the solar system a practical reality.

My committee, the Committee on Science and Astronautics, which has legislative jurisdiction over work of the National Aeronautics and Space Administration, has since its inception kept thoroughly informed and aware of the forward strides that have been taken in achieving the objectives of our national space program. In carefully watching NASA progress in space research and development, committee contact has been continuous. This committee-NASA relationship has been highlighted by outstanding space achievement.

It is an unarguable fact that the exploration of space is directly related to, and is the result of, progress that is made in propulsion. We are living through the years when the chemical rocket is the only means by which earth satellites, lunar satellites and deep-space probes can be launched. We already foresee and are swiftly reaching the point of development when chemical rockets will no longer provide the necessary boost to achieve our space missions. Today we have the Nova, a 6-million-pound liquid-fueled rocket in the mock-up stage. The gigantic proportions of this booster are considered to be the ultimate in practical utility. Even such a giant as this will not, by itself, place man in space and at the same time permit him to control at will his flight to the planets of our solar system. Hence we have been and are continually looking for new means and devices by which true space missions can be accomplished. Within a few short years, nuclear propulsion promises to give us the means to make manned exploration of Mars and Venus as well as unmanned deep penetrations to Saturn, Uranus, Neptune, and possibly even Pluto, a practical accomplishment.

As you know, Mr. Speaker, progress of research and development, to be valuable, must be built, block upon block, on a sound foundation of valid scientific accomplishment; and each block supporting those above it must be solid and well founded. There is really no such thing as "technical breakthroughs" in the scientific world. Each brilliant accomplishment is not a spontaneous great leap forward but is the culmination of years and years of persistent, unfaltering experimentation, testing, trial, success, and failure. Nuclear propulsion will become a reality in the same way.

In March 1959, my committee conducted extensive investigations, hearing testimony from the Nation's outstanding leaders in research and development, not only from the Government but also from private industry, on the progress that was being achieved in space propulsion. The report on those hearings gives a very clear picture of the immense effort and work that is needed to make nuclear propulsion a practical system. I quote from that report:

"When we leave the chemical propulsion systems for nuclear and electrical systems, we are going largely into unmapped territory." So stated an important industry witness in his appearance before the Science and Astronautics Committee. He went on to point out that some of the principal problems can now be recognized, but that any program for utilization must necessarily be long range and that specific problems remain to be recognized. However, he and other witnesses appearing before the committee on the subject of nuclear propulsion were confident that we would ultimately obtain this new means of space propulsion. The time estimates ranged from 5 to 10 years, with a consensus favoring 10 years.

As envisaged by most of the witnesses, a nuclear propulsion system would consist of a more or less conventional nuclear reactor which would be used to raise the temperature of liquid hydrogen from minus 423° F., convert it to a gaseous state, and expel it at temperatures from 2,500° F. to 4,000° F. This high-temperature hydrogen gas would then be expanded through a nozzle to produce a high velocity jet and thereby thrust. The principal departure from a chemical propulsion system lies in the utilization of a nuclear reactor to provide heat energy instead of obtaining it through chemical reaction. Specific impulses on the order of 1,200 pounds per pound per second would be obtainable at the higher temperatures. This is approximately three times as great as the highest specific impulse obtainable through chemical reaction. Even the lower operating-temperature reactors producing a specific impulse of 600 to 800 pounds per pound per second may represent sufficient improvement to be of interest. Project Rover, a national program to develop a nuclear engine, is based on this heat exchanger concept of propulsion. As a step in the Rover concept, the Kiwi-A test reactor was operated late this spring in Nevada.

The caution expressed by most witnesses as to an early completion of a nuclear rocket engine certainly seems justified by a consideration of some of the principal engineering problems to be solved. For example—

(a) Reactor controls must be made capable of bringing the reactor safely up to operating power within a matter of seconds.

(b) Methods must be provided to reduce heat from neutron and gamma radiation in adjacent engine components and propellant tanks. Radiation shielding is also a problem to limit induced radioactivity in adjacent structural elements.

(c) Consideration must be given to the fact that fission products will be carried by the propellant into the exhaust jet, producing considerable radioactivity in the surrounding area.

(d) Reactor materials will be required to operate at very high temperatures without

erosion, corrosion, or change in physical characteristics.

The major problem in obtaining the high efficiency possible with nuclear propulsion lies in the development of suitable materials to withstand the extreme operating conditions. The peak performance of a heat-exchanger type of rocket is fixed by the ability of core materials, moderators and reflectors, and structural components of the engine to withstand thermal stress, radiation damage, and corrosion and erosion. The attainment of a safe, reliable engine of high power is dependent upon gaining new knowledge of the properties of materials. It may be necessary to develop new alloys or ceramics to meet the stringent requirements. However it is considered possible to develop an engine which operates at lower temperatures, and therefore lower efficiency, using presently available materials.

During the 12-year period from 1945 to 1957, in spite of our best efforts in the great metallurgical laboratories of the country, we were able to increase the working temperatures at high stresses of metal alloys and ceramics only 300°, from approximately 1,500° F. to 1,800° F. This suggests the magnitude of the problem faced.

High temperatures are not the only problem encountered. We want to use hydrogen because of its low molecular weight, but hydrogen embrittles some materials, forms hydrides with others (with resultant corrosion) and forms volatile hydrogen compounds with others (thus eroding the material). Resistance to corrosion and erosion and ability to withstand high temperatures are not enough to qualify a material for nuclear engine use. Materials must also be able to withstand high stress imposed by temperature change and thrust loading. In some cases a material otherwise qualified for use may fail because it is not dimensionally stable under continued neutron bombardment or undergoes other changes in physical properties. A great amount of work is going on to determine and tabulate the properties of a large number of materials under conditions of high temperature and high stress, in the presence of corrosive and erosive substances and exposed to heavy neutron bombardment. For example, elements such as graphite, tungsten, tantalum, molybdenum, niobium, rhenium, and zirconium are under careful investigation. In many cases carbides, nitrides, and borides of these and other elements possess even better properties, and these, too, are being examined. Much work remains to be done and progress will certainly not be easy unless an unforeseeable breakthrough occurs.

Rewards for the solution of nuclear energy problems are great. For example, a theoretical mission of lifting a 50-ton payload from Earth to orbit around Mars and return to an orbit around the Earth, if done with a high-energy chemical propulsion system, would require a six-stage vehicle and a thrust unit capable of lifting 30 million pounds. On the other hand, if this same mission were to be undertaken with a nuclear-powered vehicle, only two nuclear stages would be required and the thrust unit would be required to lift only 3 million pounds.

While the main objective is to provide nuclear space propulsion, important corollary advantages will undoubtedly accrue. Solutions to many of the problems confronting us will result in far better nuclear powerplants for commercial use.

Mr. Speaker, no one is more aware of the need for urgency in our space programs than I. And may I say that I believe that my committee, insofar as our overall national space objectives and the scientific complex needed to achieve those objectives are concerned, is the most widely informed committee in the House and in the Senate. This is not to say that the Senate committee has not had broad orientation and experience in astronautics generally, but I emphasize that our committee has, as its responsibility, the entire area of science as well as astronautics.

Nuclear propulsion is not going to be a solitary achievement. It is going to be the product of the countless contributions that have been and will be made to its success by our entire scientific community. Therefore, our committee knows what measures will be necessary to give to our space effort the benefits of nuclear propulsion.

In our authorization hearings on the 1961 budget the committee diligently and minutely examined NASA's programs, including nuclear propulsion. My committee noted the fact that the Atomic Energy Commission had produced a nuclear propulsion device that showed great promise and indicated that great developmental strides had been made. One of our major witnesses at that time was Brig. Gen. Irving L. Branch, U.S. Air Force, Chief, Aircraft Nuclear Propulsion, Assistant Director for Aircraft Reactors, AEC. In his statement General Branch said:

Project Rover, our nuclear rocket development, is being conducted as a joint AEC-NASA program in which the AEC is responsible for the overall ground feasibility demonstration phases with NASA supporting this effort. Los Alamos Scientific Laboratory conducts the AEC portion of the program. NASA is, of course, responsible for follow-on flight application phases of the nuclear rocket development and its eventual application to the national space program.

You will recall that the Kiwi-A experiment, completed last July at Jackass Flats in the Nevada test site, proved not only the feasibility of the Rover device, but, also, was successful beyond our original expectations. We expect to be able to test next summer a vastly improved fuel element which will be an early step toward important space vehicle applications.

Thus General Branch concisely and clearly outlined nuclear propulsion progress to that date. In fact, General Branch stated to the committee that nuclear rocket propulsion is available—

* * * within the next 5 years, as a matter of fact * * *.

General Branch also pointed out, when questioned about NASA's funding for propulsion developments, that:

It is our opinion that this is a sufficient amount of money at this particular time to match up our capability with their—NASA's—requirement, and also to match up our capability with as rapid a growth in the state of the art at this particular time as we can go. We feel in the future we can go faster than the requirements call for, but at this particular time this is a sufficient amount of money to make a compatible requirement with our development capability.

Permit me to outline for the benefit of the House the scope of NASA programs aimed at the development of not only nuclear propulsion devices but also nuclear power systems. Our committee authorization report stated:

A total of $10 million is being allocated by NASA for this area of research which contains much promise for future application to rocket propulsion in deep space. The objectives of the program are to develop the components and technology required to permit the development of nuclear-powered systems to deliver large payloads to interplanetary objectives. The current emphasis in this program is on solution of the many technological problems that now stand in the way of nuclear system development.

The two principal types of nuclear systems that are considered suitable for the propulsion of high payload rocket systems in space are the nuclear heat transfer rocket system and the electrical propulsion system using a nuclear reactor system to generate electrical power. The nuclear systems technology program supports the work on the nuclear heat transfer rocket system and on the nuclear reactor electric power generating systems.

The nuclear heat transfer rocket is a system in which hydrogen is heated to high temperatures in a nuclear reactor to produce specific impulses in the range of 700 to 1,000 pounds of thrust per pound of hydrogen flowing per second. The high specific impulse potentially available from the nuclear heat transfer rocket permits the delivery of large payloads for various missions requiring high energy. The nuclear rocket can be used in booster rocket systems as well as in the space environment. Although early emphasis in the nuclear heat transfer rocket program was on research aimed at the development of large thrust or high reactor power first-stage rockets, the current goals of the program are aimed at accumulating the necessary research information required to develop a reactor flight test system that would be launched by chemical rockets. Such a system could eventually be incorporated into a space vehicle stage which would take off for its interplanetary objective after having been launched into an earth orbit by large chemical rockets. In this program, the NASA is working with the Atomic Energy Commission.

Nuclear reactor electrical power generating systems are required to supply the electrical power needed to accelerate charged particles or neutral plasmas to high velocities in order to produce thrust in the electrical propulsion systems which appear to have good capabilities for space missions. Analyses of space mission capabilities of these electrical propulsion systems have indicated that such systems will be competitive with the low thrust nuclear heat transfer rocket system described above. One of the disadvantages of the electrical propulsion system is the long trip time involved as the result of the low ratio of thrust-to-stage weight. One of the advantages of the electrical propulsion system is that the electrical generating equipment may be used for communications when the payload has been propelled to its planetary objective.

It is one of the purposes of the present program to do the research necessary to develop high power, lightweight nuclear reactor electric generating systems. It is felt that the development of such high-power systems must wait for the accumulation of various fundamental data and research on critical components of the system. In addition to the funds required for applied research leading to advanced high-power systems, funds are included in this program to continue the development of a system for converting energy from nuclear heat to electrical power using currently available information. This conversion system will be matched with the SNAP-8 reactor being developed at the request of the NASA by the Atomic Energy Commission. This reactor electric system will produce enough power to supply communications needs for planetary missions as well as to test early versions of electrical propulsion systems.

The work under this program is divided into nuclear reactor electric generating systems and nuclear heat transfer rockets. The fiscal year 1959 funds for nuclear reactor

electric generating systems were used to design conversion equipment for a nuclear-electric system (SNAP–8) and to initiate fabrication of the components. In addition, work was started on the acquisition of data that will be required in the design of higher power, higher temperature systems. Funds for the support of the nuclear heat transfer rocket reactor test program were transferred to the Atomic Energy Commission to undertake the development of a pump that will be used in the test program. In addition, funds were used to initiate experiments (such as the effect of radiation on the properties of materials at cryogenic temperatures) that will supply information necessary in the eventual design and operation of nuclear rockets.

In the fiscal year 1960, the components of the nuclear electric system will be fabricated and component testing will be initiated. The work on the fundamental information required to permit the design of higher power, higher temperature systems will be expanded. For instance, work will be undertaken on the corrosion characteristics of high temperature working fluids. The support of the reactor test program will be expanded. This development of a pump for operation under the conditions required for early reactor testing will be completed, and research and development on a pump drive system will be undertaken. Work on the fundamental information that will be required in the design of nuclear rockets will be expanded. For example, work on shielding methods will be undertaken. The test loop for the study of radiation effects at cryogenic temperatures will be designed, fabrication will be started, and preliminary tests will be run.

In the fiscal year 1961 the first conversion system tests will be run as part of the nuclear-electric system (SNAP–8) development program. Much of the fundamental data required for the design of components of a high-power, high-temperature system should be completed so that early applied research design and experimental studies should be initiated on critical components of such systems. In the nuclear heat transfer rocket program, it is planned to develop the turbopump to full rated performance for use in higher power reactor tests than those considered in the fiscal year 1960 pump development. Work will be expanded on the other nonnuclear components that will be required in the nuclear rocket system.

Thus, Mr. Speaker, I have attempted to give a picture of the enormous amount of work, study, research, and development that will be encompassed in creating nuclear propelled rockets. In my 2 years as chairman of the House Science and Astronautics Committee I have become convinced that people in and out of Government who do not have an overall view of our space program cannot properly appreciate the amount and degree of human achievement that is involved. And this achievement will not be realized merely by appropriating money and by Government directive. As an example, years of testing, experimentation, trial, success and error produced the IRBM's and ICBM's upon which our current space missions are completely dependent. These were produced at the price of not only money but "Blood, sweat, and tears". Space exploration by means of the nuclear-propelled rocket will come at no less an effort.

Our success in launching earth satellites and deep-space probes has been unmatched in the world. Our scientific accomplishments made possible by these vehicles have far and away exceeded those of any other nation.

We must build soundly for the future. If we are to achieve nuclear propulsion it must be a real achievement and not just a propaganda device. Achievement does not come quickly. Therefore, I believe that this step in joining NASA and the AEC in a formal organization to promote the development of nuclear propulsion is only one of many significant steps that will be taken to attain that goal.

We are a people who are dedicated to the ideal that science is truth and its accomplishments should be utilized to benefit all mankind. I and my committee colleagues are actively dedicated to this ideal, and we pray that when the true exploration of outer space is made possible by the creation of an efficient system of nuclear propulsion, mankind will approach this great adventure in harmony and good will.

Memorial to the Late Senator Richard L. Neuberger Urged

EXTENSION OF REMARKS
OF
HON. HALL S. LUSK
OF OREGON
IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. LUSK. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD, along with my statement, a resolution by the Clatsop County Democratic Central Committee of Astoria, Oreg., urging the erection of a memorial to the late Senator Richard L. Neuberger.

There being no objection, the statement and resolution were ordered to be printed in the RECORD, as follows:

MEMORIAL TO THE LATE SENATOR RICHARD L. NEUBERGER URGED

The late Senator Richard L. Neuberger successfully sponsored legislation authorizing the establishment of Fort Clatsop National Memorial, located in Oregon at the mouth of the Columbia River near the city of Astoria. This is Oregon's first national historical shrine. Construction is now under way and commenced in our State's centennial year, 1959. It was in 1958 that President Eisenhower signed into law legislation sponsored by the late Senator establishing Fort Clatsop National Memorial and its formal dedication is expected sometime next year.

Fort Clatsop has played an important role in our Nation's history. It was here that Meriwether Lewis and William Clark spent the winter of 1805–06, the western terminus of their historic expedition authorized by President Jefferson. For the first time men carrying the American flag had spanned the continent.

If it were not for the expedition of Lewis and Clark our Nation would not have been able to support its claim to the great Pacific Northwest. Our country's claim prevailed and as a result this district west of the Rocky Mountains is the only part of our domain which was neither fought for nor bought, but directly the result of the expedition of Lewis and Clark.

Mr. President, recently I received a resolution adopted by the Clatsop County Democratic Central Committee and the Democratic Party of Oregon, urging the placing of a suitable monument or marker at the site of the Fort Clatsop National Memorial in honor of the late Senator Richard Neuberger.

I believe, Mr. President, that it is most appropriate and fitting that the memory of this great U.S. Senator be honored by such a memorial. I have considered it a privilege to serve as his successor.

The resolution follows:

"RESOLUTION OF THE CLATSOP COUNTY DEMOCRATIC CENTRAL COMMITTEE, ASTORIA, OREG.

"Whereas it was due to the untiring work and devotion of the late Senator Richard L. Neuberger that Fort Clatsop was declared a national memorial by the Congress of the United States and the necessary funds were provided to carry out the work of making Fort Clatsop a national shrine; and

"Whereas the Fort Clatsop National Memorial is of great historical interest and will attract thousands of visitors in coming years: Now, therefore, be it

"Resolved, That the Clatsop County Democratic Central Committee and the Democratic Party of Oregon acting jointly do go on record as urging that in recognition of Senator Richard Neuberger's work and devotion that a suitable monument or marker be placed at the site of Fort Clatsop in honor of the late Senator; and be it further

"Resolved, That copies of this resolution be presented to the Oregon congressional delegates, Department of Interior Secretary Seaton, Gov. Mark Hatfield, Mrs. Maurine Neuberger, the Oregon Historical Society, Clatsop County Historical Society, and other interested parties."

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. FRANK M. CLARK
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. CLARK. Mr. Speaker, this fall Americans of Ukrainian descent will celebrate the 20th anniversary of the founding of the Ukrainian Congress Committee of America and I should like to pay tribute to this outstanding group of citizens, and especially to those residing in the 25th Congressional District of Pennsylvania which I represent in Congress.

Twenty years ago a group of patriotic, freedom-loving Americans, representing 40 million of their Ukrainian countrymen enslaved by Soviet rule, founded the Ukrainian Congress Committee of America. Since that time 2½ million Americans of Ukrainian ancestry have sought to inform the world of the struggle and desire of the Ukrainians for independence from the Soviet Union. By exposing myths of Soviet unity and proposing means of defeating the Soviet in the cold war, the Ukrainians in America seek to keep alive the spirit of independence and individualism so characteristic of their enslaved countrymen, unable to speak to the world for themselves.

The Ukrainians declared themselves independent in 1918. In 1920 they were taken under Soviet domination. However, those 2 years of freedom still remain in the hearts of the Ukrainians. To be independent once again is their

goal. To reassert their individualistic culture and to reap the benefits of their rich land in their own name is the desire to be always cherished.

The members of the Ukrainian Congress have worked arduously to keep alive the memory of the Ukrainian people. But they are realistic enough to realize that under existing world conditions and the might of the Soviet rule, independence for the Ukrainian people is not likely to come tomorrow. The Congress has done equally as valuable work in informing the world of the struggles not only of the Ukrainians but of all enslaved peoples behind the Iron Curtain. Just to make their fellow Americans and the other free peoples throughout the world aware of Soviet disunity is a vast and rewarding task. If we are to win this war of the minds against tyranny, we must teach and keep alive those values and freedoms we think so valuable. This is what the Ukrainian Congress is doing. I congratulate it on its fine work, and I encourage it to continue to promote its ideals throughout the world.

Parallel of Two Republican Presidents

EXTENSION OF REMARKS
OF
HON. JAMES ROOSEVELT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, I had thought before the Republican National Convention that both President Eisenhower and former President Hoover were in agreement about what policies to pursue and what economic social and moral conditions our Nation is in. Well, imagine my surprise when I heard their speeches and later having an opportunity to read them. They do not agree at all. Let me give you some examples:

How is free enterprise working these days under Republican rule? Here are President Eisenhower's words:

> Private enterprise, dependent upon the vigor of healthful competition, leads to individual responsibility, pride of accomplishment, and, above all, national strength. This has always been, is now—and I pray will always be—basic Republican doctrine.

Yet one must wonder whether God is really blessing free enterprise as that term is interpreted by the Republicans. Listen to what President Hoover has to say about that matter as he looks around from his perch in the Waldorf Towers:

> Beyond the terrifying warnings of statistics, we can hardly believe that integrity and moral steadfastness are increasing when we witness the constant exposure of State and municipal corruption. We daily read blazoned headlines in the press exposing corrupt practices in some nationwide services and the fraudulent practices of some distributors of our daily necessities.

And what about our moral posture and our image as the commentators call the ideals and values of America? Listen to President Eisenhower, the fervent crusader, who sees nothing but happiness and joy about him while our Nation suffers from a crisis as serious and as insidious as has ever faced a people.

> The irrefutable truths are that the United States is enjoying an unprecedented prosperity; that it has, in cooperation with its friends and allies, the strongest security system in the world, and that it is working ceaselessly and effectively for a peace with justice and freedom. Our own mounting living standards and the history of the Republican years, provide the proof that these are facts. * * * I have come before you in this assembly to testify to my great pride in the America of today; and my confidence in the brightness of her future. I glory in the moral, economic, and military strength of this Nation in the ideals that she upholds before the world.

But that other purveyor of prosperity who at another time gloried in our economic and moral strength while a nation went hungry and lost its way has this to say about the Eisenhower years.

> I do not need to tell you that today our country is faced with the gravest dangers from overseas in all of our history. Today, America is in the midst of a frightening moral slump. During the 14 years following the Second World War, our statistics show that major crimes in most of the years have increased three times as fast as the population. * * * During this same period since the end of the war, our cities have become increasingly infected with teenage gangs with criminal intent.

Mr. Hoover closes his speech saying that the moral decay of the last 14 years must stop.

> Yours is the task to stop the moral retreat, to lead the attack and to recapture the meaning of the word—America.

And President Eisenhower says in his close exordium for more of the same.

> Over and above strictly material accomplishments, the American people have every reason to be proud of their many domestic achievements during these Republican years.

Mr. Speaker, I am sure that the American people are ready to turn away from the two-headed Hoover-Eisenhower brand of politics and leadership. Theirs is the politics of drift, of inaction and frustration. Both while in office faced problems of the most serious kind. Neither was able to fulfill the position of the Presidency with the kind of acumen, understanding, and leadership the times demanded. However, President Hoover has certainly shown himself to be the shrewder analyst and commentator on today's world than President Eisenhower judging from a comparative analysis of the speeches which they made at the Grand Old Party's convention.

Twentieth Anniversary of Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. FRANK KOWALSKI
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, this fall Americans of Ukrainian descent will celebrate the 20th anniversary of the founding of the Ukrainian Congress Committee of America, Inc., an organization which has compiled a splendid record of achievements.

Speaking for 2½ million Americans, the Ukrainian Congress Committee has served primarily as an educational organization.

It has kept Ukrainian-Americans fully informed on events behind the Iron Curtain, especially the efforts of the dozen captive non-Russian nations within the Soviet Union.

It has served the United States, particularly our national security interests, by bringing to the attention of our Government important facts about the cold war.

I congratulate the Ukrainian Congress Committee on its achievements. I wish it many more years of success.

State Department Acts Belatedly on Banning of Masaryk Stamp by Government of Czechoslovakia

EXTENSION OF REMARKS
OF
HON. FRANK KOWALSKI
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. KOWALSKI. Mr. Speaker, the decline in American prestige abroad can be attributed in substantial part to the vacillation and delay which are characteristic of the State Department under the present administration.

Just a few days ago, on August 25, the State Department announced that it had sent a note to the Czechoslovak Government requesting information on the barring of U.S. mail bearing stamps honoring the great patriot of the Czech Republic of lamented memory, Thomas Masaryk.

As long ago as last May, Mr. Speaker, I asked the State Department not to seek information but to protest strongly to the Czech Government against its refusal to deliver mail carrying Masaryk commemorative stamps.

I pointed out in May, and in another letter early in June, that the facts were indisputable—that the Czech Government was dumping some mail from America with Masaryk stamps, was returning other mail to the American senders with the notation, "Not Admissible." I also informed the State Department that the Czechoslovak National Council of America had evidence that in some cases letters were being delivered in Czechoslovakia with the Masaryk stamps removed from the envelopes.

These actions by the Czech Government are in clear violation of international postal agreements.

After all these months, the best our State Department can offer is a request to Prague for information about the banning of the Masaryk stamp.

We do not need information, Mr. Speaker, since we have the facts. What we need is strong action by our State Department to compel the Communist

rulers of Czechoslovakia to abide by international regulations and stop interfering with mail sent from this country.

Here we have had an opportunity, now largely lost, to bring before the world that the Communist government of Czechoslovakia is so apprehensive that it will not allow its people to see on postage stamps the picture of a great Czech leader who fought for and helped win freedom for his country.

Last spring, I suggested that our Government bring this story to the whole world, to underscore how reluctant are the rulers in Iron Curtain lands to let their people be reminded of their days of freedom.

I submit, Mr. Speaker, that this case called for much earlier action and for something stronger than a polite request for information. It is another administration fumble which has cost us a great opportunity.

Method of Detecting Carbon Monoxide and Other Gases

EXTENSION OF REMARKS
OF
HON. CARROLL D. KEARNS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. KEARNS. Mr. Speaker, early in the next session—if my constituency sees fit to return me to Washington—I plan to introduce a bill for which it has been proven that there is a great need; namely, requiring the use of a method of detecting carbon monoxide and other gases, especially in public conveyances, where there has been tragic loss of life due to gas poisoning.

Mr. J. Roy Snyder, an outstanding young constituent of mine from Sharon, Pa., has spent a great deal of time developing a safety device which will sound an alarm when danger is imminent. He has a patent pending on his invention and recently demonstrated it to the Interstate Commerce Commission, where great interest was shown.

Some of the reasons Mr. Snyder has devoted so much time to developing this safety device are as follows:

First. There is no other method known of detecting and sounding an alarm in a motor vehicle. With the alarming increase of carbon monoxide poisoning and deaths, and the changing design of trucks and buses to cab over engine—thus placing the driver's location directly over the engine and exhaust manifold—this danger is being increased. Another increase in this respect is the exhaust outlets on trucks now carried to the top of the window of the cab. Some of these outlets are at such a height, and all are located on the right-hand side of the trucks, that on superhighways when a truck is being overtaken and passed by another truck, the passing truck's exhaust is blown directly in the open window of the truck being passed. In cab-over-engine trucks, when the engine is checked for any purpose, the entire cab is constructed to raise. To do this, a joint is provided to allow the exhaust pipe to raise with the cab. If this joint is bumped or damaged, gas can leak directly into the cab. Extreme care must also be used when lowering the cab to normal position or the proper seal will not be made on the exhaust causing the same hazard.

Second. A great majority of trucks are now being equipped with either gasoline or bottled-gas type of heaters on which there is no provision of proper exhaust. Many drivers have met their deaths with this type of equipment, particularly in sleeper cabs of trucks. These are trucks designed with a bed in the cab of the truck. Many a driver has gone to sleep in these and never awakened. In the South and West trucks are now equipped with air conditioning. This requires all windows to be closed, thus increasing the danger of gas poisoning.

Third. With the alarming increase of truck accidents in which one truck runs into the back of the preceding truck or car, and where no apparent reason or cause can be found, it is quite logical to conclude, after assembling all the known facts from insurance investigation records, ICC reports, and 2 years' questioning of drivers and investigators, that human resistance is lowered by fatigue and, after arduous hours of driving, the known factors of carbon monoxide are lowered. The standard known effects of carbon monoxide on humans, as taken from the Bureau of Standards Tech Paper No. 212, shows that as little as 0.02 percent of carbon monoxide in atmosphere has perceptible effects in 1½ hours and 0.04 percent is dangerous to life in 2 hours. It can be readily seen that this can be a major factor in national safety.

Fourth. All buses which are engaged in carrying the thousands of passengers each year should also be protected from this hazard. This can be attested to by such instances as the two busloads of Mexican workers who were casualties just this past spring and the 37 pupils overcome on the Pennsylvania Turnpike this year.

Fifth. The Department of Education is also aware of this danger in the thousands of school buses engaged in transportation of our children each year, these being engaged in traveling over all kinds of unimproved roads where the danger of damage to the exhaust system is even greater. All kinds of safety equipment and fire protection have been installed on motorized transportation, but nothing has been done to overcome this greatest hazard, chiefly because nothing has been available.

There is now a unit available which is both economical and practical which will not only detect all gases and vapors, but will sound a visible and audio alarm when any such gas enters these vehicles.

The unit is self-contained in a box 5 by 7 by 2 inches and will operate from the electrical system of the bus or truck. It reads the air content of the vehicle on a meter and at all times shows any entrance of gas and the percentage of same, sounding an alarm or turning on a ventilation system to clear the gas and thus afford safety at all times to all occupants and make for greater safety on our highways which have become our Nation's greatest killer and where millions of dollars of material and equipment are lost each year.

Facts of F–27 Funding Action by Congress

EXTENSION OF REMARKS
OF
HON. JOHN R. FOLEY
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. FOLEY. Mr. Speaker, because of its importance and the widespread interest in the action of the 86th Congress on appropriation items for F–27 aircraft produced by the Fairchild Engine & Airplane Corp., at Hagerstown, Md., I am inserting in the CONGRESSIONAL RECORD a chronological recital of action by the House of Representatives on these items.

In the early part of February 1959, the Fairchild Washington representative visited my office to discuss the decision of the House Defense Appropriation Subcommittee in denying an Air Force F–27 request in January of 1959.

As a result of this conference, the following letter was sent to the chairman and each member of the subcommittee:

FEBRUARY 17, 1959.

Hon. GEORGE H. MAHON,
Chairman, Subcommittee on Military Appropriations, Committee on Appropriations, House of Representatives, Washington, D.C.

DEAR COLLEAGUE: Very frankly this is a request for reconsideration of the subcommittee's recent elimination of the Air Force request to purchase 10 Fairchild F–27's to be used for the Overseas Air Attaché Mission. I am writing to you to explain the extreme importance and the emergency aspect of this procurement program to the continuation of the Fairchild Co.'s operations in the Sixth District of Maryland. Many of the considerations presented before the subcommittee recently are still fresh in your mind. However, I should like to present certain aspects which may not have been submitted to the subcommittee.

Approximately 6,000 employees living in the Hagerstown, Md., area are directly connected with the production of this aircraft. The Fairchild plant is the largest employer in the whole Sixth District of Maryland. This fact points up the strong economic influence that the Fairchild plant has on the district in general and on the Hagerstown area in particular. During the past year, from January 1, 1958, to January 31, 1959, approximately 2,000 were laid off by Fairchild. An additional 500 is scheduled for layoff between now and June 1, 1959. Yesterday, Monday the 16th, 250 persons were given layoff notices. As a result, the unemployment figure in the Hagerstown area, 11.7 percent of the employable population. In the past, the Fairchild plant has employed approximately 39 percent of the work force in the Hagerstown area. An acute depressed condition now exists in the Hagerstown area. Only if the Fairchild plant can intensify production of the F–27 aircraft is there a possibility for the alleviation of this condition.

The subcommittee may have been informed of the Air Force's recent cancella-

tion of the Goose missile which was produced entirely in Hagerstown. In addition, the J–83 engine for the Goose missile was canceled. These cancellations have cost Fairchild not only considerable current income production and profit but amount to approximately $200 million loss in future business. In 1958, Fairchild lost approximately $8 million. The company is anticipating additional operating losses this year, 1959. The company is not independently strong enough financially to survive these blows. A military order for the F–27 airplane is needed at this time, not only for the dollar volume involved, but equally important for the vote of confidence in the company and in the F–27 airplane.

There are sufficient current orders on hand for commercial aircraft to continue the production through all of 1959. However, there is a substantial dollar loss on each commercial plane produced this year.

A small military order and the prospects of additional military production is needed in order to bring the F–27 production volume up enough to produce in the black.

These harsh economic facts for this one particular company would not merit special consideration by the subcommittee if it were not for the fact that the F–27 is peculiarly fitted for existing missions. By this I mean the aircraft is one of the best suited for certain continuing missions carried on by the Air Force. Thus, this is not a request for a make-work project. The Air Force has requested this procurement based on current mission needs, irrespective of the unemployment and the company's economic position. The missions to which the F–27 would be assigned by the Air Force fall into the following categories:

1. The F–27 is a natural replacement for the DC–3 (C–47) which the Air Force uses as a general workhorse all over the world. The DC–3's are anywhere from 12 to 18 years old. They are getting expensive to maintain; the spare parts problem grows more acute with time; and they are wholly unsuited to a number of Air Force missions today.

2. The Air Force could use the F–27 in the photographic and charting service in the low and medium altitudes. The F–27 is the best airplane in the world for this use because of its high-wing configuration. The commanding general of the charting service at Orlando, Fla., has requested the F–27 in the most glowing terms.

3. There is the medical air evacuation mission, particularly in Europe, South and Central America. Because the Air Force is responsible for the medical care of not only its own personnel, but State Department personnel and oversea Government agency employees, some 1,200 people are transported each month by the Medical Air Evacuation Service, ranging from Burma to Iceland. These people are carried from bases or places of employment to military hospitals, etc. The capacity of the F–27 for either ambulatory or litter patients, or both, greatly exceeds that of the C–47 (DC–3). With its jet engines and vibrationless performance, it can do the medical mission better than any airplane presently flying.

4. There is a navigational training mission. The F–27 is particularly suited for the work carried on at the Air Academy, Colorado Springs, Colo. Because of its superior high-altitude and hot-temperature performance, the F–27 is ideally suited for student navigational training work. There are navigational training jobs at a number of air bases in the United States where present aircraft should be replaced by a more modern aircraft.

5. The Caribbean Air Command based in Panama has a daily flight requirement of supplying high-priority equipment, mail, and personnel to some 20 military missions maintained by our Government in Latin, Central, and South America. This work is now being accomplished by old DC–3's. The DC–3's are also being used to furnish high-priority cargo and personnel service to a number of remote radar facilities.

6. The air attaché mission, particularly for countries close to or behind the Iron Curtain, is now carried on by old DC–3's.

In general, because of its greater range, larger payload, and additional speed, an F–27 has 2½ times the productivity or usefulness of the C–47. It costs $0.56 a ton-mile to operate a C–47 today. It costs $0.22 a ton-mile to operate the F–27. Thus the F–27 does 2½ times more work than the C–47 at only 39 percent of the ton-mile cost.

At the recent subcommittee hearing, only the air attaché or embassy use was presented to the committtee by the Air Force. However, the foregoing specific missions indicate that the F–27 has a much wider use and the Air Force has a much greater and broader need for this type of aircraft. For this reason, I have taken the liberty of presenting to you the extreme economic need for the production of this aircraft in my district; the precarious financial condition of the Fairchild Co. unless there is an early military procurement of the F–27. The need for the aircraft exists and can be strongly demonstrated before the subcommittee. I have been reliably informed that Gen. Thomas White, Chief of the Air Force and Lt. Gen. C. S. Irvine, head of the Air Force Procurement Office, are anxious to procure the F–27 for the missions outlined above.

You are respectfully requested to consider the facts set forth in this letter, many of which I believe will come to you for the first time. All of them can be supported by testimony and documentary evidence. It is hoped that the study of these facts will induce you to reconsider the subcommittee action to the end that a further hearing on the Air Force's need of the F–27 will be held.

By way of summary, the unemployment situation in the Hagerstown area is acute owing to the cutback in the production by the Fairchild plant. Alleviation of this unemployment can be accomplished only through expanded production of the F–27 airplane. This expanded production at this crucial time can be accomplished only through the Air Force's procurement of the F–27 to meet the needs outlined above in the numerous missions defined. Since a genuine need for this aircraft exists in the Air Force and since an immediate military order for its production is essential for the continuation of the very life of the Fairchild plant itself, the subcommittee is urged to consider this request favorably.

Very truly yours,

JOHN R. FOLEY,
Member of Congress.

Air Force officials did not later appear before the Mahon subcommittee to make a request for an F–27 appropriation item in the 1960 budget. Debate on the 1960 Defense budget began in early June 1959. On June 2 at about 3 p.m. a telephone conversation was held with the Fairchild Washington representative concerning the omission of an F–27 item in the House proposed Defense budget for aircraft procurement. Approval was given by the Fairchild representative to inform Chairman MAHON that an F–27 item amendment would be offered from the floor of the House at the appropriate time. The Air Force officials had made no request for the F–27 item from the House subcommittee. Every indication existed that the said Air Force officials would not make a request from the Senate subcommittee. Accordingly, on June 2, 1959, time was requested and granted by Chairman MAHON for an amendment to be offered from the floor for the F–27 item. On June 2 permission was also granted by Chairman MAHON to inform the Members of the House that such amendment would be offered. A portion of the presentation on June 2, 1959, as it appears in the CONGRESSIONAL RECORD is as follows:

Mr. MAHON. Mr. Chairman, I yield 5 minutes to the gentleman from Maryland [Mr. FOLEY].

Mr. FOLEY. Mr. Chairman, I have asked our distinguished chairman of the Department of Defense Appropriations Subcommittee for an opportunity to rise before you today to inform you that I intend to offer an amendment to the bill pending before the committee at the proper moment. I want to present to you very briefly the factual basis for my amendment. In my short period here in the Congress, I have never met up with a more classic example of bureaucratic bungling, hesitancy and failure to decide and lack of consideration for human elements than the facts of the case I am about to present to you. In my district, at Hagerstown, Md., we have a relatively large aircraft producer, Fairchild Engine & Development Corp. At this very moment that I stand here, over 10,000 people have no source of income, no means to buy food, no source of the wherewithal to pay the weekly rent, and it all goes back to bureaucratic bungling. Let me read to you a few facts which I received this past week from the Maryland Department of Employment Security, affiliated with the Bureau of Employment Security. They present facts that were prepared and collated during May of this year:

"Unemployment at Hagerstown was estimated at 4,425 or 11.7 percent of the civilian labor force of 37,675 in April 1959."

This is the largest depressed area with the largest unemployment in the State of Maryland. This official State agency finding continues:

"The major factors contributing to this employment decline at Fairchild are the cancellations of the defense contract for the C–123 cargo type aircraft as well as the $50 million contract for the Goose 'decoy' guided missile. In the past month, production was also cut on the F–27, a turboprop type of aircraft used primarily for short hauls and commercial business."

I am going to present to the Members of the Committee of the Whole House another side of the spectrum of aircraft vehicles. I am going to present a request that the Air Force be authorized and money be provided to procure only 10 of these turboprop type aircraft for various uses that I will enumerate in due time. This large and increasing group of unemployed persons in Washington County as found by the Maryland State agency are as follows:

"Included in the unemployed are professional personnel, skilled workers such as turret-lathe, milling machine, tool makers, aircraft electricians, welders, maintenance and sheet metal workers, and semiskilled, such as bumper operators, welders, milling machine operators, engine lathe operators, riveters and assemblers."

The report concludes:

"If new military contracts are not obtained by Fairchild Aircraft in the next few months the already crucial unemployment problem will become more acute as the winter advances."

And finally:

"There is no anticipated industrial expansion to absorb the large number of jobless aircraft and construction workers. The outlook for the Hagerstown area is for continuation of the problem of critical unemployment. By the end of May the U.S. Department of Agriculture will begin to distribute free food packages to 975 families

representing 3,200 people, and they estimate another 3,000 are eligible for this assistance."

* * * * *

I am talking about the F–27 aircraft. This F–27 aircraft as contained in the brochure I hold in my hand is listed as a military utility transport. Let me enumerate just briefly some of the uses that this new aircraft can be put to and should be put to and will be put to as I will explain when I offer my amendment tomorrow.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. FOLEY. Mr. Chairman, will the gentleman yield me 2 additional minutes?

Mr. MAHON. I yield the gentleman 2 additional minutes, and after that I shall move that the Committee rise.

The CHAIRMAN. The gentleman from Maryland is recognized for 2 additional minutes.

Mr. FOLEY. This aircraft, because of its greater range, larger payload, and additional speed, an F–27 has 2½ times the productivity or usefulness of the C–47. It costs 56 cents a ton-mile to operate a C–47 today. It costs 22 cents a ton-mile to operate the F–27. Thus the F–27 does 2½ times more work than the C–47 at only 39 percent of the ton-mile cost.

On June 3, 1959, at 5:20 p.m. an amendment for the F–27 item was offered from the floor. Part of the presentation as it appears in the CONGRESSIONAL RECORD and the action on the amendment is as follows:

Mr. FOLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

"Amendment offered by Mr. FOLEY: On page 22, line 23, delete '$4,165,700,000' and substitute '$4,175,700,000.'"

Mr. FOLEY. Mr. Chairman, my amendment is at bottom an appeal to you Members of the Committee of the Whole. It is an appeal that I make as an elected Representative of many thousands of unemployed persons in the Sixth District of Maryland and the many more thousands who are dependent upon these unemployed persons. As I pointed out yesterday in my remarks to the Committee, appearing on pages 9608 and 9609 of the CONGRESSIONAL RECORD, volume 105, part 7, these unemployed persons are highly skilled, many of them professional employees and many semiskilled employees. They are employees laid off by the Fairchild Co. in Hagerstown, Md., within the past 17 months.

* * * * *

Last August, in 1958, the Air Force officials requested approval of procurement of the F–27 from the Senate Appropriations Subcommittee. Because of the lateness of the hour of the request, the F–27 was not included in last year's budget. In January of 1959, before the House Subcommittee on Department of Defense Appropriations, of which the distinguished gentleman from Texas is chairman, the request was made for approval of the F–27 for limited air attaché or embassy use. This request was turned down by the subcommittee. In my subsequent conversations with the members of the subcommittee, by letter and by personal visit, I pointed out the many broader and greater needs for the F–27 by the Air Force. I will itemize these needs a little later. Suffice it to say that the Air Force has seen this aircraft and has approved the aircraft and has demanded the aircraft.

I can inform the Members of the Committee without any fear of contradiction that Gen. Curtis LeMay has requested this aircraft, that Gen. Thomas White, Chief of the Air Force, has requested this aircraft, that the Air Force Weapons Board has approved the F–27 and has requested through channels requisitions of the aircraft. Moreover, an Air Force committee, studying the future needs of support aircraft to replace the C–47, the old DC–3, has recommended the purchase of 150 of the F–27's over a period of time. Yet, in the face of this expert appraisal and recommendation of the top Air Force defense official, the civilian spokesman for the Department did not come before the Defense Appropriations Subcommittee and request the F–27 for the 1960 fiscal year.

Let me remind you that last December the Air Force canceled the Goose missile. The Air Force has terminated production of the C–123. Fairchild Co., as a result of these actions, has had to lay off close to 3,000 of its employees within the last 17 months. The company lost considerable money in 1958, and will lose increasing amounts in 1959. In fact, unless there is a military requisition effective within a few months to come, the whole F–27 production program of Fairchild will come to an end.

For this reason, I have presented this amendment to the Committee of the Whole House. Since the top spokesman for the Air Force, for no reason, to my mind, failed to request this necessary aircraft vehicle, I, as the elected Representative of the many thousands of unemployed persons and the last person who can register an appeal with you Members of the Committee of the Whole House, you who are the last refuge for my constituents, make this appeal for support of my amendment. For in our governmental system, it has been necessary for me to wait until this very moment to have the authority and opportunity to make a request of the Committee of the Whole House for appropriations for these needed aircraft vehicles.

* * * * *

An F–27 has two and one-half times the productivity or usefulness of the C–47. It costs 56 cents a ton-mile to operate a C–47 today. It costs 22 cents a ton-mile to operate the F–27. Thus the F–27 does two and one-half times more work than the C–47 at only 39 percent of the ton-mile cost.

The CHAIRMAN. The time of the gentleman from Maryland [Mr. FOLEY] has expired.

Mr. MAHON. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

* * * * *

Mr. STAGGERS. Mr. Chairman, I rise in support of the amendment. I should like to say that I agree with what the gentleman from Iowa [Mr. WOLF] said about our colleague from Maryland, JOHN FOLEY, that he is sincerely trying to do a good job for his people.

Certainly, he is here today making an earnest plea for several thousand unemployed people in his district as well as their families.

Mr. Chairman, there are some points that I would like to emphasize following what my colleague has told you about this situation.

First, a proven aircraft producer, namely Fairchild, of Hagerstown, Md., will be saved from imminent economic disaster, and I am not overstating the case.

Secondly, a proven aircraft, namely the F–27, a logical economical replacement, for the old DC–3, will be provided the Air Force.

The gentleman pointed out several other facts in support of his amendment, but I suggest the strongest point that he has to make is the saving of one of our pioneer aircraft producers from possible disaster. The gentleman is making a plea and so am I for several thousand workers, and also for the modernization of our Air Force, and to do away with a lot of the obsolete DC–3's that are now being operated all around the world, with many of them that have been held over since World War II and replacing them with modern jet airplanes that will be capable of doing a much better job and at much less cost, in other words, at about 39 percent of the cost of operating the old DC–3's. The Air Force itself has made a plea for this. I do not know why the Air Force did not come before the committee, but as the gentleman from Maryland [Mr. FOLEY] pointed out, General LeMay and General White, I believe were in favor of the F–27. The F–27 has proven its worth and its capabilities. I am certain it would help to modernize our Air Force and replace a lot of planes which are now obsolete.

The F–27 has also proven its worth in air medical evacuation. Some of the officers who are in charge of this have said that they would like very much to have this plane.

Mr. Chairman, I hope the amendment offered by the gentleman from Maryland is adopted.

The CHAIRMAN. The Chair recognizes the gentleman from Texas [Mr. MAHON].

Mr. MAHON. Mr. Chairman, the Air Force requested funds for certain cargo planes which were eliminated by the committee, and which represent a reduction of $50 million. Certain other administrative type of planes were also eliminated from the budget. The plane in question is one manufactured by Fairchild at Hagerstown. It was not presented to us as a budgetary item at all for 1960. It was discussed somewhat with regard to the program for fiscal year 1959. I have the greatest sympathy and the greatest interest in the people involved here, but, Mr. Chairman, there have been many cancellations of programs throughout the Nation and many people have lost their jobs. Of course, such a thing is always regrettable, but the object of our defense program is to provide the best possible defense for the country with the maximum utilization of the funds available. If we use these funds primarily to aid communities with unemployment problems, we will get ourselves very far afield from our main objectives. I want to say in behalf of the gentleman from Maryland [Mr. FOLEY] that he has done a diligent and a good job in presenting this very serious problem to the Committee and to the Congress. I do not blame him for offering the amendment. I wish I could support it, but it would be contrary to the principles that this Congress must follow in making defense appropriations. Therefore, Mr. Chairman, I must recommend that the amendment be voted down.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

The question is on the amendment offered by the gentleman from Maryland [Mr. FOLEY].

The question was taken; and on a division (demanded by Mr. FOLEY) there were—ayes 25, noes 86.

So the amendment was rejected.

On June 4, 1959, a telephone conversation with Secretary of the Air Force Douglas was held. The substance of the conversation was reprinted in a letter to the ranking minority member of the Senate Defense Appropriation Subcommittee:

JUNE 4, 1959.

Senator STYLES BRIDGES,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BRIDGES: I talked with Secretary of the Air Force Douglas from 4:50 to 5 p.m. today relative to the F–27 program and the action taken yesterday in the House in connection therewith. I assured him that Mr. MAHON, Mr. FORD, Mr. SIKES, and Mr. FLOOD were not in any way adversely affected in their attitude toward the F–27 because of their vote in the House. I mentioned that I had talked with you this morning. I encouraged him to make a request in the Senate for the F–27's and assured him

that I would do everything in my power to make certain that his efforts would be successful from the House side. His concluding remarks were that his plans were still the same to come forward and make a request for F–27's from the Senate. During the course of our conversation, he stated that he was in favor of the acquisition of F–27's.

I am writing the foregoing to you by way of a report and also for the purpose of extending my thanks to you for your interest in this program and for advice this morning.

Very truly yours,

JOHN R. FOLEY,
Member of Congress.

Mr. Speaker, thereafter, Air Force officials requested the F–27 item from the Senate subcommittee.

On July 13, 1959, the Senate approved the item at page 13180 of the CONGRESSIONAL RECORD, volume 105, part 10.

On July 30, 1959, the Senate-House conferees on the Defense budget eliminated the F–27 item.

On August 4, 1959, the Maryland Senator from Frostburg took the floor of the Senate to criticize the deletion of the F–27 item by the conferees. At page 15076 of the CONGRESSIONAL RECORD, volume 105, part 12, the Senator specifically pointed out that California and Missouri aircraft procurement items were retained and the Maryland-Oklahoma F–27 item deleted. He stated the Democratic House conferees from California and Missouri showed special interest in their own respective State areas over the Nation's interest. He pointed out that it was the California and Missouri votes that deleted the F–27 item.

On August 25, 1959, the same Maryland Senator took the Senate floor again in connection with the F–27 item deletion by the conferees.

He requested from the Senate permission to correct the RECORD and strike from his remarks in the CONGRESSIONAL RECORD on August 4, 1959, statements made by him that the House conferee Democrats from California and Missouri showed special interest in retaining their own State items and deleting the F–27 item in the conferee appropriation report. The Senator stated that he was striking the sentences because they lent themselves to a meaning that reflected on the House conferees. In later remarks he praised the California Congressman who was a House conferee as a hard worker with whom he served in the House for 10 years. The Maryland Senator was joined by the two California Senators and a Senator from Missouri in praising the California Congressman.

In early 1960 the following letter was sent to the Secretary of the Air Force urging that the Air Force request inclusion of the F–27 item in the 1961 budget:

FEBRUARY 10, 1960.

Hon. DUDLEY SHARP,
Secretary of the Air Force,
Washington, D.C.

MY DEAR MR. SECRETARY: You will recall that on June 3, 1959, in the 1st session of the 86th Congress I introduced an amendment to the Aircraft Procurement, Air Force section of the defense appropriation bill. This amendment provided for an additional $10 million to be earmarked for the purchase, by the Air Force, of F–27 aircraft from the Fairchild Aircraft Co. Beginning at page 9734 of the CONGRESSIONAL RECORD, volume 105, part 7, and continuing to page 9735, I listed the various uses to which the F–27 can be put by the Air Force. You will recall that the amendment was defeated. Mr. MAHON in opposing my amendment states on page 9735 of the RECORD as follows: "The plane in question is one manufactured by Fairchild at Hagerstown. It was not presented to us as a budgetary item at all for 1960. It was discussed somewhat with regard to the program for fiscal year 1959."

It was because the Air Force did not make a specific demand of the Mahon subcommittee in 1959 that my amendment was defeated, as set forth by Chairman MAHON himself. At about 5:30 p.m. on June 4, 1959, I talked with Secretary Douglas by telephone concerning the action taken by the House of Representatives the previous day on my amendment. I also related to him the attitude of certain members of the Appropriations Subcommittee insofar as they pertain to his making a specific request from the Senate Appropriations Subcommittee. I encouraged him at the time to make the request to the Senate subcommittee. He informed me that it was his intention to request funds from the Senate committee. I informed him in answer to one of his questions that the action of the House in voting down my amendment followed the general practice of supporting an appropriation subcommittee chairman's position. And since the agency involved, the Air Force, has not made a request for the 1960 fiscal year, the committee did not want to accept the amendment on its own and, therefore, was forced to oppose it.

Subsequently, to my great satisfaction and that of my constituents, the Air Force did make a request from the Senate subcommittee. On July 13, 1959, on page 13180 of the CONGRESSIONAL RECORD, volume 105, part 10, the Senate voted $11 million for the specific procurement of 11 F–27 mission support planes. Thereafter, the item in conference was eliminated by a vote of 3 to 2 among members of the House conferees.

I cite the foregoing legislative history, as background for my request that when you appear in the next few weeks the Air Force make a specific demand of the Mahon subcommittee for F–27 aircraft. The needs and uses which I listed on June 3, 1959, without question exist today in February of 1960. The conclusion is clear that the reason that this item was not approved by the House in the 1960 budget was the failure of the Air Force to make the specific request of the Mahon subcommittee when it appeared in 1959.

I am writing to you now to request that this same occurrence will not happen again. I have been informed that the Air Force is scheduled to appear before the Mahon subcommittee sometime toward the end of February. In my discussions with members of the Mahon subcommittee, I have been informed that they are disposed to act favorably upon a request by the Air Force for an amount to be used for the purchase of F–27 aircraft. Thus, the responsibility rests solely on the shoulders of Air Force officials to make this request for F–27 aircraft.

I am sure that you have been informed by other representatives, including those of Fairchild Aircraft Co. itself, of the deteriorating position of this most vital industry in my congressional district. The failure by the Air Force to make a request for funds for the F–27 will prove to be decisive action that will put an end to the Fairchild Aircraft Co. In making this statement I am not exaggerating. I am enclosing by way of official facts, photostats of recent reports by the Department of Employment Security of the State of Maryland. They show dramatically how in recent weeks unemployment rose in Washington County at the Hagerstown office from 2,880 total claims on January 6, 1960 to 5,478 on January 13. The highest rate of unemployment in the country exists in Washington County. The increases in unemployment have been brought about solely by the continued layoffs by the Fairchild Co. necessitated by the spreading out of F–27 production.

It is easy to say that the missile age and space technology is dynamic and, therefore, changes are made and must be made rapidly in our defense program. As a result of these adjustments certain communities are hurt economically. However, Fairchild already has felt the adverse effects by the cancellation of such an item; namely, the Goose missile. But, the F–27 is a workhorse item, and not a missile or space age item.

During the past 20 years the people of Hagerstown and of Washington County in my district served well in the production of other workhorse items; namely, the C–119 and the C–123 aircraft. They are producing a product which can be used now by the Air Force. I am emphasizing by this letter that the Air Force should within the next few weeks request funds from the Mahon subcommittee for the procurement of F–27 aircraft.

Unexpended balances of the 1959 appropriation to the Air Force, I understand, are still available. The Mahon subcommittee is prepared to approve the use by the Air Force of these funds. It is urged that when you and the Air Force officers appear before the Mahon subcommittee you will make a further request to include funds in the 1961 budget for F–27 procurement.

Thanking you for your favorable consideration of this request, I am,

Very truly yours,

JOHN R. FOLEY,
Member of Congress.

Mr. Speaker, the reply from the Secretary of the Air Force dated February 25, 1960, was as follows:

DEPARTMENT OF THE AIR FORCE,
Washington, February 25, 1960.

Hon. JOHN R. FOLEY,
House of Representatives.

DEAR MR. FOLEY: The Secretary has asked me to reply to your letter of February 10, 1960, in which you discussed possible Air Force procurement of F–27 aircraft.

As you mentioned, we have, in the past, made several attempts to secure authority to purchase F–27's from the Congress. We still have a need to replace certain aircraft within our utility fleet. However, this requirement does not hold the priority accorded our first-line combat needs. As a result, there are no funds available or budgeted for a more modern aircraft in the utility transport support area.

It should be noted, at this point, that we have been conducting a number of reviews of all of our programs. This has been necessitated by the rapidly changing composition of our forces and the need to hold Air Force spending to a minimum consistent with national defense requirements. As a result of these reviews, we have already canceled some projects, reduced others, and initiated action to close some installations. As examples, we have canceled work on the F–108, we have decided to phase out part of our aging B–47 force earlier than originally planned, and we have announced our decision to close Ethan Allen Air Force Base, Vt., and to terminate primary pilot training at Malden Air Base, Mo.

In view of the above, we are not presently considering the F–27 aircraft for possible procurement. We recognize the situation at Fairchild and are most sympathetic with the people of Hagerstown. However, in the final analysis, our plans must be based on the needs of the Air Force and the most economical use of the funds made available to us.

I trust that the above will explain our present thinking on the F–27 matter. Should you have any further questions, please call on me.

Sincerely yours,

JOSEPH T. KINGSLEY, Jr.,
Brigadier General, U.S. Air Force, Deputy Director, Legislative Liaison.

Mr. Speaker, when it appeared before the Mahon subcommittee, the Air Force did not request an F–27 item in the 1961 budget. However, on March 31, 1960, a specific request for an F–27 item was made by the U.S. Representative from Maryland's Sixth District as printed on pages 439 to 448 of the 1960 hearings before the Mahon Defense Appropriation Subcommittee. A portion of the testimony is as follows:

PROCUREMENT OF F–27 AIRCRAFT

Witness: Hon. JOHN R. FOLEY, a Representative in Congress from the State of Maryland.

Mr. MAHON. Mr. FOLEY.

Mr. FOLEY. Mr. Chairman, I am approaching the committee on a subject that I am sure the chairman and the members of the committee know about. The unfailing courtesy of the chairman and the other members of the committee has been the source of real satisfaction to me, and I hope my appearance this morning, however brief, will not be considered presumptuous in any way.

I appear, if I can quote a couple of cliches that I have listened to with some tremendous interest this morning, basically in the interest of free enterprise within the broad context of public interest. In that connection I want to say that I am here because fundamentally the members of this committee have always given me very fine attention and consideration. I am here somewhat like a layman in an area which is beyond my ken, and that is in connection with the F–27.

Mr. MAHON. How many have been produced?

Mr. FOLEY. A little over 50.

Mr. MAHON. Do you think it is here to stay?

Mr. FOLEY. The F–27 is here to stay if we can get some stimulation and inspiration from the Air Force, and that is why I want to appeal to the demonstrated leadership capabilities of this committee to go forward on its own.

I am going to mention something about the importance of utility aircraft as a somewhat neglected orphan in the whole missile program and the whole jet program.

* * * * *

Mr. FOLEY. I have talked to the president of Piedmont Airlines and Bonanza Airlines, I have talked with Air Force personnel, individuals, and they have told me that this is one of the finest aircraft that they have ever flown.

Going back to what I put in the record a year ago, the appraisal committee of the Air Force itself has approved this particular aircraft. General White has requested the aircraft. It was not until we reached the upper echelons of civilian leadership in the Air Force that we ran into trouble. I am not criticizing anybody; I am just making that statement.

Frankly, the company has run into a dead end in a sense, which is why I am here today to appeal to the committee to exercise its own judgment. This committee has been very courteous to me when I have hounded them a little bit. In fact, some of the members have somewhat encouraged me because of their fine consideration of my repeated request.

Mr. MINSHALL. Thank you.

Mr. RILEY. Mr. THOMSON.

Mr. THOMSON. Are there any airlines besides Piedmont and Bonanza that have gone into this particular aircraft?

Mr. FOLEY. Aside from Bonanza Airlines and Piedmont Airlines, there are the following: Pacific Airlines, West Coast Airlines, Ozark Airlines, Quebec Airlines, and West-Alaska Airlines.

Mr. THOMSON. I believe Piedmont and Bonanza had committed themselves to procure some of these planes as of the time of our hearing last January.

Mr. FOLEY. That is right.

Mr. THOMSON. I was interested in knowing whether there had been expansion of use of their airplane into other airlines. The reason I ask that is in our more sparsely settled areas, such as the area I represent, it has been a problem to find an airplane which is a suitable replacement for the DC–3 as it gets older. At one time I thought there was going to be an interest in this aircraft, but they seem to have dropped it. I did not know whether it was a fact or not.

Mr. FOLEY. This is a jetprop aircraft designed for short-range operation. It has a 40-passenger capability. As a layman, I foresee that our economy, our society, and our military services will always need a short-range aircraft regardless of how far we fly a rocket around the sun.

Mr. THOMSON. I think there is no doubt about that.

Mr. FOLEY. There is an element of urgency from my standpoint. We were caught in the switches at Fairchild, and we came up with this aircraft, and it has proven it is airworthy in every test to which it has ever been submitted.

We just feel that if we can get over this dead end, the country will profit and particularly the domestic airlines will profit because the feeder lines will have a constant source of spare parts in future products, but unless we do so—I hate to inject this—we are in a very tough way.

Mr. RILEY. Thank you very much, Mr. FOLEY. I am sure the committee will take into consideration the very fine presentation you have given us.

Mr. FOLEY. I want to thank you again, Mr. Chairman and members of the committee, for your unfailing attention and consideration. I really appreciate it.

Mr. Speaker, the Mahon subcommittee did not include an F–27 item in its reported bill that passed the House on May 5, 1960. No amendment from the floor of the House for an F–27 item was offered as was done in 1959. On June 16, 1960, the Senate passed its 1961 Defense appropriation bill including an item for the F–27. This item was again deleted in conference. The Senate passed the conferee's Defense appropriation bill on June 30, 1960. No reference was made to the F–27 item in the Senate during the explanation of the conferee's bill.

The House passed the conferee's bill on the same day, June 30, 1960. The following letter was sent that day to Chairman MAHON:

JUNE 30, 1960.

Hon. GEORGE H. MAHON,
Chairman, Subcommittee on Defense Appropriations, Committee on Appropriations, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Today I voted for H.R. 11998 providing appropriations for the Department of Defense for the fiscal year ending June 30, 1961. However, I voted as I did with considerable misgiving owing to the elimination of the $10 million item for F–27 aircraft. You will recall that on March 31, 1960, I appeared before your subcommittee and requested that $10 million be included in the 1961 Department of Defense appropriation. I pointed out that the F–27 is needed as a replacement item for the Air Force C–47's. My statement appears at page 439 of part 7 of the published hearings.

Since the $10 million item was again this year inserted on the Senate side, it would be greatly appreciated if you would explain to me why the conferees rejected this justified and justifiable item in my view.

Thanking you for your courtesy in the matter, I am,

Very truly yours,

JOHN R. FOLEY,
Member of Congress.

Mr. Speaker, the reply to the foregoing letter from Chairman MAHON is as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., July 1, 1960.

Hon. JOHN R. FOLEY,
House of Representatives,
Washington, D.C.

DEAR JOHN: This is in response to your letter of June 30 in regard to the F–27 aircraft. All members of the subcommittee which I head have been most aware for many months of your very great belief in and interest in the F–27. As you know, we have discussed this whole problem many times but you have asked me for a formal statement in regard to the problem.

I am attaching a memorandum which, in my judgment, covers the whole situation rather well. The memorandum explains that the President has never included funds for the F–27 in his defense budget. It explains that there is presently no replacement program for the C–47 plane, a plane which the F–27 could replace.

As you know, the House Subcommittee on Appropriations for Defense has not looked with favor upon adding nonbudgeted procurement items to the defense bill, especially unless such additions were of the highest urgency for the defense of the country. The F–27 is a good plane but it could not be considered a high urgency requirement at this time especially in view of the expenditure ceilings which have been imposed by the administration.

I regret that I cannot write more helpfully, but I believe that this letter and the attached memorandum give the picture rather accurately. I commend you for your good work in behalf of the people of your district and extend best wishes.

Sincerely,

GEORGE MAHON.

BACKGROUND INFORMATION ON F–27 (MANUFACTURED BY THE FAIRCHILD CO. AT HAGERSTOWN, MD.)

The Bureau of the Budget and the Department of the Air Force have never included in the President's budget a request for funds for the procurement of the F–27 aircraft. Had officials in the executive branch desired to do so, funds could have been included for this aircraft in fiscal years 1959, 1960, and/or 1961. Despite efforts of the company to sell the aircraft to the Air Force, no budget request has ever been made of Congress through regular channels for financing procurement of the aircraft.

No reason is known why Congress would not have provided funds for the procurement of the F–27 had a regular budget request been submitted and substantial proof provided that the airplane was required. The implication, to some extent, throughout the controversy in regard to the F–27 has been that the Fairchild Co. has done some good work for the Government, is in financial difficulty, needs a Government order for the purpose of improving the financial status of the

company and for the purpose of adding prestige to the aircraft which the company is seeking to sell and is selling to private industry. The F–27 is considered to be an excellent feeder-line type aircraft for small airlines. It could be used by the Air Force and the Navy as an administrative aircraft and as a replacement for the old C–47, but the services have never submitted a budget estimate for F–27 aircraft. It is true that administrative aircraft in the Air Force are becoming obsolete.

The Air Force has a fleet of approximately 1,200 C–47-type aircraft of an average age of about 15 years. Eventually these aircraft will have to be replaced with more modern types. The Air Force has desired to replace these aircraft, but because of limited funds and higher priority items it has simply not been in a position to make a fight for a replacement plane for the C–47. One of these days a program of replacement will be initiated. Had a program of replacement been initiated 2 or 3 years ago, no doubt the F–27 would have been seriously considered, but, of course, we cannot foresee what the future holds with respect to this matter. There is no doubt but that expenditure ceilings in the Defense Department have made it impossible to make any substantial headway in a replacement-type administrative aircraft. There are no administrative aircraft in the budget for the Air Force or Navy for fiscal year 1961.

The first mention of the F–27 in the official record was during the Senate hearings on the Defense appropriations bill in calendar 1958. The position of the Air Force was summed up in this statement by General White (p. 406, Senate hearings, fiscal year 1959):

"If and when we find that we can start replacing that type of transport (C–47), the F–27 is going to be one of the ones we will look at in conjunction with other aircraft of similar type."

The Air Force had not included a request for the aircraft in its fiscal year 1959 budget. That year the Senate put in the defense bill funds for 10 F–27 aircraft which were later deleted in conference. In January 1959 the Air Force requested permission of the Congress to reprogram funds for the procurement of 10 F–27 aircraft, but there was no budget estimate. The mission of the aircraft was stated to be support of air attachés in Europe and special missions (classified). After holding a hearing on the request, the House Subcommittee on Defense Appropriations voted on the issue, and the request was voted down.

In calendar 1959, the Air Force again failed to include the F–27 in its budget request for fiscal year 1960 and there was only brief mention of the aircraft during the House hearings. The excerpts below (p. 651) indicate the somewhat indefinite status of the aircraft in the Air Force program and its relative insignificance in any plans for replacing the C–47 and similar aircraft:

"General IRVINE (then Deputy Chief of Staff, Materiel). 'We really need some airplanes to replace the obsolete C–47's and C–54's which we now have in inventory.'

" 'This is partly for prestige purposes, for our air attachés, and Ambassadors overseas. The F–27 would have fulfilled that requirement. However, when we got into the problem of programing it forward and matched it against our other requirements, it was one of the things we just felt we could get along without. We could use the airplane. It looks like an economical airplane in that category of operation. It is something like the Goose program and some of the programs of that kind that fell by the wayside because of priorities.'

"Mr. FORD. 'Do I understand there still are or are not funds available in the 1959 program for this procurement?'

"General FRIEDMAN. 'Yes, there are funds but not specifically earmarked for the F–27.' "

In calendar 1959 the Senate, despite the absence of a budget request, did put 10 F–27 aircraft into its version of the fiscal year 1960 defense appropriation bill and these were subsequently deleted in conference.

During calendar 1960 there were no references in Air Force hearings made by Air Force witnesses to the F–27 in the testimony, either of the House or Senate. The House subcommittee did hear testimony from Congressman JOHN R. FOLEY, of Maryland, in whose district the F–27 is manufactured. Mr. FOLEY expressed his conviction that the F–27 could be utilized by the Air Force, making a strong presentation in behalf of the plane. He has upon many occasions stressed the importance of an Air Force F–27 procurement program.

Funds for 10 of these aircraft were again added by the Senate Appropriations Committee, in spite of the fact that the Air Force had not included a request in the budget for them.

The Farmer: His Year of Decision—A Report on Agriculture

EXTENSION OF REMARKS
OF

HON. HAROLD D. COOLEY

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. COOLEY. Mr. Speaker, 28 years ago America's farm families, racked by poverty, foreclosure and despair—after 12 years of Republican rule—placed their faith and their hopes in the Democratic Party. The Democratic Party was equal to this trust and to this faith. It was equal to the times. Championed, encouraged, and aided by the dynamic administrations of Franklin D. Roosevelt and Harry S. Truman, farmers themselves designed and constructed a farm program dedicated to their needs and to their aspirations. This progressively developing program guided them out of the great depression and, with it, they pressed on to achieve a full parity position in the Nation's economy. Farmers then enjoyed their greatest prosperity in all our history. They then had reason to believe that at last they were equal and accepted partners with all Americans, in the rewards of free enterprise under capitalism.

But, now—after another era of Republican power—their program is wrecked, and the Nation's farm people again have been relegated to unpromising and near hopeless struggle and strain.

Mr. Speaker, agriculture, our basic industry, once more is on the brink of bankruptcy.

THE BENSON REPUBLICAN PROGRAM

The Benson Republican program was established in Washington in 1953. Now, 8 years later, we look upon the consequences.

The family farm, which was the beginning of free enterprise in America, is threatened. Thousands upon thousands of once proud and independent farmers have been forced to leave the land they love.

Farmers' net income in 1959 dropped to the lowest level, in relation to volume of their sales of any year since the Department of Agriculture began keeping records. Average farm prices at the close of 1959 reached their lowest, in terms of parity, for any yearend period since 1933.

In 1960 the farmer is gripped tighter than ever in the cost-price squeeze that is strangling him. In the first half of this year his income was 8 percent below the depressed level of 1959.

The per capita annual income of people living on farms in 1959—including Government payments and also their earnings from off-farm work—again plummeted to less than one-half that of nonfarm people.

Here, briefly, is a summary of the last 8 years, comparing 1960 with 1952:

Farm prices: Down 17 percent.

Farm parity ratio: Down 21 percent.

Realized net farm income: Down 24 percent.

Purchasing power of that farm income: Down 29 percent, lowest since 1940.

Farmers' debts: At a record high, above $24 billion.

Farm population: Declined from 24,283,000 in 1952 to 21,172,000 in 1959.

This is the record. It is a documentation set against the backdrop of Candidate Eisenhower's promise, made in the heat of the 1952 campaign, to reward farmers, not at 90 percent, but at 100 percent of parity.

REPUBLICAN BREACH OF FAITH WITH FARMERS

Mr. Speaker, never before in my memory—probably never before in the history of the United States—has there been a more complete breach of faith with any group of voters than the Republican administration's faithlessness to its promises to the farmers of America.

In his 1952 campaign, the Republican candidate for President promised not merely 90 percent of parity—but full parity. He promised specifically to strengthen the price supports for, as he put it, "the nonperishable crops so important to the diversified farmer—crops such as oats, barley, rye, and soybeans," so that these crops would be given the same protection as available to the major cash crops. He went on to promise a sound way to protect farmers who produce perishable food products.

Mr. Speaker, there was no question as to the meaning of these Republican promises. The Associated Press reported that the Republican candidate had promised "a plan which he said would guarantee present price supports for another 2 years and then would lead to higher prices for the farmers."

The Indianapolis News blazoned the Republican promises of 1952 in black headlines, proclaiming: "Ike Favors More Farm Props and 100 Percent Parity."

The Milwaukee Journal headline declared: "Ike Promises To Work for 100 Percent Farm Parity."

The Des Moines Tribune headline, bannered across the full eight columns of the front page, declared: "Ike Offers Plan for Farm Price Boost."

The Wichita, Kans., Sunday Eagle declared: "Ike Down Line on Parity Laws; Promises Farmers Perishables Support."

These were the Republican promises of 1952. The betrayal of these solemn pledges is now history—history which has been lived in sorrow and despair in every farming community in this land.

These Republican campaign promises have been violated in spirit as well as in the letter of their content. In all the 8 years since these pledges were made to the farmers of America, the Republican national administration has never taken one voluntary step—nor has it initiated one single action to Congress—which would raise the price received by any farmer in America for any farm commodity.

Mr. Speaker, we are now again in the midst of another great political contest. Once again we can expect to hear glowing promises from the Republican national candidates to the farmers of America. Farm people may well reflect upon the promises that were made before, only to be disregarded as soon as the election was over. The outcome of the great national election campaign of 1960 is certain to affect the circumstances of farm families all over America. Perhaps no segment of our people has as much at stake in the impending election as our farmers.

THE WAY OUT

At this place in this report let me recall, for the reflections of the Members, that there were days, in times past, when it was difficult to distinguish a Democrat from a Republican in this body when legislation relating to the well-being of agriculture was debated and voted upon. Our farm people are Democrats and they are Republicans. Their well-being should have no reference to party politics.

I commend, as I have on other occasions, those Members of both parties who have proven themselves to be true and devoted friends of agriculture and who have placed the interests of our farm people above any possible partisan advantage.

But, Mr. Speaker, I must state what now is true—as painful as this may be to me—that Mr. Benson and this Republican administration have injected partisan politics, and have promoted political alinements, in our deliberations in the Congress on vital farm legislation; and they thus have created circumstances whereby a political determination at the polls in November may be the only solution to the problems of our farm people.

Therefore, the farmer and his family must know that their very economic survival, in agriculture, is deeply involved, when they cast their ballots.

I say to the farmers on these broad lands of ours, first and foremost, we must banish from the Department of Agriculture every aspect and vestige of the Benson philosophy and design, and we must install in the Department of Agriculture, a man who understands the farm problem, a man who has the confidence of farmers, a man who is devoted and consecrated to the rightful aspirations of farm people, a man who unswervingly will champion the causes of farm families, a man capable of uniting farmers again into a brotherhood of purpose, and a man endowed with the ability of leadership to undo the wrongs of 8 long years and to guide the agricultural economy back to the road of stability and prosperity.

The great need of farmers today is not a specific bill or a specific law but, above all, to install in Washington an administration sympathetic and devoted to the restoration of a parity position—of income and of living standards—for the people who till the soil and feed the Nation.

THE COST-PRICE SQUEEZE

Mr. Speaker, the farmer wonders—and others who are not farmers must question—why has our Government actually encouraged, and promoted, if you please, the cost-price squeeze that is driving our agricultural establishment to insolvency, with all this means in anxiety and privation for farm people? Why, during these years when the prices of things farmers must buy are going up and up and up, why does this administration preach and enforce, by its policies, lower and lower and lower prices for the things that our farmers produce?

Why has Mr. Benson taken control of the farm program out of the hands of farmers and surrounded himself with people "who farm the farmers," as Edward A. O'Neal described those middlemen who profit by the farmers' poor prices?

The stated purpose of this administration is to drive down production by taking away the incentive to produce. It is the bankruptcy route to production adjustment. It is the back road that farmers traveled before we had a farm program. It is the cruel way that in bygone years created in agriculture a second-class status for farm people because they were so poor, so that others in our society amused themselves by calling them yokels, bumpkins, and hayseeds. It is the route to economic collapse in our great countryside.

The people who "farm the farmers" have been rewarded. As applied in the Benson program, this philosophy has succeeded in driving many people from our farms. But it has confounded him by piling surplus upon surplus, with great expense to taxpayers, and consumers have not profited as farm prices have fallen.

Farmers, fighting for survival, have taken over the lands of their neighbors who have been forced out, and they are producing more on these lands than ever was produced before.

Aside from the human suffering involved, Mr. Benson never seems to have examined the simple arithmetic of his program.

As farm prices have gone down, with the margin of profit thinner and thinner, farmers simply have produced more, to make up in volume what they have lost in price.

CORN AND A PAIR OF PANTS

I requested a member of my staff to inquire of the Department of Agriculture as to what a pair of pants cost in 1952, as related to the value of corn, and how much corn it would take today to buy the same pair of pants.

The Department, to my satisfaction, had the figures on a number of items.

I now am advised that it takes 41.7 bushels of corn today to buy the same suit of clothes that 26 bushels would buy in 1952, that it takes 9.2 bushels to get a pair of men's shoes that required only 5.3 bushels 8 years ago, and 6 bushels to buy a woman's dress as compared with 3.6 bushels in 1952. Among other items, a chair for the farmer's house that cost 17.1 bushels of corn 8 years ago now costs 38.6 bushels, and it takes 216.7 bushels to buy an electric stove that could be had for 153 bushels in 1952.

It would seem to me, in all seriousness, that it should have been obvious to Mr. Benson from the start—even in his youth—that if it takes twice as much corn to buy a pair of pants, then the farmer, to keep himself in pants—as certainly he must—will do his utmost to produce twice as much corn.

Farmers are impelled to increase their output as prices fall. Surplus thus builds upon surplus, further depressing prices.

The fallacy, and the tragedy, of the Benson program is as simple as that.

HISTORY REPEATS

Mr. Speaker, our farm people and the Nation should have known what to expect when a Republican President moved into the White House in 1953. Precedent forewarned us. That foreboding harked back to the 1920's and early 1930's when, in the gathering economic storm, the veto power of the President—under Republican power—was used to destroy virtually every piece of general legislation intended to save the farm industry from chaos and from bankruptcy. This legislation in that bygone era was developed and sponsored by the old farm bloc in Congress, counting in its leadership and in its ranks stalwart Democrats and Republicans. But one by one, a Republican President struck down these farm bills, by the exercise of the veto power.

Our farmers had called for help. The Congress responded. But the veto power prevailed.

There are Members of this House today who can remember—and we shall never forget—the catastrophe that then befell the Nation. In the late 1920's and the early 1930's the ruin of agricuture ran its inevitable course, and the whole Nation tumbled into the great depression.

Mr. Speaker, history now repeats. There today is a stark similarity.

When another Republican President moved into Washington in 1953 he installed Mr. Ezra Taft Benson as the chief agricultural magistrate of the land. Mr. Benson forthwith set out upon a course to administer the farm program in a way to discredit it, and thereby to destroy it. There then came into being, under Mr. Benson's guidance, a design and calculation to inflame consumers against farmers, to destroy the parity principle which the Nation had come to accept as sound and just, to repress agriculture's price structure, and thus to woo political strength in the cities because

the numbers of farmers were becoming so few.

The turning point came, Mr. Speaker, when this Republican administration repudiated the principles and the philosophy of the greatest farm statesman the Republican Party ever produced—Clifford R. Hope, of Kansas.

Cliff Hope became chairman of the House Committee on Agriculture in 1953, as Republicans gained control of the Congress. He believed in the program that had served our farmers and the Nation so well. He was one of the architects of this program. He brought to the House for a vote a bill to continue this program. The administration, led by Secretary Benson, turned upon him with a vengeance. It is a sorry story to recall. Mr. Benson was aided in this onslaught by the national officers and staff of the American Farm Bureau Federation, who themselves had turned upon and set out to destroy the program which their own revered leader and president, the late Edward A. O'Neal of Alabama, and other great farm bureau leaders as Earl Smith of Illinois, had developed and sponsored as spokesmen for the farmers of America.

Thereupon, the bill presented by Cliff Hope, the recognized Republican farm leader, received only 23 votes from the 219 Republican Members of the House; and this body—then dominated by Republicans—installed instead the Benson farm program pledged to the lowering of farm prices and the destruction of the production adjustment machinery whereby farmers had patterned their output to their markets.

And, Mr. Speaker, since that day, vetoes of the President—one by one—have been erected like gravestones over the farm program and over the hopes and aspirations of the farm families of America.

The control of the Congress was returned to the Democratic Party in 1955. We promptly enacted legislation—H.R. 12—to restore the 90-percent-of-parity price supports for the major crops. Just as promptly, the President vetoed the legislation.

The Congress next, in 1958, enacted "hold the line" legislation—Senate Joint Resolution 162—to prevent Mr. Benson from lowering the price structure of agriculture any further. This bill was stricken down by the veto.

The shadow of the veto power then spread across every constructive effort in the Congress to restore general stability to farm prices.

Surplus was piled upon surplus and prices continued to fall.

In 1959, we enacted legislation to deal with the great surplus and price problem in wheat. The bill proposed another 25-percent cut in wheat acreage throughout the country, and it would have restored the 90-percent-of-parity support, to prevent a violent drop of farm income in the Wheat Belt.

The veto again was brought to bear. As a consequence, great additional costs have occurred to taxpayers. Our farmers are being buried in an avalanche of wheat.

Also last year, tobacco farmers became concerned that a quirk in the parity formula, not detected when the formula was written, tended to raise tobacco prices to a level which threatened our markets. Our farmers requested a change in the parity computation for tobacco, to prevent unreasonable increases in prices. The necessary legislation was passed by the Congress. The competitive position, pricewise, in world President vetoed the bill. Mr. Benson prompted the veto. He wanted a sharper decrease in tobacco prices. We later were able to develop legislation dealing with price problems of tobacco farmers that the President was willing to accept.

Again in 1959, the Congress passed a bill to restore the authority over the Rural Electrification Administration to the REA Administrator, thus to forestall actions by Secretary Benson which might prevent the proper development of REA. This too, was vetoed.

This is the record. I do not question the veto power of the President, under the Constitution. But I shall never understand the use of it by Republican Presidents, now and in the past, to build a barrier between the farm families of America and their rightful recourse to their Government, as such recourse now is accorded to labor, industry, and other elements of our free economy and democratic society.

ADMINISTRATION UNWILLING TO TRUST FARMERS

Mr. Speaker, when this Democratic 86th Congress convened in its 2d session last January, the President sent to us a special message which led the country to believe he, at last, was ready to approve a sound farm bill. He told us "I will approve any constructive solution that the Congress wishes to develop," within certain limitations. But, when we called Secretary Benson before our Committee on Agriculture, we found nothing had changed. The veto power hung over us as menacingly as ever it had before, daring the Congress to interfere with Mr. Benson's set purpose of holding down the price structure of agriculture.

Thereupon, it being evident that any bill seeking to improve farm prices would be doomed in this session, we wrote legislation which simply would have provided the machinery for farmers themselves to develop, in cooperation with the Department of Agriculture, programs dealing with the pressing and specific problems of the various crops.

The administration quickly condemned the bill. Mr. Benson called it a monstrosity. The people in the American Farm Bureau national headquarters joined with Mr. Benson. We learned then for a fact that there were people identifying themselves as farm leaders who were unwilling, as was Mr. Benson, to trust farmers with a voice in the development of their own programs. The opposition created great confusion among farmers as to the provisions and objectives of the legislation. It failed of passage in the House.

Mr. Speaker, in a last hopeful effort to deal directly and quickly with the deepening crisis in agriculture, I invited the ranking members of our Committee on Agriculture—Republicans and Democrats—to meet with me in Washington, prior to the reconvening of the House following the recess for the conventions. It was my hope to discover some area of unity in which we could move in this August session to bring some relief to the farm economy. Time was running out, and it was obvious that nothing could be accomplished without complete understanding and unity among Republicans and Democrats.

Only one Republican responded to my invitation to the meeting. My effort failed.

Mr. Speaker, this session ends with a Republican Member of the Senate blocking action in that body on farm legislation, except what he has written himself. Doomed by this blockade are important bills reported by our committee and passed by the House, including legislation to expand vastly the research into industrial uses of agricultural products and a bill to revamp and strengthen the laws relating to farm credit through the Farmers Home Administration.

In such circumstances, blockaded by the veto and by legislative maneuvering, our farmers are suffering.

A 20-YEAR STORY AND AN 8-YEAR STORY

The President, who in 1952 advocated 100 percent of parity, has sent messages to the Congress from time to time urging the outright abandonment of the parity principle. In one of these messages he said:

> I have frequently requested legislation to deliver our farmers and taxpayers everywhere from the mounting failures and staggering excesses of the mandatory farm price support and production control program.

Mr. Speaker, as this 86th Congress draws to a close, I feel it to be my duty, as chairman of the Committee on Agriculture, to set the record straight, so that the people may know how our farm families have been treated in these last 8 years and how they fared in the previous 20 years. I hope these facts may appeal to the conscience of the Nation, to the end that the cost-price squeeze that now is strangling agriculture may be broken. This is the primary objective of this report to the House.

The President, in his message, quoted above, referred to the mounting failures and staggering excesses of the farm program. Let us look to the days and years when the old farm program was in friendly hands—before the Benson program was installed in Washington.

Our old pre-Benson program for the major crops operated for 20 years, prior to 1953, at an actual profit to the Government of $13 million. During 11 of these years—1942 to 1952, inclusive—the average price level of all of agriculture was at or above 100 percent of parity each year. At the end of the 20-year period the Government had only moderate investments in farm commodities, including basic and nonbasic crops.

The period prior to 1953 embraced agriculture's golden era, representing the triumph of the parity principle. Rural people came out of the great depression and, with their incomes steadily increasing, became able to buy the conveniences and comforts hitherto available only to our citizens in towns and cities. Electricity was taken to the rural areas. Farmers became financially able

to mechanize their farms and to apply new sciences, to bring food abundance at low cost to the consumers of the Nation. With the means to do it, farmers devoted their energies to the restoration and conservation of the Nation's greatest resource, the soil. Prosperity on the farms created greater markets for industries in the cities.

Then, for reasons yet unexplained to the American people, the new administration in 1953 decided to depart from this program, and the President subsequently called for the scrapping of the parity principle.

Then began the 8-year story, the consequences of which I have set forth earlier in this statement. Farm depression. Record surpluses. Great costs.

A study by the Legislative Reference Service of the Library of Congress, done at my request, discloses that appropriations or expenditures of the Department of Agriculture since January 1, 1953, have been greater than the combined total of such expenditures or appropriations during all the 90 previous years of the history of the Department. The totals for the period 1862 through 1952—$35,843 million; for the period 1953 to July 1, 1960—$37,017 million.

The present Secretary of Agriculture has had more authority to deal with the problems of farmers than any of his predecessors. He has had more money at his disposal than all his predecessors combined. He has more employees in the Department than any Secretary before him.

Mr. Benson has sought to explain away his failures by contentions that the good years for agriculture, preceding 1953, were the result of food demands of war and postwar years. The facts are that food requirements in our country and the opportunities for export of food have been greater in the last 8 years than in any similar period of history.

Mr. Speaker, the old farm program, as fundamentally constructed, did not fail. When it needed adjustment to accommodate the changing conditions in agriculture, this program was delivered into unfriendly hands and it has been administered, as I have stated, in a manner to discredit and destroy it. And the nearer the program has moved to the low-price, unlimited production philosophy of the present Secretary, the more severe has been the decline in farm income, the larger our surpluses, and the greater the cost to the Government.

THE CONSUMER

In 1959, Mr. Speaker, American consumers bought 16 percent more farm-produced food than in 1952, yet our farmers received $100 million less for that larger volume than for the more limited output in 1952. In contrast, consumers paid food processors and marketing middlemen $10 billion more in 1959 than in 1952 for hauling, processing, and handling the food between the farm gate and the retail counter.

As one illustration of how the farmer and the middleman have fared, I refer to an official Department of Agriculture report which shows that from 1948 to 1958 the cost of wheat and other ingredients in a loaf of bread declined 12 percent at the farm, while processing and marketing margins for the loaf increased 55 percent. Thus, in the 10-year period, the cost of the loaf of white bread increased from 13.9 to 19.3 cents, on a national average, or 39 percent, while the price received by the farmer for a bushel of wheat declined from $1.98 to $1.72.

However, notwithstanding the sharp increase in processing and marketing charges, retail food costs today are lower in the United States in terms of workers' wages than anywhere else in the world.

The average factory worker in the United States spends only 23 percent of his earnings to buy the average amount of domestically produced food consumed by a family of three. Twenty years ago the same food would have cost the same worker 41 percent of his wages, and 30 years earlier—when there was no farm program—48 percent.

The average pay for an hour's work today will buy approximately twice as much food as in 1929.

LOOKING AHEAD

The capitalistic system in America has no greater expression than in the independent family farm. Free enterprise on this continent began with the family farm. There are today more units of enterprise in agriculture—more individual capitalists—than all other industry and business combined. There are now 4,637,000 independent enterprises in agricultural production and 4,589,000 in business and industry.

Agriculture represents virtually one-half of the value of the Nation's productive assets.

This Nation, committed to economic and political freedom under capitalism, will not permit more than one-half of its free enterprise units to struggle constantly on the edge of insolvency.

Our Government provides the minimum wage and collective bargaining powers to protect our labor force; and our industry is favored by the many laws that soften the impacts of harsh and unrestrained competition.

We must rebuild an effective farm program. We must enable farmers, as the managers of other business, to adjust their production to their markets. We must give the producers a voice in the price of the things they deliver into the markets, as is essential to any successful business. These were the free enterprise principles of the program Mr. Benson inherited and which he set as his purpose to destroy.

There has been a studied effort, Mr. Speaker, to spread the impression that the adjustment of production to market demands and the asking of a price that reflects cost of production and a reasonable profit—the free enterprise mechanisms of industry and business—are something different from free enterprise when used by farmers to establish for themselves an equitable position in the economy. Various devices have been used by the opponents of a workable farm program to aline farmer against farmer, crop against crop, farm organization against farm organization, and consumers generally against farmers.

A prosperous agriculture is important to the total economy and to all the people. The farm problem is everybody's problem.

It is unthinkable that urban people can be persuaded to a position of prejudice against farmers. A population predominantly predisposed to agriculture controlled the Congress and the State legislatures during the formative and development years of this country, and it was during this time of great rural influence and power that the laws and the free enterprise climate were created for the growth of the greatest industrial nation on earth. To speculate now that the predominantly urban population will turn upon and deliberately repress the less numerous population in agriculture would be to suggest that a former rural ascendency should have legislated against the development of industry and the growth of cities. Both propositions are absurd.

Agriculture is our basic industry. We are the best fed nation on earth. Our farmers have made it so. The productivity of our farms is today the greatest stabilizing force in the economy of the free world. The Communists have put satellites above the earth, but they cannot begin to match the productivity of the people tilling the soil of America.

Mr. Speaker, I have faith in the fairness and wisdom of the American people. I am supremely confident that, when we have in Washington a President and a Secretary of Agriculture devoted to the well-being of our people on the land, the representatives of the urban populations will join with the representatives from the farming areas in this Congress in support of public policies assuring again to these farm families of the Nation the opportunity to achieve a parity position in the rewards of enterprise, so that they, too, may enjoy full partnership in this capitalistic system that has brought America abundance and unmatched strength and prosperity.

The Ukrainian Congress Committee of America: A Tribute

EXTENSION OF REMARKS

OF

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SIKES. Mr. Speaker, 20 years ago one our most forthright and vigorous ethnic organizations was founded, the Ukrainian Congress Committee of America. This committee has performed yeoman service for the interests of Ukrainians at home and abroad but above all it has worked for the United States itself. What the committee has done so effectively is the patriotic task of demonstrating to all Americans the true nature of the Soviet Empire. It has shown, sometimes dramatically—and here I am thinking of its effective campaign for commemorating Captive Nationals Week—that the U.S.S.R. is not a monolithic empire of a homogeneous ethnic group; namely, Russians. But it is rather a massive empire of many oppressed people in which the Russians are

only one group but they are the controlling group over all other peoples in the Russian empire.

To call the attention of Americans to this fact has been a praiseworthy service of the Ukrainian Congress Committee. On this occasion I wish to express my gratitude to its leaders for their courage, wisdom, and forthrightness in their efforts to enlighten the American people and in their general struggle against world communism.

Voting Record, 86th Congress

EXTENSION OF REMARKS
OF

HON. JACK WESTLAND

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WESTLAND. Mr. Speaker, I firmly believe it is my duty to the people of the Second District of Washington State who elected me to represent them in Congress to compile and publish a record of my stand on important issues. It has been my custom during the four terms I have served in Congress to present a compilation of my votes on these issues in the CONGRESSIONAL RECORD so that it will be available to all my constituents.

More than 14,900 pieces of legislation have been introduced in the House of Representatives during the 2 years of the 86th Congress. Only a small percentage of the legislation introduced got to a vote. Even so, more bills came to a vote than can conveniently be placed in this voting record. Therefore, I am confining my record to issues of national importance and those of particular concern to constituents of my district.

To simplify my voting record, I have placed these measures into categories according to the general fields they encompass, although some are difficult to classify because they are broad in scope and may overlap. If there are questions concerning any of these issues or my stand on a particular issue, I will be happy to answer them when I return to my district following adjournment:

BILLS AFFECTING NATIONAL DEFENSE, NATIONAL SECURITY, AND FOREIGN AFFAIRS

Voted for H.R. 11713 appropriating $211.4 million for the development of atomic energy. This legislation included funds for many peaceful uses of atomic energy such as medical research, medicine, food preservation, power, and agriculture.

Voted for H.R. 10777 for construction at Army, Navy, and Air Force bases here and abroad.

Voted for H.R. 2260 to extend the draft to July 1, 1963, to extend the Doctor Draft and Dependents' Assistance Act, and to suspend the limit on strength of the Armed Forces.

Voted for H.R. 12049 to increase the authority of the National Aeronautics and Space Agency, the civilian space agency. Voted for H.R. 7007 providing $485.3 million for NASA.

Voted for H.R. 11998 appropriating $39.3 billion for the Defense Department, sufficient funds so we will continue to have a first-class defense system capable of deterring any aggression.

Voted for H.R. 11510 extending the Mutual Security Act to protect the security of the United States. Voted for H.R. 12619 providing appropriations for mutual security.

Voted for House Concurrent Resolution 369 expressing the sense of Congress that the Communist Chinese regime should not be seated in the United Nations.

Voted for House Concurrent Resolution 459 expressing the sense of Congress that any variation in traditional interpretation of treaties with Panama shall only be made pursuant to treaty. In effect, it expresses opposition to any action to permit official flying of the Panama flag in the Canal Zone.

Voted for H.R. 12311 giving the President authority to cut the Cuban sugar quota as requested by the President in order to stop American aid to the Castro-controlled government in Cuba.

BILLS AFFECTING VETERANS, SOCIAL SECURITY, EDUCATION, AND WELFARE

Voted for H.R. 12580 to provide grants to States for medical care of the aged. Program is voluntary, not compulsory, is under State control and is designed to help older persons who are unable to meet the costs of necessary medical aid. Bill also extends coverage under old-age, survivors, and disability insurance, unemployment compensation, and other programs under Social Security Act.

Voted for H.R. 7903 to extend for 2 years the veterans' guaranteed and direct home loan program to stimulate home construction.

Voted for H.R. 12259 to provide Federal aid to school districts on basis of need and local effort for emergency school construction. Voted against H.R. 10128 which provided no criteria for need or local effort and which would have led to Federal interference in local school matters.

Voted for House Concurrent Resolution 465 expressing the indignation of the Congress at desecration of houses of worship and other sacred sites.

Voted for H.R. 8601, the civil rights bill guaranteeing right to vote for all qualified citizens.

Voted for H.R. 10341 to authorize grants-in-aid to universities, hospitals, laboratories and other public or nonprofit institutions to strengthen their programs of research and research training in science related to health.

Voted for H.R. 6769 and H.R. 11390 providing funds for school construction and operation in so-called federally impacted areas, such as those we have in the Second District.

BILLS AFFECTING ECONOMY, BUSINESS, AND TRADE

Voted for H.R. 10213 authorizing the Treasury to purchase $1 billion of FHA and VA mortgages to stimulate construction of housing.

Voted for H.R. 11207 authorizing an increase of $150 million, to $725 million, the amount of loans the Small Business Administration may have outstanding.

Voted for S. 2611 to facilitate extension of credit to small businesses.

Voted for H.R. 10644 to increase subsidy for domestic ship construction to 55 percent of cost in foreign yards.

Voted for H.R. 10572 authorizing and directing the Secretary of Agriculture through the Forest Service to continue to manage national forests under principles of multiple use.

Voted for H.R. 47 to amend the Internal Revenue Code to permit stock of a small business corporation which is owned by husband and wife to be treated as owned by a single shareholder for purposes of determining number of shareholders in such corporations. The bill is of particular benefit to small businessmen in community property States such as Washington.

Voted for H.R. 5421 to provide differential payments for construction of fishing vessels to stimulate construction of fishing boats in the Pacific Northwest.

BILLS AFFECTING FARMERS AND AGRICULTURE

Voted for H.R. 8609 to extend for 2 years the Agricultural Trade Development and Assistance Act for sale of surplus abroad. This act helps to reduce our surplus commodities.

Voted against S. 1901 to provide unnecessary price supports for tobacco.

Voted for S. 662 to create an Agricultural Research and Development Commission to find and promote new industrial uses for farm products.

Voted for H.R. 9331 to extend the special school milk program for children.

Voted for S. 2917 to provide that the price of whole milk and butterfat shall be supported at not less than $3.22 a hundredweight and 59.6 cents a pound respectively.

BILLS AFFECTING LABOR AND GOVERNMENT EMPLOYEES

Voted for H.R. 5610 to provide increases in benefits under the Railroad Retirement and Unemployment Compensation Acts.

Voted for H.R. 5640 to extend benefits to Temporary Unemployment Compensation Act of 1958 for 3 months to jobless whose State payments expired before April 1, 1959.

Voted for H.R. 8430, the Landrum-Griffin bill, to protect rank-and-file union members, honest labor unions, and the public against labor racketeers and gangsterism.

Voted for H.R. 9883 to increase pay of postal workers and other Federal employees.

Voted for H.R. 12677 to increase the minimum wage to $1.15 an hour and to extend coverage.

Voted for S. 2575, identical to my bill H.R. 8787, to provide health insurance program for retired civil service workers.

BILLS AFFECTING GOVERNMENT OPERATION

Voted for S. 50 providing for Hawaiian statehood.

Voted against H.R. 3151 providing for withholding income taxes imposed by certain cities from pay of Federal employees.

Voted for H.R. 12326 appropriating $3.9 billion for public works construction including funds for Sammamish River flood control project, Snohomish River navigation project, Point Roberts survey

and the Skagit, Nooksack, Snohomish, and Stillaguamish Rivers flood control surveys.

Voted for H.R. 10569 to prevent the loading of city mail boxes with "occupant addresses" junk mail from Members of Congress.

Voted for H.R. 5160 to extend to June 1, 1961, the authority of the President to propose plans to Congress for more efficient reorganization of the Federal Government.

Voted for H.R. 10495 authorizing $925 million a year for fiscal 1962 and 1963 in Federal aid for primary and secondary highway systems and their urban extensions. Provides nearly $50 million for roads in Washington State in fiscal 1962.

Voted for H.R. 7634 authorizing certain public works including a survey at Point Roberts and the Snohomish River navigation project.

Voted for H.R. 3 reaffirming States rights to legislate in the fight against communism.

Mr. Speaker, I believe this is about as complete a voting record that is possible to compile. Not all will agree with each and every vote, but I have always voted for the things I believe are right and for what is in the best interest of the Nation and the people whom I represent.

Report on Congress

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. MUNDT. Mr. President, with the session of Congress at a close, I have issued my final report to my constituents in South Dakota which contains my observations on the record compiled, particularly in this short session ending in September. My report follows:

THE WINDUP

As this session of Congress came to an end, several significant "partial" victories were achieved on bills sponsored by your Senator. Of course the success attained cannot compensate for the lack of action by this Democrat-controlled Congress in other major areas, such as agriculture, or the need for legislation to prevent Communists from obtaining passports and using them against our best interests.

SENATE APPROVAL

Three bills which I introduced passed the Senate. The Freedom Academy bill, in receiving Senate approval, marks a major stride forward. Recognition has now been given that new approaches are needed in the cold war to launch a positive program in the political and economic fields to counteract the Soviet conspiracy. Senate approval also was given to the Mundt-Scott bill dealing with obscene and pornographic literature, and my bill for a special commission to study problems of small towns and rural counties. While it is unfortunate House action was not taken, Senate approval places all of the bills in a much stronger position for the next Congress.

LAST-MINUTE ACTIONS

Before leaving for South Dakota, I conferred with Fish and Wildlife Service officials on the new aquarium at Gavins Point. Agreement was reached on accepting a bid for construction and assurance given that facility will be completed in time for centennial ceremonies in Yankton next year. An additional $100,000 for rehabilitation of forest areas recently burned in South Dakota and Nevada was obtained on recommendations which Senator ALAN BIBLE of Nevada and I made in the Senate Appropriations Committee. Our committee was meeting at the time fires were burning in the Black Hills. The new funds were added to $700,000, providing a sizable sum for rehabilitation work in national forest areas.

IT'S TIME FOR SCORECARDS

While various organizations "rating Congress" have not completed their voting charts, I can report some indication on studies already compiled. One scorecard gives me only a 13-percent record of voting "right." This one I take as a badge of honor and as truly reflecting South Dakota interests, for the 13-percent "right" votes came in the ADA scorecard, the ultraliberal Americans for Democratic Action. I'm surprised the ADA socializers didn't rate me zero. Programs in which ADA says I voted "wrong" are the usual centralized government proposals or wildcat spending gimmicks which would cause a terrific inflationary spurt, further lower the value of the dollar, and take away the system of State and local government so vital to our Republic.

"Free Citizens Voting Record," compiled by Civic Affairs Associates, has your Senator voting "right" 69 percent, the same score, incidentally, as that of Senator JOHN MCCLELLAN, my Labor Rackets Committee colleague. My "right" votes were for economy in government, limited government, and other essential principles enhancing economic and political freedom.

Americans for Constitutional Action, headed by Adm. Ben Moreell, retired, and the former Democrat Governor of New Jersey, Charles Edison, records me with a 73-percent score in voting for "safeguarding the God-given dignity of the individual, and promoting sound economic growth." My percentage—a South Dakota percentage, because it is your scorecard as well as mine—came on my votes against inflation, for economy, conservation, against Government interference, against Government ownership, for individual liberty, against coercion, and for a strong national security.

BACK HOME AGAIN

As this final newsletter of the year reaches you, the Mundts will be in South Dakota again. In closing this report, I want to thank the many, many folks who have written to me during this session of Congress. Your letters have been most helpful, and my hope is that I have been able to be of service to you. My thanks, also, to radio and television stations, wire services, and newspapers which found the newsletter of use to them from time to time.

THE 86TH DEMOCRAT CONGRESS FAILS THE FARMERS

With the "bobtailed" session of Congress finished, the record is written on the 86th Congress, a Congress controlled by a 2-to-1 majority of Democrats. What is the record for the American farmer? It can be summed up thusly:

"One of abysmal failure in dealing with the agriculture problem."

In the fresh bloom of the 1958 victory at the polls, Democrats promised the American farmer that at long last, something would be done to solve the problems which have plagued agriculture for generations.

The House Agriculture Committee opened its session in January 1959, with 23 Democrats sitting in complete control over a handful (12) of Republicans. In the U.S. Senate, the Committee on Agriculture had 11 Democrats in control, with the minority represented by 6 Republicans, of which I am fourth ranking.

The record, after 2 years, is a sorry one. The promises made in 1958 by the Democrat majority led to the election victory which achieved the 2-to-1 Democrat congressional control. The promises were repeated in 1959. And again, as the Congress returned in January 1960, we heard the same promises. Early in July, the Congress adjourned—but not without the promise that "action for the farmer is forthcoming in August."

We heard the national convention proceedings in Los Angeles. We heard the political platitudes reach a crescendo on a platform of glittering promises unmatched in American history. And we heard the candidates selected at Los Angeles again promise action in the August session of Congress—action to solve the farm problem.

But there was no action. The promises, growing bigger, remain unkept. The American farmer has looked to the U.S. Congress for 2 years to take constructive steps to alleviate the difficulties of a cost-price squeeze. The American farmer has looked in vain. He was told of major new plans contained in omnibus legislation. "Look to this legislation or that measure as the answer to your problems," the American farmer was advised. And he looked, carefully, but eagerly. He found only controversy within the House Agriculture Committee, when Democrats, completely in control of that committee, could not agree on a farm bill. The House Agriculture Committee Democrats killed the bill sponsored by their own compatriots.

When the majority in the Congress could not agree on an omnibus bill, they turned their attention to the most critical area, wheat. The Senate Agriculture Committee tangled over various measures, and finally agreed on a compromise which I offered. But the Democrat Senate rejected this proposal, substituting another which could not do the job. And the House added the final death blow to wheat legislation, with rejection of all wheat bills presented for a vote.

In another area, the Senate approved a bill for a crash research program for industrial uses of farm products, legislation identical to that which I have sponsored over the years. The House approved a watered-down, sadly ineffective version, and for more than a year, no agreement has been reached, to work out a compromise on this program which would open a vast area of new markets for American farm products and bring to the farmer a fair price for a full crop.

The President, recognizing deeply the problems confronting agriculture, was willing to accept a compromise with which he was not in full agreement but which he felt should be adopted if it expressed the will of the Congress. On two occasions he sent messages to Congress offering in advance to sign a wheat bill or a general farm bill if Congress would enact one designed to increase farm income, reduce surpluses, and meet the public interest. But the Congress again failed to meet even this test, and again failed the American farmer.

The 86th Democrat-controlled Congress has not been a proud one in the history of American agriculture. It has failed to meet its responsibility in developing constructive legislation, either for the whole farm plant, or for specific areas such as wheat. The American farmer has once again been made the victim of the whims and caprices of politicians who appear dedicated to the proposition that problem for political purposes is better than a solution to end the dilemma and bring American agriculture full force into our vibrant economy. The inaction by a Congress that has placed politics above national interest is a scar that unfortunately is borne by the farmer rather than the legislative body which could not forget the last election results but failed to foresee the next returns.

Washington Report

EXTENSION OF REMARKS
OF
HON. BRUCE ALGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following newsletter:

WASHINGTON REPORT
(By Congressman BRUCE ALGER, Fifth District, Texas)

The 86th Congress, 2d session's 2d session finally came to a halt, long overdue. In my view, this session was an object lesson in poor congressional leadership. Congressional work could have been programed for final adjournment well before the political conventions. Few, if any, feel that this last session accomplished much. To our credit, it may be claimed that we did not pass aid-to-education or minimum-wage legislation. The danger was ever present (and will be in the future) and should be understood by everyone looking to the next Congress. Some may say our finest compliment will not be over what we did, but what we did not do.

"Operation Veracity" is the title of the effort by Republican Members in 2 days of floor debate to expose 14 misstatements of fact in the Democratic platform. These categorical contradictions thoroughly discredit the Democratic platform without even getting into the controversial issues themselves, such as the party differences on the right-to-work law, oil depletion, tidelands ownership, and others. These misstatements and the two sides of these conflicting views I intend to present in Dallas further to inform the voters.

The second supplemental appropriation bill, 1961, was the final spending catchall, some 70 items totaling $162 million. Two record votes were taken on increasing foreign aid spending. An interesting spectacle developed. When it became apparent that the increase of $65 million for defense support was losing, the leadership on both sides urged Members to change their votes. Eight Members switched from nay to yea (amounting to 16 votes difference) and the appropriation passed 203 to 193. Some felt as I did that $65 million cannot be too important when you realize that the mutual security program already has $8,486 million to its credit for spending this year.

A resolution concerning a Congressional Commission To Commemorate the Constitution's 175th Anniversary later became better known as the vehicle for a housing bill. Unbeknownst to most Members, a $550 million housing expenditure was tacked on by the Senate and slipped quietly through the House under unanimous consent. This is questionable procedure at best. It does fit the pattern of the past when housing bills frequently have been delayed until the closing hours of Congress, precluding careful consideration. The bill extended FHA title I insurance authority for 1 year, added $500 million for college housing, and $50 million for community facilities. This keeps the Federal foot in the door for all three programs until the next session of Congress.

The Dallas Federal building again was rudely thrust into the limelight by a statement issued to the press by the Government Activities Subcommittee chairman, JACK BROOKS, of Texas (subcommittee of Government Operations Committee, chairman, WILLIAM DAWSON, of Illinois), on subcommittee stationery listing all members. I challenged this statement on the floor as improper procedure and unfair. It became apparent that (1) the statement was solely that of Mr. BROOKS, not the subcommittee, although the inference of committee action was plain; (2) hearings were not held; (3) congressional information (the GAO report on Dallas site acquisition) was withheld from Members of Congress; (4) Mr. BROOKS had not looked over the GAO report until a Republican colleague called it to his attention; (5) the GAO report specifically gave a clean bill of health to the Dallas site acquisition; (6) another committee, that on public works, was holding up reauthorization of the Dallas building because of the alleged continued study of the Government Operations Subcommittee (GAO report was received by them last April); (7) the reference to "peculiar moral and ethical overtones" related to Dallas businessmen was unwarranted in view of the April GAO report. This individual's personal attack on the integrity of Dallas business people under the guise of committee action could not go unchallenged, as I saw it. Neither can this charge be allowed to stand if the Dallas Federal building is to be built.

It is now up to Mr. BROOKS and his subcommittee to complete their work and "to put up or shut up." If he is wrong, the record must be corrected—apologies would also be in order. Right or wrong, I agree, indeed, insist, that it is proper for Congress to investigate. Private property—the right to own property—is a precious cornerstone of personal freedom and free enterprise. If there was improper activity in the acquisition of the Dallas Federal Building site, we should know about it. The power of government under eminent domain can be ruthless and destructive. It is incumbent on Congress to protect the citizens from unfair exercise of this power. However, in the zeal of investigation, no Member of Congress has the right to forgo the rules of procedure, nor damage character. Hearings on both sides of the question should be held, Government reports requested and studied, the committee views developed and finally presented to the House for action. Federal buildings should be built based solely on the openly arrived at study of need and merit—not by political deals outside the committees of Congress. On this, as Congressman, just like all Dallas people, I stand. Political decisions and deals should not be allowed to replace dedication to our elementary beliefs in right versus wrong. Fortunately, in most congressional matters, right and wrong generally are readily recognizable. It is so in this case. Congress should get on with this work as needed and right or shelve it for an equally understandable reason—that it is illegal, uneconomic in use of the taxpayers' money or other reason, clearly recognizable as wrong.

South Korean Government Attempts To Drain Our National Treasury Further by Ridiculous Demand

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BAILEY. Mr. Speaker, under the privilege of inserting my own remarks in the CONGRESSIONAL RECORD, granted all Members of the Congress following adjournment, I wish to call the attention of my colleagues to an unusual situation.

Mr. Speaker, it has been my observation throughout a long and active life that friendships based on pecuniary considerations are never lasting friendships.

The press on Friday, August 31, 1960, brought the news that the South Korean Government is demanding a total of $4.1 billion which they claim is due them for ground rentals and building rentals during the period of occupation by American forces from 1950 to the present date.

The Korean officials must have had some encouragement from our military or State Department officials that would lead them to file such an outrageous and unreasonable bill.

I know of no way they could get any part of this settlement, arrived at without consent of the Congress, and I shall make it my business in the 87th Congress to uphold any further drain of our National Treasury by these economic bandits.

The 86th Congress and Marion County, Ind.

EXTENSION OF REMARKS
OF
HON. JOSEPH W. BARR
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BARR. Mr. Speaker, when George Washington, Benjamin Franklin, and our Founding Fathers drew up the Constitution, they made an important decision about the Congress. They decided that it would be composed of two bodies—a Senate, whose Members were to represent the different States, and a House of Representatives to represent the people. Since that time the Senate has grown from 26 Members to 100 as new States have been added. The House has grown from 65 to 437 as new congressional districts were carved out of the States. But the responsibilities are about the same.

My responsibility runs clearly to the 700,000 people who live in Marion County, Ind.—the people who are trying to raise families, earn a living, and live a peaceful and purposeful life. I have been the voice of these 700,000 people in the affairs of the United States for the past 2 years as a Member of the 86th Congress.

We have all heard and read a lot about the Congress and world affairs, about the Congress and the Nation, about the Congress and the States. I have been directly involved in all these matters, but I also think it is vital that someone report on the 86th Congress and what it meant to the people in Marion County, Ind.

We are a great metropolitan area with special problems that need special attention. It is my job to see to it that our special problems are recognized and considered. If I do not, no one else will. That is the reason for this report.

WHAT IS MARION COUNTY?

Before anyone can represent this area, he must first know what it is and what its problems are. Just what is Marion County, Ind.? Statistically, it is a great manufacturing and commercial area. It

is one of the largest congressional districts. It is one of the 30 largest counties in the Nation. More people live within our borders than live in 11 different States. We earn about $2½ billion a year in manufacturing, commerce, and services. We pay about $400 million a year in Federal taxes. These are the bare bones of the statistics.

But there is a human side, too. There is a story of about 100,000 men and women making a living in our plants, producing aircraft engines, telephones, drugs, automobile parts, electrical equipment, and a wide variety of other products. There is a story of about 190,000 men and women earning a living in our stores, on construction, and as doctors, lawyers, dentists, and architects. There is a story of 150,000 school children on the one hand, and about 70,000 senior citizens over 65 on the other.

Put the statistics and the people together, mix in our churches, our libraries, our fraternal and social organizations, and some sort of a picture of this great area begins to emerge. This is the picture I keep trying to keep in focus. This is the picture I try to keep before me when I vote.

With this background let us take a look at the 86th Congress from seven different sides—peace and foreign policy, defense, Government finances, business, labor, agriculture, and social security—and see how its record worked out for Marion County, Ind.

PEACE AND FOREIGN POLICY

In Marion County our people share with everyone else in the country, and probably everyone else in the world, a deep yearning for peace. Those of us who were under fire in World War I, World War II, or Korea remember the horror of combat and the anguish of separated families. We all hope to spare our children this fate. But it possibly goes deeper than that. It probably boils down to a concern for the survival of the human race. The question that haunts me was asked by an Air Force general who said: "JOE, this Nation and the Soviet Union are developing almost completely reliable weapons. Just how reliable are you politicians?"

Probably the most significant move that the 86th Congress has made in this field has been through laws doubling the size of the World Bank and the creation of the Inter-American Bank. Maybe you are asking yourself: "What do these banks have to do with peace?" They have a great deal to do with it, and they mark a significant change in our policy. Through these institutions we are saying to 68 free nations of the world and 20 nations in Latin America, "Look, we will join with you, and all of us will put up our cash and our brains to attack the problems of poverty, disease, and ignorance wherever they may exist."

Foreign aid has become increasingly unpopular with the Congress because we realize that our country simply does not have the resources or the brains to solve the problems of the underdeveloped nations of Africa, Asia, and South America alone. Recent events in the world—especially in Cuba and Latin America—have cast serious doubts on the old approach. But recent events have also shown that cooperation will work and can head off Communist drives to exploit these underprivileged nations.

The Community Chest is working fine in Indianapolis and Marion County. Through the World Bank and the Inter-American Bank the 86th Congress just carried this idea on to our international problems of peace and foreign policy. History would indicate that if the world ends up with Russia and China on one side, the United States on the other, and the rest of the world in the middle, then there is little chance for peace or freedom. An explosion is inevitable. But if we bind the free nations to us through this Community Chest approach of sharing brains and cash to attack poverty and ignorance, then the world stands a chance for freedom and peace. We in Marion County stand to get a better return for the $20 million of our tax money that is being spent every year on foreign aid.

DEFENSE

While working for peace, we cannot be foolish enough to neglect our defenses. The Communists obviously respect strength. The question that the 86th Congress had to face was, "What sort of defense?" One wise old Senator told me, "Most generals and admirals are always preparing for the wrong kind of war. They are always getting ready for a war in which we strike the first blow. But this is impossible under our democratic government. We have never struck the first blow and probably never will."

Our task is clear. We must make sure that any enemy knows that we will retaliate with terrible force if attacked. Still, the Congress has to fight the Navy on carriers that we think are vulnerable, and to urge them to concentrate on retaliatory weapons such as antisubmarine warfare. We have to prod the Air Force to consider an airborne alert, and to develop missiles that can be moved on railway cars. Retaliation is our goal, and I think the record of the 86th Congress in that respect is good.

On other defense fronts, I am not too happy. Their accounting methods in the Department of Defense are so old-fashioned that they tell little or nothing to me. About 200 millions of Marion County tax dollars are involved in defense. You can see why I have yelled about accounting.

Probably the biggest gap is civil defense. First of all, I think that the name is wrong. This area is defense pure and simple. If Marion County is hit and our people cannot get back to producing engines, rocket casings, and communication equipment, then how can this Nation launch an effective and sustained retaliatory strike? Frankly our efforts seem poor in this area so vital to us in Marion County.

GOVERNMENT FINANCES

All of us are concerned about the Nation's debt and its spending. I was surprised to find that the House is usually very frugal with our money. In 29 out of 33 appropriation bills, we cut the amount the President requested. The total cuts ran to about $5 billion. I personally voted for about $6 billion less than the administration asked for in 1959 and again in 1960.

Finance is the field in which I am trained and which I know. I have worked harder on Government finances than any other field. I can pass on to the people in Marion County three bits of advice.

First. Do not look for sizable tax cuts until we can get some measure of peace in the world. The cold war has moved to Cuba within 97 miles of our borders.

Second. If we are going to cut the debt, we will have to run a large surplus in good years, because in bad years we will be lucky to end up with small deficits. The returns from the income tax fluctuate violently up and down.

Third. Keep yelling about saving. There is more pressure on the Congress to spend than to save.

BUSINESS

Marion County has one special business interest that should be protected. We sell millions of dollars worth of drugs, truck engines, truck bodies, and many other items in world trade. Some estimates show the total as high as $150 million a year and involving directly 10,000 jobs, and indirectly another 20,000 (for a total of 30,000 jobs).

We are hurt to some extent by imports of bicycle chains, plywood, and a few other products. But on balance a free world trade looks much the best for us.

On the import side we buy enormous amounts of oil, lead, tin, zinc, and copper. Tariff or quota laws keeping these prices high are not best for us.

Marion County is a world trading center. It is hard to realize, but it is true. What is more, we make money out of it. The record of the 86th Congress is not too good in this field. It has been more interested in protection than trade. I voted against protection, but I usually lost.

LABOR

In Marion County we have about 70,000 families where the husband or wife belongs to a labor organization. We have a vital stake in labor laws. The 86th Congress started out to write a law giving union members the right to run their unions through honest election procedures and to control their unions' money. The bill nearly ended up as a union-busting law. It seemed to me that Marion County had a history of decent and responsible labor-management relations. I believe that union members should have the right to run their own unions and that their conduct in our county does not call for any union busting. I voted accordingly.

It is still too early to know what effect this Labor-Management Act will have.

AGRICULTURE

Marion County could not be called a farming county, but our ties with agriculture are very close. We ultimately share the farmer's prosperity or depression. There is no single national program that has failed so miserably in recent years. In the last 8 years we have spent $26 billion on a program that has not kept the small farmer alive. Nearly 4 million people have left the farms.

The program has not supported farm income, which has dropped from $14 billion a year to $11 billion a year. The program has not disposed of farm surpluses. Our surplus holdings have jumped from $2 billion to $9 billion in storage. Our storage costs run at the rate of $1 million a day. And ironically, employees at the Department of Agriculture have increased 20,375 in the past 8 years. What a record.

How do we get out of this mess that soaks up $20 million a year from Marion County tax dollars? It would seem obvious to me that the first step is to get rid of that surplus. No approach will work with that fantastic surplus hanging over the market.

With two-thirds of the world starving, surely this surplus would be a wonderful asset in our attempts to rebuild the underdeveloped parts of the world. But the diplomats always have some objection that we will ruin the markets of our competitors. Frankly, I cannot understand this argument. How can you ruin a market where the people have no money and are starving? We have tried to sell part of this surplus for local currencies that are useless except in that country. This device is backfiring because if we are not careful we will end up owning half of the poor countries in the world. We have enough headaches without that.

Surely we can go back to the cooperative technique I mentioned earlier and join with other surplus nations to use this food for peace. I believe that we can do some good in the world by shipping food instead of firearms, butter instead of bombs. We would also save $350 million a year storage cost.

When we get rid of the surplus, then what do we do to keep a healthy farm economy? For the next decade we may be plagued with the ability to grow more than we can eat or sell. How do we get rid of it? There are all sorts of solutions floating around, but I am going to recommend an approach, not a solution.

Fifty years ago the United States had about the same problem with our monetary system. Surpluses or shortages of money were causing booms or busts that were slowing the orderly growth of the country. We tackled that problem by establishing a commission—the Aldrich Commission—which studied the problem for 3 years and then recommended a Federal Reserve System to give the United States "enough but not too much money." It is dangerous to draw too close an analogy between money and farming, but the procedure can still be recommended. I can say for certain that no orderly solution of the farm problem will emerge from a presidential election campaign.

SOCIAL SECURITY

There are about 70,000 people in Marion County who are 65 or over—10 percent of our population. By 1970 the percentage figure will jump to 15 percent, and the Census Bureau estimates that the total figure will rise to 130,000 senior citizens. Life for these people is not always easy in a great metropolitan area. When we lived on farms, there was always work to do for everyone, and aged relatives were a welcome and respected part of every household. This is not true today in our big city industrial areas. The original social security law was passed to meet this situation. It was passed to give these senior citizens and our society a chance to work out the problem of how to live with some dignity after 65. Today about 49,000 people in Marion County come under the law—about 70 percent of our 65-or-over population.

The 86th Congress made some technical amendments to the law. First, they changed the $1,200-a-year earning limitation to provide that anything earned between $1,200 and $1,500 would reduce benefits 50 cents for every dollar earned and over $1,500 each dollar earned would reduce benefits $1. This gives some incentive to earn more than $1,200 a year.

Second, we eliminated the 50-year age requirement for total disability payments. A person covered under the act can now receive benefits whenever he becomes completely disabled.

Third, we worked on the extremely controversial problem of medical care for the aged. One plan that was considered would have operated directly under the social security law. Anyone receiving benefits would have been entitled to hospitalization. The cost would have been met by raising the social security tax one-fourth of 1 percent.

Another plan called for subsidies to private insurance companies to enable them to shoulder heavier risks.

The third plan called for Federal-State cooperation to provide medical care for those elderly people who were hopelessly impoverished. This was the plan adopted. The United States will match State funds in this program. It is voluntary; any State may or may not join. All programs are administered by the State.

All these plans had their fierce supporters and opponents. The plan adopted was probably chosen because it involves no increase in the tax and will not damage the financial stability of the social security trust.

CONCLUSION

Marion County, Ind., is a highly significant part of the Nation and the world. According to the latest figures of the Bureau of Internal Revenue, we paid more Federal taxes than perhaps any other congressional district. It is certain that we paid more taxes than 14 different States.

We earn more money than many independent countries in the United Nations.

We do not and cannot live in a vacuum. No one can ignore the needs of the country and the world we live in. But this county is important enough to be well and forcefully represented. If we fail, it would be a serious blow to the United States and even to the free world.

Our strength is unquestionably an important part of the total strength of the United States. Surely Marion County, Ind., is entitled to careful and diligent representation.

Over the Speaker's chair in the House is an inscription—a quote from Daniel Webster—which reads:

> Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.

As we adjourned I breathed a silent prayer that I had lived up to that challenge for Marion County, Ind., and for our beloved country.

The Highway Investigation—Massachusetts and Elsewhere

EXTENSION OF REMARKS

OF

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WRIGHT. Mr. Speaker, the chairman of the Special Subcommittee Investigating the Federal-Aid Highway Program has denounced on this floor the hit-and-run politics indulged in by certain minority members of this subcommittee. In particular, he rebuked the ranking minority member for having issued a press release in which he charged the subcommittee was ignoring a Massachusetts highway scandal that was the granddaddy of them all and that the subcommittee purposely was avoiding it like the bubonic plague. Everything the chairman said in repudiating this statement has my hearty concurrence. The tactics being employed by the minority members are of the disgusting type that serve only to bring congressional committee investigations into disrepute.

What we have here is a situation in which certain minority members, the Bureau of Public Roads, and the Republican National Committee obviously are all linked in a conspiracy to manufacture political fodder for the fall campaign. Great indeed must be their desperation when we find them showing such complete and ruthless disregard for common decency that the text of a letter addressed to the chairman by the Bureau of Public Roads appears in the public press in Boston prior to its delivery to the chairman's office.

It is significant also that black headlines in the same newspaper proclaim "Millions Involved—Land Appraisals Raised 300 Percent—High State Official Is Under Suspicion," when the letter itself contains absolutely no such statements and there is no indication of where such information originates. I fully expect that some minority members will see to it that all of the furor emblazoned in the Massachusetts newspapers will be reflected in due course in the pages of the CONGRESSIONAL RECORD.

The Republican Party's candidate for the Presidency of the United States has made the lofty pronouncement that he intends to follow the high road and there is the implication that the Democrats have chosen to travel along the

low road. The record is abundantly clear that certain minority members of this subcommittee propose to travel by subway, with their transportation underwritten by the Republican National Committee.

I do not want anything I say to be construed as indicating that there is nothing wrong in Massachusetts. Frankly, at the moment, I do not know. There may very well be a scandal in Massachusetts and the subcommittee, in due course, will attempt to determine the nature and the extent of any irregularities.

I want to state this for the record, that as long as I am a member of this subcommittee and have any voice in its operation, investigations will be conducted in an orderly and intelligent way and will not become instruments for political purposes. I think it not an unreasonable assumption that the minority members of the subcommittee may have entertained some hope that their fanatical and frenetic fulminations about Massachusetts would stampede majority members into abandoning investigations under way in other States which have occupied most of the time of the subcommittee's staff for the past couple of months. I cannot help but wonder if the attempt to divert the staff from the investigations now being pursued in these other States may be generated by a fear that some of the minority members may be embarrassed.

The political motivation insofar as Massachusetts is concerned is all too apparent. It is the home State of the Democratic candidate for President. The Republicans are also anxious to reelect a Republican U.S. Senator. The Republicans also would like very much to elect a Republican Governor. The Republican candidate for Governor is John A. Volpe who is a former U.S. Public Roads Commissioner and a close friend of many officials who are still in the Bureau of Public Roads.

The participation of the Bureau of Public Roads in the creation of the glaring headlines in the Massachusetts press is so wanton and flagrant as to suggest the advisability of an investigation by the Department of Justice to determine whether or not employees of the Bureau of Public Roads have engaged in political activity violative of the provisions of the Hatch Act.

The blatant irresponsibility so brazenly displayed by the minority members of the subcommittee must be answered. The minority members have had complete access to the facts concerning the progress of this investigation the same as I have. They have twisted and distorted factual information that appears in the official documents of the Bureau of Public Roads and it is for that reason that I set forth the real facts so that anyone so disposed may have the opportunity to judge what has happened with respect to the Massachusetts investigation.

The Bureau of Public Roads last December came into possession of information indicating that there may have been improper activities in relation to right-of-way acquisitions. The subcommittee staff learned about it from the Bureau of Public Roads in January. As I previously mentioned, the staff was busy with other matters at that time and has been ever since, but liaison was maintained with the Bureau of Public Roads right up through the month of May.

During that month the Bureau of Public Roads hired the firm of Beasley & Beasley here in Washington to go to Massachusetts and make appraisals of all the parcels involved in three different projects. There was an agreement between the Bureau of Public Roads and the subcommittee staff that our investigators would not go into Massachusetts until the Beasley firm had completed its work.

It was felt that the Beasley Co.'s work would be materially hampered if it were conducted in an atmosphere which is created by public knowledge of an investigation. Secondly, the results of the Beasley reappraisals work must be completed before there can be an intelligent comparison made with the appraisals that were conducted under the responsibility of the State.

On August 23, 1960, C. W. Enfield, General Counsel of the Bureau of Public Roads, sent a letter to Walter R. May, chief counsel of the subcommittee, in which he gave the following information:

> In response to the request of your office to furnish you with a proposed timetable of completion of review of certain appraisal practices in the State of Massachusetts, we have conferred with Beasley & Beasley relative to the probable dates of submission of their appraisal reports and have arrived at what appears to be the likely completion dates for this matter.
>
> Beasley & Beasley have furnished the Bureau of Public Roads their appraisal reports on all the parcels they are appraising in Wakefield, on one-third of the parcels in Attleboro, and all but a few of the parcels in Reading. They have advised that they will complete their appraisals on the remaining parcels in Attleboro by August 31, the parcels in Gardner by September 15, those remaining in Reading and other appraisals on a few special properties by October 1, 1960. Within a few days after receipt of these appraisals, Public Roads will complete its preliminary review to determine those parcels for which the appraisals submitted to the Department of Public Works of the State of Massachusetts appear to be unreasonably high.
>
> Beasley & Beasley further advised that they will furnish Public Roads with complete narrative reports pertaining to those parcels for which the State's appraisals appear to be unreasonably high, which narrative reports will list all pertinent data upon which the Beasley & Beasley appraisals are based. These narrative reports will be submitted within 30 days after determination of the parcels involved, unless the number of such reports is excessive in which event a longer period of time will be required. The analysis of the appraisals and narrative reports relative to those special parcels should be completed by the Project Examination Division of the Bureau of Public Roads within 2 weeks after receipt of the narrative reports.

According to my calculations, the completion of the analysis of the appraisals and narratives referred to in the foregoing letter cannot come about until sometime in November or possibly later. The subcommittee cannot be expected to proceed with a logical, intelligent investigation until there is a determination of what it is supposed to investigate. If there are wide variances in the comparison of the figures there must then be an investigation to ascertain why.

I am informed that Bureau of Public Roads officials and representatives directly in charge of these particular projects failed to review the appraisals during all of 1959. I am also given to understand that the Bureau of Public Roads regional office did not make any reviews in 1959. You can bet all the tea in China that I am going to have a deep and abiding interest in the question of where the Bureau of Public Roads was all that time if we do uncover evidence of irregularities in Massachusetts.

It seems rather surprising to me that the newspapers can predict the actions and assess the values involved when the Bureau of Public Roads right at this minute supposedly does not have such information and cannot have it until Beasley & Beasley completes the reappraisal work.

What I particularly resent is the making of public statements impugning the motives of the committee and, in general, seeking to destroy what should be a thoroughly nonpartisan investigation on behalf of the American taxpayers. I, for one, will not be a party to covering up anything, anywhere in the United States. I am all for an investigation in Massachusetts just as soon as the fundamental data is available to us, but I do not propose for one minute that any subcommittee of which I am a member will go racing into a State in a witch-hunting manner.

I quite agree with the chairman in his public statements that this subcommittee will not conduct public hearings until a complete and full investigation is made in any case that comes to its attention and until all the available facts have been ascertained.

Reducing the Budget

EXTENSION OF REMARKS

OF

HON. LAWRENCE BROCK

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BROCK. Mr. Speaker, under the privilege granted me to revise and extend my remarks in the RECORD, I am submitting the following statement regarding appropriations.

During the 2 years of this Congress we have considered appropriation bills representing many billions of dollars of the taxpayers' money. Coming from the conservative State of Nebraska, it was necessary for me to evaluate these appropriation bills on the basis of their merit to my State and the needs of the Nation.

At various times it became necessary for me to cast a negative vote in instances where, in my judgment, the requested appropriations were not in the best interests of the taxpayers of Nebraska and the rest of the Nation.

Accordingly, my votes on amendments and final passage of various appropriation bills during the past 2 years have accounted for reductions of over $12 billion less than the amounts that were requested in the President's original budgets.

An analysis of the RECORD for the first session of 1959 indicates my voting to the extent of reducing the President's budget requests by almost $6 billion, for approximately 7.2 percent of the total budget.

In the final 2d session of the 86th Congress, this reduced figure amounted to over $6 billion, a total of approximately 8.6 percent below the requested appropriations by the executive departments.

Following is a compilation of my votes on appropriation bills for fiscal years 1960–61:

	President's budget request	BROCK votes to reduce
Fiscal year 1960 (1st sess., 86th Cong.)	$77,200,000,000	[1] $5,659,000,000
Fiscal year 1961 (2d sess., 86th Cong.):		
Includes following reductions:		
Department of Commerce	799,615,000	−39,092,765
Department of Interior	550,330,300	−6,954,700
Treasury-Post Office-Tax Court	4,897,853,000	−102,439,000
Labor-Health, Education, and Welfare	4,000,083,981	+183,938,750
Executive offices	14,302,500	−515,000
Supplemental appropriation	134,822,200	−85,106,500
State-Judiciary	713,803,755	−37,249,049
Independent offices	8,416,897,000	−270,729,680
Department of Defense	39,335,000,000	+2,867,000
Department of Agriculture	4,135,263,190	−197,319,690
Military construction	1,188,000,000	−311,855,000
Legislative (Library of Congress and GPO)	104,072,020	−3,754,360
Public works	4,001,016,180	−86,217,195
Mutual security	4,181,704,000	−3,589,750,000
Special items:		
Acquisition of Hubbell Trading Post site, Arizona	300,000	−300,000
Pan American health site, District of Columbia	874,000	−874,000
School construction (3-year program)	975,000,000	−975,000,000
Federal postal pay raise	607,500,000	+102,500,000
U.S. Citizens Commission on NATO	300,000	−300,000
2d supplemental appropriation bill, 1961	118,185,031	−27,597,031
Latin America foreign aid	600,000,000	−600,000,000
District of Columbia	5,281,000	−5,281,000
Total	75,698,701,550	[2] −6,821,922,108

[1] Reduction 7.2 percent.

[2] Reduction 8.6 percent.

Statement by Senator Harry F. Byrd, Democrat, of Virginia, Relative to Tax Foundation's Review of Budgetary Actions in Congress

EXTENSION OF REMARKS

OF

HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by me relative to the Tax Foundation review of budgetary actions in Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

When the President submitted his 1961 budget in January he requested new spending authority totaling $79.4 billion. I am advised that new spending authority finally enacted through the end of this session of Congress totaled $80.7 billion, an increase of $1.3 billion as compared with the January requests.

These figures are revealed in a review by Tax Foundation, Inc.

The review strictly follows budget presentations and it covers spending authority—appropriations, authority to spend from debt receipts, etc.—enacted through this session of Congress to become available in fiscal year 1961.

It must be kept in mind that these are not expenditure estimates for fiscal year 1961. Expenditures in the current fiscal year will be made not only from these new spending authorizations but also from the unexpended balances remaining in other spending authority enacted in prior years. By the same token, some expenditures from the new 1961 authority will not be made until later years.

The Tax Foundation figures also reflects the failure of Congress to enact postal rate increases. The President's January requests contemplated $554 million in additional postal revenue from proposed increases in these rates to eliminate the estimated postal deficit. Appropriations to the Post Office Department allow for meeting the postal deficit in an indefinite amount.

The Tax Foundation is an independent research organization which I regard as the best in the field of government at all levels.

As a matter of routine, the Tax Foundation for years has been keeping a running box score on bills authorizing expenditures during their passage through the legislative procedure. This review shows final action by Congress on spending legislation during the session just ended.

The Tax Foundation's review follows:

TAX FOUNDATION TABULATION SHOWING FINAL ACTION ON NEW SPENDING (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 1961 BY THE 86TH CONGRESS, 2D SESSION

The budgetary record of the 2d session of the 86th Congress offers hope of a moderate surplus in the fiscal 1961 Federal budget. Depending upon certain economic and other factors, the surplus may be somewhat less than the January estimate of $4.2 billion. Last-minute approval of backdoor financing items in a stopgap housing measure may have little effect upon actual fiscal 1961 expenditures. Despite increases over budget requests, the session was noteworthy for successful resistance to strongly backed big spending proposals.

Spending authority increase: An unofficial tabulation conforming to Budget Bureau accounting practices shows an increase of $1,406 million in new obligational authority for fiscal 1961 over amended budget requests ($1,274 million over the original January estimate). The total does not include upwards of $1 billion for unbudgeted programs (including the pay increase and medical care) for which supplemental funds probably must be provided in the next session.

Appropriation bills: Appropriations providing new obligational authority exceed amended budget requests by $539 million and original estimates by $576 million. Authority in appropriation bills to borrow from the Treasury is greater by $50 million than amended budget requests but less by $120 million than original proposals. The latter decrease is due to the unwillingness of Congress to shift from backdoor financing in two programs.

Backdoor financing: Unbudgeted spending authorizations bypassing the appropriation process in legislative bills were held sharply in check throughout the session. A total of only $818 million applicable to fiscal 1961 was enacted into law, including $550 million in the stopgap housing measure.

Tentative totals: Totals in the unofficial tabulation are subject to revision in official figures in the midyear review of the Budget Bureau. A tentative grand total of $80,689 million in new obligational authority is expected to be reduced by nearly $500 million (with accompanying reductions in budget requests and expenditure estimates) by omission of a temporary advance to the highway trust fund and a shifting of programs financed by the Federal Unemployment Tax Act to the unemployment trust fund under a provision of the Social Security Amendments of 1960. New estimates for indefinite appropriations for interest on the debt and the postal deficit also may show differences.

Fiscal 1961 surplus: An increase in the January estimate of $79.8 billion in fiscal 1961 expenditures is forecast by action on new spending authority, but offsets may be provided by reductions in farm price support and other programs. Revenues may fall short of estimates, but a surplus seems assured.

Nature of tabulation: The tabulation which follows provides a comparison of new spending authority with both amended budget requests and the original January estimates.

The grouping is designed to show the area of spending authority within the jurisdiction of the Appropriations Committee, as distinguished from backdoor financing under control of legislative committees. A grouping under appropriation bills includes appropriations and reappropriations from the general fund of the Treasury, authority in appropriation bills to borrow from the Treasury (or in technical terms "to expend from public debt receipts"), and a separate January budget item of borrowing authority in appropriation bills marking an unsuccessful effort of the administration to shift from backdoor financing in replenishment of mortgage purchase and public facility loan funds.

Inasmuch as the tabulation covers only budget estimates and final spending authority, it fails to show the extent to which backdoor financing figured in uncompleted actions by committees and by the House and Senate.

The totals for permanent authorizations are necessarily based on estimates in the January budget, the latest available until revisions are provided in the Budget Bureau's midyear review.

The fact that appropriation totals in the tabulation are considerably lower than those issued by congressional committees is accounted for by exclusion of (1) an estimated $3,450 million in appropriations from postal receipts, and (2) $417.5 million for liquidation of prior contract authority. The latter includes amounts for grants in the urban renewal program, airports, airmail subsidies,

public domain highways, and minor construction items. The appropriation totals in the tabulation, in accordance with Budget Bureau practice, are limited to those which authorize new obligations from the Treasury. Actual postal costs from the Treasury are included.

Upward trend in spending authorizations: The tentative total of $80.7 billion in new obligational authority for fiscal 1961 is larger than in any other year since the Korean war, except fiscal 1959, which reflected antidepression expenditures. Supplemental appropriations in the new session may boost the fiscal 1961 total up to or above the fiscal 1959 total of $81.4 billion.

Each year since fiscal 1955, when new obligational authority totaled $57.1 billion, final totals have exceeded original estimates. An increase over the previous year occurred each year for 4 successive years.

In the 16 appropriation bills enacted for fiscal 1961, there were net increases over amended budget estimates in 5 bills aggregating $1,689 million and net decreases in 11 bills aggregating $1,111 million, a total net increase of $578 million, which becomes $588 million, when funds for liquidation of prior contract authority are eliminated.

During the progress of the appropriation bills, the House made reductions from budget estimates, including borrowing authority within these bills, amounting to $975.5 million. The Senate increased the total over the House by a little more than $3 billion. The compromises in conference brought the final total down to the $588 million over amended requests.

Fiscal 1961 data comparable to original and amended budget requests

[In millions]

	Original January budget	Amended budget estimates	Total spending authority	Plus or minus January budget	Plus or minus amended budget
Current authorizations:					
Appropriation bills:					
Appropriations [1]	$68,237	$68,274	$68,813	+$576	+$539
Authority in appropriation bills to borrow from Treasury	368	368	418	+50	+50
Budgeted shifts from backdoor approval of borrowing	170	----------	----------	−170	----------
New obligational authority under control of Appropriations Committees	68,775	68,642	69,231	+456	+588
Backdoor financing:					
Contract authority (public domain highways)	----------	----------	118	+118	+118
Borrowing authority (loans for veterans' and college housing and public facilities)	----------	----------	700	+700	+700
New obligational authority under control of legislative committees	----------	----------	818	+818	+818
Total current authorizations	68,775	68,642	70,049	+1,274	+1,406
Permanent authorizations (as estimated in January):					
Appropriations (including interest on the debt)	10,196	10,196	10,196	----------	----------
Contract authority (airport grants, airmail subsidies and urban renewal)	437	437	437	----------	----------
Borrowing authority	8	8	8	----------	----------
Total permanent authorizations	10,641	10,641	10,641	----------	----------
Total new obligational authority	79,415	79,283	80,689	+1,274	+1,406

[1] Appropriation totals follow Budget Bureau practice of exclusion of those from postal receipts ($3,450,000,000) and for liquidation of prior contract authority ($417,500,000), neither of which provides new authority to obligate from the Treasury. Failure of Congress to approve budgeted increases in postal rates to yield $554,000,000 is reflected in an estimated $508,500,000 indefinite appropriation for the deficit (after reduction of $45,500,000 in authorized obligations), which is in addition to a specific appropriation of $49,000,000 for public service costs. Details in table may not always add because of rounding.

Safeguard Colorado River Water Supply

EXTENSION OF REMARKS

OF

HON. D. S. SAUND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SAUND. Mr. Speaker, in May of this year, the special master appointed by the Supreme Court of the United States in the Arizona against California water suit issued his recommendations. They produced consternation among the people of southern California, dependent on a water supply from the Colorado River.

In view of the fact that the special master, the Honorable Simon H. Rifkind, will allocate more than 4 million acre-feet of Colorado River water to the State of Arizona with a population of about 1 million people as against 3.5 million acre-feet to 7 million people in southern California, it is fitting for us to study the history surrounding the claims, appropriations, and settlements for the Colorado River water supply.

The need for a dam in the Colorado River for flood control and to regulate the supply of water in the lower Colorado River Basin was first emphatically voiced by President Theodore Roosevelt in 1907. Claims had been filed for Colorado River water by Palo Verde and Imperial Valleys in southern California before the close of the 19th century. The first water was diverted for agricultural purposes in Imperial Valley and Mexico in 1901. The Imperial Valley, situated 200 feet below sea level, was always in danger of floods during the river's heavy flow periods and short of water during the summer months when the river was low.

But there was powerful opposition to the building of such a dam from three sources: the State of Arizona, the opponents of public power development, and American owners of land in Mexico. Water was being appropriated in the lower regions of the river, and the upper basin States feared that, if a storage dam was constructed, faster development in California and Arizona would take the river water before development could begin in the upper basin.

Mr. Speaker, to resolve those fears and to find a basis for equitable distribution of the water supply in the river it was found necessary to form a compact between the different States. After several attempts, representatives of the seven Colorado River Basin States—Colorado, Wyoming, New Mexico, Arizona, Utah, Nevada, and California—reached an agreement to hold a conference between the representatives of the seven States and the Federal Government. The conference started early in 1922 and continued until November of that year. It was presided over by former President Herbert Hoover, then Secretary of Commerce.

After nearly 30 meetings in Washington and other parts of the country, as well as personal inspections and thorough study of reports of various commissions, agreement was reached and the Colorado River compact was signed in Santa Fe, N. Mex., on November 24, 1922. The compact divided the available supply of water in the Colorado River equally between the upper and lower basins. Lee Ferry was established as the point of division between the two basins. The compact was ratified by all of the basin States except Arizona. Failure of Arizona to ratify the compact has been the cause of litigation in the Federal courts, including the U.S. Supreme Court, for nearly 30 years.

Legislation was introduced in Congress by Congressman Ralph Swing and Senator Hiram Johnson, both of California. Finally, after long delays and filibusters, the fourth Swing-Johnson bill, authorizing the construction of Hoover Dam at the Black Canyon-Boulder Canyon site, was passed by the Congress on December 21, 1928.

The Boulder Canyon Project Act provided for the authorization of $260 million in Federal funds for the construction of the dam. This sum would be reimbursed, with interest, from sale of electric power to be produced at the dam. It was stated in the law that the act would not become effective until the seven basin States had ratified the compact, or lacking that, at least six States, including California, ratified the act and California passed a limitation act, whereby it agreed to limit its claim to Colorado River water to 4.4 million acre-feet a year. Further, no work was to begin on the dam until the Secretary of Interior had received firm contracts for the sale of power sufficient to pay the entire cost of the dam, with interest, within 50 years. The Colorado River compact was an integral part of the Boulder Canyon Project Act. Water contracts hereafter made by the Secretary of Interior for water stored behind Hoover Dam were to be governed by provisions of the Colorado River compact.

President Hoover declared the Boulder Canyon Project Act effective on June 28, 1929, after all the States except Arizona had ratified the compact and California had passed its limitation act.

Twenty-five million dollars of the cost of Hoover Dam construction was apportioned to flood control, which was to be paid out of the excess revenues from sale

of power. This was a unique provision because in all reclamation projects, the flood control portion is nonreimbursable and borne completely by the Federal Government.

After the contracts for the purchase of power at the dam were completed between the Secretary of the Interior, the city of Los Angeles, the Metropolitan Water District, and the Edison Co., the construction bids were opened.

Mr. Speaker, there is another feature of this project that should receive careful attention. The State of Arizona demanded remuneration from the sale of power at the dam, claiming that because the power was to be developed under Federal control, it would be deprived of tax revenues. In order to satisfy this demand it was provided that the people of southern California not only underwrite the entire cost of the dam but, in addition, agree to pay excess price of power over and above the need to make payments of construction costs. California has been paying $300,000 a year each to the States of Arizona and Nevada and $500,000 a year for development of the upper basin States. The States of Arizona and Nevada did not have to guarantee anything, and in addition, reserved the right to demand 18 percent of the firm power production at rates equal to those charged to southern California.

The irony of the situation, brought out forcefully by the special master's recommendations, is that the State of Arizona fought against the Boulder Canyon Project Act, and it refused to ratify the Colorado River compact. And yet now it will be guaranteed 2.8 million acre-feet of water a year stored in Lake Mead. The State of California, which guaranteed and paid the entire cost of the dam, will receive only 200,000 acre-feet more than it was receiving from the Colorado River before the dam was constructed. People of the State of California have spent nearly a billion dollars to develop their projects. This includes $500 million for the Colorado River aqueduct constructed by the Metropolitan Water District with its own money, raised by the sale of bonds.

Mr. Speaker, if the special master's report is accepted by the U.S. Supreme Court, the Colorado River aqueduct, which supplies water to the Los Angeles metropolitan area and adjoining cities, the city of San Diego and municipalities in my own congressional district, will become completely dry after the State of Arizona and the upper basin States begin using their full share of water of the Colorado River granted in the special master's recommended decree. This can occur within 10 years.

Today fear hangs over the heads of millions of people in southern California who, placing reliance upon Federal statutes and contracts with the Secretary of the Interior, have built their economies and constructed their lives upon the assurance of receiving their share of the Colorado River water.

Within 2 years, the Glen Canyon Dam will be closed and storage of water in the upper basin will begin. Projects are already authorized and under construction which will store 35 million acre-feet of water. The Secretary of the Interior has issued preliminary criteria for the allocation of water during the filling period behind the dams of the upper basin. The criteria mildly assures that the users of water in the lower basin will receive their present supplies during the filling period. People in southern California, particularly my own district, want assurance that their rights for domestic and agricultural needs will be guaranteed during the filling period, and that there shall be no water stored for power at the expense of agricultural and domestic users in the lower basin.

Already the people of my district have been threatened by our neighbors in the metropolitan areas of our own southern California. A proposal has been made by Congressman CRAIG HOSMER, of Long Beach, for a California, Arizona, and Nevada interstate compact to control all existing and future water power development on the Colorado River. Key point of this proposal would be the elimination of existing priorities on use of Colorado River water for irrigation purposes.

Mr. Speaker, after adjournment of Congress, I propose to meet with my constituents and leaders of water companies and water districts to bring to their attention the danger that they face if their rights are not recognized and officially guaranteed by law before the filling period starts 2 years from now.

Of course, Mr. Speaker, we do not accept and in no way agree with recommendations of the special master. We have filed our comments, suggestions, and motions before the special master and we propose to carry our pleas before the Supreme Court of the United States.

Congressman Lester Holtzman Reports to the People

EXTENSION OF REMARKS
OF
HON. LESTER HOLTZMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HOLTZMAN. Mr. Speaker, now that the 86th Congress has drawn to a close, I would like once more to bring my neighbors and constituents up to date on my activities as their Representative in the Congress of the United States. Due to limitations of time and space, this report must touch only on the highlights.

Believing that an alert, well-informed, and politically active electorate is the surest safeguard of democracy, I earnestly solicit the detailed views and reactions, as well as questions of the citizens of my district. I hope they will get in touch with me at room 107, House of Representatives, Washington, D.C., so that I may be in the position best to reflect their attitudes and serve their needs as their elected Representative.

INTERNATIONAL SCENE

A series of stunning diplomatic defeats makes total reevaluation of our foreign policy imperative. The launching of sputnik; the rapid growth of industrialization and productivity of the Soviet and the Red Chinese, together with their evergrowing military power; the collapse of the summit; the fiasco in Japan; and the extremely serious situation in Cuba; all point up vividly the transcending need for a positive, well-defined, and imaginative approach in our foreign relations. We must strengthen our ties with our allies and the uncommitted nations, including the new nations of Asia and Africa, and our Latin American neighbors. I am happy to report that just prior to adjournment the Congress passed legislation to provide assistance in the development of Latin America and in the reconstruction of Chile.

A big business administration, with its eyes firmly fixed on budgets and costs, has sometimes accepted less than the best in military power, space research, and economic assistance to the free world. In addition, an indecisive and vacillating leadership has substantially weakened its appeal to the minds of men everywhere by reacting piecemeal to the moves of our opponents, instead of moving forward with an independent program of its own.

I have consistently supported our defense appropriations and have opposed crippling cuts in our mutual security program, which is so vital to our alliances throughout the world. I shall continue to do so, for I believe that the Communist leaders will negotiate honorable solutions with us only when and if they are convinced that we are in fact the strongest nation in the world.

ISRAEL AND THE WEST

The continued belligerence and lawlessness of Dictator Nasser in the Middle East has posed another international crisis which the present administration has badly fumbled. It has granted repeated loans and other assistance to the United Arab Republic in the face of Nasser's persistent denial of passage through the Suez Canal to Israeli shipping in defiance of a United Nations resolution. Israel is a vital bulwark of the democratic way of life. Its political integrity must be defended. In the House I vigorously supported a resolution recently adopted by Congress authorizing the President to deny mutual security aid to any nation that engages in boycotts or blockades barring unrestricted passage through the Suez Canal. I deeply regret that the President has not seen fit to use this power.

CIVIL RIGHTS

At home a vital issue continues to be the protection and extension of the civil rights of every American, without regard to the circumstances of his birth. I served as a member of the subcommittee of the House Committee on the Judiciary which originated the Civil Rights Acts of 1957 and 1960, and I fought for their enactment. These laws are important initial steps, but much remains to be done. The disgraceful lynching of Mack Charles Parker in Mississippi, and the failure or inability of law enforcement officials to prosecute the perpetrators highlight the need for a strong anti-lynching measure such as is contained

in my bill, H.R. 3965. Further, we must safeguard for every American not only his right to vote, but also his right to study, to travel, to be housed, to be employed—in short, to live with dignity in full freedom and equality.

TAXES, SOCIAL SECURITY, MEDICAL CARE FOR THE AGED

Our present system of taxation unfairly burdens many of our low and middle income families. To correct this inequity and at the same time stimulate our economy, I have sponsored three measures: H.R. 4710 to increase the present $600 personal exemption to $1,000; H.R. 4711 to exempt all retirement annuities and pensions up to $2,500; H.R. 4712 to permit parents to deduct the cost of care for dependent children while the parents are at work.

Similarly, our social security program needs to be brought up to date. My bill, H.R. 3652, would remove the $1,200 limitation on outside earnings, reduce the eligibility age for receipt of benefits from 65 to 60 years for men, and from 62 to 55 years for women, and further provide for payment of benefits to those permanently and totally disabled, without the present limitation to persons 50 years of age. I am happy to report that this last provision was included in the bill just passed by the Congress.

I regard it as equally essential that provision be made under the social security program for adequate medical care for the aged. For that reason, I have joined with many of my colleagues in supporting the principle of the Forand bill, which provides prepayment for medical expenses for persons over 65 years of age under the social security system. This is not only the dignified approach, but the most practical way to cope with this ever-increasing problem of our elder citizens.

SALARIES AND WAGES

Despite glowing slogans by Madison Avenue about our great prosperity there are still large groups of wage earners—white-collar workers, retail-store employees, and retired folks—who cannot make ends meet.

My bill, H.R. 6103, calls for an increase in the minimum wage to $1.25 per hour, and extends coverage to many unprotected wage earners. Unfortunately minimum wage legislation to provide such an increase and the added coverage died in conference.

H.R. 5905, H.R. 3014, and H.R. 7271, which I have also introduced, liberalize the provisions of the Civil Service Retirement Act by granting retirement after 30 years' service; by increasing the multiplication factor from 2 to 2½ percent for hazardous employment; by reducing the possibility of loss of annuities by disability retirees if they have temporary periods of high earned income, and by protecting restoration of annuities if the disability recurs later or if earning capacity diminishes.

Finally, my bill, H.R. 10538, provided for an increase in the salaries of our dedicated postal workers and civil service employees, all of whom have been hurt badly by the spiral of inflation. Happily, legislation in this vein was enacted by the Congress over a veto by the President.

SMALL BUSINESS AND MONOPOLY

As a member of the Antitrust Subcommittee of the Committee on the Judiciary, I have worked in Congress to prevent monopolies, strengthen the antitrust laws, and protect small business against predatory and unfair methods of competition. Due in large measure to the efforts of the Antitrust Subcommittee the Congress in recent years has enacted legislation to prevent monopolistic corporate mergers; increase tenfold the maximum penalties for antitrust violations; provide important safeguards against monopolistic bank mergers; protect small business by preventing monopolistic practices by meatpackers and retail chains engaged in meat packing; and protect small business against the unfair pricing policies of large chains, by strengthening the enforcement provisions of the law against price discrimination.

Further, as a result of investigations by this subcommittee, long-distance telephone rates were cut $50 million last September, with additional reductions still to come—all of which will inure to the benefit of the consumers of our country.

SCHOOLS AND TEACHERS

Every parent who reads this report is well aware of the critical shortage of classrooms and other school facilities. We simply cannot afford to be ostrich-like in our approach to this problem but must meet it head on with adequate funds and a long-range program. Likewise, it would be pennywise and pound foolish to forget our teachers, too many of whom cannot cope with their financial problems without additional and secondary employment.

OTHER ISSUES

In addition to the foregoing, a Congressman frequently has the obligation to speak out even where legislation may not be indicated. And so, during the 86th Congress I called on the attorney general of the State of New York to investigate the merger of two banking giants for a possible violation of the New York State antitrust laws; I protested vigorously when a private club barred the distinguished Ralph Bunche and his son from membership; I spoke out in concern over the unfair sentence imposed on Bishop Walsh by the Red Chinese; I expressed my horror at renewed outbreaks of anti-Semitism, so reminiscent of Hitler's Germany; and I voiced strenuous objections to the granting of a permit to the American Nazi Party for a meeting in the city of New York.

BACK HOME

Since I am fortunate enough to live within commuting distance of Washington, I have been able to return home on weekends and take an active part in my community. My membership in civic and other local clubs has made it possible for me to meet and talk with many of my constituents. When local problems have arisen, whether related to traffic regulations, police and fire protection, school construction, or juvenile delinquency, I have welcomed the opportunity to cooperate with leaders in my community toward their satisfactory solution.

Mr. Speaker, my greatest pleasure and privilege during the last 8 years has been the opportunity to meet with so many of my neighbors, to profit from their ideas and recommendations, and to try to serve their personal and civic needs. Their sincere interest in my efforts as their Congressman, and their friendship will always remain my most lasting compensation.

The Minimum Wage Conference

EXTENSION OF REMARKS

OF

HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ROOSEVELT. Mr. Speaker, the failure of House and Senate conferees to agree upon a satisfactory minimum wage bill has caused a temporary setback to present efforts to raise the minimum wage to $1.25 an hour and broaden coverage under the Fair Labor Standards Act to include several million additional low-wage employees. I am confident, however, that this setback will be of short duration. I feel sure that the new Congress that will be elected in November, aided by strong Executive leadership which the election of Senator JOHN F. KENNEDY as President of the United States will provide, will speedily formulate and pass a minimum wage bill that will do an even better job of assuring economic justice for all American wage earners than would either of the minimum wage bills passed by the House or Senate this year.

The fact that Congress has been unable to pass a minimum wage bill this year provides an opportunity for the people to pass judgment in the November election on those responsible for this outcome. Minimum wage legislation will assuredly be a most important issue in the forthcoming presidential and congressional campaigns. For this reason, and since I was a member of the conference committee representing the House, I should like to define the issue, as I see it, and describe what went on in our deliberations so that my colleagues and the American people may fairly judge where the responsibility for our failure lies and the people may cast their votes accordingly.

As I believe my colleagues are aware, statements were made before and during the conference committee sessions that the House conferees would not yield to the Senate and that the Senate conferees would either have to accept the House bill or be reconciled to having no bill at all. I think this was a pretty fair and accurate statement of the problem with which the conferees had to deal. It is important, however, to inquire who made these statements and why the adoption of this position by the party who made them made inevitable the

failure of the conferees to agree upon a satisfactory minimum wage bill.

The statements to which I have reference were not made by any of the conferees representing the majority party on the conference committee. As we all know, the statement was made, and often repeated during our deliberations, by one of the conferees from the minority party representing the House. Nor were these statements merely a prediction of what the conferees might be expected to do. They constituted a deliberate policy assertion without whose adoption by the three conferees representing the minority party from the House the truth of this prediction could not have been realized.

The willingness of the Senate conferees to work out and agree upon any reasonable compromises of the differences between the House and Senate bills has been described in detail in discussions which took place on the Senate floor the day before adjournment. There is no need for me to repeat that discussion here. I only want to add that all that has been said about the desires and the efforts of the conferees representing the majority party in the Senate, led by the conference chairman, Senator JOHN F. KENNEDY, were fully shared and supported by Congressman JOHN H. DENT and myself. With the honorable exception of Senator WINSTON L. PROUTY, who made constant efforts to bring about a conference agreement, however, the Senate conferees representing the minority loyally supported the position of those conferees representing the House. The responsibility for the "House bill or nothing" policy lies squarely at the door of the Republican members of the conference committee.

Why was it, however, that agreement on the House bill was not possible in conference? The answer to this lies in the fact that, as I told my colleagues at the time we debated the Kitchin-Ayres substitute for my bill, the House bill made only token improvements in the coverage of the Fair Labor Standards Act. Whereas the Senate bill provided for a minimum wage of $1.25 an hour for employees presently covered by the Fair Labor Standards Act, the House bill provided for a minimum wage of only $1.15 an hour. Whereas the Senate bill provided coverage for an additional 4,100,000 retail, service, laundry, telephone, and other employees, the House bill provided coverage for only an additional 1,400,000 employees limited to retail chains, doing business in two or more States and having at least—not several—but at least five stores.

Whereas the Senate bill provided for a maximum workweek of 44 hours for newly covered employees during the second year after the date of enactment; 42 hours the third year, and 40 hours thereafter; the House bill provided no overtime protection for newly covered employees.

Some may say that even though the House bill was inadequate, it was better than no bill at all and that the conference committee should have accepted the House bill on the basis that it is more important to do something than nothing at all for our low-paid wage earners. This argument, in my judgment, is completely without foundation. If the Congress had approved the House bill, the coverage of the act would have been frozen at the meager level provided for in the House bill for many years. Rejection of the House bill by the Senate conferees now gives us the opportunity and the duty, at the beginning of the next session of Congress, to begin again. As a result of what has been learned during the course of the discussion of this legislation in the legislative committees, during floor debate in the House and in the Senate, and in the conference committee, I am confident that we will be able to develop next year a new bill that will provide even more substantial new coverage and a minimum wage of at least $1.25 an hour for employees at the low end of the economic ladder who urgently need this protection.

Passage of satisfactory fair labor standards legislation will be a matter of first importance in the next session of the Congress. Aided by strong executive leadership which I am sure the people will guarantee in this fall's national election, we will be able to accomplish much more than the miserable performance to which Congress and the people have been subjected during this recent session of the Congress.

Congressman Griffin Reports on Student Loan Program and Landrum-Griffin Reform Act

---

EXTENSION OF REMARKS

OF

HON. ROBERT P. GRIFFIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. GRIFFIN. Mr. Speaker, when a bill actually becomes a law, the author of the legislation and those most responsible for its enactment are on the spot. With an anxious eye, they watch and hope that the new law will really operate in the manner intended. As helpless observers, they can only stand and wait while the law is being administered by another branch of the Government—the executive.

Promises and claims made as to thousands of bills which never become law are soon forgotten (20,164 bills were introduced in this 86th Congress; only 1,130 became law). But the bills that survive the rigors of the legislative process must stand in a lonely light to be judged.

During my 4 years of service in the House, I have had the rare privilege to cosponsor, and play a leading role in the enactment of two bills of great national importance which have become legislative landmarks. I refer to the student loan program, which is part of the National Defense Education Act of 1958; and to the Labor-Management Reporting and Disclosure Act of 1959 (Landrum-Griffin Act).

Mr. Speaker, as this 86th Congress prepares to adjourn, it will be of interest to the Members of the House, I believe, to have a report on the administration and operation of those two significant legislative programs.

I. STUDENT LOAN PROGRAM

When Congress passed the National Defense Education Act late in the 1958 session, I doubt if there were many who envisaged the tremendous impact that would be felt throughout the Nation's colleges and universities as a result of one portion of the act entitled: "Loans to Students in Institutions of Higher Education."

Although the story of the 1959 labor reform bill is well known, few people are familiar with some of the circumstances and events which led up to adoption in the House of the student loan program.

When administration recommendations were first made to Congress early in 1958 for legislation in the field of education to bolster our national defense capability, no reference was made to student loans, although a limited scholarship program was proposed to encourage talented high school graduates to continue their education.

The more I studied the proposed national defense education bill, as a member of the House Education and Labor Committee, the more I became convinced that a student loan program should be substituted for the limited scholarship (grant) proposal.

Relatively few students could have benefited under the scholarship program as proposed. Moreover, some danger existed that politics could creep into the selection of the chosen few.

On the other hand, Mr. Speaker, I was convinced that a great many more talented students would be willing to invest in an education if they could just borrow part of the needed funds from a revolving fund at low interest rates and have the opportunity to repay it over a long period after graduation. It was ridiculous—but true—that high school graduates could finance the purchase of expensive automobiles on easy credit terms—but few loans were available for ambitious but needy students who wanted a college education.

Fortunately, some of my colleagues on the Education and Labor Committee agreed with my views concerning the need for a loan program. They included Representatives Elliott, of Alabama; Frelinghuysen, of New Jersey; Wainwright, of New York; and Haskell, of Delaware.

In May 1958, at our request, the Office of Education of the Department of Health, Education, and Welfare called into conference a number of outstanding administrators in the field of education who had experience with student loan funds. This conference and several that followed proved very fruitful.

Later, in June 1958, several of us huddled with Dr. James R. Killian, the head of Massachusetts Institute of Technology who was then the President's Special Adviser on Science and Technology. Dr. Killian enthusiastically approved the student loan idea and he agreed to set up a meeting with President Eisenhower.

Thereafter, in early July 1958, Dr. Killian, then Secretary of Health, Education, and Welfare Marion Folsom, and

Representatives Wainwright, Frelinghuysen, Haskell, and I met with the President at the White House. We were joined by Representative Robert J. McIntosh, of Michigan who, while not a member of the committee, was intensely interested and active in promoting the loan proposal.

After a long discussion with President Eisenhower, which included some sharp and critical questions stemming from his experience as president of Columbia University, we left the White House satisfied that President Eisenhower would be with us.

From that point, Mr. Speaker, legislative developments moved rapidly. The appropriate education subcommittee, under the able chairmanship of the gentleman from Alabama [Mr. ELLIOTT], agreed to incorporate the loan program in the comprehensive national defense education bill. The scholarship title was eliminated. The bill sailed through the House on August 8, 1958, and was passed by the Senate on August 13, 1958.

The student loan program provides for the establishment by each participating college and university of a loan fund from which needy and able students may borrow for the purpose of entering upon, or completing, courses of higher education.

A participating college or university is required to contribute to the loan fund a sum equal to one-ninth of the amount supplied by the Federal Government.

An eligible student may borrow up to $1,000 in any one year, and as much as $5,000 in the aggregate. To be eligible, a student first, must be in need of the loan to pursue a course of study; second, be capable of maintaining a good academic standing; and third, have been accepted as a full-time undergraduate or graduate student.

Interest on the loan, at 3 percent, does not begin to run until 1 year after graduation. The borrower can take up to 11 years after graduation to repay the loan.

Taking special note of the teacher shortage, the Senate added an amendment—which was retained—whereby borrowers who teach in public elementary and secondary schools will be eligible for cancellation of 50 percent of the loan if they teach full time for 5 years or more.

Currently there are 1,410 colleges and universities throughout the Nation participating in this program. Loans averaging $500 have been made to well over 130,000 students in 50 States.

In this session, Congress has appropriated $58,430,000 to meet the Federal Government's share of the funds which participating institutions have substantiated as being required.

Mr. Speaker, in a status report issued in June 1960, the Honorable Lawrence G. Derthick, Commissioner of Education, made these significant comments:

Contrary to what might have been expected the student loan program has not had the effect of drying up other sources of student loans; rather, it has stimulated non-Federal loan activity.

Besides the very significant change in attitude toward using credit as a means of helping to finance a student's higher education and the increase in loan activity, there is evidence that the program is encouraging a change in the approach of many colleges and universities to student financial assistance. It is a change that can perhaps be characterized as the "umbrella" approach, i.e., bringing all the institutions' financial aid resources—loans, scholarships, grants-in-aid, work opportunities—to bear on the problem of meeting the particular needs of each financially needy student. Such an approach, when combined with a careful assessment of financial need, offers considerable promise of achieving the optimum use of both national defense student loan and institutional student aid funds.

The comments below are illustrative of a great many that are pouring into the U.S. Office of Education:

From a junior college in Texas: "It appears that the National Defense Education Act has focused attention on the need for a student loan fund and more local participation by the public for scholarship programs in general. We have 13 new scholarships given by clubs and organizations that amount to tuition, books, and fees."

From a large western land-grant university: "Moneys received under the National Defense Education Act have been invaluable in that they have made it possible during the past year for 350 students to obtain additional higher education."

From a State college in Alabama: "The college had no loan or scholarship program whereby a student could finance any significant part of his education. The national defense loan has helped to remedy this situation. Also, the national defense student loan program has had the effect of releasing a number of campus jobs to students who for one reason or another do not qualify for a national defense loan."

In my own State of Michigan, the impact of the student loan program is tremendous. About $2 million will be available during the 1960–61 academic year for loans under the program to students in 39 Michigan institutions of higher learning. If the loans average $500, about 4,000 students will be benefited next year in Michigan alone.

As it is operating, Mr. Speaker, the national student loan program is a dream come true for thousands of deserving students with the will who were searching for a way to a college education.

Perhaps the Members of Congress who worked so hard to advance this legislation—and there were many—can be pardoned if they are a bit proud of this landmark achievement. It may be understandable that I treasure a letter received from Secretary of Health, Education, and Welfare, the Honorable Arthur S. Flemming, which reads in part as follows:

Many of us who have devoted long years to college teaching and administration can well wish that we may have made an educational contribution as far reaching as that made by you as a cosponsor of the national defense student loan program.

II. LANDRUM-GRIFFIN ACT

Mr. Speaker, this report concerning the administration of the Labor-Management Reporting and Disclosure Act of 1959 (Landrum-Griffin) will not be as comprehensive as a report soon to be released by the Department of Labor based upon 9 months of operation under the law.

Although the act is still new, it is not too early to notice and begin to evaluate some significant results flowing from its enactment. Quietly but effectively, the Department of Labor has been assembling and putting into operation the necessary enforcement machinery to make the law meaningful.

I should like to take this opportunity, Mr. Speaker, to commend Secretary of Labor James P. Mitchell, Assistant Secretary John J. Gilhooley, Commissioner John L. Holcombe, and those associated with them, for their patient but firm and fair handling to date of the complex and difficult responsibilities of enforcement.

Referring to the new act in a recent statement, the Department of Labor said:

There has been an awakened interest on the part of many union members in the operation of their organizations. This has been reflected in the many letters and complaints received by the Bureau during its first half year.

In a speech delivered before the labor relations law section of the American Bar Association on August 30, 1960, Assistant Secretary Gilhooley revealed the following up-to-date statistics concerning the volume of enforcement activity handled by the Bureau of Labor-Management Reports:

Reports received, initially processed and made available for public disclosure	106,000
Requests for information have been handled	62,000
Publications distributed	2,300,000
Cases opened for investigation, of which 632 are under active investigation by BLMR personnel in 22 area offices around the country and the balance either investigated by FBI, being processed for prosecution or closed	1,876

Title I of the act, generally known as the bill of rights, is designed to guarantee rank-and-file workers important, fundamental democratic rights within their unions. Many examples could be cited to demonstrate that the bill of rights is having a wholesome impact upon the conduct of union affairs. The following item is illustrative:

The Akron, Ohio, Beacon Journal of January 18, 1960, carried the following story:

The Landrum-Griffin labor law has restored all 12,000 members of Operating Engineers Local No. 18 to the status of first class citizens in their union.

For the first time, all of them can vote in union elections and all can run for union office.

Before the Landrum-Griffin law was passed, the union was split into A, B, and C class members. Only class A members could vote or run for office. They comprise about half of the total membership.

The new Federal labor law bars such discrimination.

In his recent address before the bar association, Assistant Secretary Gilhooley noted that the bill of rights in the labor law requires still further amendment to provide protection against racial discrimination. He correctly pointed out that in many respects the AFL–CIO constitution and ethical practices code go even beyond the compass of title I, and he said:

It occurs to me that if the AFL–CIO (and other labor organizations) vigorously pro-

mote these concepts, the need for enforcement proceedings under title I will certainly diminish as the years go by. The trade-union movement would do well to bear this in mind.

Title II, which requires labor organizations to disclose the details of their financial condition and transactions, should ultimately prove to be one of the most effective provisions of the act. Under this title the Secretary of Labor is given authority to conduct audits of account and to determine the accuracy of reports filed. Some concern has been expressed that criminal penalties attached to failure to file, or false filing tend to discourage union members from seeking or retaining union office. Unfortunately, most of the concern stems from the spreading of misinformation and misunderstanding. It should be carefully noted that criminal penalties apply only to one who makes a false statement, knowing it to be false; or to one who knowingly fails to disclose a material fact; or who willfully makes false entries.

It should also be noted that simplified report forms are available for smaller unions and that the Bureau of Labor-Management Reports and its area representatives stand ready to assist union officers, singly or in groups, with any problems concerning required reports.

The language of title II requiring the filing of conflict of interest reports may need clarification before the constructive purpose intended can be fully achieved. The Bureau has indicated that questions of interpretation may account for the fact that a relatively small number of reports have been filed under this provision. Thus far in 11 months, only 96 employers, 137 union officers and 71 labor relations consultants have filed such reports.

Title III of the act provides protection for local unions placed under trusteeship by an international union. The Bureau reports that over 300 trusteeships, or more than half of those known to be in existence when the law was passed, have now been dissolved. Under the new law an unscrupulous union official will think twice before seeking to impose a trusteeship over a subordinate local to obtain control of its finances or to otherwise manipulate it for undemocratic purposes. Title III of the act protects and promotes local autonomy in union affairs.

Title IV of the act which governs union election procedures is one of the most important parts of the new labor law. While many complaints have been filed under this title, the Bureau has moved cautiously and only recently filed its first suit challenging a union election under the new law. The Washington (D.C.) Post of July 29, 1960, carried the following story:

The Labor Department yesterday filed its first suit challenging a union election under terms of the Landrum-Griffin labor reform law.

Labor Secretary James P. Mitchell brought the action in U.S. district court in Newark, N.J., asking that an election of officers last February by the Independent Petroleum Workers Union of Bayway, N.J., be set aside.

In his recent address, Assistant Secretary Gilhooley made this remark which is worthy of notice:

The best way, it seems to me, to keep the Government out of [union] affairs is for the trade union movement to take the initiative more vigorously than ever before to insure that all unions go even beyond the spirit of the Landrum-Griffin bill in administering their affairs. Here is an idealistic mission that can capture the imagination of union people. Here is indeed a moral crusade worthy of the militancy showed by the great [union] leaders of the past in their successful efforts to improve the material welfare of their membership.

For our part, I can assure them that in such a crusade they will have the wholehearted support of the Department of Labor. It is not enough to say, as did one highly placed leader before the passage of the Landrum-Griffin bill, that the trade-union movement lacked the power to do a cleansing job. The power is now available to them if they will use it.

Tangible evidence of the cleansing effects of the new labor law is reflected in a Washington (D.C.) Star news story—March 13, 1960—which reads in part as follows:

James Hoffa, Teamster president, announced publicly following the President's signing of the act that he had sent telegrams to his locals removing the ex-convicts who came under section 504 of the law. A private Department of Labor report indicated that more than 100 Teamster officials were suspended, although the Teamsters themselves will admit to only 5.

A 14,000-member Illinois local has been forced by its rank and file members to publish all that transpires in what were formerly closed leadership meetings. Attendance at the union meetings has so increased that a larger meeting hall had to be selected.

Mr. Speaker, in summing up its first status report on the new law, the Department of Labor said:

Reports received * * * indicate that throughout the country union members have been expressing themselves more freely at their union meetings; union constitutions are being revised along more democratic lines; union members are obviously taking a greater interest in union elections; a number of ex-convicts holding union office in violation of the law have been removed from posts of leadership; trusteeships have been terminated; and, in most cases, both labor officials and employers have expressed their intent to comply with the law.

So far as rank and file union members are concerned, there is mounting evidence of their general support for the objectives of the new law. Illustrative is the following excerpt from an article which appeared in the February 1960 issue of the Great Lakelands magazine—formerly Inside Michigan:

UNIONS LOOK AT LANDRUM-GRIFFIN BILL

Recent statements appearing in union publications indicate that much of the opposition expressed in Washington previous to the enactment of the Landrum-Griffin bill, actually did not represent the opinions of large segments of organized labor. In fact, passage of the Landrum-Griffin reform legislation has aroused frankness and determination among many union officials, unheard of during the past decade.

For example, John L. Cooper, president of the Los Angeles joint executive board of the Hotel, Restaurant, and Bartenders Union, made the following observations in a speech on the west coast recently:

"In my opinion, had the Landrum-Griffin bill, as passed by the House of Representatives, been submitted by secret ballot referendum to only members of organized labor, union members would have voted in favor of this legislation by an even greater majority than when this bill was first adopted in the House of Representatives."

The Star Mop Contest

EXTENSION OF REMARKS

OF

HON. STUYVESANT WAINWRIGHT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WAINWRIGHT. Mr. Speaker, I should like to bring to your attention an action by a sports group that demonstrates the overall American spirit and philosophy of cooperative actions in worthy causes. I am referring to the August 14 star mop contest sponsored by the Empire State Underwater Council.

This group, whose members popularly are known as skindivers, worked its diving contest in cooperation with the Long Island oyster farmers, who breed these succulent crustaceans in the waters of Long Island Sound. One of their biggest handicaps in raising oysters, however, are starfish—predators who feed on young oysters. In star mop the contest was geared to 225 participants using and demonstrating their diving skills to gather as many starfish as possible from the underwater oyster farm area so they could be destroyed. Actually, the contest served to bridge an underwater area gap that cannot be covered by now available mechanical equipment, such as dredges and special starfish brooms.

The manager of one of the benefiting oysterbeds, George Vanderborgh, of Long Island Oyster Farms, Inc., described this 1-day contest as a fine alliance between sportsmanship and conservation. I should like to echo that sentiment—and add this important fact, too.

It further pinpointed the need for more diversified usage of the underwater swimming skills of skindivers.

We already know the values of such skills in the military services.

But the numbers of devotees to this sport plus the areas in which they can practice and generate newer skills are limited and should, I feel, be amplified as much as possible. What has been done to benefit Long Island oystermen can similarly be done in other waters of our land where oysters are bred since predator starfish not only are prolific breeders—they are also good travelers.

There are undoubtedly some industrial services—such as cable checkings and repairs, and so forth—which would benefit from skindiving developments as well as the essential advantages of increasing the numbers of our peoples who

can readily handle themselves safely in deep waters.

Were this latter phase the only aspect for encouraging skindiving, I would be most happy to add my enthusiastic voice. But I can envision many more nonsports benefits than already have been made apparent.

I think you will all find that what the Empire State Underwater Council did in my district for my constituents can be done in all districts bordering the oceans and the gulf. There are such underwater groups throughout the country, I am told, who will be most happy to cooperate. They seek only the opportunity, plus the pleasure, of encouraging development in their sport.

Five Farm Vetoes—Facts and Fancy

EXTENSION OF REMARKS

OF

HON. CHARLES B. HOEVEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HOEVEN. Mr. Speaker, one of the most ridiculous statements being made by Democrat orators is that President Eisenhower's use of the veto has precluded any effective agricultural legislation. These orators point to five farm vetoes, wring their hands and thus apologize for their own failures, rather than face the unpleasant music that their own Democratic leadership in the Congress, not President Eisenhower, has repeatedly vetoed the American farmer.

I would like to go over with you the five Eisenhower farm vetoes and the numerous Democrat Congress farm vetoes, just to keep them in proper perspective.

There were three farm bills vetoed in the 86th Congress. The first was S. 1901, the tobacco bill of 1959; the second was S. 1968, the Wheat Act of 1959; and the third was S. 144, the Rural Electrification Administration bill.

The tobacco bill was simply a proposition whereby its sponsors wanted to have their cake and eat it too. The issue at stake was the method of computing the tobacco parity formula. Rather than forthrightly admitting that price support at 90 percent of parity for tobacco was losing our export markets and was threatening further cuts in acreage for U.S. tobacco farmers, the proponents insisted upon changing the parity formula. It would of course have been much more simple and straightforward to lower the level of support to whatever figure was necessary to recapture the foreign markets. The bill which was sent to the President put tobacco under the so-called old parity formula, making that commodity the only one of some 170 which would be so calculated.

The President pointed out in his veto message that the American tobacco farmer could very easily be misled into believing he would receive 90 percent of parity as computed for all other commodities.

The defects of this bill, however, were not fatal because 1 year later, Congress passed and the President approved Public Law 86–389, a tobacco price support measure which accomplished the purposes of the vetoed bill without returning tobacco to the "old parity" formula.

S. 1968, the vetoed wheat bill of 1959, was vetoed because it raised price supports without providing for effective production controls. The Department of Agriculture estimated that it would cost an additional $110 million per year if enacted. In addition, it contained a number of obvious loopholes which would have severely aggravated the already serious feed grain problem. It is interesting to note that those who do a great deal of crying about this veto fail to point out that the House of Representatives refused to accept the report of the House-Senate conference committee on this bill. However, knowing full well that the President would not approve the House bill, the Democratic leadership of the Senate sent it to him, rather than work on a realistic compromise. A year later the Senate did pass another wheat bill, but the House refused to consider it with the result that our wheat problem continues to grow. The President again appealed for action with no results on the part of Congress.

The third bill vetoed in the 86th Congress was S. 144, the Rural Electrification Administration reorganization bill. It had nothing to do with interest rates or with the basic operation of this program which has flourished in this administration. It was merely legislative shadowboxing and political muscle-flexing by the newly organized Democratic Congress. It was a sacrifice of sound administrative procedure on the altar of political expediency.

In the 85th Congress the President vetoed Senate Joint Resolution 162, the so-called "freeze" resolution. This legislation was basically a cotton and rice bill designed to prevent then-scheduled acreage cuts from going into effect on these crops. Other commodities were included only at the sufferance of the South. After the veto of this bill, the House Agriculture Committee produced the hodgepodge omnibus bill of 1958 which the Democratic-controlled Congress refused to even consider by defeating the rule on the bill. Finally in 1958 the Congress passed S. 4071, the Agricultural Act of 1958, which was signed into law by the President as Public Law 85–835. This bill provided a new cotton program, revised rice program, the present corn program under which farmers rejected all controls on corn, a 3-year extension of the Wool Act, an extension of the veterans and armed services milk program, and a number of minor amendments to the basic farm laws.

Going back to the 84th Congress, the President vetoed H.R. 12, a bill which contained a number of sound provisions, but contained an unworkable two-price plan for wheat which would have dumped many millions of bushels of wheat into subsidized competition with the feed grain producers of the Corn Belt. The veto, however, did not end farm legislation in the 84th Congress because it was shortly followed by the Agricultural Act of 1956 signed into law by the President as Public Law 84–540. This act included the soil bank program, major amendments to the cotton program, barter amendments, the establishment of an Agricultural Research Commission to study industrial uses, additional donation and disposal authority, provisions dealing with Federal irrigation, drainage, and flood control projects, a number of amendments to the Agricultural Adjustment Act of 1938, the authorization for a study of rice certificate program, increased assistance to States for tree planting and reforestation, and a number of minor amendments to basic farm laws.

The noise about these five farm vetoes is fundamentally an apology on the part of congressional Democrats for their failure to come to grips with the serious problems facing American agriculture. Certainly President Eisenhower has vetoed five farm bills, but he has never vetoed the American farmer as this Democratic-controlled 86th Congress has done.

One of our most valuable and effective farm programs, the conservation reserve, was allowed to expire. No new contracts will be authorized by the Department of Agriculture because the Democrat-controlled Congress has failed to act.

No action has been taken on a number of land retirement, soil conservation, and payment-in-kind proposals that have been introduced by Republican Members of the House.

This Democrat Congress has vetoed more effective research on agricultural commodities by failing to act on the Senate and House farm research bills. An expanded research effort holds a great deal of promise for the profitable use of our surplus production for some years to come. It is tragic that this legislation was killed.

Another Democrat farmer veto in the 86th Congress was the Farmers Home Administration bill which was killed in the Senate. This bill was designed to more efficiently meet the credit needs of farmers using the facilities of the Farmers Home Administration. This bill which had the sad misfortune of being sponsored by a distinguished Republican Senator was never allowed to see the light of Senate debate.

There were three other examples of vetoes of its own farm bills by the Democratic-controlled Congress. H.R. 5432, which would have raised feed grain price supports, and H.R. 8394, which would have set up a Brannan plan for hog producers were both killed by the Committee on Rules which stands 8 to 4 in favor of the Democrats.

H.R. 12261, the residual fallout of what was originally known as the Poage family farm bill was so obnoxious that 100 House Democrats joined in killing it shortly before the recess for the conventions.

The record then speaks for itself. In spite of their almost 2 to 1 majority in the Committee on Agriculture and in the House and the Senate, the Demo-

crats have refused to act. In spite of their own 1960 platform which promises much for the American farmer, congressional Democrats have declined to act. In spite of the fact that President Eisenhower has repeatedly asked for action, and in spite of constructive farm bills that have been introduced by many Members, and in spite of many moans, groans, and crocodile tears about the farm problem, this Democratic-controlled 86th Congress has failed to act.

The outright failure and the downright refusal of this Democratic-controlled Congress to act constructively is an example of the Democrat Party's fundamental attitude toward agriculture during the last 6 years: "There was no action, there is no action, there will be no action."

We Need a Sound National Food and Farm Policy

EXTENSION OF REMARKS
OF
HON. MORGAN M. MOULDER
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, the Congress, the President, the political parties, the administrative branches of the Government, and every individual in the Nation cannot afford to disregard and turn aside from what is happening to farmers and the rural communities of the United States.

Congress has tried to correct the present farm situation by enactment of new farm programs to hold up sagging farm income, but the administration now in power either vetoed such legislation passed by Congress or used every possible influence to prevent the adoption of legislation proposed and necessary to help the farmers of America.

United States Department of Agriculture figures show that it takes 41.7 bushels of corn today to buy the same suit of clothes that 26 bushels would buy in 1952, that it takes 9.2 bushels to get a pair of men's shoes that required only 5.3 bushels 8 years ago, and 6 bushels to buy a woman's dress as compared with 3.6 bushels in 1952. Among other items, a chair for the farmer's house that cost 17.1 bushels of corn 8 years ago now costs 38.6 bushels, and it takes 216.7 bushels to buy an electric stove that could be had for 153 bushels in 1952.

It would seem to me, in all seriousness, that it should have been obvious to Mr. Benson from the start—even in his youth—that if it takes twice as much corn to buy a pair of pants, then the farmer, to keep himself in pants—as certainly he must—will do his utmost to produce twice as much corn.

Farmers are impelled to increase their output as prices fall. Surplus thus builds upon surplus, further depressing prices.

The fallacy, and the tragedy, of the Benson program is as simple as that.

Because of the outdated pricing system under which farm products are marketed, the abundance resulting from the farmers' efficiency and hard work has aggravated the farm problem.

Farm income continues to decline. USDA figures for the first 6 months of 1960 show net farm income down 9 percent from the same period a year ago. During the past 8 years, net farm income has fallen more than 26 percent. During the same period, business corporation profits have risen 45 percent after taxes. Farm purchasing power is at a 20-year low with a prospect of further declines. The farm share of the food dollar is lower than at any time since the depression of the early 1930's.

Today the Government inventory of surplus farm commodities is over $9 billion—and will increase this year.

These facts clearly demonstrate the failure of the present farm program as administered by the administration in power. Of course, overproduction has built up huge surpluses, but the surplus production has not been used to any advantage, either at home or abroad.

The administration's farm program has cost more than $30 billion during the past 6 years, but the farmer realized very little benefit from this huge expenditure.

Mr. Speaker, there is definitely a farm crisis in farm income and purchasing power which must be faced by the Nation. Farmers have been substituting credit for purchasing power at an alarming rate. In the past year, total farm debt has increased $400 million to a new all time high of $23.8 billion—more than 50 percent higher than in 1952.

I do not want to be an alarmist, but in all sincerity, I must say that too few people realize the deep economic inroads which have been made into the family farm system because of the 7½ years of lowering of farm prices and 7½ years of deliberate tightening of credit and raising of interest rates.

The processors and speculators who want to obtain a monopoly of the farm and food business know that they have to obstruct and wreck farm programs before they can roll the family farmers off the land. And in this they have made great progress under the administration's Benson farm policy.

Mr. Speaker, a farm program to help the Nation must help the farmer first. You cannot cure the national farm economic problem without solving the economic problem of the individual farmer. Farmers are entitled to such farm prices as will earn a rate of return for their investment, labor, and management which is comparable to that earned by others for their capital, labor, and management.

Mr. Speaker, agriculture needs bold and vigorous action. The first order of business at the next session of Congress should and must be the adoption of legislation that will—

First. Provide full parity prices for all farm products;

Second. Establish marketing quotas in bushels and pounds—under the direction of a farmer elected board—on those products for which it is necessary to protect each farmer's full share of the market;

Third. Provide that the prices and quotas as established be subject to approval or disapproval by farmers in referendums;

Fourth. Establish an accurate formula or method of parity, taking into consideration the farmer's cost of production;

Fifth. Limit farming activity of business corporations, eliminate farm program benefits which might be received by producers who are not bona fide farmers, and strengthen the family farm to prevent the threat of monopolistic forces seeking to control production of food;

Sixth. Establish a food use policy by and through the food stamp plan and a food for peace program—whereby existing surpluses and future production will provide more of our citizens with an adequate and nutritious diet, and help alleviate hunger and poverty in undeveloped nations and by so doing, promote a permanent and honorable world peace;

Seventh. Expand and intensify research by land grant colleges and universities to discover and develop new uses for farm products, especially for industrial purposes;

Eighth. Revitalize the Farmers Home Administration and provide low interest rates to effectively serve family farmers with both long-time and emergency farm credit;

Ninth. Provide a percentage depletion tax allowance for farmers, based upon the net income from the farm;

Tenth. Promote export sale of farm products on world markets with the same or comparable consideration given to industrial exports;

Eleventh. Establish a national safety reserve of food and fiber to be strategically stored and located in relation to the Nation's population; and I am reliably informed that the total balance of unused U.S. foreign aid currencies and counterpart funds in all foreign countries amounts to $2.5 billion. Therefore, we should compel foreign countries having surplus funds to use the funds for the purchase of our surplus farm commodities in the establishment of a safety emergency reserve of food and fiber in each of such countries.

Mr. Speaker, the farmers of America recognize that the farmer's responsibility for improving his economic condition should rest to a greater extent with his development of a better distribution and control of supply. But all of us recognize or should know that it is extremely difficult, if not impossible, for farmers to accomplish these objectives without the benefit of guidance of an organization that deals specifically with their problem or without an opportunity to develop these programs with Government assistance.

All these goals demand the leadership of a Secretary of Agriculture who is not only conversant with the technological and economic aspects of the farm problems, but who is sympathetic with the objectives of effective farm legislation, not only for farmers, but for the interest of the Nation, as a whole.

Agriculture is our basic industry. We are the best fed nation on earth. Our farmers have made it so. The productivity of our farms is today the greatest stabilizing force in the economy of

the free world. The Communists have put satellites above the earth, but they cannot begin to match the productivity of the people tilling the soil of America.

The income crisis is the major and the basic agricultural problem. All other farm problems are secondary in nature. Any proposal which purports to deal with the farm problem without seeking to enhance the net income of farm families does not deserve to be known as farm legislation.

The farm problem is not a political problem. It is a national problem. The same serious farm crisis faces all farmers, Democrats and Republicans alike.

Mr. Speaker, you well know and my record in Congress reveals that I have vigorously promoted, supported, fought for and voted for all farm legislation presented here in Congress to improve, to protect, and to serve the best interests of the farmers, Democrats and Republicans alike.

The farm families have always been and are now the solid social and economic anchor of America. If abandoned, our ship of state will surely flounder toward the ultimate loss of our American way of life.

Former Chairman Murdock Comments on the Master's Report

EXTENSION OF REMARKS
OF

HON. STEWART L. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. UDALL. Mr. Speaker, the court-appointed master, Judge Simon Rifkind, of New York City, will shortly file his report with the Supreme Court, and there is every anticipation that within the next 18 months the Court will enter its decision in the protracted litigation between Arizona and California over the waters of the Colorado River.

The history of this dispute, and the ensuing litigation, is of current interest to the Members of Congress as in all likelihood, once title to the water has been finally adjudicated, additional projects will be presented to the Congress to put these waters to beneficial use.

No man within, or without, the Congress knows more of the intimate details of this dispute than my good friend, John R. Murdock, the former chairman of the House Committee on Interior and Insular Affairs.

In order to enlighten our colleagues as to the implications of the master's report I recently propounded a series of questions to Chairman Murdock, and these questions and his answers are reproduced below:

Question. John, you have been a student of the relations between Arizona and California for years, especially about the Colorado River. Will you answer for me for the record some questions about the case, *Arizona* v. *California* on which you have been reading recently or about which you know personally?

Chairman MURDOCK. Certainly I will be glad to answer any of your questions within my knowledge of existing facts or of historical happenings. When you say the case, *Arizona* v. *California*, to what particular case do you refer? Or to what class of cases which may be not inappropriately labeled? As a lawyer you probably mean, *Arizona* v. *California*, a case now in the Supreme Court of the United States, but I, a nonlawyer, may have in mind—without too great a stretch of language—one of the many historical cases *Arizona* v. *California*, in the Congress of the United States. In fact I can answer questions about legislative cases better than court cases involving us.

Question. Well, lets not quibble over terms. To me a "case" usually means a law suit in a court. Since our contest with California is a quarrel between States, in this instance over dividing the waters of the Colorado River, the case I want to know about is in the Supreme Court. However, if you want to call the hearings and proceedings on a bill in Congress, a case in Congress, I will not quarrel with you. I suppose you have been involved in many such cases.

Chairman MURDOCK. Yes, many cases in Congress—meaning bills—but not as many as has CARL HAYDEN, for he has been in these legislative battles with California in the twenties, the thirties, the forties and the fifties. I have participated in "legislative cases"—meaning bills in Congress—with Arizona opposing California in most of them about water—for the 16 years that I was a Member of the House of Representatives.

Question. John, you have been lecturing on the history of the Colorado River. Have all, or most, of these legislative cases been concerned with the Colorado River? And has Arizona won many of these so called cases in Congress?

CHAIRMAN MURDOCK. Stewart, you are a native of Arizona and a lawyer, but even you may be surprised at how terribly complex the Colorado River problems are. One doesn't have to look at a map to see that the Colorado River separates Arizona and California in more than one sense. You might also be surprised how many legislative battles Arizona has won, but, of course, California in Congress has won most of them.

Question. I did want to question you about both kinds of battles with California, the legislative contests and the judicial contests, but before leaving this point I would like to know how you came to use the term case in Congress.

Chairman MURDOCK. I got that idea first from Mr. Charles Carson, one of Arizona's best lawyers. In discussing the procedure before my committee on a bitterly contested water bill, he said: "Those lawyers—the opposition—seem to want to try this matter like a case in court." I had noticed that the California forces seemed to use more lawyers than engineers and experts and were always harping on the law of the river which they interpreted to prove their way.

Question. Will you name one instance where Arizona won her case in Congress and then will you comment on and explain that phrase: The law of the river?

Chairman MURDOCK. My best example: Arizona won her case in Congress after a bitter fight through 1946 and 1947 to reauthorize the Gila project which gave us the important Wellton-Roll, Mohawk Valley development the ultimate importance of which cannot even yet be adequately measured.

THE LAW OF THE RIVER

As for the law of the river—I have studied it for many years, even before I came to Congress and I do not yet know exactly what it is until the Supreme Court has finally spoken. I am not a lawyer but I have heard good lawyers. I think we might study this law of the Colorado River as used before my committees during the period of controversy from 1945 to 1953 under four heads:

(1) What was the Arizona conception of the law of the river during this controversy? (Let us refer to it as "the law" for brevity.)

(2) What was California's conception, or view, of the law at this same time? (3) What would Arizona's conception, or view, of the law—if finally affirmed by judicial action of the High Court—allott to Arizona in water out of the Colorado River system? (4) What would California's conception, or view of the law—if fixed by judicial determination—probably allot in water to California out of the Colorado River system? California's determination and political power made it inevitable that the U.S. Supreme Court must eventually enter this controversy because California had stressed the law as they viewed it as final. I was well aware of this at all times, but was concerned chiefly about how and when the Supreme Court could best be brought into the controversy in a constitutional way.

At my committee hearing of April 18, 1951, I told the committee that I was not opposed to having an early Supreme Court decision on it; in fact, I was extremely anxious for final Court decree, but was earnestly opposed to the California suit resolution, which one of the three California members had just raised again at that meeting. I was extremely anxious for the Highest Court to tell Arizona and to tell California how much water each should have under the law of the river. However, good lawyers had told me that the Supreme Court does not render advisory opinions in disputes between States and, therefore, the Court probably would not do what I was so anxious to have done. I told the committee that the 4-year-old suit resolution, which was brought up again that day, would only lead us into a blind alley and get us nowhere, but only cause interminable delay. All of this is in the printed record of the hearing of April 18, 1951, and may be read by anyone interested. The three California members, it seemed to me, were trying to force Arizona to sue California, and in that way get the case into court on better terms for them, if at all.

I did not want Arizona to have to sue California, nor ask for an injunction against her for the water California was then taking and, for some time previously, had been taking, through her huge existing facilities. Instead, I wanted Congress to pass a sensible authorization bill, which my central Arizona bill (H.R. 1500, 82d Cong.), could have been made into and was being made into—exactly as Congress had passed a similar authorization bill for California in 1928, and then both States could get into the Supreme Court constitutionally without one having to sue the other. Thus the High Court would interpret the law with a logical new element added.

When Arizona finally had to sue California—as they maneuvered it—it made a harder case for Arizona, bearing the burden of proof. But with 3 Californians on that committee against 1 from Arizona, 30 California Members in the House of Representatives against 2 from Arizona, they had the power to block my proposal, although their counterproposal—the suit resolution, which had been sponsored by all of their Members in both the 80th and also the 81st Congress was never put over. That California's suit resolution had been heard by two Judiciary subcommittees in the 80th and again in 81st Congress through 4 years, and yet no favorable action was taken on it by all those lawyers who, as you know, are always the pick of the lawyer Members of Congress. Thus the case at law went to the Supreme Court in 1952 under terms disadvantageous to Arizona. There it is today—to this day after years of expensive litigation, although they said then it would take only a few weeks.

ARIZONA'S VIEW OF THE LAW BEFORE PRESENT COURT TRIAL

Question. Will you refresh my mind as to Arizona's view of the law of the river during the years you suffered with it?

Chairman MURDOCK. I have suffered with it for 46 years, or ever since I went to Arizona in 1914. But let us think only of the 8 years from 1945 to 1952, both inclusive. Because several changes were made and added thereto after I came to Congress, I'll pinpoint the time let us say, the spring of 1950. You see I am confining my answers right now to the hearings I have had in the House during the 8 years following 1945 when this case was tried in Congress before numerous committees, both of House and Senate, although Arizona tried three times before 1952 to get into court.

Question. What did Arizona think and contend by 1950 made up the law of the river? I'm not asking this for my information, but for the record.

Chairman MURDOCK. Our view included: (1) The seven-State treaty of 1922, known as the Colorado River compact, the basic instrument of law; (2) the Boulder Canyon Project Act of 1928–29; (3) the California Statute (Covenant) of Limitation of 1929; (4) numerous contracts for water out of Lake Mead with the Secretary of Interior, authorized by the Boulder Canyon Act, including Arizona's contract; (5) Arizona's Statute of 1944 ratifying the Colorado River compact of 1922 and authorizing an Arizona contract for water out of Lake Mead; (6) Nevada contracts for water out of Lake Mead; (7) the Mexican Water Treaty of 1944–45; and (8) Gila Project Reauthorization Act of 1947. Of course there were other items, but the above were the main ones; all instruments in print available for reading by anyone who can read. Then, we must remember, there was the general water law of the West, as old as white settlement out there, the law of prior appropriation and beneficial use.

CALIFORNIA'S VIEW

Question. You have named the chief elements of the law of the river in Arizona's view, now how was it in California's view? Would it contain the same elements then as they saw it?

Chairman MURDOCK. Not exactly the same elements—for as early as 1946 we and they differed not only in the reading of these related documents and instruments, but also as to which of the instruments to include as valid. California talked about the Colorado compact—not so much the seven-States compact, signed by all the seven States in 1922, but that compact modified into a six-States compact in 1929. They regarded the California statute of 1929, the irrevocable covenant, to be binding only with the six-States compact, excluding Arizona. They seemed to regard the numerous contracts of the California water agencies, signed in the early thirties, as having higher standing and firmer commitment than any later ones. They took a dim view of Arizona's statute of 1944 ratifying the compact of 1922 and they doubted the legality of Arizona's contract for water out of Lake Mead. Anyway, contracts signed by Secretary Ickes were not regarded by them as on a par with those earlier signed by Secretary Wilbur. And finally, California had fought the terms of the treaty with Mexico and after it passed, thought of ways to let Arizona suffer the consequences of that water burden, or so it seems to me in memory and as the legislative record shows.

Question. Now that you have indicated what Arizona considered to be the law of the river, and also what California indicated to be the law of the river, during the last years you were in Congress, what did each of these views spell out in water for each lower basin State if the Supreme Court should validate either of them?

HOW MUCH WATER FOR ARIZONA?

Chairman MURDOCK. Well, Arizona authorities, while I was chairman of the committee having to do with these disputed waters, considered the law to furnish her—assuming there was enough water in the river to do it—a gross of 2.8 million acre-feet out of Lake Mead annually, and in addition to that, all of the water of the Gila River system in Arizona and without diminution. And in further addition most Arizona authorities counted on 1 million acre-feet more out of the main stream annually in perpetuity, and also half of any surplus which was to be divided after 1963. Besides the above, some Arizona lawyers figured out that the law would give Arizona an extra million acre-feet of lower basin water. But disregarding this very last addition, as doubtful, we can add these sure items to total at least 3.8 million acre-feet annually of mainstream water plus the Gila River water.

WATER YIELDED BY CALIFORNIA'S INTERPRETATION

Question. And what did California authorities figure Arizona to have coming to her about 1950 by their view of the law? What did they think California had under the law?

Chairman MURDOCK. In 1947 one of their keenest lawyers implied that Arizona didn't have another gallon due her under the law as they read it. Furthermore that California had firm contracts for 5,362,000 acre-feet in perpetuity, plus half the surplus. She already had ample engineering facilities built by Uncle Sam, built on their orders to take practically all the flow of the river in the lower basin.

With such drastic conflicting claims of the two States to water to be divided in the lower basin, it certainly became necessary, after the committee action that day in April 1951 (April 18, 1951), for Arizona to sue in the Supreme Court—not as I thought it ought to be done to get into Court, but as they forced it to be done to the great disadvantage of Arizona because she had to sue and prove California wrong in action as well as thought.

Question. All that you have said brings much more to my mind of that long struggle in Congress of Arizona and California over the waters of the Colorado River. But you say Arizona was forced to sue California in 1952. Can you say what has happened since in this court trial?

Chairman MURDOCK. This trial cannot be said to be ended yet, as of this date, although the end of the suit seems to be near. The Supreme Court appointed a special master at once and he held hearings for about 2 years till his death. The present special master continued with the hearing of voluminous testimony for several years, mostly in San Francisco, and has finished his draft report this spring. His 400-page report contains a close analysis of the law of the river pertinent to this lawsuit—*Arizona* v. *California*—and also his rulings on 27,000 pages of testimony as well as the contentions of lawyers. To sum up this report to the Supreme Court the special master drafted a proposed decree which could be approved by the Supreme Court and become final. I will be very happy if it is approved as is and made final. This proposed decree was given to the press early last May and printed. It was hailed as a victory for Arizona, and I think it is. Of course, Stewart, I borrowed your copy while you were home and I have read it carefully, noting the points on which Arizona was held right or wrong according to the master's interpretation of the law and also the points on which California was held right or wrong, in their view of the law. This suit was narrowed down to the question: How shall the waters of the lower basin be divided among the three States under existing law?

Question. Did the master sustain Arizona on all points? Or did he overrule most of them?

Chairman MURDOCK. He overruled some of them but sustained some very important ones. For instance, this decree confirms Arizona's legal rights to 2.8 million acre-feet annually out of Lake Mead, as I read it. The surplus may be divided after 1963 but cannot be the basis of legal rights of appropriations before 1963. I believe this proposed decree allots Arizona her legal rights to a gross of 2.8 million acre-feet out of Lake Mead, plus 1 million acre-feet of mainstream water, and all the Gila River waters within the State. If I have been able to read the master's report aright, I believe it deals justly with Arizona according to the intent of the lawmakers and without injury to California.

The 1960 Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. DOMINICK V. DANIELS
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. DANIELS. Mr. Speaker, the year 1960 marks the 20th anniversary of the Ukrainian Congress Committee of America. This organization represents more than 2½ million Americans of Ukrainian descent. But even more, it is the voice for over 40 million Ukrainians who have been silenced by the boot of totalitarian communism.

The Ukrainian people, although a part of the U.S.S.R., are by no means of either Russian origin or sympathy. They represent the largest nation of subjugated human beings in the Western World. Except for a short period after World War I, there has been no free Ukrainian state for centuries; they have no flag, no army, no national schools to remind them of their heritage. Yet in all this time the desire for freedom has never been quenched.

The year in which this committee was founded, 1940, was a time of great hope for the Ukrainian people. They believed that the victorious German armies were coming to liberate them from their tyrannical Russian masters. They met the Nazi armies with open arms, only to discover that the Germans only wished to murder and enslave them—not treat them like human beings. Only then did they join the Russian national front—not to fight for a Mother Russia, but to defeat the greater of two evils.

An oppressed people fought hard for liberty; but when the war was ended, when their struggle was ended, that people found that its bonds had been tightened even more than ever.

Those Ukrainians who have sought freedom and peace in the United States love their new homeland; yet they can never forget the sufferings of their brethren who still live in slavery. The Ukrainian Congress Committee has thus worked to insure the freedom of all Ukrainians, as well as of all peoples. They have never failed to expose the

dangers of communism throughout the world. Through war and peace they have kept burning a light of hope for oppressed peoples. We congratulate the Ukrainian Congress Committee on a job well done, and hope that the near future may see the freedom of the Ukraine for which they have worked so hard.

Congressman Bow's Report

EXTENSION OF REMARKS
OF

HON. FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, my customary report to citizens of the 16th Congressional District is both an obligation and a privilege.

I believe it is an obligation of a Member of Congress to report to the people he represents at the end of each Congress, and I have done so regularly since 1952.

It is a privilege to hold public office in a nation where the people rule through elected representatives.

THE DISTRICT

Some 500,000 people in Stark, Tuscarawas, and Wayne Counties are constituents of the Representative of the 16th District of Ohio, an increase in population of about 90,000 since FRANK T. BOW first came to Congress 10 years ago.

They represent as great a diversity of interests as can be found in any congressional district.

Wayne County continues to be one of the foremost agricultural counties of the State and Nation, but small industry is expanding and providing greater balance in the economy.

Tuscarawas County continues to boast the largest concentration of clay industries in America, together with an increasing number of manufacturing plants. It is well known as a center of the swiss cheese industry and its farms form the solid basis of its economy.

Stark County's diversified industry has grown steadily through the 10 years of my tenure in office, and the city of Canton is celebrating a decade of progress that has seen many new industries established beside the giants whose names and products are known internationally.

Thus, farm and business legislation, problems of labor-management relations and of helping to secure Government contracts to keep production humming, problems of water conservation and flood control, city development and interstate highways occupy the time and attention of the 16th's Representative in Congress.

APPROPRIATIONS

During the 86th Congress, FRANK T. Bow continued to serve as a member of the Appropriations Committee, and as the senior Republican member of the Subcommittee on the Departments of State, Justice, and the Judiciary, and the Subcommittee on Commerce and Related Agencies, as well as a member of the Subcommittee on Deficiencies.

Day after day through the session these subcommittees have had hearings on budget requests, seeking to find means of improving Government service while reducing Government expense.

In the first session of the Congress, the subcommittees of which I am a member recommended savings of $675,979,859.

In the second session we have recommended savings of $912,262,023.

KEY TO TAX REDUCTION

Taxes continue to be the biggest complaint of my people. They want tax reduction, but not at the expense of necessary Government programs.

The key to tax reduction of this kind is the careful scrutiny we give appropriations. If every officer of the agencies and bureaus of Government will do his best to cut costs, and if they will cooperate with our committee efforts to find further economies, we can save millions.

The budget surplus of $1.1 billion in the fiscal year just ended, and the promise of another surplus in the current fiscal year, give hope that the increasingly distressing burden of taxes can be eased. If we continue to have an administration interested in economy and tax relief and if we can have a Congress dedicated to that end, the $7½ billion tax cut of 1954, which has saved Americans over $45 billion to date, can be repeated.

NEW FEDERAL BURDENS

Tax reduction history will not repeat itself, however, if the American people or their representatives create new burdens for the Nation's taxpayers.

Forty-five billion dollars' worth of such proposals were introduced during the 86th Congress.

One such proposal to provide from the Federal Treasury $20 for each child of school age to be spent for the public schools of the States without regard to whether such children attended public schools or, indeed, any school at all, came close to passage.

Who would pay the bill?

The same people who now pay school taxes in each district and State.

Why would it be any easier for them to pay additional taxes to Washington than to the local government?

Why should they send money to Washington for the Federal bureaucracy to take out its administrative expenses before returning a pittance to the people?

These are questions basic to every Federal aid something-for-nothing proposal.

There is only one source of tax dollars—the people. Tax dollars buy more when they are collected and spent by government closest to the people.

Federal aid costs more for collection, for administration, for unnecessary Federal requirements and—most of all—because we lose a part of our individual liberty and our individual responsibility every time we turn to Washington to do a job we can do better for ourselves.

These are some of the reasons your Congressman, FRANK T. BOW, has opposed unnecessary new Federal spending programs.

PRINCIPAL BOW BILLS

Carrying out the political philosophy I have explained to the people of Ohio in five congressional campaigns and innumerable other occasions, I have prepared legislation as follows:

A bill to carry out the recommendations of the Hoover Commission to end commercial enterprises of the Government that compete with business and take away job opportunities.

A bill to require a complete inventory of Government property so that property not essential could be disposed of and the proceeds applied to the national debt.

A bill to require the Government to live within its income.

A bill to avoid new tax burdens and Federal control in our schools by turning over to the States for education one-fourth of the cigarette taxes collected in each State.

A bill to restore the constitutional rights of servicemen stationed abroad who may now be tried and imprisoned in foreign courts.

A bill to recognize good citizenship in later years of men who received undesirable discharges from the armed services primarily because of immaturity.

An amendment to the Fair Labor Standards Act to protect the wages of American workingmen by authorizing special duties on products of foreign nations where substandard wages provide an unfair competitive advantage.

A resolution to declare that the Congress believes we should enter into no further tariff reduction negotiations at this time.

A bill to protect and define the right of associations of dairy farmers to deal as a unit with the processors and distributors of milk.

LOCAL PROBLEMS

Working with Government agencies to assure proper Federal service for the 16th District is an important part of the Congressman's job.

During the past 2 years we have come closer to solving many longstanding problems.

Berlin Reservoir: For 10 years we have tried to find a means of maintaining the water level throughout the summer for recreational uses, compatible with the main purpose of the project. In 1960 we obtained a $15,000 appropriation for a study by the Corps of Engineers which should provide a solution. Also, construction of the West Branch Reservoir will be helpful in augmenting water supply.

Chippewa watershed: The project won congressional approval this year and we are working to find some method of preventing unnecessary damage to families in the Orrville area.

Flash flood warning: At my request the Weather Bureau is establishing a flash flood warning system at Akron-Canton Airport that will help to prevent economic and possible human loss when flash floods occur in our three-county area.

Stark County flood control: My resolution authorizing the Corps of Engineers to prepare plans for flood control in the Stark County area, to prevent losses such as occurred in the 1958 floods, was approved by the Congress.

Air travel: Progress continues on improvement of the Akron-Canton Airport

and we are endeavoring to secure new facilities and continued airline service at New Philadelphia-Dover.

Government contracts: Cooperating with local industries, your Congressman has helped to bring important defense contracts to our area to help maintain employment levels.

Postal service: The Post Office has completed several new post office buildings and is working on improvements at others including Massillon and Canton. City and rural delivery routes have been extended to serve several thousand additional families.

MAJOR LEGISLATION

As shown in the accompanying voting record, I have been present and voted on all major issues presented in the 86th Congress.

This Congress has enacted 34 laws extending and improving the program of the Veterans' Administration, all of which I supported.

FARMING

No major farm legislation has been enacted because the Democratic majority in Congress and the Republican administration have disagreed on this subject. The Democratic majority insists upon continuation of the high price support which has encouraged tremendous surplus of certain favored commodities at terrific cost to the taxpayer. While constantly urging modification of this program, Secretary Benson has been forced to administer the Democratic incentive law and to take the blame for the cost of the surplus that law promotes. Farmers and taxpayers alike are suffering from too much Government interference in agriculture. We must break the legislative deadlock that has prevailed so we can give the farmer a chance to produce at a profit, which is the only way we can assure the rest of the population a continued ample supply of food and fiber.

Two programs in this field have proved successful. The conservation reserve, which the Democratic Congress refused to extend, has taken millions of acres out of production at far less cost than paying for surplus that would have been produced.

The use of surplus for relief and barter, at home and abroad, has continued to help millions of individuals while at the same time relieving our storage problem and spreading good will for our country. I am proud to have been a sponsor of this program.

FOREIGN AID

I have continued my unwavering record of opposition to the extravagant and lavish grant of funds to foreign countries. However, I have supported the Development Loan Fund which will help erase the necessity for foreign grants, and the special program for Latin America. We must create harmony and unity of purpose in this hemisphere. If we cannot do that much, we can look forward only to isolation in a hostile world.

LABOR-MANAGEMENT

I voted for the Landrum-Griffin bill—Labor-Management Reporting and Disclosure Act of 1959—because it provides an opportunity to give individual members of labor unions the opportunity to run their unions properly and rid them of graft and corrupt leadership.

The labor bosses of America are loud in their demands for civil rights, but nowhere in America are civil rights so trampled upon as in those unions where members are denied the right to secret ballots in union elections, denied the right to know how tremendous union treasuries, taken from their pay, are managed, and denied the right to take part in vital decisions that mean bread and butter to their families.

I voted also for the minimum wage bill that passed the House. This measure provided for a gradual increase to $1.15 per hour and the coverage of about 1 million additional workers. Unfortunately, it was impossible for the House Committee on Education and Labor to compromise this reasonable bill with the more radical approach advocated by Senator KENNEDY with the result that there is no legislation.

SOCIAL SECURITY

Several improvements in the social security program, including the disability program, were enacted in the 86th Congress. Unfortunately, the effort to remove or increase significantly the ceiling on earnings of retired persons was not successful.

After bitter controversy within the Democratic leadership of the Congress over various proposals for medical care to the aged, the Congress adopted a program that constitutes a small beginning toward Federal-State responsibility for elderly persons who, though not on public welfare, cannot afford proper medical treatment.

It is not my intention to make this a political message, but it is impossible to explain the social security medical care issue without reference to politics. Some constituents have written me heated letters blaming Republicans for failure to provide a broad medicare program for the aged. As a matter of fact, President Eisenhower proposed far more comprehensive medicare than anyone else.

The 86th Congress has been controlled by the Democrats in both House and Senate almost 2 to 1. The Democratic Senators and Representatives could pass any bill on which even two-thirds of them agreed. They could not agree on any feature of medical care for the aged; and if any blame is to be cast for legislation enacted, they must bear it.

VOTING RECORD

Proper titles of bills and the methods of voting on them make a congressional voting record sometimes difficult to understand. I have used descriptive rather than proper titles on some of the following important issues of the 86th Congress:

	Bow vote	House action	Final action
1st session:			
Agricultural Trade and Development Act	Yea	Approved	Public law.
Federal-Aid Highway Act	Yea	do	Do.
Landrum-Griffin (labor bill)	Yea	do	Do.
Deny passports to subversives	Yea	do	No Senate action.
Uphold validity State laws	Yea	do	Public law.
Foreign aid	Nay	do	Do.
TVA, self-financing	Nay	do	Do.
2d session:			
Redevelop so-called distress areas	Nay	do	Vetoed.
Civil rights	Yea	do	Public law.
Continued rigid controls on farms	Nay	Defeated	
Federal employees salary increase	Yea	Approved	Do.
Foreign aid	Nay	do	Do.
Social Security Amendments of 1960 including medicare	Yea	do	Do.
School Construction Assistance Act	Nay	do	Failed of enactment.
Increase minimum wage	Yea	do	Do.

The Ukrainian Congress Committee

EXTENSION OF REMARKS
OF
HON. MARGUERITE STITT CHURCH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. CHURCH. Mr. Speaker, this fall, branch and member organizations of the Ukrainian Congress Committee of America, Inc., will commemorate the 20th anniversary of the founding of the committee.

The work and the objectives of the committee, in informing not only the 2½ million Americans of Ukrainian ancestry but all Americans of the continuing struggle in the Ukraine and in other captive nations against Soviet domination and of the perils of communism, are contributing greatly to the cause of freedom throughout the world. In speaking for the captive Ukrainian people, who have struggled for centuries to break the bonds of tyranny and proclaim their independence, and in affirming their right to freedom and justice, the committee continues to expose the fallacy that communism insures liberty.

It is most urgent today to know and realize fully the true meaning of communism and its danger to the rights and freedom of men and nations. The Ukrainian Congress Committee of America is to be commended for its unceasing efforts to stem the advance of communism, which seeks to extend its tryanny over the world.

Ukrainian Congress Committee of America Celebrates 20th Anniversary

EXTENSION OF REMARKS
OF
HON. CARL ALBERT
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ALBERT. Mr. Speaker, this fall marks the celebration of the 20th anniversary of the creation of the Ukrainian

Congress Committee of America, an organization of some 2½ million Americans of Ukrainian descent.

The purpose of this unique organization is to make the American public aware of the situation existing in the U.S.S.R. This "prison of nations" encompasses 15 supposedly independent nations of which the free governments of three—Estonia, Latvia, and Lithuania—still are recognized by this country.

Joining together, Americans, bound to these captive nations by ancestral and traditional ties, are devoting their efforts to dispelling the widespread misapprehension of peace and harmony within the Soviet Union. Many of these nations still actively seek their freedom. While we cannot afford to underestimate the power of the U.S.S.R., we need not be absorbed nor overwhelmed by a national purpose and unity which does not exist under Soviet domination.

Mr. Speaker, I join in the salute to these loyal Americans on this 20th anniversary of the formation of the Ukrainian Congress Committee of America. Their dedication to the peace and security of our Nation should be an inspiration to us all.

Record of the Committee on Post Office and Civil Service During the 86th Congress

EXTENSION OF REMARKS

OF

HON. TOM MURRAY

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MURRAY. Mr. Speaker, the record of the Post Office and Civil Service Committee during the 86th Congress is a tribute to the very able, informed, and diligent performance by the committee, and by each member of the committee, of the duties and responsibilities imposed on the committee by the Legislative Reorganization Act of 1946. It is impossible to single out one or more members for outstanding work; each and every member has made a vital contribution to our committee program and may take just pride in the committee's record of accomplishment.

Improved employee benefits, personnel management, and postal operations during the 86th Congress represent major forward steps in the committee's continuing program to establish and maintain a Government civilian personnel system and a level of efficiency in the postal service which compare favorably with best modern practices in private enterprise. The record of employee legislation is particularly significant when viewed in the light of the very fine benefits so recently approved in the 85th Congress, to which those of the 86th Congress are added.

I welcome this opportunity to express to the committee members my deep personal appreciation for their fine cooperation and conscientious devotion to duty.

The following summary of the committee's legislative and investigative activities is provided with the thought that it might be helpful to the Members during the recess:

FEDERAL EMPLOYEE BENEFITS

Salary increases

Public Law 86-568 (H. Rept. 1636) grants a general 7½-percent salary increase for those categories of Federal employees customarily included in salary legislation, except that the increases are slightly larger (averaging approximately 8.4 percent) for postal field service employees in the first six salary levels and for rural carriers. The coverage of Public Law 86-568 is as follows:

Section	Coverage	Number of employees
102	Postal field service employees	535,000
112	Classification Act employees	980,000
113	Foreign Service Act employees	8,100
114	Employees in the Department of Medicine and Surgery in the Veterans' Administration	19,300
115	Agricultural stabilization and conservation county committee employees	15,000
116	Judicial branch employees	5,000
117	Employees of Senate and House of Representatives	7,500
	Total	1,570,000

Public Law 86-568 also extends to the agricultural stabilization and conservation county committee employees coverage of the civil service retirement, Federal employees' group life insurance, and Federal employees' health benefits programs. The effect is to grant these employees pay raises and fringe benefits on the basis already accorded to their fellow workers who are agricultural county extension agents.

This legislation further (1) makes certain adjustments in the salaries of top legal positions in the executive and military departments; (2) establishes the position of Administrative Assistant, Secretary of Health, Education, and Welfare; and (3) earmarks 25 existing supergrade positions for the Interstate Commerce Commission.

Health insurance

Public Law 86-382 (H. Rept. 957) establishes a Federal employees health benefits program—one of the most valuable employee measures approved in any recent Congress. There is no finer example of able and constructive legislative deliberations than demonstrated by the committee in taking this extremely complex and controversial legislation and working out a bill that has the unanimous support of every committee member, the wholehearted agreement of employees' organizations and of private enterprise that will provide services, and the approval of the administration.

The Government will share the cost under this program to protect Federal employees and their dependents against the high, unbudgetable, and financially burdensome costs of medical services. Employees will be able to purchase protection, at very low cost, from the oppressive expenses of normal medical care and often crushing expense of major or catastrophic illness or injury. The program also improves the competitive position of the Government in the recruitment and retention of competent civilian personnel.

Addition of the health program to the existing fringe benefits package for Government employees—which already includes retirement and survivor annuities, group life insurance, annual and sick leave, pay for job-connected injury or death, uniform allowances, and other benefits—places the Government on a substantially equal level with progressive private enterprise in respect to employee fringe benefits.

Basic and extended health protection is made available to 2 million employees and their dependents—some 4,500,000 individuals. There will be free choice among four separate health plans, including a service benefits plan, such as the Blue Cross-Blue Shield organizations offer; an indemnity plan, such as now offered by certain insurance companies; any one of several Federal employees organization plans; and a comprehensive medical plan on either a group-practice or individual-practice prepayment basis. The plans will provide a wide range of hospital, surgical, medical, and related benefits. Both the service and the indemnity plan will include at least two levels of benefits. Thus, each employee will be able to select the plan best suited to his own needs.

The Government's contribution generally is 50 percent of the cost, but not less than $1.25 nor more than $1.75 biweekly for an individual employee and not less than $3 nor more than $4.25 biweekly for an employee and family, subject to certain special exceptions. Employees need not pass any physical examination and, in the event of separation from Government service, may convert their coverage to a private plan without physical examination. No person may be excluded because of race, sex, health status, or—at time of first opportunity to enroll—age.

This legislation enriches the Federal employees' fringe benefits package by a minimum $222 million annual health program, with the Government and the employees sharing the cost. It is widely regarded among employees as the equivalent in value of another liberal pay increase, on top of the 10-percent raise granted a year earlier.

Retirees health benefits program

Public Law 86-724 (H. Rept. 1930) grants former Federal employees (who retired before the Federal Employees Health Benefits Act of 1959 became effective) a health benefits program comparable to the program established by such act for active employees and new retirees. Approximately 415,000 retired employees and survivors will be eligible for the health benefits program. The Government's contribution to premiums will be not less than $3 nor more than $4 monthly for a retiree who enrolls for self alone and will be twice such rate for a retiree who enrolls for self and family. The Government also will make an appropriate contribution to cover costs of administration.

Retirees will have the option of enrolling under a single health plan, for which the Civil Service Commission will enter into a contract with the carrier making the best offer, or of retaining or obtaining a different plan of his choice. Under either option the Government's contribution will be the same.

Disposition of certain retirement contributions

The first section of Public Law 86-622 (H. Rept. 1916) provides that retirement contributions made by an individual after he has qualified for maximum annuity benefits (80 percent of high average salary) will be applied, first, in payment for any noncontributory service standing to the individual's credit and, second, as voluntary contributions to purchase added annuity benefits under the previously existing voluntary-contribution provisions of section 12 of the Civil Service Retirement Act.

Section 2 rounds out the deferred annuity provisions of the Civil Service Retirement Act applicable to Members of Congress by providing entitlement to deferred annuity benefits for Members separated from the service before reaching age 50 after having completed 20 years of service including 10 years of Member service.

Section 3 provides that any former Government employee who, after retirement, is reemployed for 5 years or more may elect to

have his annuity rights redetermined on the basis of his total service (including the reemployed service) upon final separation and payment of the appropriate contributions for the reemployed service.

Section 4 extends to a very limited class of surviving widows of former Members of Congress survivorship benefits identical in principle to those provided by present law for all other surviving widows of former Members.

Earlier commencing dates for retirement annuities

Public Law 86–713 (H. Rept. 1150) provides that civil service retirement annuities will commence the first day after separation from the service if immediate benefits are payable or, in the case of deferred benefits payable at a certain age, the first day after the prescribed age is reached. Benefits of surviving widows and children will begin the day after the death of the employee or annuitant on whose service they are based. Previously annuities and survivor benefits commenced the first of the month following separation from the service or death, as the case might be. The new law is particularly helpful for widows and children, since their survivor benefits will become payable immediately after death of the employee or annuitant, whereas under prior law the benefits were not payable for periods of as much as 30 days after death.

Reemployment of retirees and miscellaneous retirement improvements

Public Law 86–604 (H. Rept. 832) corrects inequities in the Civil Service Retirement Act relating to reemployed annuitants and the crediting of service and makes certain other revisions of such act. Conditions with respect to (1) reemployed service of retired Members of Congress and (2) crediting of civilian service rendered by Members of Congress before their election to the Congress are placed on substantially the same basis already applicable to other retired Government employees.

The annuity computation formulas for Government employees generally—that is, 1½ percent for years of total service not exceeding 5; 1¾ percent for years of total service between 5 and 10; and 2 percent for years of total service in excess of 10—are made applicable to total service of retiring congressional employees and Members of Congress. For any of such total service not covered by the 2½ percent computation formula applicable to Member service and certain congressional employee service, the 1¾ percent formula will apply to years of total service between 5 and 10 and the 2 percent formula will apply to years of total service in excess of 10.

The age for commencement of deferred annuities of Members of Congress separated on or after October 1, 1956, is made applicable to Members separated prior to that date with deferred annuity entitlement.

A legislative technicality inadvertently contained in Public Law 85–465 is removed so that surviving widows of Canal Zone and Alaska Railroad retirees who died during March 1948 may receive surviving annuities intended for them by Public Law 85–465.

Retirement and leave credit—Internment of employees of Japanese ancestry

Public Law 86–782 (H. Rept. 1920) corrects omissions in Public Law 545, 82d Congress, which granted Federal employees of Japanese ancestry certain seniority and compensation benefits where their grades, time in grades or rates of compensation were adversely affected because of the security policies of the Federal Government during the World War II period of evacuating people of Japanese ancestry to relocation centers. Consideration was not given at that time to crediting such periods as periods of service for annual leave accrual and retirement purposes. Such annual leave accrual and retirement service credit benefits generally are associated with the benefits granted by Public Law 545, 82d Congress, Public Law 86–782 conforms the annual leave and retirement benefits of these employees of Japanese ancestry to the other benefits granted by Public Law 545.

Oversea differentials and allowances

Public Law 86–707 (H. Rept. 902) is another important employee measure, developed by the committee through its Civil Service Subcommittee studies over the past several years. This law will improve and strengthen administration of oversea activities of the Government by establishing a coordinated and reasonably uniform system to compensate American citizens employed abroad by the Government for additional costs, hardships, and inconveniences incident to their working assignments abroad. There will be uniform treatment for all oversea employees, to the extent practicable.

The law embodies the principle that the Government should provide equal treatment for its oversea employees in respect to the additional expenses they incur because of their assignments abroad, over and above expenses of Government employees in the United States, and the hardships, inconveniences, and other differences in environment or conditions of employment which justify additional compensation or allowances.

The law consolidates a wide variety of existing provisions of law granting allowances and differentials for the several categories of Federal employees in oversea areas. Provision is made for a temporary lodging allowance after arrival at a new overseas post and before final departure from the post; reasonable repairs to make substandard living quarters habitable; the inclusion of water as a utility covered by quarters allowances; advance payment of quarters allowances; allowances for maintenance of dependents where a separate establishment is necessary for them away from the post of duty; a post allowance to compensate for living costs higher than in Washington, D.C.; a transfer allowance upon assignment to a foreign post or at a post in the United States between foreign assignments; transportation of children—one round trip to the United States and back—for secondary or college education; a hardship post differential not exceeding 25 percent of basic pay for foreign conditions of environment warranting additional compensation; payment for packing and unpacking, transporting to and from storage, and storing furniture and household and personal effects of employees assigned to foreign posts; payment of unusual expenses incident to the operation of official residences suitable for chief representatives of the United States, and other senior officials designated by the President, at foreign posts; and transportation of the motor vehicle of an employee to his oversea post subject to a general limitation that only one such vehicle may be shipped during each 4 years of overseas service.

Home leave, such as now provided for the Foreign Service, is authorized for other employees who complete 24 months of continuous service abroad, in addition to the usual annual leave. Authority to accumulate up to 45 days of annual leave, now available to classified civilian employees abroad, is extended to employees of agencies operating under the Foreign Service Act or related law. Existing income tax exemptions for foreign areas allowances—but not post differentials—are continued in effect for the foreign areas allowances contained in the bill.

The value of the additional employee benefits provided by this legislation is estimated at $3 million annually.

Oversea teachers

Public Law 86–91 (H. Rept. 357) provides an up-to-date system of personnel administration, for teachers in schools conducted by the Department of Defense for dependents of the Department's personnel in oversea areas, which is comparable to the school systems in most public primary and secondary school jurisdictions in the United States. This legislation was developed through the Civil Service Subcommittee studies in cooperation with the Department of Defense and places in effect an Executive recommendation. It is also a direct implementation of a unanimous committee recommendation contained in House Report 2109, 84th Congress.

This act eliminates serious problems in the compensation and employment conditions of oversea teachers which stem primarily from the fact that they have been employed under civil service laws and rules designed for full-time classified employees—not for the teaching profession. For example, although the school year lasts only 9 or 10 months, oversea teachers' salaries have been on an annual basis, as in the case of the usual classified employees, so that they were being paid only nine-twelfths or ten-twelfths of the annual salary. They have been subject to the Annual and Sick Leave Act, which is entirely unsuitable in view of the school recess periods at Christmas and Easter and in the summer months. They have been receiving no pay or any of the usual oversea differentials and allowances during these recess periods.

Public Law 86–91 removes these teachers from the Classification Act of 1949, the Federal Employees Pay Act of 1945, the Annual and Sick Leave Act of 1951, and other unsuitable laws and regulations. They will have a separate salary and allowance system adapted to the requirements of the school program and consistent with that followed in the school system in the District of Columbia. No oversea teacher's salary will be higher than the salary for a comparable position in the District of Columbia school system.

This new law will contribute greatly to maintaining instructional and scholastic levels in schools for dependents of oversea personnel comparable to the levels which would be available were such personnel on duty in the United States.

Rotation of oversea employees

Public Law 86–585 (H. Rept. 1469), based on an official recommendation of the Department of Defense, will contribute to a strengthened defense effort by improving the administration of oversea defense activities. To accomplish such purpose, this legislation establishes a strong policy of facilitating the interchange of civilian employees of the Defense Establishment between posts of duty in the United States and posts of duty outside the United States. Qualified employees will be encouraged (but not forced) to accept oversea assignments by being given every reasonable guarantee of return rights, after completing their oversea assignments, to positions in the United States at least equal in pay and tenure to the positions they held prior to accepting the oversea assignments.

Executive, administrative, and scientific research positions

Public Law 86–370 (H. Rept. 1138) authorizes pay adjustments for Patent Office Examiner in Chief and designated Examiners in Chief from the present $12,770–$13,970 level to maximums of $17,500 and $15,150, respectively; an increase from 146 to 260 in the number of supergrade positions—$15,255 to $18,500—in the Treasury Department; and a net increase of 94 in supergrade positions available to the Civil Service Commission for allocation to other

departments and agencies against a considerable backlog of requests—of which 20 are earmarked for the Department of Health, Education, and Welfare, 4 for the Bureau of Prisons, 3 for the Immigration and Naturalization Service, 1 for the Department of Labor, 15 for the Small Business Administration, and 1 for the U.S. Court of Military Appeals, upon justification by these departments and agencies. Pay of executive positions is adjusted as follows: Commissioner of Social Security from $17,500 to $20,000; and Deputy Commissioner and Chief Counsel of the Internal Revenue Service, Administrative Assistant Attorney General, and Administrative Assistant Secretaries of Agriculture, Labor, and Treasury from $17,500 to $19,000. The Administrator, Agricultural Research Service, previously paid $17,500 under the Federal Executive Pay Act, is transferred to one of the scientific research positions provided by the bill. The Departments of Agriculture, and Health, Education, and Welfare, respectively, are granted 10 and 5 additional scientific research positions in the salary range $12,500 to $19,000.

Administrative authorities for the National Security Agency

Public Law 86–36 (H. Rept. 231) removes National Security Agency personnel from the Classification Act since the Agency security functions make it impossible to give the Civil Service Commission normal position classification and duty data; reestablishes the 50 existing Agency scientific research positions under the new act; and authorizes the Agency Director to fix salaries of other employees, as justified by levels of responsibilities, in relation to Classification Act salary rates, with not more than 50 supergrade positions in the $15,255 to $18,500 range.

Additional civilian positions for the Department of Defense

Public Law 86–377 (H. Rept. 597) increases from 303 to 372 the number of supergrade positions—salary range $15,255 to $18,500—and from 292 to 450 the number of scientific research positions—salary range $12,500–$19,000—in the Defense Establishment to perform necessary duties resulting from the greatly increased complexity and tempo of our defense effort. This legislation also includes a liberalizing amendment to the Federal Employees' Group Life Insurance Act.

Crediting service of U.S. Commissioners

Public Law 86–306 (H. Rept. 687) credits service, for retirement purposes, of U.S. Commissioners who are compensated by fees on the same basis used to credit such service of other Government employees who are compensated by fees.

Training of postmasters

Public Law 86–33 (H. Rept. 230) facilitates the training of postmasters by specifically authorizing such training under the Government Employees Training Act, Public Law 85–507.

Observance of legal holidays

Public Law 86–362 (H. Rept. 362) corrects inequities in existing laws which deprive certain Federal employees of the right to a workday off when a holiday falls on Saturday or an employee's day off in lieu of Saturday. This law requires that every employee receive a workday off for each one of the 8 legal holidays every year, regardless of the day of the week on which any holiday may fall.

Temporary promotions, Bureau of the Census

Public Law 86–769 (H. Rept. 1982) removes certain obsolete provisions of the Census laws and restores a statutory exception from the Classification Act of 1949 relating to temporary promotions of Census employees and enumerator positions. Employees temporarily promoted during peak work periods (such as the decennial census) will have the right to return to their former positions, once their temporary work is completed, without being subject to reduction-in-force procedures.

Qualification for appointment to certain Library of Congress positions

Public Law 86–768 (H. Rept. 1926) excepts the Library of Congress from section 505(1) of the Classification Act of 1949, which (subject to certain exceptions) requires prior Civil Service Commission approval of the qualifications of appointees to positions in grades GS–16, 17, and 18 of the general schedule of such act.

POSTAL FRAUD AND OBSCENITY PROCEDURE

The 86th Congress marked still further progress in preventing use of the mails for fraudulent purposes and the transmission of obscenity and pornography. The measures summarized below were developed by the Postal Operations Subcommittee, in cooperation with the Post Office Department.

Post Office Department judicial officer

Public Law 86–676 (H. Rept. 1493) strengthens administrative procedures in postal fraud and obscenity cases by providing a judicial officer in the Post Office Department to perform such quasi-judicial duties as the Postmaster General assigns to him. This authority overcomes the effect of a judicial decision (169 Fed. Supp. 746) which enjoined enforcement of a postal fraud order on the ground that the Post Office Department's judicial officer has no authority to receive evidence under the Administrative Procedure Act. Public Law 86–676 vests in the judicial officer authority to receive evidence, along with existing authority to render decisions, consistent with the Postmaster General's delegation of authority. This legislation is a valuable aid to the prompt action always necessary to protect the public in fraud and obscenity cases.

Temporary detention of mail in fraud and obscenity cases

Public Law 86–673 (H. Rept. 945) represents one of the finest public interest actions completed by a legislative subcommittee in one Congress. This law provides for timely and effective action to terminate the business of purveyors of filth through the U.S. mails. Properly enforced, it will help sound the death knell to mail-order pornography for profit. The Postmaster General is authorized to apply directly to the appropriate U.S. district court, and the court is authorized, upon a showing of probable cause to believe that the postal fraud and obscenity statutes are being violated, to enter a temporary restraining order against the defendant and a preliminary injunction directing detention of the defendant's incoming mail pending conclusion of the statutory proceedings and any appeal therefrom. This will insure court supervision of the power to detain mail, remove any need for time limit on the period of detention, simplify and expedite proceedings, and helps to terminate dealings in obscene matter by any guilty party.

GENERAL POSTAL MATTERS

Use of certified mail by Government agencies

Public Law 86–507 (H. Rept. 1492) will effect material savings in postage costs for the transmission of official Government mail. A number of statutes heretofore have required that certain official Government mailings be registered, with accompanying charges generally representing the costs involved in providing this special postal service. Public Law 86–507 authorizes each department and agency in its discretion to utilize, in lieu of registry, the far less expensive certified mail procedure established several years ago and widely used by the general public. Since certified mail will serve the purposes of the Government fully as well as registered mail in many instances, the use of certified mail under this new law will result in economies in postal handling costs which will be passed on to the departments and agencies concerned.

Postage rates for books and library books

Public Law 86–644 (H. Rept. 252) revises and clarifies postage rate provisions under which books, library books, and related materials are mailed at special low rates. Either the third- or fourth-class rate or the book rate, whichever is cheaper, will apply to mailings of books and certain other educational matter. The book rates are extended to "sound recordings" in lieu of the existing application to "phonograph recordings," to printed educational charts of a permanent nature, to scientific or mathematical kits, instruments, and devices, and to mailings between cooperative processing centers. Periodicals may be mailed at the book rates in either bound or unbound form. Guides or scripts may be mailed with films and filmstrips at the book rates. Certain meaningless language is removed from the book and the library book postal rate provisions.

Minimum charge on third-class mailings of odd sizes and shapes

Public Law 86–56 (H. Rept. 331) revises the minimum per piece charge for third-class mail of odd size or shape from 6 cents to 3½ cents. This revision eliminates serious hardship imposed by the 6-cent rate on churches, church organizations, nurserymen, and other small businesses and also removes difficult operating problems arising in the postal establishment because of the 6-cent charge.

Statement of number of magazine copies sold

Public Law 86–513 (H. Rept. 573) clarifies the law relating to sworn statements by publishers having second-class mail permits and extends to magazines the requirement—now applied to most newspapers—that the sworn statements show average number of copies of each issue sold or distributed to paid subscribers. The publishers supported this legislation, which will facilitate postal operations.

Credit to postal revenues

Public Law 86–169 (H. Rept. 296) authorizes credit to postal revenues of commissions on toll telephones in post offices; amounts received by employees for witness fees, travel expenses, and subsistence when subpenaed to appear officially in private litigation; and collections for loss of first class registered matter not restored to the original owner.

MISCELLANEOUS

Clarification of salary appropriation provisions

Public Law 86–122 (H. Rept. 386) eliminates from Government salary laws an obsolete provision which is contradictory to existing budget and appropriation procedures. The provision eliminated purported to authorize salary costs, incurred in part in one fiscal year and in part in the following fiscal year, to be charged to the following year appropriations.

BILLS PASSED BY THE HOUSE

Forfeiture of Federal retirement benefits

H.R. 4601 (H. Rept. 258), developed in a special committee study after adjournment of the 85th Congress and passed by the House, April 14, 1959, would correct certain harsh inequities caused by Public Law 769, 83d Congress, which prohibits Federal retirement benefits based on service of an individual who has committed any one of a great many types of minor as well as serious offenses. The bill would continue and strengthen the existing prohibition against any Federal annuity or retired pay in the case of an offense involving the national security of the United States but would restore other annuities—including survivor benefits—previously denied because of comparatively minor offenses having no

relationship whatever to the national security. In many instances the offenses were so trivial there was no penalty and the individual continued in, or returned to, work and rendered long and faithful service until retirement. In these cases, there is no doubt of the individuals' complete loyalty or any semblance of an offense against the national security.

Veterans' preference—Define mothers

H.R. 1907 (H. Rept. 1489) would amend the Veterans' Preference Act of 1944 to redefine the terms "mother" and "mothers" as including a natural mother, a mother through adoption, or a female who stands in loco parentis to a deceased or service-connected permanently or totally disabled ex-service man or ex-service woman for at least 1 year before the ex-service man or ex-service woman attained the age of 21 and not less than 1 year before the entry of the ex-service man or ex-service woman into active military service. This same policy is now contained in the definition of the term "parent" in title 38 of the United States Code, relating to veterans' benefits.

Exemptions from residence requirements, postal employees

H.R. 5571 (H. Rept. 937) would make career postal employees with 3 years of service eligible for postmasterships at their offices, if otherwise qualified, even though they reside outside the town or the office delivery limits.

Saved salaries for postal employees whose salary levels are reduced

H.R. 12663 (H. Rept. 1984) would protect postal field service employees from loss of salary when their salary levels are reduced for any reason except (1) demotion for personal cause, (2) the employee's request, or (3) reduction in force due to lack of funds or curtailment of work. Similar salary protection is provided for classified Federal employees by Public Law 85–737.

Saved salaries of employees whose positions are downgraded—Exception

H.R. 12336 (H. Rept. 1979) would provide a necessary exception from Public Law 85–737, which protects salaries of classified employees whose positions are reduced in grade through no fault of their own. The Comptroller General has ruled that such salary saving provision applies even in the cases of employees given temporary promotions with their agreement to return to their regular salary grades when the temporary work is completed. H.R. 12336 would except such temporary promotions from Public Law 85–737.

Transportation of 4-cent letter mail by air

H.R. 12595 (H. Rept. 1929) would prohibit the transportation by air of mail matter upon which the lawful domestic airmail postage is not paid. The prohibition would not apply to first-class 4-cent letter mail transmitted (1) between the 48 contiguous States (including the District of Columbia) and Alaska, Hawaii, the Canal Zone, the Commonwealth of Puerto Rico, or any territory, possession, or protectorate of the United States; (2) within or between any of such places which are outside the 48 contiguous States; and (3) military mail moving between ports of embarkation or debarkation in any of such places and any military post office outside of such places or such other places as the Secretary of Defense may prescribe. The bill would not alter existing statutory authority for air star routes where surface transportation is inadequate or for emergency mail service necessitated because of flood, fire, or other calamity.

Waiver of collections on certain raised money orders

H.R. 9507 (H. Rept. 1490) would authorize the Postmaster General to waive collection on raised money orders cashed by banks, business concerns, and individuals where (1) the overpayment resulted from alteration not apparent from visual inspection, and (2) payment was made in good faith and for value with no notice of any defect in the money order. The liability of the person altering any such money order would not be affected, nor would the Postmaster General's responsibility to pursue collection action against such person.

Penalty charges on short-paid mail

H.R. 9889 (H. Rept. 1491) would provide desirable flexibility in the regulation by the Postmaster General of mail on which required postage has not been paid. The Postmaster General would be authorized to establish a penalty charge for delivery of such mail whenever he finds it necessary to protect the postal revenue. This provision would replace the existing requirement for the assessment of a penalty charge, on any such mail, which is equal, as nearly as is practicable, to the approximate cost incurred by the postal service for delivery of the mail and collection of postage and other lawful charges thereon.

Adjustment of postal claims

H.R. 11531 (H. Rept. 1934) would (1) restore authority of the Postmaster General to handle "remission" cases involving funds sent by the postmasters directly to banks rather than through a designated depositary postmaster and (2) authorize the Postmaster General to relieve accountable postal employees from liability for losses resulting from certain illegal, improper, or incorrect payments. The authority for such relief now is vested in the General Accounting Office except in cases of loss by burglary, fire, or other unavoidable casualties which are considered by the Postmaster General. In each of the 717 cases sent to the General Accounting Office in the calendar year 1959, with relief recommended by the Postmaster General, the General Accounting Office granted the relief. The total amount involved was $200,774. This legislation would not affect the audit authority of the General Accounting Office, and any relief granted by the Postmaster General thereunder would be subject to review by the General Accounting Office. There would be no additional cost to the Government under this legislation, which is officially recommended by the Postmaster General.

BILLS REPORTED

Civil service retirement survivor benefits

H.R. 6743 (H. Rept. 1974) would grant certain former Federal employees who were separated before October 1, 1956, after having qualified for deferred annuity benefits, the right to elect reduced annuities and thereby provide survivorship benefits. Former employees similarly separated on or after October 1, 1956, now have such right.

Temporary postal salary increase of 1958 to be made permanent

H.R. 9890 (H. Rept. 1601) was reported, as a precautionary measure, to make certain that postal field service employees would not lose the 2½-percent temporary salary increase granted by Public Law 85–426, regardless of action on new salary increase legislation pending when the bill was reported. The purpose of H.R. 9890 later was effected by enactment of Public Law 86–568, which also granted an additional 7½-percent general salary increase for postal, classified, and many other groups of Federal employees.

Minimum pay raise for classified employees upon promotion

H.R. 543 (H. Rept. 1981) would provide a formula for guaranteeing a minimum salary increase for any classified employee who is promoted from one grade to another. The salary increase would be not less than the aggregate amount of two step increases of the grade from which promoted.

Mail powerboat service in Alaska

S. 1849 (H. Rept. 1921) would amend existing law which authorizes a subsidy to the low bidding carrier of mail, passengers, and freight operating on a prescribed intra-Alaska route so as to require that any steamboat or other powerboat used in performing such a contract for mail service shall be operated exclusively on the prescribed route.

SPECIAL ACTIVITIES OF THE COMMITTEE

Pay study

A special study, directed toward identifying problems with respect to Federal civilian salary policies, and developing solutions thereto, was conducted under the supervision of the committee chairman. The first step in this study was the preparation and publication, in a committee print dated December 8, 1959, of the Classification Act of 1949, as amended, and related provisions of law, with pertinent annotations. This publication provides for the first time, in a single document, a convenient and up-to-date means of authoritative reference to statutes governing the compensation of over 1 million Federal civilian employees.

Personnel management in transition to new administration

A committee print of September 12, 1960, entitled "Maintaining the Integrity of the Career Civil Service," sets forth Federal civil service laws, orders, regulations, and related information with respect to advance planning for an orderly transition from the present to the new administration in January 1961. It is essential, in fairness to career employees and to provide an efficient work force for a new administration, that personnel adjustments resulting from changes in policies, objectives, and programs under the new administration, be effected without impeding important programs and in accordance with sound principles of personnel management. The information contained in the committee print is designed to facilitate accomplishment of these objectives by providing guidelines for executives and reassurance to employees that the merit system will be protected.

Placement of separated career employees

In reponse to inquiry made by the chairman on behalf of the committee, assurances were received that all possible efforts would be made to find other suitable Federal positions for career employees who may be separated from the military departments because of current appropriation personnel ceilings. The Secretary of Defense has appointed a coordinator to work with the Civil Service Commission and the Interdepartmental Placement Committee for this purpose. Exchanges of correspondence relating to this program were released September 11, 1960.

Codification of Federal personnel laws

A review is being made of the official administration proposal (H.R. 8748) to enact into positive law the provisions of title 5, United States Code, and appropriate related provisions. This legislation was not enacted during the 86th Congress but is expected to be considered early in the 87th Congress by the House Committee on the Judiciary, which has invited comments and recommendations from the Post Office and Civil Service Committee.

SPECIAL SUBCOMMITTEE STUDIES AND INVESTIGATIONS

The Committee on Post Office and Civil Service, pursuant to authority contained in House Resolution 78, 86th Congress, established a new special Subcommittee on Census and Government Statistics, and reconstituted three other special subcommittees which were activated in earlier Congresses, to carry out the committee's responsibilities under this

resolution. A summary of the special subcommitee activities follows:

Postal Operations Subcommittee

This subcommittee devoted primary attention to the serious and growing problem of obscenity and pornography moving through the U.S. mails and other avenues of commerce. The subcommittee conducted an intensive program of study and investigation directed toward corrective measures and held a number of hearings and conferences throughout the country to obtain information and recommendations from recognized authorities at all governmental levels and in private life.

The subcommittee made excellent progress toward its chief objectives—that is, stronger laws and vigorous enforcement thereof and the inducement of full public awareness of the problem—which are essential to combat the growing menace of filthy writings, pictures, and the like in America.

Two major legislative measures developed through the subcommittee studies and enacted into law as Public Laws 86–673 and 86–676 will have a valuable deterrent effect on the filth merchants. The provisions of these laws are explained in the above summary of postal legislation approved by the committee.

Thousands of mothers, fathers, teachers, ministers, priests, and laymen have petitioned for intervention by the subcommittee and the Congress to stop unbridled dealing in obscenity and pornography. The subcommittee has established a strong program of cooperation with organized governmental, community, civic, fraternal, and religious groups all over the country toward this end. The subcommittee reports and recommendations have gained wide and enthusiastic support and are credited with triggering a very effective campaign to protect the public from this vicious commerce.

Civil Service Subcommittee

The 86th Congress marked the virtual completion of the program of this subcommittee, undertaken in the 84th Congress, to strengthen civilian personnel policies in the oversea activities of the Government. House Report 2109, 84th Congress, contains a broad range of major recommendations with respect to such oversea activities, based on the subcommittee investigations during that Congress. These recommendations deal with four primary areas wherein corrective measures were found desirable as a result of a number of hearings and conferences held by the subcommittee in eight foreign nations in which the majority of Americans employed abroad are assigned to duty.

The first such primary area of recommendation—that the competitive civil service be extended to American citizens employed abroad—was placed in effect by Executive action in the 84th Congress in accordance with the subcommittee recommendation.

The second, for the establishment of an effective and suitable compensation and employment system for teachers and other personnel in schools conducted by the Department of Defense for dependents of the Department's oversea personnel, was placed in effect by Public Law 86–91, discussed earlier. This act provides an up-to-date school system for these oversea teachers and other school personnel, along the lines of the District of Columbia primary and secondary school system, and is expected to greatly facilitate and improve oversea school activities while at the same time reducing personnel turnover and recruitment problems to a minimum.

The third—for clarification and coordination of the then widely varied policies with respect to allowances and differentials for the several categories of oversea civilian employees of the Government—is effected by Public Law 86–707, as noted earlier. This bill will improve the operation of critical defense and other oversea activities of the Government through the establishment of a coordinated and reasonably uniform system of compensating American citizens for extra expenses and for hardships and inconveniences incident to their oversea assignments.

The fourth primary area of recommendation, for the establishment of a badly needed medical and health program for American citizens employed by the Government abroad, is embodied in H.R. 5178 and several companion bills on which final hearings were completed during the 1st session of the 86th Congress. Since this bill, like the other committee recommendations, is approved by the administration, early action is expected in the 87th Congress to place the proposed medical and health program for oversea employees in effect so that these employees will have appropriate health services and facilities on a reasonably uniform basis.

The subcommittee report and recommendations were highly commended in a letter from the White House, in these words:

"I would like to say first that this was an excellent report, carefully prepared and reflecting a comprehensive review of the facts, both in the oversea hearings and in the staff research. I believe that the liaison between your office and both my White House office and the Civil Service Commission has been a fine example of cooperative effort between legislative and executive branches of Government in developing sound legislation in this field of personnel administration."

Census and Government Statistics Subcommittee

The Subcommittee on Census and Government Statistics, newly established early in the 86th Congress, has undertaken a broad continuing study of all Government activities pertaining to the collection of information from the public, the processing and use of such information, and the impact on the public. A brief description of specific projects follows:

Census

The subcommittee held hearings on April 8, 1959, and March 18, 1960, on plans for the 1960 census, covering both the statistical content of the census and personnel aspects. A report on the role of the census in the reapportionment of the House of Representatives is contained in House Report No. 2223, 86th Congress. Materials have been assembled and plans made for hearings on the question of holding future censuses of population and housing more frequently than decennially. Preparation for the hearings includes the collection of opinions and recommendations from the Governors of all States, the mayors of a representative list of cities, and various municipal leagues and other groups.

Electronic Data Processing

Hearings were held on June 5, 1959, and March 2 and 4, 1960, on the use of electronic data-processing equipment in the Government. The latter hearings concentrated on problems of employee job security occasioned by the introduction of automation in office procedures. A report on this study is contained in a committee print dated August 31, 1960, now on sale for 35 cents by the Superintendent of Documents at the Government Printing Office.

Reporting Requirements of the Government

A detailed report on "Business Reporting Requirements of the Federal Government" was issued as a committee print on December 6, 1959. The report includes recommendations for controlling and reducing reporting burdens on the public, some of which have already resulted in specific corrective actions by executive agencies. As part of this continuing study, the subcommittee investigations of particular problem areas have led to reductions or elimination of reporting burdens which would have cost the Government and the public millions of dollars. Special attention has been devoted to the reporting burden on small business.

Government Data Compilation Work

The subcommittee surveyed all executive departments and major independent agencies to ascertain personnel and payroll figures for data collection and compilation. The results are summarized in House Report No. 1357, 86th Congress, entitled "Data Compilation Activities of the Federal Government: Personnel and Contract Costs." Government costs for collecting and compiling data from the public are estimated as $79 million a year. The report shows the relative activities of the various departments and bureaus and serves as a benchmark for measuring future increases and decreases. As part of the study, information was obtained on each contract for statistical services let during the past 5 years by a Government agency to any outside organization. Details of many of these contracts, made public for the first time, have led to questions concerning the public need for the information and the desirability of Federal sponsorship.

Transportation Statistics

The subcommittee selected transportation statistics—one of the most poorly organized of the Federal statistical fields—for its first major study in a specific subject field. The study to date has included an intensive examination of the Interstate Commerce Commission, which has led to a number of improvements in the Commission's statistical work, and exploratory surveys of the Civil Aeronautics Board and other agencies. Plans have been drawn up for a series of hearings to be conducted early in the 87th Congress.

Manpower Utilization Subcommittee

The Subcommittee on Manpower Utilization made valuable further progress, during the 86th Congress, in the studies of manpower and related problems which it has conducted during earlier Congresses. The objective of these studies is to achieve maximum efficiency in the utilization of Federal civilian personnel and thereby strengthen the defense effort and other essential services, reduce costs to the taxpayers, and advance the Federal career civil service.

The subcommittee has continued to work in close cooperation with responsible executive and administrative officials in the conduct of this study program. Quarterly manpower utilization progress reports are received by the subcommittee from 24 departments and agencies, setting forth employment changes, reasons for the changes, plans and programs for better manpower utilization, and related civilian personnel matters. During the 86th Congress the subcommittee held 16 days of public hearings, in which representatives of 24 departments and agencies participated.

A summary of major specific projects of the subcommittee follows:

Manpower Utilization in the Missile Program

The subcommittee was one of the first legislative groups to initiate inquiries with respect to the use of scientists and engineers in the design, testing, and production of missiles. The Department of Defense has adopted, or is in the process of implementing, many subcommittee recommendations in this highly important management field. For example, the rotation time of engineers and scientists in the military services who are assigned to missile programs has been extended, duplication of effort in the naval missile program has been reduced, and the Department's policy on bonus payments to contractor personnel is being strengthened in several areas. The subcommittee's "Preliminary Report on the Aspects of the Mis-

sile Program in the Departments of the Navy and the Air Force" (committee print, April 1959) contains subcommittee findings up to that time. A second report is planned for the fall of 1960, with further findings based on a study made by the General Accounting Office at the request of the subcommittee.

Contracting Out Work Normally Performed by the Government

A number of public hearings and field investigations were conducted during the 86th Congress, supplementing and extending the scope of the manpower study program. The subcommittee report based on these hearings and investigations, printed as House Report No. 688, 86th Congress, points up a growing habit of responsible Government officials to contract out functions which have been successfully performed in the past by career Government employees within the Government itself. The subcommittee unanimously agrees that continuance of such a departure from the fundamental policy of holding Government officials responsible for the performance of their assigned duties well may lead to waste and extravagance and have a serious adverse effect on the morale of Federal career employees.

Conference With Departmental Management Officials

The subcommittee during February 1960 conferred with top management officials of the departments and major agencies of the Government as part of the cooperative program to develop and activate still better and more effective utilization of Federal civilian personnel. Valuable contributions were made in the form of suggestions, plans, and projects by representatives of several of the departments and agencies.

Functional Studies

The Secretary of Defense early in 1960 officially reported that a functional study of the financial management programs in the military departments, based on subcommittee recommendations, will result in payroll savings in excess of $25 million a year. Management officials in other departments and major agencies currently are engaged in functional analyses of one or more of their work areas, pursuant to agreement reached in the February conference, and expect to complete the analyses by the end of 1960. Preliminary reports of progress are most encouraging. Three of the departments report that savings aggregating over $14 million a year will be achieved as a result of their functional analyses.

Manpower Questionnaire

Working with representatives of the executive branch and the General Accounting Office, the subcommittee developed a new procedure, in the form of a manpower questionnaire, for determining employment trends and for evaluating manpower programs and policies at local field activities of Federal departments and agencies. The General Accounting Office has been asked to use the questionnaire in the course of its regular audit of activities. To date the questionnaire has been used in some 15 field activities (both military and civilian) to point up basic manpower information that previously has often been lost through editorial processes in the chain of command.

Hiring of Retired Military Personnel

The subcommittee has initiated a study of the hiring by departments and agencies of recently retired military personnel. Numerous instances of this practice have been brought to the attention of the subcommittee. Currently the study is aimed at determining both the magnitude of the practice and the administrative techniques used.

Costs of Recruiting Engineers and Scientists by Defense Contractors

The subcommittee during the 85th Congress became concerned at the heavy turnover of scientific and engineering talent in our defense effort and instituted a study of recruitment practices and the moneys spent by defense contractors to obtain these talents. As a result of the study, Department of Defense officials have indicated that tighter control is being exercised over this item of contractor cost. The subcommittee has made a followup study this year to determine the present situation and later in the fall will issue a report covering defense contractor personnel which will show reduced turnover but also will reveal several problem areas for the contractors in the recruitment and utilization of highly skilled personnel.

Wage Board Pay Procedures

The procedures used in the executive branch to set wage-board employee pay rates were studied by the subcommittee in 1960. Due to a low turnover of Government employees in most of the wage board jobs, review of the current procedures reveals areas requiring further study and possibly action by the subcommittee. There are indications that recommended payroll changes, affecting many thousands of Federal career workers, well may result from this study.

Report of Hon. Gerald R. Ford to Fifth District of Michigan

EXTENSION OF REMARKS

OF

HON. GERALD R. FORD, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. FORD. Mr. Speaker, under leave to extend my remarks, I include a report of my voting and attendance record during the 2d session of the 86th Congress.

The record includes all rollcall votes and all quorum calls. The description of bills is for the purpose of identification only; no attempt has been made to describe the bills completely or to elaborate upon the issues involved.

The purpose of this report is to collect in one place information which is scattered through thousands of pages of the CONGRESSIONAL RECORD. I want to be able to provide any interested constituent with a simple compilation of my voting and attendance record.

It will be noted that there were 206 rollcalls and my attendance record was 93.2 percent.

Voting record, Representative GERALD R. FORD, JR., Fifth District, Michigan

Number	Date	Measure, question, and result	Vote
1	Jan. 6	Call of the House	Present.
2	Feb. 2	H.R. 1217, amend the Tariff Act of 1930 to provide for the free importation of amorphous graphite, amended. (Passed 278 to 116)	Yes.
3	Feb. 2	H. Con. Res. 459, expressing sense of Congress that any variation in traditional interpretation of treaties between United States and the Republic of Panama shall be made only pursuant to treaty, amended. (Passed 380 to 121.)	Yes.
4	Feb. 2	H. Con. Res. 465, expressing the indignation of Congress at the recent desecrations of house of worship and other sacred sites, without amendment. (Passed 392 to 0.)	Yes.
5	Feb. 17	H.R. 3151, relating to withholding for purposes of income tax imposed by certain cities on the compensation of Federal employees. (Passed 221 to 160.)	Yes.
6	Feb. 25	H.R. 3610, override the President's veto of bill to increase grants for construction of sewage treatment works. (Defeated 249 to 157.) (⅔ required)	No.
7	Feb. 29	H.R. 10743: On Yates amendment to bill to restore $50,000,000 for slum clearance and urban renewal. (Defeated 158 to 187)	Yes
8	Mar. 1	Quorum call	Present.
9	Mar. 7	Quorum call	Present.
10	Mar. 7	Quorum call	Present.
11	Mar. 7	H. Res. 467: On motion to take up for consideration H.R. 10777 to authorize certain construction at military installations. (Passed 309 to 1)	Yes.
12	Mar. 8	Quorum call	Present.
13	Mar. 8	H. Res. 468: On previous question to adopt closed rule to provide for 3 hours of debate on H.R. 5, foreign investment tax bill. (Passed 236 to 127)	Yes.
14	Mar. 8	Quorum call	Present.
15	Mar. 8	Quorum call	Present.
16	Mar. 9	Quorum call	Present.
17	Mar. 9	H.R. 10809, fiscal 1961 authorization bill for the NASA. (Passed 398 to 10)	Yes.
18	Mar. 9	H.R. 10777, authorize certain construction at military installations. (Passed 407 to 4)	Yes.
19	Mar. 10	Quorum call	Absent.[1]
20	Mar. 10	H. Res. 359, open rule to provide for consideration of and 15 hours of debate on H.R. 8601 to enforce constitutional rights. (Passed 312 to 93)	Paired.[2]
21	Mar. 11	Quorum call	Present.
22	Mar. 11	Quorum call	Present.
23	Mar. 14	Quorum call	Present.
24	Mar. 15	Quorum call	Present.
25	Mar. 16	Quorum call	Present.
26	Mar. 17	Quorum call	Present.
27	Mar. 18	Quorum call	Present.
28	Mar. 21	Quorum call	Present.
29	Mar. 21	H.R. 7279: On motion to suspend rules and pass bill to authorize establishment of Hubbell Training Post National Historic Site in State of Arizona. (Defeated 171 to 208.)	No.
30	Mar. 22	Quorum call	Present.

See footnotes at end of table.

Voting record, Representative GERALD R. FORD, JR., Fifth District, Michigan—Continued

Number	Date	Measure, question, and result	Vote
31	Mar. 23	Quorum call	Present.
32	Mar. 23	H.R. 8601, amendment to civil rights bill providing for U.S. voting referees. (Passed 295 to 124)	Yes.
33	Mar. 24	Quorum call	Present.
34	Mar. 24	H.R. 8601, motion to recommit civil rights bill to committee in order to omit threatening communications from penalties dealing with obstruction of court orders. (Defeated 118 to 304.)	No.
35	Mar. 24	H.R. 8601: On final passage of the Civil Rights Act of 1959. (Passed 311 to 109)	Yes.
36	Mar. 28	Quorum call	Present.
37	Mar. 29	Quorum call	Present.
38	Mar. 29	H.R. 11390: On final passage of appropriation bill ($4,100,000,000) for Departments of Labor, and of Health, Education, and Welfare. (Passed 362 to 10)	Yes.
39	Mar. 30	Quorum call	Present.
40	Apr. 4	Quorum call	Present.

Newsletter by Hon. E. Y. Berry

EXTENSION OF REMARKS
OF

HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BERRY. Mr. Speaker, under leave to extend my remarks, I wish to insert in the CONGRESSIONAL RECORD my recent newsletter summarizing congressional action in the closing days of the 2d session of the 86th Congress:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 1960.

DEAR FRIEND: This Congress, which came here for the August session with flags flying and bands playing, is sneaking out of town. Its Democrat leadership, who will campaign for the highest office in the land on the slogan that we need leadership, has been unable to lead its own party. Crucial items in the President's program were thrown overboard. The announced program of the Democrat leaders for this session was abandoned. The Nation received a practical lesson on the inability of the majority party in Congress to work together.

On civil rights, Senator KENNEDY himself ran out on the Democrat platform and voted against consideration. On medical care, he lost his principal demand—that medical care for the aged be financed through the social security payroll tax. It was this defeat that led to his proposal to go to the people. In his frustration that followed, he announced, "Congress might as well pack up and go home." On minimum wage, the session came up with much less than young KENNEDY promised. On agriculture, he promised at Los Angeles immediate passage of a farm bill. Nothing was attempted; nothing accomplished.

The people were not led out of the wilderness. The program for the special session ended just about where it left off on July 3. Nothing was done which could not have been done the week prior to the conventions, and the hoped-for leadership of a politically lopsided Congress did not develop.

MEDICAL CARE

In spite of the Kennedy forces, the Senate adopted a medical care bill very similar to the one previously passed by the House, and one which leaves the handling of the program to the States, following its adoption by the States, and will be administered through the State welfare division.

The Central Government proponents wanted the medical care for the aged program linked with social security payroll taxes where it could be handled out of Washington. The objections to this approach are that it would be compulsory and limit benefits to only those already covered by social security.

Actually, the elderly in greatest need of health assistance are those without regular monthly incomes. Linking health to retirement benefits under social security would also add greatly to the cost of the program. The payroll tax for retirement, now 6 percent and costing $10 billion annually, is already scheduled to go to 9 percent by 1969, and employers and employees would be required to pay even more if health were added, giving the worker less and less control over his earnings.

If the Federal Government were to operate the compulsory medical care program, as proposed by Senator KENNEDY, rather than the States, it would mean Federal control of funds, including rates of compensation for hospitals, nursing homes, dentists, and physicians, with reports, audits, etc., to justify an additional army of Federal employees to administer. Again, responsibility would be shifted to Washington, curbing community incentive to build hospitals and handle health problems locally.

In the debate, Senator KENNEDY called the State program most unwise because as he said, "They will operate with all the different standards which are going to be set up in the different States, with some States participating and many not participating." It is difficult to understand just what is wrong with that. The people of South Dakota, acting through their locally elected legislators, may wish to set up standards which differ from those preferred by the people of Massachusetts and their delegation. If so, what is wrong with this? Why should the Federal Government seek to impose its standards, regardless of local wishes, local costs, and local facilities? Is it too old fashioned to believe that there are those other than politicians and Government employees who can operate and handle their own affairs and who can spend their own tax money?

MINIMUM WAGE

Eight votes in the House are all that saved almost every industry in the country from being covered by the minimum-wage law.

As the bill was reported to the House floor, the bill would have increased from $1 to $1.25 the minimum wage of all employees presently covered and would have extended coverage to restaurants, hotels, and nearly all retail and wholesale businesses.

By a vote of 211 to 203, the House adopted the Kitchin-Ayres substitute, which reduced the wage floor to $1.15 and limited coverage to approximately 1.4 million additional workers in retail chains with five or more stores in two or more States. I voted for this substitute.

The central government enthusiasts in the Senate raised the minimum to $1.25 and extended coverage to about 4 million workers now excluded. Covered under the Senate bill were businesses with gross annual sales of $1 million a year or more, even if they operate within one State, disregarding entirely the constitutional limits of Federal legislation of interstate commerce only.

Fortunately for the American public, the House conferees refused to budge from the position established by the eight-vote margin in the House. They refused to knuckle down to the labor bosses and insisted on the House version or none at all. As a result, the conferees were deadlocked and unable to agree on a compromise, with the measure dying in conference as the session ended.

Had it not been for the eight-vote victory of the Kitchin-Ayres amendment in the House, in all probability we would now have on the statute books a $1.25 minimum wage bill affecting almost every business in South Dakota and throughout the Nation, and preventing thousands of unskilled and untrained workers from securing employment.

This, too, will be a major campaign issue this fall. The voters who will decide how they want their vote cast in Congress (keeping in mind the small margin that decided the issue in this session) must consider these questions: Can the Federal Government, by enacting a law, set wage and hour levels without harm to the worker and the economy which supports him? Would the increase be justified if, as is estimated, a half-million people, mainly teenagers, elderly and relatively inefficient workers, would be forced out of work as employers tried to absorb the added cost? Can the Federal Government fairly set wage standards when income levels vary so greatly throughout the Nation? Would such an increase add to inflationary pressures so that pay increases would soon disappear because the worker would have to pay higher prices for goods and services?

MISCELLANEOUS

Because of fire danger in the Black Hills areas, and other public land areas of the West, where mining claims have been filed and annual assessment work is required to be completed prior to September 1, the Bureau of Land Management has granted a temporary deferment of annual assessment work. This is only a temporary deferment, however, and miners seeking such deferment should contact the Billings office without

delay. When deferment is granted, it should be filed in the office of the Register of Deeds of the county in which the mining claim is located to protect the claim. In these cases 2 years of assessment work must be completed prior to September 1, 1961.

The Atomic Energy Commission will probably accept a contract for the establishment of a lignite-uranium plant at Bowman, N. Dak., which would serve northwestern South Dakota and southwestern North Dakota. The contract would be with the International Resources Corp. but the city of Bowman will be constructing the plant. It will be operated by Susquehanna Western, who operate the Edgemont mill. There will be the large mill location in Bowman with two field roasting units preparing the ash for the central mill. AEC will probably approve the contract providing the people of Bowman fully understand the problems involved and are willing to take the necessary risks. Decisions should be firmed up before too long.

Schools in federally impacted areas which were "short changed" some $7.3 million in 1958–59 by congressional appropriation will be relieved of their warrant liability with an appropriation of that amount by this session. Schools with limited tax base, such as the Douglas School District at Ellsworth Air Force Base, were especially affected, but there are some 28 school systems in western South Dakota who will benefit by this delayed appropriation. This is an alarming example of what could well happen if the budget of every school district in the Nation were dependent upon the whims of Congress to appropriate for school construction and for teachers' salaries. Twenty-eight districts in western South Dakota have learned by bitter experience what Federal aid without Federal appropriations can actually mean.

With my kindest regards and best wishes, I am,

Sincerely yours,

E. Y. BERRY.

Report to My Constituents on the 86th Congress

EXTENSION OF REMARKS

OF

HON. FRANCES P. BOLTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. BOLTON. Mr. Speaker, another Congress—the 86th—is over. The second session adjourned sine die on September 1. It has been a strange Congress in many ways; largely because so much time passed without accomplishment. In the first session there were 23 Fridays when the House did not even meet. This session 3 whole months went by with practically nothing done. The Senate filibustered for weeks over doing anything for civil rights, and now boasts of the bill finally passed. We cannot filibuster that way under House rules, but we dillydallied along most of the winter. Of course the party in power—the Democrats had about a 2-to-1 majority—is always reluctant to put through the program of a President of the other party, especially in election year. This time the Senate held up appointments of judges and postmasters, as everyone in Ohio knows all too well. However, the 86th Congress has adjourned, and we can look at the record.

It was particularly unfortunate that in the first 3 months of this session so little legislation of importance was passed, as it gave an excuse to the majority leadership to recess for the conventions and then come back in August to complete the work. Along with my Republican colleagues I opposed the recess, believing that very little could be accomplished in such a postconvention session and that it was not in the best interests of the United States. Now that the Congress has finally adjourned, the public press and informed persons have pretty well agreed that little if anything real was accomplished, and that it was charged from the very beginning with political impulses. Most of the "musts" that were supposed to be so important to the country could have been passed before the recess if the majority party had had the will to do so. It certainly had the votes.

ACCOMPLISHMENTS AND FAILURES

This Congress failed to take action on many important matters recommended by President Eisenhower, such as: a moderate upward adjustment of the minimum wage; constructive measures to meet existing farm problems; Federal assistance in the construction of facilities for colleges, universities, and elementary and secondary schools; authorization of 40 new Federal judgeships to expedite the rendering of justice; liberalization of our immigration laws; and proper financing to avoid delays in our interstate highway program.

SOCIAL SECURITY

One of the few important post convention session bills passed was the social security amendments bill which authorizes a new program of Federal grants to the States for medical care for the aged. The plan finally adopted provides that the Federal Government will assume one-half of the cost of providing medical care to persons over 65 who have incomes under minimums to be established by the respective States. The program is voluntary on the part of the State with respect to the establishment of such a program, and it is further voluntary on the part of the individual as to whether or not he or she seeks to be covered. The language of the bill clearly states that the recipients under the program are to be in addition to those persons now receiving old-age assistance, not merely a substitute for it.

Present social security laws restrict to $1,200 the amount of money a person may earn without losing benefits, but do not affect the income he—or she—may receive from stocks or bonds. To me this is wholly unjust. I introduced H.R. 11029, a proposal to eliminate the earning limitation, hoping some action might result. The bill as passed sets up a rather complicated formula which amounts to an increased earning of approximately $150 a year without penalty. In addition, the bill removes the requirement that permanently disabled persons must be 50 years of age before they or their dependents can receive disability payments, and eliminates the 6-month waiting period in the case of recurrence of a disability.

This legislation does not go as far as some would like, and goes further than others think wise. But it will give the country an opportunity to look the program over and make the necessary changes.

HOUSING

Another necessary bill passed in the final days of the session was a modified housing bill which will keep three very important programs going. This legislation authorized an additional $500 million in Federal loans to build college dormitories; provided a 1-year extension of the Federal Housing Administration home improvement program; and authorized $50 million for new loans for the community facilities program, covering such things as city water plants and sewage systems.

NATIONAL ECONOMY

Once again it was necessary to extend for 1 year the present 52-percent corporate tax rate and certain excise taxes on beer, wine, cigarettes, automobiles, telephone, and telegraph. Many of us were hoping that it would be possible to repeal the excise tax on telephones, believing that a telephone should be classified as a necessity, rather than a luxury. However, the bill came to the House under a closed rule which made it impossible to vote on this specific issue.

GOVERNMENT WORKERS

Our Federal postal and classified workers were given a 7½-percent pay increase by this Congress. I voted for this pay raise. After studying the problem carefully, I was convinced that the loyal workers on the postal and Federal payroll had not been kept abreast of the cost-of-living increase, forcing many to hold second employment, with a consequent reduction in efficiency to the Government.

Retired Federal workers were also brought under coverage of the Health Benefits Act by the passage of appropriate legislation.

DISTRICT OF COLUMBIA

Another bill on which Congress completed action was a proposed constitutional amendment giving residents of the District of Columbia the right to vote for President and Vice President. I supported this resolution when it came before the House. Thus, after 160 years of being denied this basic right of suffrage, victory is near for residents of the District of Columbia as soon as 38 State legislatures ratify the proposal.

House Joint Resolution 502—now Public Law 86–484—which I sponsored, gives authorization to the National Council of Negro Women to erect a memorial to the late Mary McLeod Bethune in Lincoln Park in the District of Columbia. It is most fitting that in this centennial year honor should be paid this outstanding woman, born the daughter of a slave, who became the counselor of Presidents, and the founder of the Bethune-Cookman College.

VETERANS HOSPITAL

Culminating the efforts of many years, funds were voted this year to construct on property purchased by the Government for this specific purpose at least 12

years ago, a new 800-bed Veterans' Administration general medical and surgical hospital to replace the present disintegrating Crile Hospital. This has long been needed to provide adequate medical care for the more than 715,000 veterans who reside in Ohio's 38 northern counties which come under the jurisdiction of the Cleveland VA regional office. Architectural plans for the hospital are now being drawn and actual construction should get under way next year.

CLEVELAND HARBOR

Once again this year I joined my congressional colleagues and city and business interests from Cleveland in urgently requesting the House Appropriations Committee for funds for the further development of our Cleveland Harbor. The committee approved and the Congress voted an appropriation of $200,000 for design and engineering funds for the replacement of three bridges that are a hindrance to navigation.

NEW FEDERAL BUILDING FOR CLEVELAND

A new $47 million Federal building for Cleveland has reached the stage of having funds for site acquisition and planning approved by the Senate and House Committees on Public Works. Although no site has been agreed to, we are hopeful that the actual construction funds will be appropriated in the next session.

CIVIL RIGHTS

The passage of the Civil Rights Act of 1960 was a real achievement. To get this bill to the floor for action it was necessary to obtain 219 signatures on a discharge petition. Believing this was the only way to get consideration of this very important legislation, I was glad to sign the petition. When the bill reached the floor I supported every strengthening amendment and opposed those amendments which would have weakened the bill. As finally passed, the bill has five major provisions as follows: First, gives power to the courts to name special voting referees when it finds evidence that discrimination against Negroes exists—the referees, under court's jurisdiction, to take appropriate steps to insure that qualified Negroes are able to register and vote; second, provides schooling for children of servicemen whenever desegregation disputes lead to the closing of local schools; third, provides criminal penalties for interference with court desegregation orders; fourth, makes it possible for the Federal Bureau of Investigation to enter cases involving bombings of schools, churches, and synagogues. I had introduced a separate bill on this subject—H.R. 2242; fifth, provides that voting records must be preserved for 22 months for possible Federal inspection.

FOREIGN AFFAIRS—MUTUAL SECURITY BILL

In the area of foreign affairs, our committee sat for many weeks in consideration of the mutual security bill. The legislation which finally emerged from the House-Senate conference provided for an authorization of $4,036,300,000 for fiscal year 1961, a reduction of $88 million from the President's recommendations. In the final days of the session the Congress appropriated a total of $3,716,350,000 for the program—some $458 million less than the administration had requested. This was subsequently increased by a $65 million supplemental appropriation, passed at the urgent request of the President.

SPECIAL PROGRAM FOR TROPICAL AFRICA

One of the new sections added to the Mutual Security Act of 1960 provides a sum of $20 million for a special program for tropical Africa. This sum is planned for use in assisting emerging African countries with basic educational planning and program development. It will supplement teacher training activities carried on under the existing technical cooperation program, and identify us more closely with the aspirations of the African people. With the breakdown of order in the Congo and establishment of a United Nations military force, the Congress approved an additional $100 million of contingency funds for the President to take whatever constructive action that may be necessary.

LATIN AMERICAN DEVELOPMENT

At the request of the administration the Congress authorized a $500 million social development program in Latin America. Growing unrest under conditions of extreme poverty and mounting demands for improvement require immediate attention if violent overthrow of governments and institutions is to be avoided. Specific programs will be worked out in cooperation with each of the governments concerned, and funds channeled through such agencies as the Inter-American Development Bank. An additional $100 million was authorized for relief and rehabilitation expenditures to earthquake-stricken Chile.

NATO COMMISSION

In a move directed toward increased cooperation among the Atlantic nations, the Congress authorized the appointment of a 20-member U.S. NATO Commission. This Commission is expected to participate in a citizens conference of NATO countries, and will explore economic and political measures designed to develop further democratic freedom.

FOREIGN SERVICE AMENDMENTS ACT

As the United States has had to assume increasing responsibility across the world, it became more and more apparent that changes needed to be made in the legislation governing our Foreign Service. Months—over several years—of study by the Department, in conjunction with a subcommittee of the Committee on Foreign Affairs, on which I serve, gave us S. 2633. Briefly, a reduction was effected in the number of staff personnel classes, and retirement benefits extended to include specialists in the Foreign Service retirement system. These amendments were adopted unanimously, providing some limited recognition of the very fine job that our dedicated Foreign Service officers and staff are doing all over the world.

CONCLUSION

This is little more than an outline of the work of the 86th Congress. Difficult as the situation is, as in the past, it has been a privilege to serve the 22d Ohio District in the many areas of national life that grow increasingly important to each individual American.

Fourth Annual Report to the People of the 18th District of Michigan

EXTENSION OF REMARKS

OF

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BROOMFIELD. Mr. Speaker, despite the deadlocks, the disappointments and the bitterness which prevailed during the short session of Congress following the political conventions, there were some solid accomplishments made by the House of Representatives and the Senate during the 2 years of the 86th Congress which has now concluded.

In this, my fourth annual report to the people of the 18th District, I would like to outline some of the successes, and the failures.

Certainly, all of us have learned a lesson in the folly of calling Congress back to work following the political conventions during a presidential election year. A great deal of heat was demonstrated by members of both political parties during the short session, but light on the important subjects under discussion failed to shine through the haze of political fog.

NO COMPROMISE

We have found that there is no room for compromise in the heat of a partisan campaign, that issues are drawn and lines of verbal battle so firmly set that logic and cool thinking simply cannot exist under such conditions.

Rather than constructive legislation on issues such as minimum wage, aid to education, housing, agriculture, the American people got nothing.

The upstaging, the playing to the galleries, the passionate pleas which took place in the Senate during this short session are better suited to the theater than to the Senate, which takes pride in calling itself the greatest deliberative body on earth.

Despite the charges and denials, the verbal fencing and the thundering prose which erupted in both Houses of Congress during the short session of Congress, there were some accomplishments. They were difficult to discover, to be sure, but they were there.

These were:

Adoption by both Houses of a modified plan of Federal financial aid to States to provide medical and hospital insurance for our senior citizens. Neither political party was satisfied with the results of this bill, but the act approved by Congress and now Federal law, lays the groundwork for more effective programs in the future.

BASED UPON FREEDOM

The plan adopted by Congress is based upon need rather than compulsion, upon covering as many of our senior citizens who need help as possible, rather than limiting such aid to those covered by social security. Its benefits can accrue to the 4 million who are over 65 but who never were eligible to receive the same benefits as those who held steady jobs prior to retirement.

In addition, administration of this new program of aid to the aged will be partially a State responsibility. I am happy to note that the Michigan Legislature soon will reconvene to consider establishment of a State program of aid under the new Federal law.

Such rapid action by States undoubtedly will mean that a great many of our senior citizens who will be faced with large hospital and medical bills in the near future will be aided by their States and the Federal Government in meeting high medical costs.

Congress also approved a number of changes in our Nation's social security system in the closing days of the short session. These changes were mostly technical in nature, although there are one or two which will prove of definite advantage to many of our senior citizens.

RAISE EARNINGS LIMIT

The first is a change in the retirement test which in effect raises the present $1,200 limit on outside earnings to about $1,500 under a complicated formula. For the past 3 years, I have introduced legislation to raise the limit to $3,000, as I was convinced that the $1,200 limit was totally unrealistic in view of today's living costs. A great many retired persons eligible for social security were suffering financial loss because of this provision. I will continue to seek drastic upward revision of this retirement test as a means of helping those who want to contribute part-time work past the retirement age.

Benefits payable to the children of deceased workers also were increased to include about 400,000 children, while disability insurance provisions were made more comprehensive. Maternal and child welfare funds were increased and unemployment compensation funds were raised.

At President Eisenhower's request, the House and Senate approved a $500 million authorization to provide more funds for Latin American nations to aid them in economic development. Another $100 million was authorized to help the victims of the Chilean earthquake to pick up their lives where they left off after the devastation which destroyed so much of that nation.

In addition, the Congress restored some $65 million of the $215 million it had previously cut from the mutual security program. This raised our total appropriation in economic and military aid to our allies abroad to $3,700 million for the current fiscal year.

PROGRAM COMPLETE

This increase in funds also heralds a change in emphasis in our mutual security program. Following the end of World War II, much of our self-help funds went to those nations which experienced the almost complete devastation of total war. Out of necessity, most of our mutual assistance went to help Europe get back on its feet.

Now, this part of our program has been completed, and our friends in Europe are enjoying economic prosperity as never before. Recovery has been complete, and the standard of living has risen far above that before the Second World War. Resistance to communism in Europe has stiffened to a point where we are stronger militarily, economically and politically than at any point in previous history. The nations of Europe are working together toward a common goal for the first time.

Because of this prosperity in Europe, we now can look forward to a greater participation by the United States in helping other areas of the world, areas such as Latin America and Africa, where in many cases economic progress has lagged far behind that of other areas of the Western World.

There is one sure answer to communism, and that is a high standard of living. We will continue to do what we can to see that this valuable weapon is used to the utmost to stop the spread of communism.

Almost lost in the political debates being waged on the floors of the House and the Senate was another important step forward. That was the ratification of a treaty banning the use of nuclear weapons in Antarctica and demilitarization of this area. This is the first major treaty signed between the free world and the Iron Curtain countries to demilitarize any large area of the earth.

IMPORTANT STEP

This treaty might well prove to be an important step in our goal toward world peace and a model upon which our future hopes for an end to the nuclear arms race can be realized.

One of the most important products considered by Congress during the last year was sugar. Besides its function as a coffee sweetener and its use on breakfast cereal, this product played a large part in our troubles with Cuba and the Dominican Republic.

Like many others in our Nation, I had hoped that Fidel Castro would have turned out to be a force for good in the Western Hemisphere. His overthrow of the dreaded Batista regime, his pronouncements of providing a better life for the people of Cuba certainly seemed to indicate that there was hope that a greater share of Cuba's wealth would get into the hands of its citizens.

Instead, Castro turned Cuba into another dictatorship. He turned his back on the friends of his people in the United States and started a campaign of vilification and hatred against our Government.

He turned more and more toward Russia and Red China and praised the Communists at every opportunity. He took away the basic freedoms of the people of Cuba until his nation has been turned into an armed camp, a military dictatorship twice as evil as the one which preceded it.

CUT SUGAR QUOTA

Early this year I introduced a bill—referred to the House Agriculture Committee—to cut off Cuba's sugar quota. For a number of years our Nation had been paying a top price for sugar, even when the world market sagged. Castro made the statement that Cuba was the economic slave of the United States. Since Castro resented taking our money in the form of sugar subsidies, I thought we ought to oblige him.

A few days after introduction of my bill to cut off Cuban sugar subsidies, President Eisenhower made a request to Congress to give him the same power.

However, it was months before Congress was permitted to take action on this emergency measure, simply because of opposition by the chairman of the House Agriculture Committee and some of his friends. Because of this hesitation on the part of the committee, millions of American dollars poured into Cuba which would not otherwise have been available to Castro.

Again, President Eisenhower asked for the power to cut off the sugar quota of the Dominican Republic after the Organization of American States censured the government of Dictator Trujillo for its highhanded tactics.

NO ACTION

But again Congress balked, and no action was taken on this important matter despite the repeated urging of the President.

It is still possible that President Eisenhower will call Congress back into special session to deal with this important matter of backing up the Organization of American States, one of the great bulwarks of freedom in the Western Hemisphere.

Some of the failures of this session of Congress were total, and the list is unfortunately long.

Federal aid to education was hopelessly stalemated on the question of whether Federal funds should be used to help pay teacher salaries. Both political parties agreed that Federal help was necessary for school construction in those areas in which the tax base was not adequate to provide decent facilities.

But rather than compromise on a bill which would provide relief for those school districts most in need of funds, any hope for Federal school aid was delayed for another year. So schoolchildren will suffer from inadequate facilities in some school districts simply so that a political issue could be made.

The same condition existed in raising the minimum wage. The House-approved bill would have raised the minimum wage to $1.15 an hour in 1 year. The Senate version would have raised the minimum wage to $1.25 an hour over a 3-year period. No compromise was attempted and another political issue was created, much to the despair of those workers who would have received higher wages now, rather than having to wait for another year.

The farm program also stalled in its tracks. After years of wrangling with Congress in an effort to win approval of a sensible program, President Eisenhower finally told Congress that he would approve any farm program passed as long as it came under certain broad guidelines.

ATTEMPTS BLOCKED

Instead of action, Congress simply sat on its hands. All attempts to pass effective farm legislation were blocked. The present program, which all admitted was a failure and a waste of billions of Federal dollars annually, was permitted to continue. Meanwhile, our farmers find their hands tied by the mounting

bureaucracy that Congress has ordered to regulate their every action. Consumers are penalized by paying more than they should for food and clothing and taxpayers are saddled with the stupendous expense of more than $7 billion annually to keep in existence a program which nobody—not even the Secretary of Agriculture—wants.

Because some Members of Congress would settle for nothing less than their own particular fancies, still another problem was permitted to go over another year. That is the problem of providing help for areas which suffer from chronic economic depression. The President often recommended the passage of such legislation, but Congress refused to give him what he asked for.

AREAS SUFFER

As a consequence, those areas of our Nation which suffer from chronic unemployment are only able to find what help is available to the President under previous authorizations by Congress by Executive order. This help has been considerable, but it is not enough to meet this problem.

Even in taking care of this traditional "perennial," Congress experienced a great deal of difficulty. A stopgap housing bill was passed at the last moment to continue certain existing programs and to authorize funds for such purposes as community facilities and college housing, but that was all. The sound approach to our housing problems sought by the President were simply ignored in the rush home to campaign.

In all, President Eisenhower proposed that 21 bills be passed during the short session of Congress. Only four of them were passed into law. The rest were ignored.

Prior to the conventions, Congress found itself at loggerheads over one of the most stirring issues facing our Nation, that of civil rights. Finally, after a prolonged 2-month Senate filibuster, the first effective civil rights bill guaranteeing the right to vote to all of our citizens was enacted by Congress and signed into law by the President.

EFFECTIVE LAW

This new civil rights law will be an effective tool in seeing to it that none of our citizens are treated as second class, that the Bill of Rights in our Constitution means what it says.

Because of judicious use of his veto power and the responsible actions by Congressmen from both political parties, the fight against inflation has been all but won.

During the current fiscal year which ended last June 30, our Federal Government turned up a surplus of better than $1 billion and there is hope of even a greater surplus when the next fiscal year ends.

Our national debt is still at the staggering total of $288 billion, but at least we are moving in the right direction, toward sound fiscal responsibility rather than through further deficit spending.

STILL STRONG

We have accomplished this goal without any reduction in our military power. In fact, our potential to resist attack has been increased considerably in the past year through new weapons, new developments, and closer cooperation with our allies throughout the world.

Last year, Congress took action on a number of important subjects which were effective and far-reaching.

Passage of the Landrum-Griffin bill has turned the crooks, the blackmailers, the extortionists out of office in many of our labor unions. Labor union members now have the Federal Government behind them in winning the right to speak, to vote and to nominate candidates for office in their locals. One year's operation of this new law has demonstrated repeatedly the wisdom of its provisions and has led to better unions, more honest unions and a virtual end to corruption and misuse of union funds by high-handed officials.

DISCLOSE FUNDS

The 86th Congress also approved a bill which I cosponsored to aid in the fight against the distribution of obscene literature through the mails. Postmaster General Summerfield has said that this bill has been one of the most effective weapons in the hands of postal inspectors in bringing these dealers in filth to justice, and I was happy to have played a part in seeing that effective legislation to curb the distribution of this obscene literature to our children, became law.

Also, a bill similar to one I introduced which requires full disclosure by Congressmen of Federal and counterpart funds spent on trips was enacted into law. This bill, along with orders issued by the House Administration Committee, should result in further savings to our taxpayers and the assurance that trips taken by Congressmen are in the public interest and are not simply pleasure jaunts.

In addition, I sponsored a number of other bills including those to place the full faith and credit of the Federal Government behind municipal water and sewer bonds, provide health insurance coverage for retired Federal employees, permit self-employed persons to participate in retirement plans, allow teachers to deduct continuing education expenses for tax purposes, establish a Capitol page residence and provide for selection of pages on a competitive basis.

It was my pleasure to back home rule for the District of Columbia. With the acceptance of Hawaii as our 50th State, the District of Columbia became the last area in our Nation without the right to vote and to select its own governing officials. Important steps toward providing full home rule for the District were made during the past session of Congress, but further steps should be taken as rapidly as possible.

HIGHWAY FUNDS

As a member of the House Committee on Public Works, I had a hand in seeing to it that our Federal Interstate Highway program proceeded on a pay-as-you-go basis and that funds were used for new highway construction rather than reimbursing States for existing toll roads. I also continued the fight against "pork barrel" projects designed to deliver votes rather than benefit the general public of our Nation, battled efforts to expand the scope of tax-free public power projects in competition with private power and urged that Federal projects make payments in lieu of taxes to local communities to make up for loss of local revenue.

During the past years, I have used two methods of finding out the views of those I represent. The first is a questionnaire which I send to a number of my constituents selected on the basis of voting area and in an effort to obtain a fair sampling of their views.

The second is a program of visiting as many communities in my mobile congressional office as possible during the recess period so that I can discuss the operation of the Federal Government face to face with those I represent.

Both of these programs have been enthusiastically received by my constituents, and I feel that they have made me a more effective Representative of the citizens of Oakland County in Washington.

AIDED MANY

The tendency has been for our Federal Government to become increasingly remote from those it is supposed to represent because of the rapid growth of our Nation and our increasing concentration in problems of the world as well as those at home.

These programs have helped to bring Washington a little closer to Oakland County and I feel that they have aided many in fighting their way through the entangling redtape which sometimes gets in the way of effective action at the Federal level.

May I urge my constituents to feel free to call on me when I visit their community in my house trailer turned office.

In addition, I would urge them to write or call me at my regular district office at 2300 North Woodward, Royal Oak, Mich., while Congress is in recess or in room 1422, New House Office Building, Washington, D.C., while Congress is at work.

While Congress is in session, I feel that it is my duty to remain in Washington to vote on the many issues which come before the House.

Quie Questionnaire Report and Highlights of the Work of Congress

EXTENSION OF REMARKS

OF

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. QUIE. Mr. Speaker, in every year in which I have had the privilege of representing the people of the First Congressional District of Minnesota in the Congress, I have asked their views on some of the major issues confronting our country.

I have done this by means of the Public Opinion Questionnaire.

Since the inception of the questionnaire, the response has been very encouraging. The many people who have praised the questionnaire seem to re-

gard it as a service with a twofold benefit.

First, the Public Opinion Questionnaire provides them with the opportunity to express easily, in as brief a time as possible, their thinking on a wide range of issues.

Second, the Public Opinion Questionnaire encourages them to take increased notice of the work of the Congress and its task of shaping legislation to affect all Americans.

Early in 1960, I prepared and ordered for printing at my personal expense the third annual edition of the questionnaire. This is an expanded and more comprehensive survey. It presents a variety of questions—mostly major considerations—which reflect, for the most part, the choices to be made in our national life. This year the questions deal with not only proposed legislation, but with broad areas of policy. Included is the question as to the type of diplomacy to be employed to meet the challenge of the cold war. One question pertains to a concept of national defense and military strength. Another outlines possible economic policies for the future.

But for the most part, the questions pertain to legislative programs and proposals.

One significant addition was made this year. Nineteen hundred and sixty is a presidential year and the contest for our highest office must necessarily enter into many considerations. For that reason, I listed the candidates who, by March 1960, had been mentioned for the Presidency. The listing of names, in alphabetical order, included representatives from the two major parties.

In an effort to reach the homes of all First District residents, I mailed 100,000 questionnaires throughout the 12-county area. In some cases new residents may have failed to receive the survey. But I do feel that the canvass was as thorough as is possible.

The response to the questionnaire was very heartening. Experts in the field of direct mail and public opinion surveying list a 10 percent return as a desirable figure. This questionnaire attained an 11-percent return. I am grateful to all those who participated.

The questionnaire follows:

Questionnaire

Do you believe—	Percent		
	Yes	No	No answer
1. Personal meetings between the President or Vice President and Soviet leaders have eased the cold war?	75.5	22.2	2.3
2. That since agricultural production is greater than consumption, production should be reduced by soil banking whole farms?	30.2	62.5	7.3
3. The Federal minimum hourly wage, now at $1 per hour, should be raised and coverage extended?	39.9	56.8	3.3
4. The present $1,200 ceiling on outside earnings for social security recipients should be raised?	60.0	38.4	1.6
5. Congress should pass legislation giving the President the right to veto specific items in appropriation bills? (As it stands now, he has to either veto or accept an entire appropriation measure.)	85.4	13.0	1.6
6. Congress should raise all postal rates in an effort to balance the Post Office Department's income with outgo?	55.3	41.5	3.2
7. Congress should enact legislation allowing parents to deduct from their income tax tuition paid on behalf of their children to institutions of higher learning?	71.0	26.5	2.5
8. Congress should enact a national fair trade law?	45.9	42.6	11.5
9. Congress should pass a GI educational benefits program for peacetime veterans?	29.8	65.3	4.9
10. President Eisenhower is correct in his claim that our present and contemplated military program will adequately provide for our security?	69.6	18.0	12.4

	Percent
11. What economic policy do you favor for the United States during the next year?	
(a) Live within our means and apply surplus funds to national debt	74.2
(b) Balance the budget and use any surplus for expanded Federal programs	16.4
(c) Adopt a "we can afford anything we want" policy and spend accordingly	1.4
No answer	8.0
12. If Congress decides to deal with the problem of industrywide strikes, what course should it take?	
(a) Compulsory arbitration	24.0
(b) Restrict bargaining to individual companies rather than encourage industrywide bargaining	28.2
(c) Set up Federal factfinding boards with power to make recommendations	24.8
No answer	23.0

THE PRESIDENCY

The following men have been prominently mentioned as presidential candidates for both major political parties. Whom would you favor as the next President of the United States? They are listed here in alphabetical order.

Hubert Humphrey	8.1
Lyndon Johnson	1.9
John Kennedy	6.5
Richard Nixon	53.7
Nelson Rockefeller	11.7
Adlai Stevenson	2.8
Stuart Symington	2.1
No answer	13.2

NATIONAL FLORAL EMBLEM

The following have been suggested, in resolutions introduced in Congress, for our national floral emblem. Which of the following plants listed in alphabetical order would you favor?

Corn tassel	14.2
Daffodil	3.0
Daisy	4.9
Marigold	3.4
Mountain laurel	2.8
Rose	45.4
Wreath	8.8
No answer	17.5

HIGHLIGHTS OF THE 86TH CONGRESS, 2D SESSION

Mr. Speaker, along with the First District questionnaire tabulation, I believe it is appropriate to present a summary of the work of the 86th Congress, 2d session.

Such a report must begin with a study of the leadership of the Congress, because of the importance to fix major responsibility for action or inaction.

Under our system of legislative process, the credentials of leadership are given to the majority group. This is a sound concept because with strength derived from the electorate should go authority for action. Such credentials include the major posts of power—including the position of House Speaker here, and the role of majority leader in the other body—as well as the committee chairmanships and the right to numerical superiority on the standing committees of the Congress.

With the authority of the majority comes responsibility—and for that reason it is understood that the majority group has the greatest responsibility for the record written by the Congress. This does not mean that the minority can shrug off its obligations. Far from it. The minority and, in fact, every individual Member of Congress has the duty to strive for accomplishment.

But, the fact remains that, for the most part, credit or blame lies with the majority.

In this Congress, Democratic Members were in the great majority. The session began with a roster of 281 Democrats and 153 Republicans, plus 3 vacancies in the House—and with 65 Democrats and 35 Republicans in the other body.

Such heavy numerical strength intensified the responsibility of the majority for the record compiled by the Congress.

The report that follows specifies action taken in broad areas of legislation, arranged for convenience in alphabetical classifications. As such, this report is a highlight summary—not a minute examination of all legislation considered by Congress.

AGRICULTURE

Congress failed to enact major legislation to bolster farm income and to cope with the threat to the economy posed by the price-depressing surplus. Instead, in the closing hours of the session it enacted a bill which, while providing a measure of short-term benefit, does not even attempt to reach a long-range solution.

The bill raised support levels for manufactured milk and butterfat to a figure just under the average price received in the market this past year The legislation extends only until next March 31, 1961.

Although a hearing was held by a subcommittee of the House Interstate and Foreign Commerce Committee on legislation which would insure the free flow of milk from Minnesota to other States, no action resulted.

Two other important bills were allowed to die. The House-passed farm credit bill which would have streamlined the credit facilities of the Farmers Home Administration was never acted upon by the Senate Agriculture Committee. Agricultural research bills were passed by both House and Senate, but differences between the 2 versions were not worked out by the conferees.

On June 23, the House rejected—by a vote of 236 to 171—the Poage bill, which contained a wheat section similar to that included in a bill vetoed in 1959, as well as a program for feed grains. As seen by many, the great weakness of the bill was its intent to glean votes on election day rather than to serve as a program to solve the basic problem facing agriculture. In its original form it insisted on higher price supports for wheat coupled with inadequate measures to control production.

During debate on the measure, I pointed out that sound legislation to assist farmers who raise grains and oilseeds should set as its objective the elimination of the price-depressant influence of Government-stored grains. I stated that total production must be reduced by the implementation of an effective program, rather than reliance on old patchwork methods of the past by which one crop would be substituted for another.

Then I proposed a series of amendments designed to improve the Poage bill—measures which, if adopted, would have greatly increased the legislation's possibilities of passage. But when the final vote came, the Poage bill had itself become a legislative patchwork quilt and the measure was defeated.

With the defeat of this bill, the disappointing prospect of no legislation at all spurred many Midwest Members to urge passage of a sound measure representing a serious attempt to benefit farmers.

Earlier in the session, I had introduced legislation outlining a payment-in-kind program which would give farmers the opportunity to idle their wheat, corn, and other feed grain acreage in return for surplus commodities from Government stocks. The twin objectives would be, of course, to bolster farm income and reduce the surplus.

I introduced also another measure which, when linked with payment-in-kind, would spell immediate help for farmers, that is, prohibit the sale of Government stored commodities on the domestic market at less than 105 percent of full parity. I pointed out that if this step were taken, the result would be an immediate jump in the price of corn by 20 cents per bushel.

Adoption of some such program in the "bobtail" session seemed reasonable to expect. The leadership of Congress had explained how necessary it was to come back to Washington in order to pass top-priority legislation. Certainly an effective farm program should be regarded as the No. 1 priority on the agenda of domestic business.

The two-part program was reintroduced and quickly accepted by a group of Midwest Members. The measure began to attract considerable support on both sides of the aisle. In hearings before the House Committee on Agriculture, a representative of the administration—Assistant Secretary of Agriculture Marvin McLain—stated the administration's approval of the bill, along with firm support for a payment-in-kind program advocated by the distinguished chairman of the committee.

Prospects were brightening when the leadership decided that there was not enough time remaining in the session for consideration of the measure.

No time for agriculture? No time for consideration of a sorely needed farm bill this year?

At any rate, progress halted and the legislation died.

One step taken by Congress—affecting agriculture and our policy regarding other nations—was the extension of the Sugar Act through next March 31, 1961. The extension gave the President the authority to reduce the Cuban sugar quota as he sees fit during that period. The President took this step shortly after the extension was granted.

In the waning hours before adjournment, the Congress debated legislation to grant the President conditional authority to not give the Dominican Republic an additional sugar quota. However, the leadership could not resolve disagreements between the two Houses. As a result, Congress abandoned action and adjourned without granting the President the authority he requested to block windfall sugar shipments from a nation whose diplomatic relations with the United States had been severed through action taken in the Organization of American States.

CIVIL RIGHTS

Legislation designed to protect the voting rights of all Americans—and to further the goal of equal protection and full rights under the law—was enacted during the 2d session of the 86th Congress. Passage came 3 years after approval of the historic Civil Rights Act of 1957 which served as a beacon for subsequent action.

The last step in approval of the 1960 measure came on April 21 when the House, by a 288 to 95 rollcall vote, agreed to amendments.

The Civil Rights Act of 1960 serves as a guarantee of voting rights—and as a protection against hate bombings.

On voting rights, the bill provides that records and registration papers in all Federal elections, including primaries, must be preserved for at least 22 months and must be turned over to the Attorney General on written request. The legislation states that on winning a civil suit brought under the 1957 act, the Attorney General can ask for a court proceeding to determine if a pattern of Negro disenfranchisement exists. Were such a pattern found to exist, any Negro in the area under survey could apply for a court order to declare himself qualified to vote consistent with State law, if it were proved that he had not been allowed to register. The court order could be reinforced by possible contempt proceedings.

To assist a court in making such a determination, voting referees can be appointed to receive applications, take evidence and report their findings to the court. If a referee's report is not challenged by State officials within 10 days, the court would issue certificates stating that the citizen in question is a qualified voter. In the event of challenge, the legislation outlines additional procedure.

On bombings, the act specifies that flight across State lines to avoid prosecution or punishment—or to avoid giving evidence—amounts to a Federal crime punishable by a fine of $5,000 or imprisonment up to 5 years, or both.

In addition, the act stipulates that when schools attended by children of Armed Forces personnel would close to avoid integration—and the U.S. Commissioner of Education would decide that no other agency could provide for their schooling—arrangements for their education could be provided.

Additional strengthening measures requested by the President in the post-recess session were rejected with the explanation that the limitation of time prevented the consideration of civil rights.

CORPORATE AND EXCISE TAXES

Congress voted to extend for another year the corporate income tax of 52 percent as well as the excise rates on distilled spirits, beer, wine, cigarettes, passenger cars, and car accessories. Also continued were the 10-percent taxes on passenger transportation and local telephone service. A temporary increase of $8 billion in the national debt limit for fiscal 1961 was provided for bringing it up to $293 billion.

DEPRESSED AREAS

Because he believed that the Area Redevelopment Act did not provide an adequate long-range solution to the problem of unemployment in some economically depressed areas, and that the legislation evidenced fiscal irresponsibility, President Eisenhower vetoed the bill. The veto was upheld. The program had provided for $251 million worth of Federal aid. This authorization was in contrast to the administration's proposal for a $53 million outlay.

EDUCATION

Majority leadership in Congress failed to win necessary support from the House Rules Committee, foreclosing the possibility of passage of a new program of Federal aid to education.

Passed by the House on May 26 was a bill which authorized $1.3 billion in Federal grants over 4 years to assist States in classroom construction. A bill passed by the other legislative wing authorized $928 million a year for 2 years in grants to the States for school construction, teachers salaries, or both. Refusal of the Rules Committee prevented a conference reconciling the two measures.

FEDERAL PAY RAISE

The House, on July 1, voted to override the President's veto of a pay raise bill which authorized an across-the-board 8.8 percent and 7.5 percent increase for 1.6 million Federal classified and postal workers.

In his veto message, Mr. Eisenhower said he favored a salary increase to match the rise in the cost of living. He said the bill was inequitable—favoring those Federal workers who were already receiving adequate pay, and granting proportionately less to the employees who stood in greatest need of an increase.

HOUSING

Despite the fact that a comprehensive omnibus housing bill was included in the must legislation list approved by leaders of the majority in Congress, all that could be provided was a measure described as a stopgap bill to continue the program until January.

Earlier, a bill had been approved by the House Banking and Currency Committee which resembled legislation adopted by the other body. However, the House Rules Committee refused to grant the $1.4 billion House bill a rule, and thus consideration on the floor was forestalled.

Shortly before adjournment, a bill was enacted which amounted to half the outlay originally forecast for housing by the leadership. Under the provisions of the bill, the FHA home improvement loan program was extended and allocations were made of $500 million for college dormitory construction and $50 million for community facilities construction.

INTERNATIONAL POLICY

Ratification by the other body of a formal treaty has been seen as one of the major steps taken during the post-recess session. The treaty, signed by 12 nations, pledges that it "is in the interest of all mankind that Antarctica shall continue forever to be used exclusively for peaceful purposes."

Associated in the agreement are the United States, the Soviet Union, Great Britain, France, Belgium, Norway, Japan, Australia, New Zealand, South Africa, Argentina, and Chile. The dozen nations are agreed to observe common ground rules—banning nuclear explosions and military utilization of Antarctica—with all countries having the right of unlimited inspection—waiving territorial claims for the next 34 years and banding together for research pools.

In the last hours of the session, the Congress endorsed another measure which, while not a treaty, had international implications. Approved was a $600 million authorization for Latin American aid—a program requested by the President. No appropriation was made as the measure was designed to serve mainly as a declaration of future intention, to be used to reinforce U.S. participation in talks at the inter-American economic conference at Bogotá, Columbia.

Earlier in the session, Congress had authorized U.S. membership in the International Development Association. The request again had been made by the President. The IDA was established as a lending agency to provide long-term, low interest assistance to underdeveloped areas of the world. Contribution to the fund will be made by the many financially able nations of the world.

MEDICAL CARE FOR THE AGED

Failure crowned efforts of some to enact a wide-sweeping medical care for the aged bill—although legislation was written which substantially enlarges the scope of Federal aid to States to enable them to assist in payment of medical bills of needy aged.

Rejected in two separate votes by the House Ways and Means Committee was the Forand bill which would have imposed compulsory health insurance coverage by means of the social security system. Instead, the committee introduced and won House approval for an omnibus social security bill with increase provisions and a moderate, State-option medical assistance program.

In the Senate, an unsuccessful attempt was made to pass legislation similar to the provisions of the Forand bill—but the measure failed 51 to 44. The administration's medicare program also failed.

Congress thus ended up adopting instead a program based mainly on the House-passed bill, the salient features of which include:

A program of matching funds to the States to participate in medical care for the aged, which will benefit an estimated 12,400,000 individuals. The Federal share will be 50 to 80 percent of the total cost—running about one-half billion dollars.

A worker covered by social security who becomes permanently disabled will be able to start collecting the benefits for himself and his dependents regardless of his age. In the past, disability benefits have been limited to those 50 years or older.

Increased authorization for child welfare services to $25 million.

No compulsory coverage for self-employed doctors—but clearance for additional ministers to obtain coverage.

Increase in the amount of yearly earnings a beneficiary can have and still receive all the benefits. For each $2 earned over $1,200 (the present limit), $1 will be deducted from the benefit. Above $1,500, the beneficiary will lose $1 of benefit for every dollar earned.

MINIMUM WAGE

In what was regarded by observers as one of the most serious defects of the session, the failure of a joint conference to agree signaled the end of attempts to raise the Federal minimum wage.

The conference sought to reconcile a House bill raising the wage to $1.15 per hour—extending coverage to a limited number of occupations—and a bill providing for $1.25 per hour and including 5 million additional workers.

MUTUAL SECURITY

Appropriation of $3.7 billion for mutual security followed strong attempts in Congress to water down the program designed to strengthen U.S. ties with friendly nations in a continued effort to maintain a bulwark against communism.

Throughout the session, moves were made to seriously curtail the military defense phase of the mutual security program. A drastic cut was restored by the other body in the final week before adjournment. The House followed suit—adding $65 million in defense funds, but still falling short by $125 million the supplemental funds approved by the other legislative wing.

RIVERS AND HARBORS

Legislation approving construction of 63 navigation projects, 9 beach erosion control projects, 43 control projects, 5 miscellaneous projects—and increasing authorization for 10 river basins—was sent to the President on July 1. House action had taken place almost a year earlier and contained a lower authorization—$657,310,500 in navigation and flood control projects, contrasted with the $1,583,768,352 figure in the bill as passed by the other body, and agreed to by both Houses. Rushford and Winona projects were included, both for planning. The President signed the measure into law.

VETERANS LOAN PROGRAM

Home, farm, and business loan programs for World War II veterans and the direct loan program for World War II and Korean veterans were extended by Congress. The programs were due to expire on July 25. Extension until July 25, 1962, was approved.

Authorized by the bill was $150 million for direct loans in each of the 2 years and establishment of a revolving fund for the guarantee program.

Activities of the House Committee on Science and Astronautics

EXTENSION OF REMARKS

OF

HON. OVERTON BROOKS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BROOKS of Louisiana. Mr. Speaker, with the adjournment sine die of the 86th Congress, the Committee on Science and Astronautics comes to the end of its first Congress.

The committee is unique in that it is the only committee in Congress with legislative jurisdiction over science in general, as well as the space sciences. In these days of great scientific advancement, I need not stress the importance of the work being done by this committee, which has still to mark its second birthday.

However, I would like to cite a few of the committee's achievements during the course of this Congress. As a result of its activities, the committee was honored this year with the Holmes Alexander annual award of the McNaught Syndicate as the outstanding House committee of 1960.

The committee's activities during the less than 2 years of its existence make an impressive record. It conducted 57 investigations, issued 47 reports, held 265 hearings and heard 658 witnesses.

Indicative further of the broad scope of the committee's work, the committee took more than 3 million words of testimony, which have been incorporated in approximately 8,000 pages of printed hearings.

In the legislative field, the committee acted upon the annual budget of the Nation's civilian space agency, now grown

to almost a billion dollars, made extensive revisions in the Space Act of 1958, and approved various other bills and resolutions.

The scope of the committee's investigations was indeed impressive. They covered such varied subjects as the man-in-space program—Project Mercury—space medicine, the effect of noise on man and machine, research on mechanical translation, development of hydrofoils, oceanic research, international aspects of space law, lunar construction, weather modification and control, basic research in agriculture, saline-water research, the status of scientific education in the United States, and many others.

This is a record of which the committee may well be proud. As we round out our first Congress, I feel that we have accomplished much in helping to advance the Nation's scientific and space programs, but I do not feel the committee can sit back on its laurels. Much more work remains to be done. Many worthwhile projects are now in preparation or under investigation, and the committee looks forward to many active months ahead during the remainder of this Congress and the years to come.

The cooperation and hard work of the individual members of the committee and of its staff has made possible this outstanding record during the committee's first Congress.

The committee's activities during the past year have been very fruitful. A summary of the committee's activities during 1960 follows:

ACTIVITIES OF THE HOUSE COMMITTEE ON SCIENCE AND ASTRONAUTICS

INTRODUCTION

The Committee on Science and Astronautics is the successor to the Select Committee on Astronautics and Space Exploration of the 85th Congress which helped enact legislation establishing a civilian space agency, the National Aeronautics and Space Administration.

As a standing committee of the House, the committee exercises legislative jurisdiction over "outer space, including exploration and control thereof, science scholarships, (and) scientific research and development."

It also exercises legislative jurisdiction over "astronautical research and development, including resources, personnel, equipment and facilities," and over the following executive agencies of the Government:

The Bureau of Standards (including "standardization of weights and measures and the metric system"), the National Aeronautics and Space Administration, the National Aeronautics and Space Council, and the National Science Foundation.

ACTIVITIES DURING 1960

During its second year the committee continued to be extremely active, both in the field of legislation and in the investigation of various activities connected with science and astronautics.

As the 2d session of the 86th Congress drew to a close, the committee had compiled this record:

1. Conducted 27 investigations whose scope ranged from exploration at the bottom of the sea to Army plans for construction on the moon.

2. Held hearings on 17 different subjects ranging from a broad review of the Nation's space program to research on mechanical translation.

3. Issued or had under preparation for publication in 1960 a total of 25 reports on a variety of legislative and investigative matters.

Reports (investigative)

During the 2d session of the 86th Congress, the committee issued or had under preparation the following nonlegislative reports:

1. "Preliminary Report on the Refusal of the National Aeronautics and Space Administration To Furnish Information to the Committee on Science and Astronautics" (staff report, Jan. 11, 1960).

2. "Project Mercury, First Interim Report" (H. Rept. 1228. Also listed as Committee Print Serial a).

3. "Outer Space, The Roard to Peace." (Observations on scientific meetings and international cooperation by Representative VICTOR L. ANFUSO, of New York, February 1960.)

4. "Management and Operation of the Atlantic Missile Range" (Committee Print, July 5, 1960).

5. "Report of Representative DAVID S. KING on Inspection Trip of Missile Installations in Utah" (May 5, 1960).

6. "Army Lunar Construction and Mapping Program" (H. Rept. 1931. Also listed as Committee Print Serial f).

7. "Hydrofoil Development" (H. Rept. 2006. Also listed as Committee Print Serial e).

8. "Space, Missiles, and the Nation" (H. Rept. 2092. Also listed as Committee Print Serial c).

9. "Research on Mechanical Translation" (H. Rept. 2021. Also listed as Committee Print Serial d).

10. "Supersonic Air Transports" (H. Rept. 2041. Also listed as Committee Print Serial g).

11. "The Practical Values of Space Exploration" (H. Rept. 2091. Also listed as Committee Print Serial i).

12.[1] "Life Sciences and Space" (H. Rept. ——)

13.[1] "A Chronology of Space Events: 1860–1960" (———).

14. "Ocean Sciences and National Security" (H. Rept. 2078. Also listed as Committee Print Serial h).

15. "Report on Cape Canaveral Inspection" (Committee Print, June 27, 1960).

16. [1] "Noise: Its Effect on Man and Machine" (———).

Reports (legislative)

The committee issued these legislative reports during the second session under the following titles:

1. "Effecting Immediate Transfer of the Development Operations Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration" (H.J. Res. 567, H. Rept. 1240, Feb. 4, 1960).

2. "Authorizing Appropriations to the National Aeronautics and Space Administration" (H.R. 10809, H. Rept. 1333, Mar. 3, 1960).

3. "Proposed Revisions to the Patent Section, National Aeronautics and Space Act of 1958" (report of the Subcommittee on Patents and Scientific Inventions, Mar. 8, 1960).

4. "Amending the National Science Foundation Act" (to make American Samoans eligible for Federal scholarships and fellowships) (H.R. 11985, H. Rept. 1591, May 6, 1960).

5. "Amending the National Aeronautics and Space Act of 1958" (H.R. 12049, H. Rept. 1633, May 19, 1960).

Reports (miscellaneous)

1. "A Study of Scientific and Technical Manpower." (A program of collection, tabulation, and analysis of data prepared by the National Science Foundation at the committee's request and published by the committee, Jan. 4, 1960.)

2. "Panel on Science and Technology," first meeting (H. Rept. 1587. Also listed as Committee Print Serial b).

3. [1] "Panel on Science and Technology," second meeting (H. Rept ——).

4. "Report on the Activities of the Committee on Science and Astronautics" (2d sess., 86th Cong.). (H. Rept. ——.)

Printed hearings

The committee also issued the following printed hearings on legislative and investigative subjects:

1. "Review of the Space Program." (Jan. 20–29; Feb. 1–24; Mar. 7, 1960. Listed as Committee Publicatior No. 3, pts. 1, 2, and 3.)

2. "The Production of Documents by the National Aeronautics and Space Administration for the Committee on Science and Astronautics." (Jan. 27–29, 1960. Listed as Committee Publication No. 1.)

3. "Transfer of the Development Operations Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration." (Feb. 3, 1960. Listed as Committee Publication No. 2.)

4. "1961 NASA Authorization." (Feb. 17–26, 1960. Listed as Committee Publication No. 4.)

5. "To amend the National Aeronautics and Space Act of 1958." (Mar. 8–31; Apr. 4, 1960. Listed as Committee Publication No. 5.)

6. "Frontiers in Oceanic Research." (Apr. 28–29, 1960. Listed as Committee Publication No. 7.)

7. "Panel on Science and Technology," first session (May 4, 1960). (Transcript of remarks is included in H. Rept. 1587.)

8. [1] "Establishment of a National Science Academy." (May 4–25, 1960. Listed as Committee Publication No. ——.)

9. "A bill To Make American Nationals Eligible for Scholarships and Fellowships Authorized by the National Science Foundation Act of 1950." (May 6, 1960. Listed as Committee Publication No. 6.)

10. "Lunar Mapping and Construction in Support of Space Programs." (May 10, 1960. Listed as Committee Publication No. 8.)

11. "Research on Mechanical Translation." (May 11–16, 1960. Listed as Committee Publication No. 9.)

12. [1] "Supersonic Air Transports." (May 17–24, 1960. Listed as Committee Publication No. 11.)

13. "Hydrofoil Development." (May 23. Listed as Committee Publication No. 10.)

14.[1] "Panel on Science and Technology," second session. (June 2–3, 1960. Transcript of remarks is included in H. Rept. ——.)

15.[1] "Space Medicine Research." (June —, 1960. Listed as Committee Publication No. 12.)

16.[1] "Noise: Its Effect on Man and Machine." (Listed as Committee Publication No. ——.)

Investigations

During the 2d session of the 86th Congress the committee conducted 27 investigations or studies, many of them leading to public hearings at which various facets of the Nation's space program and of the Nation's scientific and technological status were explored.

The following subjects held the committee's attention:

1. Refusal of NASA to furnish contract information to the committee and the General Accounting Office.

2. Project Mercury (man-in-space program).

3. Management and operation of the Atlantic Missile Range.

4. Missile installations in Utah.

[1] In preparation for publication in 1960.

[1] In preparation for publication in 1960.

5. Army lunar construction and planning program.
6. Development of hydrofoils.
7. Review of the Nation's space program.
8. Research on mechanical translation.
9. Development of supersonic air transports.
10. The practical and economic applications of space developments.
11. Space medicine.
12. A chronology of space events during the past century.
13. Boron high-energy fuels.
14. Project Wagmight, the development of inflatable aircraft.
15. Oceanic research.
16. Project Slam (supersonic low-altitude missile).
17. NASA-military management of electronic equipment.
18. International cooperation in the peaceful uses of outer space.
19. Scientific and professional education in the United States and abroad.
20. Compilation of the air laws and treaties of the world.
21. International aspects of space law.
22. Cancellation of the Vega space rocket program by NASA.
23. NASA contract award for the second stage of the Saturn space rocket.
24. Development of a 1½-million-pound thrust single-chamber rocket engine (F–1).
25. Project Orion (space propulsion through the use of small nuclear explosions).
26. Development of a nuclear powerplant for space propulsion.
27. The effect of noise on man and machine.

MAJOR SUBJECTS UNDER INVESTIGATION

Review of the Nation's space program

The committee's scrutiny of the progress being made by the United States in space was the most detailed of any investigation conducted by Congress in this field this year. Eighty-eight witnesses appeared before the committee at 26 open and 6 executive hearings during January, February, and March.

The committee's study covered the work of seven Government agencies—Department of State, U.S. Information Agency, Office of the Secretary of Defense, Army, Navy, and Air Force, and the National Aeronautics and Space Administration—as well as various technical societies, related groups and industry.

During the hearings, the Space Agency unveiled for the first time its 10-year program of space exploration, calling for approximately 260 launchings over the next decade at a cost of possibly $12 to $15 billion.

Along with its review of the space program, the committee examined the related phases of missile research and development which interact to affect the national interest.

Among the major conclusions reached by the committee during its lengthy review were these:

1. The U.S. space program is "vital to America's future."

2. The efforts of the Department of Defense to concentrate the direction of its research and development programs under a single authority will result in a tighter overall coordination of our national space programs.

3. NASA's 10-year program in space is a good program, but it does not go far enough. Furthermore, the space program is not being pushed with sufficient urgency, especially in the utilization of a nuclear powerplant and the development of a 1½-million-pound thrust single-chamber rocket engine (F–1). However, this view is not shared by every member of the committee.

4. A high priority program should be undertaken to place a manned expedition on the moon this decade. NASA's 10-year program makes provision only for manned flight to the moon "beyond 1970."

5. The Air Force presented a strong case for its having a military mission in space, but not an exclusive one.

6. The Navy opposes a single, national space organization. This opposition apparently stems from a strong concern that the Navy remain free to pursue the naval applications of the space science.

7. The Army should not be removed from the space program because of the transfer of the Development Operations Division of the Army Ballistic Missile Agency, better known as the Von Braun team, to NASA. Failure of other Government agencies to use the inhouse facilities of the Army to their full capability would be "an unwarranted waste of a unique organizational setup."

Project Mercury—the man-in-space program

From time immemorial man has dreamed of extending his range of operation above the surface of the Earth. With the development of the airplane, he took his first big leap and flew with the birds.

Now, he dreams of extending his range into limitless space. First will come a flight around the Earth at a height of 100 to 150 miles; then out to the Moon and beyond in the years to come.

Project Mercury has as its objective the placing of a man in orbit around the Earth. The primary objective of the Mercury mission is to determine man's capabilities and reactions in a space environment.

In view of the importance of the program, which the National Aeronautics and Space Administration ranks first and most urgent on its list of space projects, a study of the progress made by the space agency was conducted by the committee staff.

The study, approved by the committee, came to the conclusion that the Mercury program is progressing satisfactorily, although there have been various delays which have postponed the date for the first attempt to place man in orbit. This epochal event is scheduled now for 1961.

The study emphasized that Mercury is our only program actually under way for putting man into orbit and questioned the desirability of putting all eggs in one basket.

The committee stated in its report on Project Mercury:

"Considering the number of challenging new techniques which must be mastered to make space flight a success, there is a question whether the national interest is best served by a single approach to this problem."

It added:

"There are a number of very promising alternative approaches to putting man in space. By setting a limit on testing these concepts through exclusive adoption of the Mercury approach, the Nation is risking the loss of extremely valuable development time. The country cannot support a large number of approaches in competition with all the other demands on fiscal and personnel resources. But at the same time the failure to develop in parallel at least one other man-in-space program could prove to be a costly mistake."

Overall, the committee commended the "dedication, the ingenuity, and the orderly approach being demonstrated by the many people in NASA, the armed services, the private laboratories, and industry in contributing to Project Mercury."

Refusal of NASA to furnish contract information to the committee

During the committee's continuing study of the Space Agency's contracts and contract procedures, NASA refused to furnish the committee and the General Accounting Office, which is collaborating with the committee, with four documents on the ground of Executive privilege.

As a result, the committee held several public hearings at which it heard NASA Administrator T. Keith Glennan and other NASA officials and Robert Keller, General Counsel of the GAO. The hearings resulted in an airing of the issues involved, but no change in NASA's position.

Subsequently, however, when the committee requested information from the Space Agency on another contract under study, the Space Agency complied with the request by furnishing, voluntarily, documents similar to those previously refused the committee.

Research on mechanical translation

The inquiry into research efforts to provide a means of reliable mechanical translation was an offshoot of committee hearings held in 1959 on "Dissemination of Scientific Information." Various witnesses then expressed the view that mechanical translation could revolutionize the translation problem.

The inquiry disclosed that 11 groups in the United States are now engaged in various aspects of mechanical translation research with support from the Federal Government. These include the Central Intelligence Agency, the first to show interest in machine translation; the U.S. Air Force, Army, and Navy, and the National Bureau of Standards, and the National Science Foundation.

The world is divided by language barriers into about 4,000 linguistic communities, of which well over 50 are large and important enough to carry on extensive trade, communication, and cultural exchange with one another. All interchange between language communities must now funnel through individuals who are to some extent bilingual. The resulting bottlenecks hamper dealings between nations.

The two most important reasons for carrying on research in this field involve national intelligence requirements and the need for the automation of languages to facilitate the dissemination of foreign scientific and other types of information.

The committee found that the most promising long-range program for mechanical translation was the Army-financed research at the National Bureau of Standards. It suggested that a national center for machine translation will be required in the near future.

Army lunar construction and mapping program

One of the most interesting inquiries conducted by the committee involved Project Lamp—the lunar analysis and mapping program.

The Army began studying methods of mapping the moon in 1958, recognizing that lunar maps will be needed prior to unmanned as well as manned exploration of the lunar surface.

The Army program proposes to furnish necessary data for precision maps and information on the structural formation of the moon. The Air Force is doing complementary work in this field. Its work is largely concerned with obtaining aerial photographs, whereas the Army utilizes the photographs to produce the final product, the map. The committee found that close coordination existed between the two agencies.

In addition to the mapping program, there is also under study the development of lunar construction methods designed to withstand the peculiar environment of the moon, and training facilities to provide, in simulated form, the exacting conditions of the hostile lunar environment.

The committee concluded that preliminary lunar mapping is "a prime requisite to the establishment of a base on the moon" and said Project Lamp was worthy of consideration by the National Aeronautics and Space Administration to further its program of manned and unmanned exploration of the moon.

Supersonic air transports

The next major advance in civil air transportation appears to be the development of a supersonic aircraft. This development may occur within the next decade and will raise numerous technological and administrative problems which are of particular interest to the committee.

There are other highly significant problems which will require understanding and solution prior to any legislative action which may be deemed appropriate by the Congress.

In addition to the technical problems created by the advanced design of this type of aircraft, and the requirement for more modern navigation, communications, and traffic control systems, the supersonic air transport will be very expensive to develop. The consensus of witnesses was that it will be impossible to finance development and production in the traditional manner. It appeared that some direct or indirect financial support by the Government will be required. In the event that some foreign nation takes the lead in this development, the effects upon American industry and national prestige could be serious.

LEGISLATION

Four bills were approved by the committee during the second session, while action was begun on another, but not completed. The major pieces of legislation reported out by the committee and approved by the House of Representatives were the annual authorization of funds for the Space Agency and revision of the Space Act of 1958.

The legislative histories of the bills follow:

H.R. 10809 (a bill to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes)

This bill authorized funds for NASA for the 1961 fiscal year beginning July 1, 1960. It was originally introduced January 26, 1960, by Chairman OVERTON BROOKS, of Louisiana as H.R. 9918. The committee held hearings on the measure February 17, 25, 29, March 1, and 2. Four subcommittees also held hearings on the bill February 18, 19, 22, 23, 24, and 26. Committee amendments were adopted February 29 and on March 1 the committee directed the chairman to introduce a clean bill.

The clean bill, H.R. 10809, was introduced by Mr. BROOKS March 1. The bill was reported to the House March 3, accompanied by House Report 1333, and passed by the House March 9.

The Senate Committee on Aeronautical and Space Sciences reported the bill with amendments April 29, accompanied by Senate Report 1300. It passed the Senate with amendments May 3 and on that date the Senate requested a conference. Conference Report 1629 was filed in the House May 19 and was approved May 23; it was adopted in the Senate May 24. The President signed the act June 1 as Public Law 86–481.

The act authorized funds for aeronautical and space research, scientific investigations in space, satellite applications, manned space flight, vehicle systems technology, space propulsion technology, vehicle development, and tracking and data acquisition.

The legislation also authorized funds to pay for the creation of 30 additional supergrade positions at the George C. Marshall Space Flight Center, Huntsville, Ala.

When the bill was reported to the House, it authorized $915 million for fiscal year 1961, including $170,760,000 for salaries and expenses, $621,453,000, for research and development, and $122,787,000 for construction and equipment. The Senate amendment increased the authorization to $970 million. This included $50 million of emergency authorization for "Research and development" to be available for expenditure to defray the cost of research and development activities which the Administrator determined to be urgently required in the national interest to exploit technological or scientific breakthrough. Also included was a $5 million emergency authorization for "Construction and equipment."

H.R. 12049 (a bill to amend the National Aeronautics and Space Act of 1958, as amended, and for other purposes)

This bill was introduced January 18, by Mr. BROOKS of Louisiana as H.R. 9675 following a message of the President, dated January 14, 1960, transmitting recommendations that the Congress enact certain amendments to the National Aeronautics and Space Act of 1958.

The amendments were designed to (1) clarify NASA's responsibility for planning and managing a program of nonmilitary space activities and to simplify organizational arrangements relating to such activities; (2) modify the provisions of the National Aeronautics and Space Act of 1958 concerning property rights in inventions; (3) provide NASA with certain types of authority which are otherwise available to the Department of Defense or other agencies of the executive branch; and (4) make certain technical amendments to the act.

H.R. 12049 was introduced by Mr. BROOKS, May 3, as a clean bill. It incorporated the provisions of two bills, previously introduced, proposed amendments to the Space Act—embodied in H.R. 4148, authorizing NASA to indemnify its contractors, and H.R. 9484, amending section 305, entitled "Property Rights in Inventions"—thereby tabling these bills.

On March 8 the committee received a report from the special subcommittee which had held hearings the latter part of the first session on proposed changes in the patent section of the act. Hearings were held by the committee on March 9, 10, 14, 15, 16, 17, 21, 22, 24, 28, 29, 30, 31, and April 4 on all aspects of the proposed revision.

On May 3 the committee voted final approval of the bill, and on May 19 it was reported to the House, accompanied by House Report 1633. The House passed the bill without amendment June 9.

As approved by the House, the bill made the following major revisions in the Space Act: (1) abolished the National Aeronautics and Space Council and the Civilian-Military Liaison Committee of the National Aeronautics and Space Administration and the Department of Defense; (2) established an Aeronautics and Astronautics Coordinating Board; (3) revised the patent provisions under which NASA operated; and (4) added an indemnification section to guard contractors against losses which might arise from unusually hazardous risks.

The Senate took no action.

House Joint Resolution 567 (a joint resolution to effect immediately the transfer of the Development Operations Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration)

This joint resolution was introduced by Representative B. F. SISK, of California, January 21 following a message from the President to the Congress on January 14 relative to making certain transfers from the Department of Defense to provide NASA with an organization capable of and equipped for developing and operating large space vehicle boosters and conducting related research.

The committee held a hearing February 3 and agreed to report the resolution. It was reported February 4, accompanied by House Report 1240, and passed the House February 8.

However, the Senate took no action on the resolution and the transfer became effective March 14, or 60 days after the President submitted the proposal, in accordance with the provisions of existing law.

H.R. 11985 (a bill to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950)

This bill was introduced by Chairman BROOKS April 28. Its purpose was to change the wording in the act to remove discrimination against American Samoans who had been excluded from eligibility for certain scholarships and graduate fellowships authorized to be granted to Americans chosen on merit for study and work in the mathematical, physical, medical, biological, engineering, and other sciences at accredited nonprofit educational institutions in this country and abroad.

The committee held a hearing May 6 and on the same date reported the bill, accompanied by House Report 1591. It passed the House on May 16 and was approved by the Senate without amendment June 18, 1960. The measure was signed by the President as Public Law 86–550 on June 29, 1960.

H.R. 4986 (a bill to provide for the establishment of a National Science Academy)

This bill was introduced by Representative VICTOR ANFUSO, of New York, February 25, 1959. Subcommittee No. 3, headed by Mr. ANFUSO, held hearings on the bill May 4 and 25, 1960. No final action was taken by the subcommittee.

Summary of Congressional Action of Special Interest to the Indian People in the Second District of South Dakota

EXTENSION OF REMARKS

OF

HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BERRY. Mr. Speaker, under leave to extend my remarks, I wish to insert in the CONGRESSIONAL RECORD my recent newsletter summarizing congressional action of special interest to the Indian people in my district:

DEAR FRIEND: The Democrat-controlled 86th Congress which was elected on promises of doing everything to improve the lot of the Indian people, sneaked out of town last week after having failed in most of its promises and having done little to improve the lot of the Indian people generally.

It should be remembered that it is Congress which passes the laws—it is Congress which appropriates the money—and Congress alone which is responsible for legislative successes or failures.

When Congress is composed of 280 Democrats and 152 Republicans in the House and 66 Democrats and 34 Republicans in the Senate they can hardly blame the Republican Party or the Republican administration for their failure to pass legislation beneficial to the Indian people.

In spite of 2-to-1 Democrat majorities, Republican Members of the South Dakota delegation, Senator MUNDT and Senator CASE and myself, have been able to get through a number of measures helpful to South Dakota and South Dakota Indians. This we have been able to do because of seniority in Congress, and because through the years, we have built up confidence in what we are

trying to accomplish, obtaining the support of even the Democrat majority through the confidence they repose in us. It has taken time to build up this confidence and to reach positions of command on committees. For instance, because of my 9 years of service on the Interior and Insular Affairs Committee, which handles all Indian legislation, I am the third-ranking minority member on the committee and the first-ranking minority member on the Indian Affairs Subcommittee.

COMMITTEE HEARINGS

I want to apologize to my Indian friends and particularly to those who spent a great deal of time in preparing their testimony given before the Indian Affairs Subcommittee hearings held on all of the reservations in South Dakota in October 1959. As you will recall, the hearings were held by Chairman JAMES HALEY, Democrat of Florida. He had notified all four Members of the South Dakota delegation in Congress of the time and places of the hearings scheduled. Because of their interest in the welfare of the Indians, Senator MUNDT personally attended all of the hearings and Senator CASE attended as many as he could, having his administrative assistant attend those where he was unable to personally be present.

MCGOVERN was unable to attend any of the hearings or to have his assisant present. Because of the fact that Senators MUNDT and CASE took part in the House hearings, he objected to the testimony being printed. The result was that Chairman ASPINALL has refused to permit the testimony taken in South Dakota to be read or referred to, and the work in preparation, the time given over in taking the testimony, was completely wasted so far as Congress having opportunity to benefit from the statements are concerned.

This is the first time in my 9 years on the Interior Committee when an objection has ever been made to Senators testifying or taking part in House committee hearings. As a matter of fact, it is customary for House Members to go over to the Senate to take part in Senate hearings, and for Senate Members to come over to the House side to take part in House hearings, but politics became involved in these hearings in spite of the fact that Chairman HALEY is himself a Democrat.

LEGISLATION

One of the bills I got through Congress this session was a bill relieving members of the Standing Rock, Lower Brule, and Crow Creek Reservations from having delinquent seed loans and other debts deducted from payment of their land settlement where their land was taken under the Oahe Dam.

Three days of hearings were held on my bill to provide industry on Indian reservations, a bill I have dubbed, "Operation Bootstrap—Reservation Style" because it follows closely the Operation Bootstrap program in Puerto Rico. No piece of Indian legislation in modern years has met with such universal approval as Operation Bootstrap. I mailed out 1,000 copies of the printed hearings. You probably have read these hearings and know that people from all over the United States not only came to Washington but presented their testimony in support of this program.

What it does is briefly this. It authorizes the tribe to contract with an individual plant to establish an industry on the reservation, and grants a 10-year exemption from all taxes to the industry, providing it locates on a reservation and employs Indian people.

Hearings on the bill will be resumed in January, and I am very hopeful that early and favorable action will be taken. If we have a Republican majority in Congress, I am certain that with the support of the Commissioner and the Secretary of the Interior, as we already have, that it will be a law within a few months.

This would mean not only jobs but a regular salary. It would mean that the Indian people would then be eligible for housing loans. It would mean that the Indian people would be eligible for water and sewage disposal plants and sanitary facilities of all kinds. It would mean building up reservation areas, and, most of all, providing opportunity for those of working age and much greater opportunity for our young people.

I hope to have an opportunity to visit with you at some of the meetings this fall. Many of you have special land and rental problems with which I have been helping you. I shall continue to keep in close contact with these problems to bring them to a successful close.

Again, thanking you, and with my kind regards, I am,

Sincerely yours,

E. Y. BERRY,
(Mahto Cuwiyuksa).

Hon. Melvin Price Reviews Achievements of the 86th Congress

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PRICE. Mr. Speaker, each year at the end of the session of Congress, it has been my policy to review the work of the session.

The 2d session of the 86th Congress met in a period when the country gradually became conscious that we were nearing the end of the Eisenhower era. It was the period when we began to recover some of the lost ground in the space race but when the Soviet Union showed no lack of scientific achievements. It was the period in which President Eisenhower's journey to the Soviet Union was canceled as Khrushchev withdrew the invitation; when Red instigated and disciplined student rioters forced the cancellation of a visit to Japan. It was the period when the American democracy prepared for a new national election, when the two major parties chose their presidential and vice-presidential nominees and the campaign began.

Historically an election year is not a time when legislation is easily passed—and particularly this is natural when there are legitimate differences of opinion between a Congress controlled by one party and a White House controlled by the other. In the case of the 86th Congress, there have been unavoidable differences.

Moreover, we have come to a time—after 8 years of the Eisenhower administration—when an accumulation of piled-up needs has demanded attention. We have great social needs in shortages in schools, hospitals, college and university facilities; in our social security programs; in housing and farm programs; in the urgency for revisions of our tax systems. The administration, which has sought to hold the line against programs to meet these needs, has a vested interest in continuing its opposition.

The 86th Congress in both its 1st and 2d sessions has been able to cooperate with President Eisenhower in a way to advance the deepest national interests without abandoning its own majority principles.

I can report for the sixth time—each year since the 1954 elections—that President Eisenhower was dead wrong in predicting a political cold war if the Democrats should be trusted by the people with the control of Congress.

Democrats have been in control of the Legislature ever since the President indulged in this bit of campaign oratory, and there has been no political cold war. We have not used our majority to interfere with the President's role as Commander in Chief of the Armed Forces or his constitutional position as director of our foreign policy. Politics has ended at the water's edge.

When the Soviet Premier abused Mr. Eisenhower at Paris, when the Soviet Union wrecked the summit conference, we did not exploit the situation.

Khrushchev may have thought he could provoke partisan dissension in the United States, but it never occurred to the responsible Democratic leadership that the unhappy occasions of the U–2 so-called espionage flight or Khrushchev's bad-mannered conduct should modify our own support of America's objectives.

Many of us have had doubts about the wisdom of the personal diplomacy that subordinates the experienced Foreign Service to whirlwind Presidential public appearances before cheering multitudes in foreign lands.

Many would have preferred such energy expended on creative thought on ways and means of meeting the Soviet economic challenge in neutralist and underdeveloped countries. Mr. Eisenhower has still not been subjected to sniping and carping criticisms no matter what the private doubts.

On the contrary, the Democratic majorities in Congress—this year as in the past—have supported the President's major steps.

We passed a bill to authorize American membership in the International Development Association—a lending agency for long-term, low-interest loans to underdeveloped areas under management of the World Bank.

We gave the President support in the mutual security authorizations and appropriations—despite the feeling of many Democratic leaders that Mr. Eisenhower was shortsighted in turning down Senator FULBRIGHT's plan for foreign aid on a 5-year-loan basis, to begin the process of changing assistance from gifts to dependable and repayable loans.

We renewed and extended the Defense Production Act.

The heavily Democratic Senate sustained the President when it ratified the Antarctic Treaty guaranteeing multinational development of the vast Antarctic Continent with guarantees against any nation attempting to plant a military or missile base there.

In the field of appropriations, we again gave careful scrutiny to the President's recommendations on Federal expenditures.

Mr. Eisenhower's record in the area of so-called spending is not one that can

stand the test of history. He has talked a great deal about economy, but there is little evidence that he has ever understood the basic issue of public finance.

I have pointed out previously that in 1952, just before the election, the General promised the late Senator Taft to cut spending to $60 billion a year. He has never been able to cut spending at all. Our population has gone up, the cold war has continued, our needs for national defense and social purposes have increased; we are spending $20 billion more than $60 billion. The record for the 7 Eisenhower years is a deficit record—topped in 1959 by a huge $12 billion deficit.

Mr. Eisenhower has never made himself the master of the figures in the huge and complex Federal budget. For 7 years, former President Truman personally conducted annual briefings on the proposed budget, setting forth the main facts and submitting himself to any question asked by experienced and well-informed reporters dealing with the field. Mr. Eisenhower delegates this task to subordinates. When he is asked at a news conference about some expenditure, he is likely to reply that he cannot keep all the figures in mind.

This year, as in the past, the Democratic Congress has cut many of the President's proposed expenditures. In the first 10 regular appropriation bills and supplementals for fiscal 1960 and 1961, for example, the President asked nearly $61 billion, and we gave him about $300 million less. And we did this while voting to increase defense spending by $650 million.

As many readers know, much of the major work of Congress is done in committees. I have been privileged to continue my work on two major committees—the House Committee on Armed Services and the Joint Congressional Committee on Atomic Energy.

In the Armed Services Committee, it is our business to examine the state of the Nation's defenses and the adequacy of the President's proposals. It was from this committee that we were able to initiate some urgent increases in our preparation.

In the Armed Services Committee, also, I was able to initiate a measure that extended urgently justified economic assistance to the citizens of Okinawa, an island critically important to the American defense position in the Pacific. Our Military Establishment has had an impact on the economy of Okinawa that causes natural concern to the people, because of the diversion of arable land, and there have been efforts by the Communists to foment disorder and distrust.

My interest in Okinawa was stirred by a 1955 inspection trip to the island and other Far Eastern positions conducted by a subcommittee of which I was chairman. It seemed to me then, and has continued to seem, that it ill became the United States to disregard the needs of the people where our bases are located. We have at last begun the process of recognizing these needs and seeking to meet them.

I successfully sponsored legislation which resulted in surplus acreage at the Kankakee Ordnance Work in Will County, Ill., being transferred to the State of Illinois for conservation and recreational use.

In the Atomic Energy Committee, we have continued pressure on the administration to expand programs for development of peaceful uses of nuclear power. We have reviewed programs for our defense and reviewed the efforts to reach an enforceable agreement with the Soviet Union for inspection systems that will liberate the world from the fear of nuclear conflict. I was successful in obtaining authorization for a $5 million metallurgical laboratory at the University of Illinois for our atomic energy research program. At my request the Commission will use $750,000 for design study on this building next year.

I have naturally been vitally concerned with advancement of the interests of our own communities. This year again we have been able to obtain approval of appropriations to continue the Army Engineers survey of hillside drainage in St. Clair and Madison Counties, so that projects can be developed to put an end to the flash floods that caused so much death, injury and property damage in 1946 and again in 1957.

I feel certain that the 87th Congress next year will appropriate the relatively small amount of money that will complete the surveys, and that thereafter we can move to actual flood control and conservation projects that will end this waste and devastation.

In discussing local interests, I must emphasize that in many cases the needs of our people are the needs of those in other congressional districts—for schools, housing, slum clearance, purification of our rivers and streams, a fair farm law. Here we have faced an 8-year problem: the philosophy of the Eisenhower administration is hostile to Federal leadership in these fields. This year, as in the past, we have been able to make progress only against the actuality or threat of Presidential vetoes.

The House of Representatives for the first time in history this year passed a general school-aid bill, but only against vehement administration opposition to anything not tied wholly to State-participation provisions that would have made the program meaningless.

The President for the second time vetoed a bill to extend loans and Government guarantees of loans, plus technical assistance, to areas of chronic heavy unemployment.

We were unable to work out a new farm program, although such a program is urgently needed, because the administration has remained wedded to the policies of Secretary of Agriculture Benson and has consistently vetoed congressional attempts to develop solutions.

In 1959 Congress passed a bill, of which I was the House sponsor, to authorize a food-stamp plan by which surplus foods would be taken out of storehouses and distributed to schoolchildren and others who actually lack proper nourishment. Some of the people in our own district would have benefited, and the food-stamp plan was proved workable during World War II. The President and Secretary Benson refused to put the plan into effect after having threatened a veto if Congress should try to make the plan mandatory.

All our river communities, here in our district, would have been greatly benefited by a bill to increase to $90 million a year, in a 10-year program, Federal expenditures on the nationally critical problem of polluted, poisonous river systems. Both the House and Senate passed the bill—but the President vetoed it, and in the House we fell 22 votes short of the required two-thirds vote to override the veto. The great majority of Members recognize the importance of the program, and they refused to allow the President to kill the existing water-pollution program enacted over his opposition.

The stalemate that existed gave Congress power to prevent certain other administration actions that we considered unwise.

Congress declined to lift the ceiling on long-term Government bonds that would have burdened the future with high interest charges. The President repeatedly asked for an increase in the 4.25-percent ceiling, claiming that it was needed to fight inflation, but Congress refused—and a few months later interest rates began to fall in the market.

Congress declined to grant heavy boosts in postal rates because of a doubt that the administration has a proper concept of the Post Office Department as a service institution and has not installed available economies.

Congress declined to impose an increase in gasoline tax levies pending an inquiry into the vast interstate highway program and a chance to examine other tax methods.

There is no doubt that Eisenhower vetoes and veto threats played a major part in checking affirmative legislation or watering it down.

In the social security field, the administration vehemently opposed health care for retired workers financed through the tested social security system, in which citizens would be able to pay for benefits during their working years and obtain these benefits when needed as a matter of right.

On housing, the administration insisted that no general new housing legislation was needed, although the rate of residential construction has fallen far behind the expansion of our population.

On city slum clearance and redevelopment, the administration idea was that the Federal share of expenses should be reduced, although such operations are utterly beyond the fiscal resources of local communities alone.

On the minimum-wage bill, the administration opposed any increase in the minimum above $1.15. It opposed any broad increase of coverage to protect the 10 million in interstate commerce previously unprotected.

In the light of the circumstances, the 2d session of the 86th Congress wrote a creditable record. It added achievement to the record of the first session.

In the first session, it will be remembered, the administration gave some of us our first real lessons in frustration. In 1959, just as in 1960, the President tried to reverse the election results.

I was personally involved in one of his 1959 vetoes. I sponsored, with Senator HUMPHREY in the Senate, a bill to protect the Rural Electrification Administration from what we consider Secretary Benson's hostility. The President slew the bill with a veto, and the House failed by a few votes to override the veto.

We saw the same pattern of obstruction this year on many domestic issues.

Congress, nevertheless, has moved forward on a sound, responsible, progressive course. I think we have built a record that clarifies the clashes of philosophy between the administration and its appointees and the majorities in Congress chosen by the people.

This year we were able to pass the second civil rights bill since the close of the Reconstruction era—and the bill was passed under Democratic leadership that frustrated delays in the House and beat down an actual filibuster in the Senate.

We passed a Sugar Act that gave the President the authority he asked to deal with the problems created by the Castro regime in Cuba.

We granted the President another temporary increase in the ceiling on the national debt—a debt that never has fallen under his administration but has risen despite his charge that only Democrats are "wastrels."

We were able to push through a long-deserved pay raise for Federal civil service and postal employees—and we did this by overriding a veto. The veto was reversed by a vote of 349 to 69 in the House and 74 to 24 in the Senate.

In addition, in the closing weeks of the session after the political conventions, Congress was able to pass these bills:

Amendments to the Social Security Act which eliminates age requirements on totally and permanently disabled persons and a medical care program in cooperation with the States; a public works appropriation bill which provides funds for several flood control projects in this area; a communications—payola—bill; extension of the FHA loans for home repairs and extension of the college housing program.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, it is a pleasure to salute 2½ million Americans of Ukrainian ancestry on the 20th anniversary of the Ukrainian Congress Committee of America.

Members of this organization, under the able and inspired leadership of Dr. Lev E. Dobriansky, are performing an invaluable service to the United States of America in keeping us aware of the real nature of Communist imperialism.

We need to be reminded that the Ukraine is not Russian. It is not a willing member of the U.S.S.R. Its people still yearn for and would be willing to fight for the independence that was theirs for a few short years four decades ago.

We need to be reminded that all of the captive nations look to the free world and to the United States of America to keep alive their hopes of liberty from the Kremlin.

This is only a part of the valuable work of the Ukrainian Congress, for which all Americans salute it on its 20th anniversary. As in the past, it will always be my pleasure and privilege to consult and work with the Ukrainian Congress.

TVA Ghosts Come to Life

EXTENSION OF REMARKS
OF
HON. GORDON H. SCHERER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. SCHERER. Mr. Speaker, last year when the Congress passed H.R. 3460, giving to TVA bond issuing authority and broadening existing TVA legislation, I said that the practical effect of the bill would be to remove all presidential and congressional control over the use of bond and power revenues. I further predicted that, as a result, the illusory fence placed around TVA's service area by the bill would shortly fall like a stack of cards.

I argued that the proponents of socialized power had no intention whatsoever of acquiescing in any territorial limitation for TVA, and that the limitations provided in the bill were only a temporary concession or sop to enable the public power boys to get their bond issuing authority through the Congress.

I pointed out that any TVA area limitations would vanish as soon as they were able to meet the power demands in the present TVA service area, which demands had become so great because TVA had pirated industry after industry from other sections of the country by using taxpayer's subsidized power as a lure.

Mr. Speaker, no one in the Congress has a better understanding of the history and operations of the Tennessee Valley Authority and its eventual objectives than does my distinguished colleague, BEN F. JENSEN, from the Seventh District of Iowa. On August 26 I received from him a lengthy and comprehensive letter in which he carefully and with keen insight outlines what has happened and is happening in the Tennessee Valley since the passage of H.R. 3460 in July of last year.

It can be readily seen that the socialized power boys, who vigorously denied what we said during the debates on H.R. 3460, are now proceeding exactly as we had predicted. It is now apparent that the end result in a few short years will be a vast expansion of the TVA service area.

Mr. Speaker, at this point in my remarks I insert in the RECORD this excellent letter of the gentleman from Iowa, BEN JENSEN, and the excerpts from the testimony before the Appropriations Committee referred to in Mr. JENSEN's letter:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 26, 1960.

Hon. GORDON H. SCHERER,
Member of Congress,
Washington, D.C.

DEAR CONGRESSMAN SCHERER: In the keynote speech before the Democratic National Convention in Los Angeles on July 11, 1960, reference was made to the Khrushchev prophecy that our grandchildren would be living under socialism. Naturally this Democratic keynoter did not tell his audience that for years this trend toward socialism in the United States had been actively promoted by many of the leaders of the Democratic Party.

One of the prime examples of this socialistic trend is the promotion and expansion over the years of the Tennessee Valley Authority. That it is truly socialistic was proclaimed by none other than Norman Thomas, the perennial socialistic candidate for President of the United States.

During the 1st session of the 86th Congress, controlled by a Democratic majority, two bills—H.R. 3460 and S. 2471—to amend the TVA Act were passed. These bills provided, among other things, for the issuance of revenue bonds by the Tennessee Valley Authority to provide added funds for expanding the electric power facilities of that agency.

Many of the opponents of these bills claimed that their passage would practically relieve TVA of any effective control by the Congress over the plans of that agency for the expansion of its electric power system. An opinion was held by many that after passage of these bills, TVA would proceed to interpret the law as permitting them to construct, at will, new generating plants or units, without prior notice to the Congress, and without specific approval by the Congress.

I was among several Congressmen who protested to the White House, with no avail, about approval of these bills that would practically remove TVA from any effective congressional or presidential control. The replies from the White House took the position that there was no need to be apprehensive about the TVA Act as amended by the bills in question, and that Congress could in the future affirmatively legislate to meet any problem that might arise.

On July 23, 1959, when House Resolution 326 was called up for the purpose of taking up and accepting the TVA revenue bond bill, H.R. 3460 as amended by the Senate, and again on August 11, 1959, when the bill S. 2471 to further amend the TVA was taken up by the House, you spoke out against the added authority being given to TVA and against the elimination of control over TVA by the Congress and the President. You stated that passage of S. 2471 would:

"Instead of giving the President and the Congress direction over the construction of new power-producing projects by TVA as the President desired, unequivocally and completely eliminate any direction and control whatsoever by either the President or the Congress over the use of either revenue bonds proceeds or power revenues by the corporation in the construction of new power-producing projects."

With further regard to S. 2471 you said:

"Today, if we pass this bill, we wipe out all congressional authority and control."

For many years, I, too, have been greatly concerned about the continual expansion of

this autocratic socialistic TVA power empire within these United States. With this expansion there has been a progressive assumption of power by TVA with a concurrent and continuing elimination of effectual and proper control by the Congress.

In the CONGRESSIONAL RECORD, volume 105, part 2, page 2913, I pointed out in some detail why I thought the "Congress should have more, not less, control over TVA—H.R. 3460 and similar bills should not pass." On page 3921 of the CONGRESSIONAL RECORD, volume 105, part 3, I inserted the statement I presented that forenoon to the House Public Works Committee in opposition to H.R. 3460. It should be amply clear from the documentary evidence presented in these two statements that the Congress has been derelict in not asserting proper control over this autocratic socialistic agency. In addition I am enclosing a reprint of an article of mine, "Socialism or Freedom for America," from the CONGRESSIONAL RECORD, volume 105, part 6. This article deals at some length with development of the autocratic socialistic empire of TVA.

As you know, I am the ranking minority member of the Public Works Subcommittee of the House Appropriation Committee. Hearings before our subcommittee, since the passage of H.R. 3460 and S. 2471 to amend the TVA Act, have clearly demonstrated that your statements and mine about the effect of such bills on the TVA power expansion program were prophetic. Of course, we were not alone in the belief that the passage of H.R. 3460 and S. 2471 would practically relieve TVA of any effective control by the Congress over the power expansion plans of that agency.

Information obtained during the above mentioned hearings disclosed that on August 13, 1959, the day before S. 2471 was signed into law, the TVA board entered into or awarded two contracts for the purchase of two new large steam electric generators. One of these was for a 600,000 kilowatt steam electric generator for a new plant in the western part of the TVA system. The second was for a 500,000 kilowatt steam electric generator for a new plant in the eastern part of the TVA system. It appears that the awarding of the second of these two contracts was in violation of the law in force on the day the two contracts were awarded.

On October 1, 1959, the TVA Board of Directors announced the plans for the construction of a new steam-electric generating plant on the Green River near Paradise in western Kentucky. These contract awards and other actions were taken without prior notification to or prior request for authority from the Congress for such action.

It is quite apparent that TVA now considers that it can start construction of new steam electric power generating plants at will, without prior notification to the Congress, or approval by the Congress as to the size, location, cost, etc., of such plants.

In an effort to obtain an admission by the TVA officials that they do now consider that they can proceed with the expansion of the TVA electric power facilities practically at will and without any requirement for prior notification of Congress, a series of questions and requests for information was presented by Congressman FENTON during the House hearings on the public works appropriation bill for 1961. The TVA officials were requested to submit, for the record, answers to these questions which would be as complete, concise, direct, and germane as possible, leaving out all extraneous comments or verbiage. These questions and answers as reported on pages 882 to and including the first paragraph of page 888 of the House hearings on public works appropriations for 1961 are attached hereto. For easy reference each question has been numbered. An analysis of the TVA answers discloses that in many instances they were neither complete nor fully responsive. This, of course, was not surprising, as it was in keeping with the TVA record down through the years. There was, however, sufficient information furnished in the TVA answers to demonstrate that TVA now believes it has sole authority to decide when, where, and what new power generating facilities are to be constructed by TVA, all without any need to advise the Congress prior to taking action on such expansion or to obtain specific approval thereof.

The following detailed discussion of some of the questions and the TVA answers thereto are presented in order to point out the indicated freedom from congressional control now held by TVA officials. The lack of responsibilities in some instances is also noted.

Questions (1) and (2). These questions requested information on the planned additions to the TVA power system through 1964. Information furnished by TVA appeared substantially responsive for the early years. Information for 1963 and 1964 appears incomplete.

Question (3). Detailed information as to how the power system additions were expected to be financed was requested through 1964. The TVA answer was neither complete nor fully responsive. For instance, information was desired on what portion of the cost of the new Paradise steam electric generating plant was to be financed by power revenues and what part from the sale of revenue bonds. This information was not given.

Question (4). Detailed information was requested as to expected purchase or lease of additional power from others. The TVA answer was to the effect that, other than probable purchase of power from Corps of Engineers projects on the Cumberland River, TVA had no other present plans for obtaining additional power through purchase or lease. In the past TVA has often used the phrase "TVA has no plans" only to end up doing the very thing it told Congress or the courts it had no plans or intentions of doing. Whether this will be true in this case, time can only tell.

Questions (5), (7), (8), (11), and (14). All these questions were related to the primary question of whether TVA had proceeded with the planning and construction of new power projects without prior notification to and specific authorization from the Congress and/or the President.

It was hoped that TVA would, in line with the request, give direct and responsive answers. In most instances, the TVA answers, instead of being straightforward yes or no type answers, were rambling and circuitous. In essence, however, these TVA answers disclose that TVA now takes the position that the TVA Act as amended now contains a general authorization under which TVA can undertake the planning and construction of power projects without prior notification to or specific authorization from the Congress and/or the President.

With regard to question (14) which specifically asked:

"Does TVA now consider it can construct new powerplants when and where it sees fit, without prior notification to or specific authorization from the Congress?"

The TVA reply was:

"This question is fully answered in the opinion of our General Counsel supplied in response to the question which follows."

This was an evasive type answer to a direct question that could have been answered with a direct yes or no. The substance of the General Counsel's response to the seven parts of question (15) discloses that a yes would be the proper answer to question (14).

Question (15). This question was directed to the General Counsel for TVA who was requested to give his opinion on the control or lack of control that Congress now has over the power operation of TVA under existing law. The following seven specific points were listed on which the General Counsel's opinion was requested:

1. What is the geographic area within which TVA can market power from existing or proposed new electric generating plants? Or from plants whose output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

2. Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

3. Is there any limitation on the area in which TVA can now construct steam electric plants?

4. If the answer to item 3 is yes, what is such limitation?

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal powerplants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds "shall not be subject to the requirements or limitations of any other law"?

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporations Control Act? Will TVA power receipts and their expenditure continue to be reported under the provisions of that act?

Question (15–1). This related to the area within which TVA and its power distributors can serve. The General Counsel's answer simply quoted section 15d(a) of the TVA Act as amended. Apparently TVA does not want to go on record as to how it interprets the area limitation.

Question (15–2). Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

Answer by General Counsel was as follows:

"Congress has authorized TVA to construct needed generating plants within the limits of its bond-issuing authority and the power revenues which are available. No further authorization from Congress is necessary.

"TVA's budget program includes a statement of TVA's plans for the construction of new generating plants during the ensuing year, but TVA's authority to construct plants and to issue revenue bonds for that purpose rests on its basic statute. If TVA should find that additional plants were required beyond those mentioned in the President's budget, it would have authority to begin construction of such plants, and would advise Congress of such action in connection with its next annual budget presentation."

It is evident that the TVA Board of Directors and the General Counsel are in agreement that TVA can under existing law use the power revenue and the proceeds from the sale of revenue bonds to construct new electric generating facilities when and where it pleases, and without prior notification to or specific authorization from the Congress or the President. It is indicated that the TVA budget program would present a statement on the TVA plans for construction of new generating plants during the ensuing year. However, the General Counsel points out that this program could be changed later, with Congress being advised of the change in connection with the presentation of the next annual budget. The General Counsel apparently believes that TVA can, within the limit of its power revenues and bond proceeds, do as it pleases about starting new plants and tell the Congress

and the President afterward. The TVA action on the Paradise plant is ample evidence of such a policy.

Questions (15–3) and (15–4). The question here is whether, in the General Counsel's opinion, there is any limitation as to the area wherein TVA can construct new steam electric generating plants.

The answer given is a circuitous one, which, in essence, seems to say that TVA can construct new plants in any area it chooses, within an implied limitation relative to the cost of power. With TVA itself making the decision as to the relative costs for power, it seems apparent that the General Counsel is saying TVA can construct a new generating plant wherever it pleases.

Question (15–5). The question here is in the same category of questions (15–3) and (15–4), except that it relates to purchase or lease purchase of power from plants constructed by others. The answer here is similar and in keeping with the answers to questions (15–3) and (15–4) to the effect that TVA can lease or purchase power from others pretty much as it pleases.

Question (15–6). The request here was for an opinion as to what were some of the more important legal restrictions or congressional controls TVA believes it is released from "by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds 'shall not be subject to the requirements or limitations of any other law.'"

No direct or responsive answer was given. Instead, the General Counsel presented his opinions as to what was the basic purpose of the quoted portion of the TVA Act. He also listed two assurances that he said resulted from the quoted language of the act.

It appears that the General Counsel, in not giving a specific answer, does not want to be put in a position of indicating any possible limitation under this freewheeling amendment of the TVA Act.

Question (15–7). This relates to whether proceeds from TVA bonds are to be recorded and reported in a special account and how TVA power revenues and expenditures are to be reported.

The TVA General Counsel says there is no accounting requirement under the Government Corporation Control Act. He goes on to say the bond proceeds and expenditures, and power proceeds and expenditures, will be reflected in TVA's budget presentation under the Government Corporation Control Act. Just what all this double talk means is not clear. It is evident from the TVA presentation in the fiscal year 1961 budget that no breakdown between bond proceeds and power revenues and their expenditures is to be given. It apparently will be the old, old story of having to pry the information out of TVA piece by piece.

I shall continue to fight for the restoration of proper congressional control over the operations of the socialistic TVA power empire and to prevent its expansion beyond its presently prescribed boundary. In addition, I believe provision should be made for a payment into the Federal Treasury by TVA and its power distributors equivalent to the average unit tax payment made by power customers of the private utilities of the Nation.

As the ranking minority member of the Public Works Subcommittee of the House Appropriations Committee, I shall continue to strive for a full detailed disclosure on the record of TVA's power operations and financial operations.

Sincerely,

BEN F. JENSEN.

PUBLIC WORKS APPROPRIATIONS FOR 1961—TVA

Mr. CANNON. The gentleman from Pennsylvania, Dr. Fenton, has left some questions which he would like to be answered in the transcript. I will recognize Mr. JENSEN for that purpose.

The clerk suggests that we reserve the right for the staff to go over them.

Mr. JENSEN. Yes; that is all right.

Mr. CANNON. Without objection.

Dr. FENTON. Mr. Chairman, I have a few observations to make and a number of questions to ask and requests to make of the TVA witnesses. A number of the items relate to extending data placed in the hearing record for fiscal year 1960. I would like for the answers to my requests to be as complete, concise, direct, and germane as possible, leaving out all extraneous comments or verbiage.

ADDITIONS TO TVA POWER-GENERATING CAPACITY

Question. Will you furnish a tabulation for the record showing all the major additions to TVA system capacity now under construction, planned and/or scheduled for completion in fiscal year 1960 and for each of the next 4 years, the total estimated cost for each unit or plant, amount expended for each at the end of fiscal year 1959, and the expected expenditures for each in fiscal years 1960, 1961, 1962, 1963, and 1964?

(The tabulation requested follows:)

Additions to generating capacity under construction, planned and/or scheduled for operation prior to June 30, 1964

[In millions]

	June 30, 1959	Estimate, 1960	Estimate, 1961	Estimate, 1962 [1]	Estimate, 1963 [1]	Estimate, 1964 [1]	Total estimated cost
Hydro units:							
Wilson units 19–21	$1.6	$12.5	$8.7	$1.2			$24.0
Wheeler units 9–11		2.3	11.9	5.7	$1.3		21.2
Melton Hill units 1–2			3.1	9.0	6.0	$1.9	20.0
Steam units:							
Widows Creek unit 7	27.6	48.5	5.9				82.0
Colbert unit 5	.6	10.1	35.5	24.6	4.2		75.0
Paradise units 1–2		15.2	65.4	87.0	30.4	7.0	205.0
Eastern unit		1.0	14.1	38.0	33.0	7.9	94.0
Johnsonville units 7–10 [2]	73.1	2.6					75.7
Gallatin units 3–4 [3]	60.6	2.6	.2				63.4
Total	163.5	94.8	144.8	165.5	74.9	16.8	660.3

[1] Preliminary.

[2] Placed in service Nov. 30, 1958, Jan. 14, 1959, June 13, 1959, and Aug. 20, 1959, respectively. Cleanup work being done in remaining part of fiscal year 1960.

[3] Placed in service May 22, 1959, and Aug. 9, 1959. Cleanup work being done in remaining part of fiscal year 1960 and in the early part of fiscal year 1961.

ESTIMATED TRANSMISSION COSTS

Question. Will you also furnish the corresponding estimated costs and expenditure data for the transmission and other related system facilities needed to market the power from the added system capacity for these same years?

(The information requested follows:)

Estimates for transmission system facilities are as follows:

Fiscal year:	*Million*
1960	$30.8
1961	31.8
1962	[1] 31.8
1963	[1] 36.8
1964	[1] 30.0

[1] Preliminary.

SOURCE OF FUNDS

Question. Will you also show what portion of the foregoing costs for generating plants and other system facilities are expected to be expended from appropriated funds, what portion from power revenues, and what portion is to be derived from the sale of bonds? Give details for each of the years noted. Also give expected unexpended balance in each category of funds as of June 30, 1960.

(The information requested follows:)

Appropriated funds available from unobligated balances of previous appropriations are being used to complete Kingston steamplant for which all units have been placed in commercial operation. Estimates for the Kingston plant, not included in the above tabulations, are as follows: Fiscal year 1960, $1.5 million; 1961, $1.2 million.

To the extent possible other generating facilities will be financed from current power revenues. Revenue bonds will be issued as a supplementary source of financing as required. The 1961 budget estimate for revenue bond issues is $115 million during that year. For fiscal years 1962, 1963, and 1964 it is estimated that such issues will average about $100 million per annum. Precise details are not available at this time.

The unexpended balance of power proceeds is estimated at $23,215,289 at June 30, 1960. This estimate includes no funds derived from bond proceeds since first issues are scheduled for fiscal year 1961. Of the $2,411,000 total of appropriated funds estimated to be carried forward into 1961, it is estimated that $1,217,000 will be applied to the Kingston steamplant.

Question. If additional power is expected to be obtained through purchase from Federal projects, or by purchase or lease from non-Federal sources which is not now included in TVA system capacity, give details for each of the following fiscal years: 1960, 1961, 1962, 1963, and 1964.

(The information requested follows:)

Power produced at Corps of Engineers projects now in operation on the Cumberland River is being marketed through the TVA system; presumably power from additional projects on that river may also be so marketed. TVA has no other present plans for obtaining additional power through purchase from Federal projects or by purchase or lease from non-Federal sources.

LACK OF SPECIFIC AUTHORIZATION FOR NEW STEAMPLANT

Question. At last year's hearings you were requested to file for the record a copy of the invitation to bid on over 6 million kilowatts of steam turbogenerators. On October 1, 1959, the TVA Board of Directors announced plans for the construction of a new steam-electric generation plant on the west bank of the Green River near Paradise in western Kentucky. The announcement also stated that the contract for the initial 600,000 kilowatt steam turbogenerator unit was ordered August 13, 1959, from the General Electric Co. at a price of $18,007,280. Was any specific authorization or appropriation ever made by the Congress for the construction of this Paradise steamplant?

(The information requested follows:)

Construction of the Paradise steamplant is covered by general authorization in the Tennessee Valley Authority Act, as amended.

No appropriated funds will be needed in financing the cost of this project.

Question. When was the construction of this $100 million-plus plant authorized by the TVA Board? What was the vote?

(The information requested follows:)

On August 13, 1959, the TVA Board of Directors awarded a contract for a 600,000-kilowatt turbogenerator unit, with the understanding that the unit would be installed in a new steamplant in the western area of the system. On September 25, 1959, the Board selected the Paradise site for the new station. On October 19, 1959, the Board formally authorized construction of the Paradise steamplant. The vote in each instance was unanimous.

Question. Was any committee of Congress ever notified of the intention to construct a plant at Paradise and, if so, what committee and when? (If the answer is "yes," supply a copy of such notification for the record.)

(The information requested follows:)

TVA's budget justification for 1960 which was set out in the record of the appropriation hearings of April 22, 1959, before the House Subcommittee on Public Works Appropriations, beginning on page 792, included statements (p. 803) that "at least another million kilowatts of capacity should be started" to be financed from bond funds, and that "early enactment of financing legislation would support efforts to hold down the Federal budget for 1960 by avoiding the need for appropriations for this additional power capacity." Much of the ensuing discussion was concerned with the financing of power generating facilities from bond proceeds. At that time TVA had already solicited bids for additional generating units in anticipation of enactment of the bond financing legislation and there was considerable discussion concerning the invitation to bid. A copy of the invitation is in the record on pages 918–952. The Paradise site had not been selected at the time of the hearings.

Question. Was the President or the Budget Bureau advised of the pending TVA actions on the Paradise plant prior to such action? If not, does TVA believe it can take such actions without prior notification to or approval by the President?

(The information requested follows:)

The information in the TVA budget justification for 1960 and the record of the hearing referred to in the answer to the preceding question were available to the Office of the President and to the Bureau of the Budget. Similar information was also included in TVA's budget submission for 1960 to the Bureau of the Budget and was the subject of hearings before the Bureau of the Budget. The necessity for the additional capacity had been common knowledge for a long time. By routine, informal discussions the Office of the President and the Budget Bureau were kept informed on TVA's plans to provide required additional capacity.

BIDS ON NEW STEAM-GENERATING UNITS

Question. An examination of the abstract of bids shows that the General Electric bid on the 600,000-kilowatt unit was the only bid for a unit of this size.

Apparently, the invitations to bid were changed almost at the last minute to provide for alternate bids on units of unspecified size. Only two bids were received under this schedule, one from General Electric for a 600,000-kilowatt unit at $18,007,280 and one from Westinghouse for an 800,000-kilowatt unit at $24 million. Each of these bids was around $30 per kilowatt of rated capacity. Can you explain why this change in the invitation to bid was made and why the award was made on a basis of a unit price per kilowatt of almost double the unit price bid on the originally specified 500,000-kilowatt units?

(The information requested follows:)

Invitation No. 31–34762 was issued April 10, 1959, for bids to be opened May 26, 1959. The invitation asked for bids on units of different capacities: 500,000 kilowatts, 400,000 kilowatts, 350,000 kilowatts, and 275,000 kilowatts. On May 6, 1959, by addendum I, bid opening date was changed to June 16, 1959.

Prior to issuing the invitation, our needs had been discussed with various manufacturers. The consensus was that a 500,000-kilowatt unit was probably the largest that could be built and delivered in time for operation in the fall of 1962, the time specified for the first of the units covered by the invitation. The invitation accordingly used this as the top size. After the invitation was issued, the manufacturers said that a review of their plans and manufacturing capacity showed that units larger than 500,000 kilowatts could be delivered within the available time.

On May 22, 1959, about 4 weeks before bid opening date, by addendum III, prospective bidders were notified that alternate bids offering units of different capacities would be considered.

When the bids were opened, General Electric and Westinghouse were the only bidders offering units for operation in the fall of 1962.

After evaluation for efficiency, the bid prices on a kilowatt of capacity basis were:

General Electric	$30.51
Westinghouse	33.62

The foreign manufacturers offered delivery dates too late to supply our needs for a first unit. Their bids, evaluated for efficiency and for "Buy American" differential, on a kilowatt of capacity basis were:

Brown Boveri	$23.03
Parsons	30.54
English Electric	31.00

The bids of Parsons and English Electric were unacceptable both for reasons of price and (for a first unit) of late delivery. Award was made to General Electric as low bidder meeting required delivery. The disposition of the Brown Boveri bid is discussed in the answer to the next question.

Question. It is noted that you have also ordered an additional 500,000-kilowatt unit. When was this unit ordered and where is it to be installed? Who was it ordered from and at what price?

(The information requested follows:)

Invitation No. 31–34762, discussed in the answer to the preceding question, in addition to asking for offers for units to operate in the fall of 1962, asked for offers for units for operation at a later date.

Brown Boveri offered a 500,000-kilowatt unit for operation in August 1963, when it would be required to meet the load growth in that year. Their quoted price was $8,500,000. The corresponding evaluated cost was $11,514,600 after evaluation for efficiency and the "Buy American" differential. This is $23.03 per kilowatt of capacity, as noted in the answer to the preceding question.

Award was made to Brown Boveri for a 500,000-kilowatt turbogenerator unit on August 13, 1959, at the price of $8,500,000.

This unit will be installed at a location not yet selected where it can help to serve loads in the eastern part of the power system.

LOCATION OF NEW STEAMPLANT

Question. The President's budget refers to a steamplant to be built in the eastern part of the TVA area. Where and what size plant is this? Does TVA plan to construct this plant without specific authorization of the Congress?

(The information requested follows:)

As stated in the budget message to Congress, a 500,000-kilowatt turbogenerator has been purchased for supplying loads in the eastern part of the system. Decisions regarding the location of this 500,000-kilowatt unit have not yet been made. As the budget document explains, "The specific location has not been determined and if studies now in progress do not result in a satisfactory new plant location, the unit can be put into an existing station." The installation of this unit is covered by general authorization in the TVA Act, as amended.

COAL CONTRACT FOR NEW PARADISE STEAMPLANT

Question. Was the coal contract for the Paradise plant obtained through competitive bidding?

Yes.

Question. If so, will you furnish for the record an abstract of the various bids received for supplying coal to the Paradise plant?

(The information requested follows:)

Only one bid was received. This was the bid of Peabody Coal Co. which offered 60,000 tons of washed mine-run coal per week for a term of 12 years at $3.80 per ton f.o.b. rail cars at loading point, said price to be subject to escalation to reflect changes in mine wages and other mine labor costs. The bid guaranteed a heat content of 11,700 B.t.u. per pound. The bid was not acceptable to TVA in the form in which it was submitted but a mutually satisfactory contract was worked out through negotiations with Peabody, the only bidder, a course which is entirely consistent with recognized principles of competitive bidding.

Question. What are the quantities, terms, and unit prices in this coal contract?

(The information requested follows:)

As awarded on October 1, 1959, the contract with Peabody calls for delivery over a period of approximately 17 years (beginning in August 1962) of approximately 65 million tons of unwashed, mine-run coal with an average guaranteed heat content of 10,770 B.t.u. per pound. The rate of delivery for approximately the first 9 months is 40,000 tons per week and thereafter 80,000 tons per week. The price is $2.95 per ton delivered (by truck) at the TVA plant. This price is subject to escalation to the extent of nine-tenths of any percentage changes in the average mine price of all mine-run coal bought by TVA from other suppliers under contracts with terms in excess of 1 year. TVA has an option under the contract to obtain delivery of additional tonnage during the contract term.

CONGRESSIONAL CONTROL OVER TVA

Question. Does TVA now consider it can construct new powerplants when and where it sees fit, without prior notification to or specific authorization from the Congress?

(The information requested follows:)

This question is fully answered in the opinion of our General Counsel supplied in response to the question which follows.

Question. Will you have your General Counsel prepare for the record his interpretation of the control or lack of control that Congress now has over the power operation of TVA under existing law? This opinion should, among other things, give a definitive answer to the following:

1. What is the geographic area within which TVA can market power from existing or proposed new electric generating plants? Or from plants whose power output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

2. Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

3. Is there any limitation on the area in which TVA can now construct steam electric plants?

4. If the answer to item 3 is "Yes," what is such limitation?

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal powerplants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds "shall not be subject to the requirements or limitations of any other law"?

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporations Control Act? Will TVA power receipts and their expenditure continue to be reported under the provisions of that act?

(The requested information follows:)

TVA is a wholly owned agency and instrumentality of the United States. It was created and exists under the Tennessee Valley Authority Act of 1933, as amended, and is responsible for carrying out the policies and programs laid down by Congress in the act. Subject to the veto power of the President, Congress may amend the act at any time.

My views on the specific questions are as follows:

1. What is the geographic area within which TVA can market power from existing or proposed new electric generating plants, or from plants whose power output is to be purchased or otherwise contracted for by TVA? Relate this to area served at time of passage of H.R. 3460.

The geographic area within which TVA can market power from existing or proposed new generating plants or from plants whose power output is to be purchased or otherwise contracted for by TVA is specifically defined in section 15d(a) of the Tennessee Valley Authority Act, as amended, as follows:

"Unless otherwise specifically authorized by Act of Congress the Corporation shall make no contracts for the sale or delivery of power which would have the effect of making the Corporation or its distributors, directly or indirectly, a source of power supply outside the area for which the Corporation or its distributors were the primary source of power supply on July 1, 1957, and such additional area extending not more than five miles around the periphery of such area as may be necessary to care for the growth of the Corporation and its distributors within said area: *Provided, however,* That such additional area shall not in any event increase by more than 2½ per centum (or two thousand square miles, whichever is the lesser) the area for which the Corporation and its distributors were the primary source of power supply on July 1, 1957: *And provided further,* That no part of such additional area may be in a State not now served by the Corporation or its distributors or in a municipality receiving electric service from another source on or after July 1, 1957, and no more than five hundred square miles of such additional area may be in any one State now served by the Corporation or its distributors.

"Nothing in this subsection shall prevent the Corporation or its distributors from supplying electric power to any customer within any area in which the Corporation or its distributors had generally established electric service on July 1, 1957, and to which electric service was not being supplied from any other source on the effective date of this Act.

"Nothing in this subsection shall prevent the Corporation, when economically feasible, from making exchange power arrangements with other power-generating organizations with which the Corporation had such arrangements on July 1, 1957, nor prevent the Corporation from continuing to supply power to Dyersburg, Tennessee, and Covington, Tennessee, or from entering into contracts to supply or from supplying power to the cities of Paducah, Kentucky; Princeton, Kentucky; Glasgow, Kentucky; Fulton, Kentucky; Monticello, Kentucky; Hickman, Kentucky; Chicamauga, Georgia; Ringgold, Georgia; Oak Ridge, Tennessee; and South Fulton, Tennessee; or agencies thereof; or from entering into contracts to supply or from supplying power for the Naval Auxiliary Air Station in Lauderdale and Kemper Counties, Mississippi, through the facilities of the East Mississippi Electric Power Association: *Provided further,* That nothing herein contained shall prevent the transmission of TVA power to the Atomic Energy Commission or the Department of Defense or any agency thereof, on certification by the President of the United States that an emergency defense need for such power exists."

This provision defines the relationship of the area supplied with TVA power on July 1, 1957, to the area within which TVA can now market power. The only major difference between the area on July 1, 1957, and at the time of passage of H.R. 3460 is that on the latter date TVA was no longer the primary source of power supply for the area served by the city of Memphis.

2. Can TVA initiate the construction of new generating plants without prior notification to or specific authorization from the Congress?

Congress has authorized TVA to construct needed generating plants within the limits of its bond issuing authority and the power revenues which are available. No further authorization from Congress is necessary.

TVA's budget program includes a statement of TVA's plans for the construction of new generating plants during the ensuing year, but TVA's authority to construct plants and to issue revenue bonds for that purpose rests on its basic statute. If TVA should find that additional plants were required beyond those mentioned in the President's budget, it would have authority to begin construction of such plants, and would advise Congress of such action in connection with its next annual budget presentation.

3. Is there any limitation on the area in which TVA can now construct steam electric plants?

See answer to No. 4 below.

4. If the answer to item 3 is "Yes," what is such limitation?

The TVA Board is obligated to supply power at the lowest possible cost to the area which relies on TVA as its primary source of power supply and thus is obligated to construct those generating plants which will accomplish that result. Congress elected to limit the area within which TVA power could be supplied but it recognized that any arbitrary limit on the area within which generating plants could be constructed would be inconsistent with the obligation imposed on the TVA Board to produce power at the lowest possible cost. The location of a generating plant can be selected only after a careful weighing of the various factors which determine its economic feasibility. Among the more important factors are availability of coal, transmission distance to the load centers where the power is needed, the availability of adequate water for cooling purposes, and the availability of rail, water, and highway transportation.

5. Can TVA enter into contracts to purchase all or part of the power to be available from existing or new non-Federal powerplants outside the TVA area? If so, are there any geographical limitations as to the location of such plants and the area within which the power can be utilized?

The TVA Board is under a duty to operate the TVA power system as efficiently, and to keep costs as low, as possible. Accordingly, the controlling consideration in a decision whether to purchase power from a non-Federal source, as in the location of a generating plant to be constructed by TVA itself and in a choice between purchase or construction, is whether the power to be obtained will be the most economical available from the standpoint of the TVA power system as a whole. Subject to this basic limitation, there is no arbitrary geographical restriction on the location either of TVA plants or of non-Federal plants from which power may be purchased. Utilization of power from both sources is subject to the geographical limitations set out in the answer to question 1 above.

6. What are some of the more important legal restrictions or congressional controls TVA believes it is released from by the exception (in sec. 15d(a) of the TVA Act as amended) that expenditures from bond proceeds "shall not be subject to the requirements or limitations of any other law"?

The basic purpose of the quoted provision is to enhance the marketability of the bonds by making clear to prospective purchasers that the limitations on the issuance of bonds are those specified in the act itself. It provides additional assurance that TVA's ability to begin construction of new generating capacity as and when needed is not dependent on the appropriation process. It also provides assurance that the flexibility given to TVA in the act will not be restricted inadvertently by statutes of general application.

7. Does TVA intend to set up a special account for bond proceeds that will not be reflected in the accounting under the requirements of the Government Corporation Control Act? Will TVA power receipts and their expenditure continue to be reported under the provisions of that act?

The Government Corporation Control Act contains no accounting requirements. TVA's bond proceeds and their expenditure will be reflected in TVA's budget presentations under the Government Corporation Control Act. TVA power receipts and their expenditure will also be reflected in TVA's budget presentations.

REDUCTION IN TVA LOAD ESTIMATES

Question. It appears that your peakload for this winter of 1959–60 is nearly three-quarter million kilowatts below the estimate you made last year; is this correct? Will you explain why you were so far off from your estimate?

(The information requested follows:)

The estimate of last year for the winter of 1959–60 was 10,300,000 kilowatts. The actual peak demand for the winter was 9,641,000 on March 1, 1960. The difference between the actual and estimate is 659,000 kilowatts. About 300,000 kilowatts of this difference results from less deliveries to the Federal agencies, principally to AEC, than had been estimated. Also, the aluminum producers in this area did not operate four aluminum potlines and associated fabricating equipment which we anticipated to be in operation. That resulted in another 150,000 kilowatts less load. The temperature at the time of our peak on March 1 was 22°, or about 8° warmer than the normal minimum during the winter season when the peak is expected to be established. At that time, wind velocity was higher than normal offsetting some of the warmer-than-normal temperature. The net effect of the weather, however, reduced the system load by at least another 200,000 kilowatts. The sum of these factors adds to 650,000 kilowatts, which almost exactly equals the difference between the estimated and actual demands.

Question. Why have you reduced all your future load estimates by about 800,000 kilowatts below those of last years? Would it

have anything to do with the lack of a need to show such a gloomy picture on requirements for future capacity additions, now that you have obtained authority to issue bonds?

(The requested information follows:)

From year to year the load forecasts are adjusted to reflect experience of trends and new developments. In the current estimates the expected demands of AEC on the TVA system were reduced about 600,000 kilowatts. About half of that reduction reflected the information that AEC would not be likely to operate at extended load, as it had in recent years; the rest of the reduction was made on the basis of discussions with AEC of their ability to take more power during part of the year and less during TVA's peak season of the year. Most of the other 200,000-kilowatt reduction was made to reflect later knowledge of industrial trends following the recession.

TVA SYSTEM CAPACITY

Question. Will you bring the tabulation on page 906 of the fiscal year 1960 hearings up to date as of December 31, 1959?

(The requested information follows:)

CAPACITY IN SERVICE DECEMBER 31, 1959

The following table divides the installed capacity among the categories named. It also gives a corresponding approximate breakdown of the estimated maximum capability at time of peak demand (before deducting necessary reserves); however, the total has more validity and significance than the components because the capabilities of individual plants or groups or plants are not independent of each other and because they are more highly variable than the total.

[Kilowatts]

	Installed capacity	Approximate maximum capability at peak demand
Hydroplants:		
TVA	2,742,500	2,553,000
Aluminum Co. of America	425,960	405,000
Corps of Engineers	571,000	474,000
Steamplants, TVA	7,647,250	8,264,000
Total	11,386,710	11,696,000

Question. Will you bring the tabulation on page 907 of the fiscal year 1960 hearings forward to show comparable information as of December 31, for each of the years 1960, 1961, 1962, 1963, and 1964?

(The requested information follows:)

Capacity of presently scheduled additions

[Kilowatts]

	Scheduled installed capacity	Corresponding approximate maximum capability at peak demand (before deducting reserves)
Dec. 31, 1960	11,910,710	12,213,000
Dec. 31, 1961	12,072,710	12,375,000
Dec. 31, 1962	13,269,910	13,575,000
Dec. 31, 1963	[1] 14,441,910	[1] 14,750,000
Dec. 31, 1964	([2])	([2])

[1] Tentative (includes new eastern steam unit, Paradise unit 2, and Melton Hill units 1-2).
[2] Program for 1964 has not yet been determined.

PEAK LOADS ON TVA SYSTEM

Question. Will you bring the tabulation on page 909 of the fiscal year 1960 hearings up to date by adding the figures for fiscal year 1960? It is noted that the Federal Power Commission reports the maximum peak for the TVA system for fiscal year 1960 so far was 9,586,000 kilowatts for January 1960. Has this peak been exceeded since that time?

(The information requested follows:)

TVA system loads at time of system peak, in thousands of kilowatts

Fiscal year	Total for TVA area (1)	Federal loads (2)	Non-Federal loads (3)	Memphis loads included in (3) (4)
1950	2,590	285	2,305	141
1951	3,000	359	2,641	162
1952	3,736	717	3,019	178
1953	4,240	963	3,277	205
1954	5,295	1,409	3,886	227
1955	6,952	2,753	4,199	287
1956	8,298	3,597	4,701	327
1957	9,239	3,795	5,444	301
1958	9,418	3,437	5,981	291
1959	9,702	3,254	6,448	327
1960	9,641	3,276	6,365	0

NOTE.—The load of 9,586,000 kilowatts for January 1960 was exceeded by a load of 9,641,000 kilowatts on Mar. 1, 1960.

Question. Will you furnish for the record a tabulation showing your peak load during each month of calendar year 1959 and of 1960 to date, with a breakdown of this to show Federal load, and non-Federal loads? Also show, if any, the peak delivery to Memphis included in the non-Federal loads.

(The tabulation requested follows:)

TVA system loads at time of system peak, in thousands of kilowatts

Month and year	Total for TVA area (1)	Federal loads (2)	Non-Federal loads (3)	Memphis loads included in col. 3 (4)
January 1959	9,702	3,254	6,448	327
February 1959	9,057	3,351	5,706	91
March 1959	8,701	3,346	5,355	91
April 1959	8,212	3,277	4,935	29
May 1959	7,624	3,254	4,370	35
June 1959	7,718	3,320	4,398	0
July 1959	7,810	3,236	4,574	0
August 1959	7,942	3,381	4,561	0
September 1959	7,598	3,323	4,275	0
October 1959	8,313	3,362	4,951	0
November 1959	9,301	3,320	5,981	0
December 1959	9,164	3,357	5,807	0
January 1960	9,586	3,259	6,327	0
February 1960	9,578	3,235	6,343	0
March 1960	9,641	3,276	6,365	0

ELECTRICITY FOR HOUSE HEATING

Question. Will you bring the tabulation on page 911 of the fiscal year 1960 hearings up to date by only including data for calendar years 1959 and 1960 to date?

(The information requested follows:)

Approximate electricity use for house heating in TVA area

Month and year	Energy, millions of kilowatt-hours	Thousands of kilowatts demand [1]
1959—January	590	1,680
February	420	1,360
March	370	1,050
April	130	660
May	20	380
June		
July		
August		
September		
October	120	750
November	430	1,380
December	510	1,240
1960—January	570	1,530
February	600	1,700

[1] The effect of the house heating loads on the monthly system peak is usually less than the numbers shown because of diversity among these loads and other loads.

DEFICIT OPERATION OF TVA DISTRIBUTORS

Question. We have often heard about how successful the operations have been in the TVA power area and how much greater usage the TVA area has in comparison with the balance of the Nation. In examining the TVA report on the operations of the TVA power distributors, I find a number of instances where the distributors are and have been operating at a deficit and have per customer power use below the national average. Many of these particular TVA distributors have been in operation for 15 or 20 years.

In this connection, will you furnish, for the record for each of the past 5 years, the number of distributors that have either operated in the red in any such year or had a deficit in accumulated net income in any of these years?

(The information requested follows:)

The number of TVA distributors who had either a deficit in accumulated net income during the fiscal years 1955–59 or whose operation during these same years produced a negative operating margin is shown below:

Fiscal year:	
1955	16
1956	14
1957	11
1958	12
1959	9

Amortization collections by distributors are available for the payment of interest on long-term debt. The inclusion of these funds in the distributors' annual operating statement would revise the above figures to those shown below:

Fiscal year:	
1955	5
1956	4
1957	2
1958	4
1959	2

Report to the People of the Fifth Congressional District of Indiana

EXTENSION OF REMARKS

OF

HON. J. EDWARD ROUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ROUSH. Mr. Speaker, now that the 86th Congress has come to a close and become a part of the history of these United States of America, I want to report to my people of the Fifth District of Indiana the activities of this Congress and my actions during its sessions. This was a hard-working, constructive Congress and I am proud and grateful to the people of the Fifth District for the opportunity to have shared in its deliberations.

Mr. Speaker, I have attended practically every session of the 86th Congress and have answered 372 rollcalls out of 382. Each day as I have approached the Capitol I have voiced a quiet prayer that in the deliberations and votes of the day I should represent to the full extent of my ability the thinking and aspirations of all the people in my district. I have felt that any day would be a lost day unless it marked some progress, small or large, toward the goals for which we are reaching.

During my first term in office I have done my best to keep the people of my district informed of the developments in Government that affect their lives. I

have made special reports to groups on legislation affecting them and requested their reactions. During the sessions I have sent out reports to the newspapers on important issues and once, and sometimes twice, a month, forwarded a newsletter to those people in the district who had requested to be informed on current events of Congress.

In this report I will first deal with those projects and actions that have a purely local impact.

FLOOD CONTROL

Mr. Speaker, although Indiana has not always welcomed Federal flood control programs, it now recognizes that flood control is not something that can be appropriately planned and carried through by State action alone. It must have Federal assistance. When I was a candidate for election I made the pledge that, if elected, I would do everything within my power to secure funds for the construction of an adequate flood control program for the Wabash River Valley.

One month after arriving in Washington I introduced legislation which would have provided funds for the construction of the Huntington, Salamonie, and Mississinewa Dams; and at that time I made a speech on the floor of the House of Representatives, pleading with the Members of Congress for the necessary appropriations. This was later followed by more speeches and committee appearances.

Securing funds from Congress is always a difficult enterprise and this one was further complicated by a resolution—House Concurrent Resolution 2, passed by the Indiana 85th General Assembly in 1947—which in effect disapproved of any new Federal projects for Indiana. This has now been repudiated and the State of Indiana has appropriated the money to pay for the State's share of the costs of a number of specific projects, including those in the Fifth District.

I am happy to report that with the assistance of dedicated, energetic, public-spirited individuals and groups from the Fifth District and the rest of Indiana, Congress was persuaded to appropriate funds for the advance engineering and design of these projects. This, of course, is only the beginning, and I intend to continue this fight for funds until the dams are finished.

These dams will not completely solve the flood control problems of our district. Smaller dams and watersheds will have to be built in several areas. A watershed is in the process of being authorized in the Portland area, which will protect and conserve water in that community. Also, an engineering survey is now being conducted by the Corps of Engineers and the Indiana Flood Control and Water Resources Commission in the Marion area. This is an essential step toward a realistic solution of these problems.

INDUSTRIAL DEVELOPMENT

Another of my ambitions is to attract new industry to provide increased job opportunities and to stimulate and improve economic conditions throughout the 10 counties of the Fifth District. As the first step, last year I launched a vigorous drive to draw new industry by sending a letter to over 500 major Government defense contractors apprising them of the advantages of locating or subcontracting in Indiana and particularly the Fifth District.

The response to this letter was extremely encouraging and this year I continued this effort by directing another letter to over 5,000 industrial leaders. The replies that indicated an immediate interest were forwarded to the mayors, chambers of commerce, and other interested parties of all Fifth District cities for their information and action.

The economic and social climate of Indiana as well as its potential has been brought to the attention of every major industrial concern and executive in the country. Although we cannot expect results overnight, there is no doubt that this undertaking will eventually bear fruit. I intend to continue in this endeavor next year.

PERSONAL SERVICES

In the field of personal service I have processed hundreds of cases involving servicemen, veterans, social security claims, immigration, tax and postal problems and other difficulties between the citizens of the Fifth Congressional District and the Federal Government. What this means is that, in addition to the normal legislative process, my office handled each year between 300 and 400 detailed and complicated personal problems affecting the lives of many people.

ACADEMY APPOINTMENTS

My service academy appointments achieved heights beyond all expectations. Each district is allowed one admission, or cadet, to each of the 3 Academies—Army, Navy, and Air Force—a year.

My appointments were made on a competitive basis and more than enough boys qualified to fill each vacancy. In addition to filling the vacancies, 2 additional boys—3 in all—were admitted to the Air Force Academy because of their outstanding scores. Five admissions in one year is a record of which our district can be proud.

COMMITTEE ASSIGNMENT

It is a distinct privilege for your Congressman to serve on the Committee on Science and Astronautics. Although the committee is the newest standing committee of the House of Representatives, it was honored this year by being selected as the "Committee of the Year."

The committee's role in this scientific age has been, and will continue to be, an important one. Although it is concerned with all types of scientific endeavors, its major work consists of dealing with legislation affecting the National Aeronautics and Space Administration, a new agency created to expand and coordinate our national effort to advance space technology and space travel.

HAWAIIAN STATEHOOD

March 12, 1959, was a proud day for our Nation for on that date the House of Representatives passed the Hawaiian statehood bill. It was also a proud moment for me when I cast my aye vote on this bill. Mark Twain described Hawaii as, "The most beautiful fleet of islands ever anchored in the sea."

The admitting of Hawaii as a State was, as one colleague put it, a positive and affirmative act to spread the glory of the American dream 2,000 miles west and to say to a great people, we admit you to full partnership in this Union.

LEGISLATION

According to the Clerk over 15,506 measures were introduced in the 86th Congress and over 1,645 bills were considered in the House. It is clearly impossible in the time and space allowed to report on all of these. I shall mention only the most important and highly publicized legislative issues. Upon request, I shall be pleased to furnish more complete information concerning any particular bill, as well as a summary of the issues involved.

NATIONAL BUDGET

Despite the constant talk that this Congress was bent on spending, its record proves it has been an economy Congress. Both the first and second sessions slashed by substantial amounts most of the appropriation bills. It succeeded in reducing the budget requests of the President in the first session by $1,882 million, and it wound up the second session with a surplus of $1.1 billion—five times as big as last January's forecast. The biggest cutbacks in spending from the January forecast were made in four areas: Agriculture, $277 million; Export-Import Bank, $267 million; interest on national debt, $118 million—lower interest rates reduced the Treasury's borrowing costs; Veterans' Administration, $117 million.

In view of the fact that the major portion of our national budget is spent on military matters, it has always seemed to me that substantial savings in Federal spending could be made in that area. Since coming to Washington I have seen considerable evidence of waste, extravagance, and duplication in the military service. In the first session, $19,961,000 less than budgetary requests was approved for defense appropriations. Substantial sums were saved, in that fiscal year and other future years, by compelling the administration to conduct a thorough review of the entire concept of defense against air attack.

No matter how much is spent for defense, it will be adequate only if its services are integrated. A central purchasing agency for all the defense forces, I believe, could save many millions of dollars in eliminating duplications and mismanagement in purchasing. There is much progress to be made in the field of greater efficiency and economy in our sprawling Defense Department. Let me emphasize, however, that I am not advocating any weakening of our defenses for, if anything, they are inadequate to meet the threat of Communist aggression.

In fact, I believe that in order to reduce expenditures and promote efficiency the entire Government structure needs reorganization. I voted to extend the authority of the President under the Reorganization Act of 1959 to propose plans

to Congress for changes in the structure of governmental departments and agencies.

INTERNATIONAL AFFAIRS

Under the Mutual Security Act of 1959 the Congress appropriated $3.5 billion in the first session, and $3.7 billion in the second session. I voted against the bill in both sessions. I offered one amendment to the 1959 bill and two amendments to the 1960 bill, which, had they been adopted would have resulted in more effective administration of the program and allocation of funds. It would also have resulted in a saving to the taxpayer, since each request for funds for a particular project would have had to be justified to Congress.

While I am in agreement with the objective of the program, I do not feel that the vast appropriations being made year after year can go on indefinitely. It does not seem consistent to preach economy in our domestic appropriations and appropriate indiscriminately for a foreign aid program that is obviously not accomplishing its purpose. The entire program must be overhauled and streamlined so it will help underprivileged people to help themselves. Every effort should be made to draw into the program the more prosperous countries of the free world that they might share the burden of helping the weak nations.

FOREIGN POLICY

On the 17th day of June 1960, I introduced a concurrent resolution calling for a bipartisan foreign policy.

At few moments in our history as a nation have we faced a crisis of such intensity and extent as that which now has begun to surround us. The fiasco of the recent summit meeting is but the most evident of the symptoms. Khrushchev's insults and mockery of the United States through the person of our President marks a low point in our diplomatic fortunes. It provides a sudden and painful illumination of how very far indeed we are from any possible agreement with the Russians on the major issues of the cold war. The last decade marks a shift which could prove the most important in the world's history: The rapid growth of the Soviet Union's economic, military, and political power as a threat to the United States.

Nor have events elsewhere in the world stood still. We are faced with the emergence of the first really pro-Communist government in the Western Hemisphere in the Castro government of Cuba. Syngman Rhee in Korea and Adnan Menderes in Turkey, both closely identified with the United States, have been overthrown. In Japan we met opposition—to the signature of a Mutual Security Pact—so strong as to threaten the Kishi government and to make President Eisenhower's visit there impossible.

We can ill afford to allow this crisis in our foreign policy to continue unchecked. These tragic experiences emphasize the need of bipartisan cooperation in the field of foreign policy.

TAXES

The President asked that the national debt limit be raised by $2 billion to $285 billion and a further temporary increase of $10 billion to $295 billion to June 20, 1960. During this session he asked for an extension of the temporary debt limit. I voted against both proposals. At the end of the Korean war the national debt was $285.5 billion. Today, having risen more than $31 billion since that time, it stands at the highest peacetime figure in history. Do you not think it is about time to call a halt?

The transportation tax was reduced by half—from 10 to 5 percent—and the tax on local telephone calls repealed, both effective July 1, 1960. I supported this legislation; however, during the second session, at the recommendation of the President, this repeal was not allowed to go into effect and the taxes will continue.

The President recommended an increase of 1½ cents in the Federal tax on gasoline and diesel fuels. The Congress enacted a temporary 1-cent-per-gallon increase, which went into effect October 1, 1959. I voted against this increase.

The rates of income tax on the earnings of life insurance companies was established on a permanent basis for the first time in 10 years. I voted for this tax, in justice to other corporations and individuals who pay their taxes on a permanent basis.

Legislation clarifying the States' rights to tax net income derived from interstate commerce was enacted. The passage of this bill is not intended as a comprehensive solution, but as an emergency measure. A study will be carried on to determine if any further legislation is necessary.

Also passed by the House was a bill allowing tax deductions for the professionally self-employed who set aside income for voluntary plans. This is meritorious legislation and should be enacted into law next year.

SMALL BUSINESS

Because of the gaps in the provisions of the Robinson-Patman amendment to the Clayton Act, the efforts of small business to compete against their larger competitors suffered. A company could grant illegal price discriminations three times before effective penalties could be applied. This Congress amended the law to close these gaps.

The lending authority of the Small Business Administration was increased from $500 million to $575 million and then again by another $150 million because of mounting demands.

A bill was passed that permits small business wholesalers of gasoline to pay the tax on the quantities of gasoline sold and thereby remedy the situation prevailing whereby these wholesalers paid an excise tax on gasoline that had been lost due to shrinkage and evaporation.

Legislation was enacted to facilitate extension of credit to small business enterprises by amendments to the Small Business Investment Act. The 85th Congress authorized the agency to set up private corporations to furnish long-term equity capital to small business; however, the administration has done very little to accomplish this.

One of the most powerful elements in building this country to its present greatness is small business. Therefore, to a great extent, our economic growth depends on our keeping this element alive and active. I have supported every piece of legislation which I believe would assist the small businessman to survive and prosper.

AGRICULTURE

One of the most serious domestic problems faced by the 86th Congress was the farm problem. Farmers caught in the squeeze between falling farm prices and rising costs in production have not shared in the general prosperity of other industries. This decline in net income occurred in spite of the fact that the administration has spent millions to bolster the basic commodity prices.

This costly farm policy has not only been ineffectual but has held back national growth. Secretary Benson has been adamant in his conviction that lower prices would increase sales and reduce surpluses. With the help of a series of Presidential vetoes, Benson forced Congress to lower the prices at which surplus crops were supported. This did not work. The increased amounts bought were small and the price cuts were large. In order to offset the decline in prices of farm products, farm operators increased the quantity of production. They broke all known production records on less land and piled up bigger surpluses. In 1960 the Government had $9 billion worth of surpluses stored away with storage charges running $2 million a day.

In an effort to bring farm prices back in line with operating costs and reduce surpluses, Congress considered a farm surplus program—family farm bill of 1960—which would have fixed wheat price supports at 85 percent of parity, reduced acreage allotment by 25 percent, and provided payment in kind for retired cropland or alternatively, price support at grain level and no production control. It would have given the various groups of producers of different farm produce, who cannot agree on what kind of help would be best for all, the opportunity to democratically choose the form they prefer.

The disagreement as to what is best for the farmer does not prevail among the farmers alone, nor between the administration and Congress, but among the Congressmen. It is a regional issue and as a result the foregoing legislation was not enacted.

Agricultural bills were enacted to permit extension of the Crop Insurance Board, authorize leasing of cotton acreage allotments during crop years 1959 through 1961, and extend the provisions of Bankhead-Jones Farm Tenant Act authorizing refinancing of loans on family size farms, stabilize price support for tobacco, and create an Agricultural Research Development Commission to find and promote new industrial uses for farm products.

SOCIAL SECURITY

No group in America is more entitled to special consideration than our elderly citizens who are retired or no longer able to work. After months of hearings and consideration, an omnibus social security bill was passed which liberalizes the

requirements of the disability program; it liberalizes the insured status requirement, making about 600,000 additional persons eligible for benefits; eliminates the 6-month waiting period for disabled workers and removes certain inequities in the law pertaining to widows and children. It also extends coverage to 300,000 additional persons, and, in the vital field of medical care, provides grants to States to encourage them to make improvements in their medical payment programs for old-age asistance recipients. The medicare provisions are inadequate and it is my hope that legislation will be enacted next year to remedy this problem.

VETERANS

I am deeply grateful, as is our entire Nation, for the sacrifice and loyalty of the men and women who have served in the Armed Forces.

Twenty-eight pieces of veterans legislation were signed into law during this Congress. Among the major bills enacted was a law revising the pensions for veterans with non-service-connected disabilities and for widows and dependent survivors. The scale of payments was readjusted to eliminate present inequities in pensions of veterans. It also equalizes the status of World War II and Korean war widows with those of World War I.

The direct-housing-loan program was bolstered by an increase of $100 million in authorization. This program is especially designed to assist veterans in smaller communities and rural areas.

Legislation was enacted which waives payment of premiums on national life insurance policies for certain totally disabled veterans, provides additional compensation for disabled veterans with more than three children, permits conversion or exchange of national life insurance policies to a new modified plan and provides for a program of educational, home purchase and rehabilitation benefits for veterans with more than 120 days of active duty between January 21, 1955, and July 1, 1963.

FEDERAL EMPLOYEES

It is a well known fact that Government employees have been underpaid. Most Federal employees are paid less than those in private industry for comparable work. Congress has recognized this and been disposed to raise the wages of Federal employees for some time but the President has opposed pay-increase bills. This meant that Government workers were denied increases to which they were entitled by higher living costs and by comparative pay standards in other fields.

This Congress finally passed a bill raising the salaries of classified Government employees by 7½ percent. In voting for this bill, I felt I was voting for a vital need, for this group of people is most deserving.

The health insurance act passed by this Congress will provide extensive low-cost coverage on a voluntary basis for employees of the Federal Government and their dependents. Half of the cost of this program will be borne by the Government.

LABOR

One of the outstanding pieces of legislation enacted by the 86th Congress was a labor bill requiring full disclosure and accounting of funds invested by unions or management groups in pension and welfare funds. This is not an ideal bill but it contains portions of three bills brought before Congress and represents the best that could be achieved to correct the undemocratic and racketeering practices revealed by the McClellan committee while protecting the interests of honest labor leaders and members, management, and the general public.

I voted to raise the minimum wage and extend coverage because it will help establish levels of living adequate for health and help raise purchasing power among the poorest workers. It will increase spending which will raise the level of employment and facilitate more rapid economic growth and reduce unfair competition between covered industries and uncovered industries.

It was my firm conviction that an exemption for these small businesses grossing less than a million dollars a year was essential and I supported this proposal.

CIVIL RIGHTS

I was happy to vote for a civil rights bill which guarantees and protects the rights of every American citizen to vote. The bill authorizes Federal courts to fix penalties for obstruction of court orders and requires preservation of Federal election records for 2 years.

EDUCATION

Mr. Speaker, I have always believed that no nation is stronger than the intelligence and character of its citizenry. The Father of our Country spoke of the necessity for having an enlightened citizenry and we all, regardless of our party, realize the necessity for higher education, especially in view of the Soviet agricultural, scientific, and medical achievements.

Because of our exploding population, States and municipalities do not have the funds nor the borrowing capacity to keep up school buildings or afford more and better qualified teachers. Manipulation of statistics currently being employed by some groups fighting Federal aid to education cannot hide the very obvious fact that we are facing a serious crisis in learning. Education is one of the most essential programs in our society. Notwithstanding this realization, the school construction bill—the President's own bill offered in 1957—bogged down because certain racial and religious considerations were injected into the measure. There are many of us who fear the possibility of Federal interference or thought control of our State and local school systems should any improper type of Federal aid to education be adopted. This issue was given grave consideration and debate and every effort was made to dispel and prevent this possibility.

RAILROAD RETIREMENT

Since I come from a town where the railroad industry is one of major importance, I have personally known many, many railroad employees and am sympathetic to their problems. It was a pleasure therefore to vote for a measure of significant consequence to the several hundred thousands of railroad employees and their families. This bill provides them with increased benefits under the Railroad Retirement and Unemployment Act.

CONCLUSION

In closing, may I say that there will undoubtedly be differences of opinions; however, I considered every issue on its merits and every position I have taken was determined by what I believe to be in the best interest of the people and particularly my district.

I want Indiana, the crossroads of America, to become the hub of industrial and cultural activity. Its economic climate should be such that our people will prosper. I believe in a strong America—an America which can proudly lead the world into the dawning of this new era because of its economic, moral, and spiritual strength.

"Early Bird" Reinhardt N. Ausmus, Pioneer of Aviation History—Built His First Plane During Years 1910-12

EXTENSION OF REMARKS

OF

HON. A. D. BAUMHART, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BAUMHART. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to bring to the public's attention a constituent of mine, Mr. Reinhardt N. Ausmus, who at the present time is Erie County veterans' service officer, located in the courthouse, Sandusky, Ohio.

Mr. Ausmus was raised in an orphanage. When he was released from the home at the age of 14, he had no home or job, and it was at this time that he decided to build an airplane. He designed and built his first plane, which took him 2 years, from 1910 to 1912. He flew it in 1912.

At the age of 19, Mr. Ausmus got a job as an instructor and designer at the old Benoist Aeroplane Co. in Sandusky, Ohio. Mr. Ausmus joined the aviation section of the Army Signal Corps, which later was to become the Air Force in the early days of World War I. Being only 20 years of age he was one of the youngest fully trained and experienced aviators in the Army. During the war he suffered injuries which made it necessary for him to give up piloting and which confined him in hospitals for various periods during the next 17 years.

Flying the plane in 1912 qualified Mr. Ausmus to become an Early Bird, an organization of men who piloted heavier-than-air planes before December 17, 1916.

While he has not been able to follow his first occupational choice, he has proceeded to collect records and other exhibits of the early days of aviation, particularly those concerning the early manufacture of planes in Sandusky,

Ohio. These have in some cases been so rare that officials of the Smithsonian Institution have consulted with him on several occasions, and in at least one instance changed the official records because of information in his collection.

While in a Government hospital he resolved that if he were ever able to work he would give his time to helping other veterans as he had been helped. With this aim he accepted a position as Erie County veterans' service officer.

Mr. Ausmus' story has been featured by articles and pictures in many of the prominent daily newspapers of my Congressional District. To name a few: Sandusky Register, Sandusky, Ohio; Chronicle-Telegram, Elyria, Ohio; and the Blade, Toledo, Ohio.

In 1958 the Sandusky Chamber of Commerce presented him with a plaque for his outstanding contributions as a pioneer of aviation history.

Senator Murray's Address to American Chemical Society

EXTENSION OF REMARKS

OF

HON. MIKE MANSFIELD

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. MANSFIELD. Mr. President, a symposium of the American Chemical Society opened with an address by our respected colleague, the senior Senator from Montana [Mr. MURRAY]. The symposium was a highly technical one, and Senator MURRAY was invited to open this scientific gathering in recognition of his encouragement of methods to reduce evaporation losses from reservoirs by using a chemical film just one molecule thick. For the past 4 years, Senator MURRAY, in association with the senior Senator from Arizona [Mr. HAYDEN], repeatedly urged the executive branch to take an active part in this imaginative program for conservation of the limited water resources of the Western States. Encouraging results of preliminary tests are now reported, and these give rise to hope of saving many hundreds of thousands of acre-feet of water each year.

In addressing the symposium, in addition to pointing up the urgent need for water resource development and conservation, Senator MURRAY brought to focus several other important aspects of the work of scientists such as those whom he was then addressing. One of these points is that in helping the United States to conserve our scarce water supplies, scientists can also give valuable help to our allies of the free world, many of whom have extremely critical problems of water scarcity. Senator MURRAY pointed out also that international collaboration within the scientific sectors of the world gives hope that international collaboration on even broader fronts may lead to effective transformation of nuclear energy from a terrible engine of destruction into a mighty tool for improving the material prosperity and happiness of mankind.

Awareness of such possibilities, Senator MURRAY told the scientific audience, stimulates the younger scientists in the early stages of their professional careers. This, he suggested, might have significant results in attracting men to research work, and in overcoming unfortunate limitations in some of the applied sciences.

These points have deep significance for all of us. I ask unanimous consent, therefore, that immediately following my remarks, there be printed the text of Senator MURRAY's address to the symposium of the American Chemical Society.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS TO THE AMERICAN CHEMICAL SOCIETY SYMPOSIUM, NEW YORK CITY, BY HON. JAMES E. MURRAY, U.S. SENATOR FROM MONTANA, CHAIRMAN, COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. Chairman, members of the American Chemical Society, and fellow guests, it is a privilege to participate in this symposium sponsored by one of the Nation's most eminent learned societies. I am sensible, too, of the honor of your invitation to make the opening remarks to the meeting.

The program for this symposium deals with matters such as monolayer, energy barrier, surface tension, and like subjects that might seem far removed from the work of the U.S. Senate. Twenty-six years ago, when I first took my seat in the Senate, such subjects actually would have been foreign to legislative considerations, but there have been profound changes in national affairs during the past quarter of a century, and now many of my colleagues share my interest in your researches.

Ever since 1807 when it made its first inquiry into the possibilities for waterways development, the U.S. Senate has been deeply concerned with resource matters. This concern is, of course, most appropriate because development of natural resources for use by the people is the foundation on which this Nation builds its strength and the well-being of its citizens. Minerals, timber, soil fertility, and water are essential ingredients of the great industrial civilization in which we live and prosper.

Recognition of this principle guides the Senate Committee on Interior and Insular Affairs, of which I am privileged to be chairman, and it has led to authorization of major resource programs. In the field of water resources, I mention only the Missouri River Basin project and the Colorado River storage project as examples of many that are important to the entire Nation.

Resource development and conservation is the clearly expressed purpose of the American people and, now more than ever previously, it is essential to maintenance of the American way of life. Yet in pursuit of that purpose, we are progressively impeded by resource scarcities, especially so in the case of water development programs. Virtually every water project that comes before the Senate for authorization is hedged about with complications arising from scarcity of the resource, and opportunities for beneficial developments are curtailed or frustrated by water supply limitations.

In this context, in 1957 evaporation losses and the possibilities for their reduction were reviewed for my committee in a special staff study undertaken at the suggestion of Senator CARL HAYDEN, of Arizona. This review was enlightening regarding the significance of evaporation. Its importance took on real meaning to those who have lived through destructive droughts, when we learned that evaporation from a stockwater pond often dissipates as much water as is used in a year by 500 head of cattle. It was shown that in the Western States, each year evaporation losses exceed the aggregate capacity of half a dozen of our major conservation reservoirs, while for the United States as a whole, evaporation from lakes and streams exceeds the total use of water by all the cities and towns of the Nation.

The staff report summarized the initial results of the experiments with evaporation suppressants already started in the United States, Australia, and several other countries. On the basis of this information, the Senate responded generously to Senator HAYDEN's and my recommendations that funds be appropriated to the Department of the Interior for evaporation control work. Just within recent weeks, Congress provided a substantial expansion of those studies and tests. The reasons for this interest and support warrant review here because they concern you both as scientists and citizens.

The charter of the American Chemical Society issued pursuant to a special act of Congress includes among its objectives "by its meetings, professional contacts, reports, papers, discussions, and publications, to promote scientific interest and inquiry; thereby * * * fostering public welfare and education, aiding the development of our country's industries, and adding to the material prosperity and happiness of our people."

These are public purposes of great present significance, and this symposium furthers them in important ways. For one thing, there is its direct and very practical relation to our scarce water supplies. This is a matter of increasing urgency to our entire economy, as I shall outline rather broadly in a moment. There is also a second significant aspect of this symposium, that is, its relation to the national and international climate of contemporary life. Although perhaps less commonly recognized, this aspect is also of great concern to you as scientists and as citizens.

Your studies of methods for reducing evaporation losses, along with other resource conservation research, are of prime importance to the Nation. In the field of natural resources, the United States no longer enjoys assurance of abundance—actually, for many resources we now are a have-not Nation. This has been recognized for some time with respect to mineral resources on which the past half-century's industrial development and two World Wars have made such prodigious demands. Now, it is apparent that we also face water shortages. These water shortages threaten to limit our production, curtail our living standards, jeopardize our health, and undermine national security.

As I have just indicated, awareness of this impending water crisis has come to sharp focus in connection with the congressional responsibilities for water resource development. This led my fellow Montana Senator, MICHAEL J. MANSFIELD, in association with me, to sponsor establishment of a special Senate review of the entire water resource situation, and under the chairmanship of Senator ROBERT S. KERR, of Oklahoma, this inquiry has brought together highly significant facts about water supplies and requirements. Because some of these facts bear directly on this discussion, in the following remarks I shall use data from the committee reports.

The United States is entering a period of enormous growth that will require twice as much water as we now use. By 1980, we must expect at least 250 million people in this country instead of the present population of about 180 million. The gross national product by then should be in excess of $1 trillion per year or twice its pres-

ent size, and industrial production should be about three times its present level. As these levels are attained, the United States will grow in strength, prosperity, and well-being.

However, one important requirement for this future growth is adequate quantities of good quality water. Without an abundant supply of good quality water, agriculture and industry would be vastly less efficient, and without abundant good water, contemporary metropolitan life would be vastly uncomfortable. The need for water, experts in this field inform us, will grow from the present level of 250 billion gallons per day to about 600 billion gallons per day by 1980.

But we are already using all the water that is readily available and fit to use. At present, there is virtually no usable water to supply the new requirements that are essential to our growth.

Our basic supply of water is, in the main, fixed by inelastic factors of precipitation and runoff. To avoid the national deterioration that would be the consequence of water deficiencies, the United States must energize a comprehensive program to use more effectively all of the water resources that we have.

You scientists in this symposium have an important role in that task, and this is why Senators and other laymen await with keen interest the results of technical meetings such as this one.

Let me illustrate this with an example that has immediate relevance to this symposium. One feature of the needed water development program is a great increase in storage reservoirs to conserve the river flows that now are only partially used before they discharge into the oceans. Preliminary data suggest that we may need to more than double the present aggregate capacity of all existing reservoirs in this country—that is, to increase from the present 275 million acre-feet of reservoir capacity to almost 600 million acre-feet, possibly even more.

I need hardly point out to this group how such an increase in reservoir capacity will affect losses from evaporation. Greatly increased losses must be anticipated, particularly in view of the fact that as we proceed with construction of more reservoirs, future sites in general will be less favorable in the relation of storage capacity to the surface area exposed to evaporation. Conversely, practical methods for reducing evaporation losses can significantly reduce the requirements for storage capacity. This is true even in humid sections of the country, and it has key importance in the drier western regions.

This relationship to regional development is of deep concern because of the national interest in a balanced economy. Where increased water use is most critical, evaporation takes a costly toll of the limited water supplies and, therefore, it has especially great impact on the growth potential of the Western States. In the next 40 years, these growth potentials are expected to result in the population of the Western States being 2½ times its present size, and this in turn will require full development of western water resources. Let me put it in the specific terms of some of the preliminary studies.

On the Colorado River, for example, it appears that at least 14 million acre-feet of additional reservoir storage will be needed to conserve the flood flows that are now only partially used, and on the upper Missouri River the estimate is that an additional 30 million acre-feet of storage will be needed. Evaporation from existing reservoirs on each of these two rivers already exceeds 1 million acre-feet a year and this will, of course, be increased greatly by the additional storage. Although the reservoirs will be essential, the evaporation loss is a very high price to pay because present calculations show that by 1980 there will hardly be enough water in those river basins for consumptive uses and sewage dilution. These examples demonstrate with great emphasis that practical methods of evaporation control can be of great significance to the potential economic and population growth.

The same considerations also have great significance in many foreign countries. In fact, a preponderance of the underdeveloped areas of the world have hydrological conditions much like those of our Western States, and water scarcity likewise limits their opportunities for improved economic and living conditions.

Evaporation control work is notable for its international character, its progress literally circling the globe. Your work developed from the research of the great British scientist, Sir Eric Rideal, then crossed the Atlantic to advance here in America under your distinguished chairman, Prof. Victor K. LaMer, and again spanning an ocean, it now also numbers among its leaders Mr. Mansfield and his associates in Australia, and includes workers in several other countries as well.

It is encouraging to observe that evaporation control work is broadly based and that it enlists members of university faculties, the personnel of Government agencies, of private research foundations, and of commercial industries. Your group includes chemists, physicists, biologists, and engineers. This broad spectrum of collaboration assures cross-fertilization of ideas and supplies continuing productive stimulus. The merit of wide collaboration is emphasized throughout the Senate consideration of evaporation work beginning with the 1958 report.

Here I will digress somewhat to commend to your consideration the opportunities for contributing to important purposes tangential to the immediate research in which you may be engaged. I speak first of the development of scientific personnel. We hear often of the lack of well-trained men in some research fields, and the dearth of creative and imaginative thinking in the fields of applied science. Perhaps one reason for this may be that the younger scientists in the early stages of their careers are not aware of the broad implications that their work can have.

I like to hope that evaporation control and other resource conservation research will attract these younger men, open new perspectives to them, and be a means for strengthening our resources of trained scientific manpower. In furtherance of this, it is gratifying that there are a number of research contracts between the Bureau of Reclamation and various colleges and universities, and that this collaboration received express approval of the Congress this year in providing increased funds for evaporation studies. It is particularly gratifying that the cooperative program with the State college in my State of Montana is especially well suited for training research men.

Would it not be desirable to make professional training in this broad sense of the term a continuing feature of cooperative research contracts and, in connection with that, to provide collaborating scientists access to the ideas and information revealing the significance of their field of work? Younger scientists, I am certain, are responsive to this, and I am confident also that the enhanced satisfaction in their work will fully repay the effort.

A little earlier I touched on the international character of evaporation control work, and I wish to explore this somewhat more. The internationalism of your scientific work gives you special qualifications to focus the advances that you make in technical problems so that they also will be advances in the problems of world peace. In the formation of the United Nations Educational, Scientific, and Cultural Organization, at which I had the honor to represent the United States, science was recognized to be a major factor in achieving the purposes of the United Nations Charter from which I quote the initial words:

"We, the peoples of the United Nations, determined to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of the human person."

Now, when the hungry two-thirds of the world seethes with violence that threatens the institutions of freedom, I recall to you the words of a great contemporary American who warned that "A hungry man is not a free man."

We have a deep concern with the water supply problems of Asia, Africa, and Latin America. Water is needed there to set men free from want, and time is short. All of us are joined in the race against time to guide the force of men's aspirations from violence into constructive channels that will provide the material basis for freedom.

Perhaps your scientific work can provide methods for immediate improvement of water supplies in underdeveloped countries. In the light of our own experiences when droughts dried up the West, it seems to me that control of evaporation losses from existing impoundments, even quite small ones, should be significant in bettering living conditions in arid regions.

In concluding, I will express one further hope and conviction regarding science in the modern world. In his last inaugural address, Franklin D. Roosevelt stated for us the grave lesson of this century—he said:

"We have learned that we cannot live alone, at peace; that our well-being is dependent on the well-being of other nations, far away."

The middle years of the 20th century are darkened by the terrifying shadow of the atomic cloud—terrifying because we have not yet learned how to work together so that its destructiveness will be transformed to beneficial and productive purposes. It is enormously encouraging to observe the wide collaboration and the spontaneous internationalism of scientists engaged in work such as yours on evaporation control. The international community of technical workers at today's meeting gives renewed confidence in men's ability to work together and in the words of your charter, "add to the material prosperity and happiness of our people." I am grateful for the opportunity to further this effort, and I wish you continuing success in all its aspects.

Hon. Gordon Canfield

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. REES of Kansas. Mr. Speaker, GORDON CANFIELD is retiring from the House of Representatives after many years of devoted service. He has represented his district faithfully and well. More than that, he has represented the people of this country. As a member of the House Committee on Appropriations, Mr. CANFIELD has worked diligently. He has been fair in his efforts to represent the taxpayers as well as those who appeared before his committee seeking appropriations for the various departments.

As above suggested, he has had the reputation of being more than fair to

all parties concerned. He is respected for his honesty, his industry, and his ability. He has served the country well. We wish for him the best that life can hold.

The Forgotten Men: Veterans of World War I

EXTENSION OF REMARKS
OF
HON. MORGAN M. MOULDER
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, several months ago I introduced H.R. 7405, to amend chapter 15 of title 38, United States Code, to provide a pension of $100 per month to World War I veterans.

The veterans of World War I are, indeed, a special and unique group. They have not been treated on a par, in terms of veterans' benefits, with the veterans of other wars. There is a debt owing to the veterans of World War I based on the fact that this Government has shown greater and wiser concern for the veterans of World War II and of the Korean war. There was no GI bill of rights for the veterans of World War I as there was for the veterans of the other two recent wars.

Mr. Speaker, the veterans who went soldering in World War I lost a definite value out of his life and his career. This he was never permitted to retrieve, as the other and later veterans were permitted to partly retrieve to some extent through the GI bill of rights. World War I veterans got some benefits to be sure, but nothing in proportion to what the country rightfully gave the others. My proposed pension of $100 a month only corrects that inequality. Since it only corrects the inequality it does not create any dangerous precedent.

Mr. Speaker, the very justice of the World War I veterans' case should make it publicly acceptable and I believe the people of the United States generally would approve it. Moreover, the statistics from an actuarial standpoint show that such a pension is sound fiscally and far from a burden to the Federal budget in relation to the results it would produce. There are approximately 2,600,000 World War I veterans. The cost of the program therefore in the first year would come to about $1.8 billion. This would be gradually but consistently reduced since the average age of World War I veterans is now 65.7 years. For example, some 9,000 World War I veterans died last month. For the second year the program would come, according to estimates from the Veterans' Bureau, to something less than $1.78 billion. The third year it would be less even than $1.7 billion, and so on. The sum is formidable to be sure. But it is not by any means an unsurmountable problem in a nation with a gross national product now rapidly climbing to $500 billion annually.

Mr. Speaker, veterans' pensions would be spent for the necessities of life. They will serve as an effective builder of morale by aiding in preserving the self-respect and pardonable pride of veterans who served their country with honor in a national emergency and who, it is understandable, have a natural reluctance against becoming objects of public charity in their declining years.

In theory, Congress has always considered the pension rate as an adjunct to income rather than as supporting income. In this connection, however, many World War I veterans because of advanced age and disability have no other income to support them.

Mr. Speaker, if our Federal Government can afford to spend and give away billions of dollars every year to foreign countries, some of which is used to pension their veterans, then why can we not pension our own soldiers of World War I? I shall continue my fight to secure action on my bill to provide a pension for these veterans.

Mr. Speaker, never must we forget the defenders of our country, of our faiths, and of our institutions. I cannot think of them without sentimentality, or without remembering the words of the poet, Carl Sandburg:

The strong men keep coming on.
They go down, shot, sick, broken.
They live on fighting, singing, lucky as plungers.
The strong mothers pulling them on.
The strong mothers pulling them from a dark sea, a great prairie, a long mountain.
Call hallelujah, call amen, call deep thanks.
The strong men keep coming on.

Congresswoman Martha W. Griffiths Reports to the People of the 17th District of Michigan

EXTENSION OF REMARKS
OF
HON. MARTHA W. GRIFFITHS
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mrs. GRIFFITHS. Mr. Speaker, under leave to extend my remarks in the RECORD, I take this opportunity to provide the residents of the 17th District of Michigan a brief résumé of major legislation and of my activities as their Representative in the 86th Congress.

This is the year of the census. Our district has grown from 333,498 in 1950 to 514,959 in 1960, making us the fifth largest congressional district in Michigan, and the second largest in Wayne County, which is now the third largest county in the United States, exceeded only by Cook County in Illinois and Los Angeles County in California.

This Congress will go down in history for expanding our horizons into the Pacific by admitting Hawaii to the Union and by extending our search into outer space by providing the National Space Agency with almost $1 billion for its work.

This Congress has also witnessed the trial of democracy throughout the world. The 1st session of the 86th Congress, the longest peacetime session in 37 years, adjourned at 6:22 a.m., on September 15, 1959, as Khrushchev was about to arrive in Washington for what was to have been an exchange visit with our President, Since that day, the honeymoon between the administration and the Communists has come to an abrupt end. In an historically amazing act, the President admitted that Powers, whose plane was brought down in Russia, was our spy and the breakdown of the Paris summit and the Geneva disarmament conferences followed. Khrushchev withdrew his invitation to our President to visit the U.S.S.R. Anti-American rioting in Japan forced the cancellation of a Presidential visit there. And so it goes, Cuba, the Congo, the Dominican Republic. Our country has lost so much ground in the past 8 years, so much stature and prestige in the world, that Congress and all thoughtful people must give this problem first consideration.

Our foreign policy is determined by the executive branch of our Government. However, Congress helps implement the policy by appropriations, and so forth. This Congress added over $1 billion to the defense appropriations which already averaged $40 billion a year. At the insistence of the President, Congress cut the Cuban sugar quota completely, allowing the President to restore it as he wishes. We also provided for U.S. participation in the International Development Association, along with 67 other countries, to help provide assistance to underdeveloped countries; approved the Antarctica Treaty and the Treaty of Mutual Cooperation and Security Between the United States and Japan; provided that economic aid may be extended to any nation, except the Soviet Union and the Communist-held areas of the Far East, if the President determines it important to U.S. security. After 7½ years in office, 3 weeks before adjournment, the President asked for and Congress authorized $600 million in mutual security funds for Latin America, an area that has long been neglected. Congress has responded to leadership in the field of foreign affairs but more often than not, lately, it has had to lead.

Congress for the first time in 12 years reconvened for a special session this year to finish their uncompleted business that was interrupted by the business of the political conventions. Actually, compromises on many legislative proposals were impossible to obtain and the gavel brought the end of the 86th Congress, with less accomplished than I wanted but far, far more than the President desired or even was willing to accept. On February 7, 1960, the New York Times wrote:

> There is something wrong with a country that has bigger and better tailfins at the same time that it has a second-best defense posture, a worsening slum problem, dirty rivers and streams, inadequate health services, and wretched underfinancing of education.

Obviously the spending of more money is not the answer to our problem. Mr. Eisenhower has produced the biggest peacetime budgets in history yet the problems are still with us. It is how we

spend our money that really matters. I have long maintained that $10 billion alone could be saved in our $40 billion defense budget if proper procurement procedures were instigated and duplication and waste kept to a minimum. For example, this administration wanted to let the Renegotiation Act die. I appeared, along with others, before the Ways and Means Committee urging that it be extended and it was. This act provides for the recovery of excess profits on defense contracts and annually the Government recovers millions of dollars as a result of this Act.

Criticism has been directed toward Federal expenditures. Most Americans are not aware that of the total Federal expenditures of over $77 billion in fiscal year 1960, almost $42 billion was spent for national defense, $3½ billion for the foreign-aid program which related to the national security, $2½ billion for atomic energy development and research, $5½ billion for the cost of services to veterans, present, past, and future. In addition, $9.2 billion was spent in fiscal 1960 to pay interest on the Federal debt, which interest payment had almost doubled from $5.8 billion in 1952 because of administration policies which favored a hard-money policy with higher interest rates to lenders.

With the addition of $5½ billion on the farm support program, slightly over $10 billion remained for all of the other important functions of the Federal Government including its frequently criticized welfare programs.

Obviously, a $10 billion savings in our defense budget from better purchasing techniques would permit us to reduce our debts and to achieve a more secure domestic economy.

In spite of Presidential vetoes of distressed area legislation, housing bills, flood control legislation and legislation for hard pressed postal and other Government workers, this Congress has looked squarely into and has spotlighted the serious dislocations in our economy—into the fact of high unemployment in the midst of what is supposed to be record prosperity and has tried in many ways, through many measures, to put a more solid base under the economy.

SOCIAL SECURITY

Two major amendments were made to the Social Security Act by this Congress. A program of Federal grants to the States for medical care for the low-income aged was approved. Grants will be made available to the States for medical care for two categories of needy aged: First, those unable to support themselves who receive old age assistance, and second, those with sufficiently high incomes to exclude them from receiving public assistance but with incomes too low to cover major medical expenses.

Congress also increased the amount a person can earn and still receive benefits. Under the present law, if a retired person earns $1,200 or less a year, no benefits are withheld. However, under the new law, passed this year, a retired person may earn over $1,200 and still secure benefits, depending on how much he earns. Detailed explanation of this new plan is available in my Detroit office.

The Railroad Retirement Act was revised, increasing benefits to retired employees; and Congress extended the benefits of temporary unemployment compensation for 3 additional months to the jobless whose State payments had expired.

The program of non-service-connected pensions to veterans, their widows and children was revised to correct the many inequities in the operations of our veterans' pension program. For example, under the old law, the widows and orphans of World War II and Korean war veterans could benefit only if the veterans had a service-connected disability. The new Veterans' Pension Act of 1959 places widows and orphans of those who fought in the last two conflicts on the same footing, with the same pension rights, as those of World War I veterans.

HIGHWAY PROGRAM

Some additional funds were provided for the highway program. The administration asked for another one-half-cent-per-gallon increase in the gasoline tax and asked that the 1-cent-per-gallon increase be continued beyond June 30, 1961, with the money going to the fund, but this tax did not pass. Highway users are now paying about $1.6 billion more in taxes than is used for roads, but an amendment to transfer some of this to the highway fund was opposed by those backing the tax increase.

POSTAL AND INTEREST RATES

The administration requested an increase in postage rates, but Congress refused to increase the mail rates.

The administration also requested authority to increase Government bond interest above 4¼ percent. Although Congress increased the interest rates on the E- and H-bonds individuals can own, the authority to increase the interest rates above the present legal maximum on commercial bonds was denied by Congress. The effect of such an increased interest rate would have been inflationary. It would have burdened the taxpayers with additional billions for interest payments for a generation. All of this on the safest investment in the world, U.S. bonds. Since Congress refused this increase, interest rates on these commercial bonds have been going down.

EDUCATION

Once again Congress failed to pass legislation providing for school construction. Although this time both the House and the Senate passed school construction bills, the House Rules Committee refused to let the bills go to final conference, so they died with adjournment. The majority of the educators in our district are very much in support of this legislation.

Congress voted to extend for another 5 years the Library Services Act which provides matching funds to States for the extension and establishment of public library service in our rural communities. The State of Michigan has received $358,346 through 1960.

Under the present programs that provide Federal funds for school construction and operating costs in areas overburdened with Federal activities, such as Army installations and defense plants, the 17th District has received $2,393,363 to date and the State of Michigan $43,742,512.

LABOR

In order to strike a blow at racketeering in unions, after the exposure of many shocking abuses, this Congress passed a labor reform bill which I supported. The 17th District probably sent more mail on this subject than any other congressional district in the United States. My district said, "Solve the problem," and I hope I voted in a way which will help solve it. However, it will remain for the courts, for union members, and for management to correct finally the evils of labor racketeering.

THE CONSUMER

This Congress wrote basic new safeguards against cancer-producing chemical ingredients in our food products and refused to open loopholes in the Poultry Products Inspection Act.

This Congress vastly expanded Government research programs in the health fields—into the causes, control, and prevention of cancer, heart disease, arthritis, blindness, mental illness, and other crippling and killing diseases.

This Congress enacted a long-overdue law to label dangerous or poisonous or hazardous household products so parents will know to keep them out of the reach of children. Every year some 600,000 youngsters swallow dangerous preparations. Of these, more than 500 die.

This Congress discussed, but failed to pass, a "truth in lending" bill which would require money lenders and creditors to spell out the interest they are charging consumers. Anyone receiving a loan or who purchases products on the installment plan should know precisely how much he is paying in interest. Such a bill would go a long way toward wiping out interest-rate gouging, a practice which creates hardships, particularly among the low income groups.

This Congress also considered, but did not pass, a shoe labeling bill that would require the manufacturers of shoes to label the materials and dyes used in their shoes. This is another attempt to assist the consumer in knowing what he buys, as our fabric and fur labeling laws do now. I have long supported it.

The Secretary of Agriculture stopped grading service on lamb and mutton. Protests from small packers and consumers and the House Committee on Agriculture forced him to restore the grading service. Grading service is essential in order to maintain reliability of quality for the consumer.

In 1959, a new district office of the Food and Drug Administration was opened in Detroit. I had long advocated the establishment of a district office here. With our increasing population and the tremendous increase in the number of new foods and drugs it is essential that we provide adequate funds and personnel so that this Agency can insure us safe foods and drugs. This district office, the 17th in the United States, services

parts of Wisconsin, Indiana, and Ohio as well as all of Michigan.

GENERAL

This Congress approved an amendment to the Constitution to give the residents of the District of Columbia the right to vote for President and Vice President. To become effective, the amendment must be ratified by the legislatures of three-fourths of the States. It will no doubt be considered by the Michigan Legislature when they convene in January.

My longtime efforts to expand the distribution of surplus foods to the needy of our country by a stamp plan were temporarily successful. Congress passed a bill permitting the Secretary of Agriculture to establish such programs and Detroit was one of the first cities to apply. However, the Secretary has refused to put the program into effect. In the meantime, the surplus food stocks keep mounting and the welfare costs to the city of Detroit keep mounting.

Among the bills I have introduced is one to create a Department of Urban Affairs. We have a Department of Agriculture with a budget of almost $6 billion. We have a Department of Interior concerned with millions of acres of empty land. But we have no department of Government concerned with the problems of the metropolitan areas. A hundred years ago this was primarily a country of farms and small towns, or rural acres and villages. Today 6 out of 10 Americans—over 100 million persons—live in metropolitan areas.

As a result of the many bombings or attempted bombings of churches, synagogues, and small businesses I introduced a bill which would permit the FBI to investigate these incidents immediately. This bill became a part of the civil rights bill which was enacted into law.

By a large majority, Congress approved a bill authorizing the administration to withhold American assistance from countries which wage economic warfare against other nations which receive economic assistance from us. This was an outgrowth of congressional sentiment that the administration had not done enough to insist the the United Arab Republic end its illegal blockade of the Suez Canal and its periodic seizures of cargoes to and from Israel.

I am the first Member of the House to introduce a bill to provide for the humane treatment of animals used in tests and experiments.

PERSONAL REPORT

In addition to my legislative duties, I would like to make reference to my other work and responsibilities as your spokesman in Washington. I have attempted from the outset of my congressional service to keep the residents of the 17th District as fully informed as possible. To accomplish this, I have written a newsletter each month. If you would like to be on my mailing list, call my Detroit office.

I have taught civics in all the senior high schools in our district and I speak to many social and service groups. Last year I made two speeches in Florida, one, at the request of Mrs. Grace Cogan, sister of the late Mayor Edward Jeffries; the second, at the request of Edith Carew, a former resident of the 17th District. I also spoke at a gathering of women in Tennessee at the request of Senator ESTES KEFAUVER. Last month I was the principal speaker at the annual convention of the National Association of Women Lawyers, meeting in Washington in conjunction with the American Bar Association.

I maintain two full-time offices, one in Washington at 1516 New House Office Building, the other in our district at 14815 Grand River. My district office enables me to give you more prompt and efficient service.

Your letters, phone calls, and visits have been appreciated. I have attempted to assist you as promptly as possible. It has been a pleasure to assist many residents of our district and our local and State officials in their dealings with various Federal agencies such as the Defense Department, Federal Housing Administration, Veterans' Administration, Social Security, and the Internal Revenue Service.

In conclusion, let me say that I have done my best to be responsive to the needs and opinions of the residents of our district and to discharge my responsibility as your Representative in Congress in a way which I hope meets with your approval.

Report to the Voters of the 10th Congressional District of New York

EXTENSION OF REMARKS

OF

HON. EDNA F. KELLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. KELLY. Mr. Speaker, for 11 years I have had the honor of representing the people of the 10th Congressional District of New York in the Congress of the United States. As your Representative, I have personally written an annual report, in which I related the most important laws enacted by the Congress for that year. Of necessity, it is always a brief report, but I have tried to make it factual and realistic.

At the closing of this, the 86th Congress, I find the report a most difficult one to write. It is difficult because the events of the year 1960, both at home and abroad, are explosive and world shaking. Of necessity these events have a bearing on the policies of these United States—policies which were initiated by President Eisenhower, and which he, in turn, requested Congress to implement. It is the implementation of these policies into law which I report to the people of the 10th Congressional District.

Undoubtedly, historians will record the year 1960 as the year of crises. These crises involved great risks and affected all people—all nations in all parts of the world. They touched our most vital areas. They battered our resources. They challenged our way of life. They transgressed our political, our civic, our social, and our religious rights. These events highlighted one fact, and that is we are now at a turning point in history, not only for the United States, but for all free men. Our civilization is on trial, and on what we do in the next year or two will depend the future of mankind.

The sole responsibility for this dark period of history can be attributed to the leader of the Communist empire—Khrushchev Incorporated. Many peoples of the free world have failed to realize that there is one, and only one, ultimate goal for communism, and that is world domination. Communist flirtations with democracies is only part of Communist strategy. It is the great illusion and must be recognized as such. Thus, the jovial smiles of Khrushchev hide his ominous objectives. Many people of the free world have been lulled into an apathetic state by these smiles. Since there is no shooting war, Khrushchev's dire threats and implications have been pushed aside as so much grandstand strategy. By playing down the grave danger of communism, President Eisenhower has caused us to forget the Russian's worldwide economic-political offensive with its central planning and clearly defined goal.

Thus, 1960 ushered in the year of the great illusion. The continuing "peace and prosperity" theme of the Eisenhower administration, coinciding with the jovial smiles of Khrushchev, rocked the free world into a state of belief that a just peace was at last within reach.

The Paris summit, the stalemate of the Camp David meeting, the cancellation of the President's visit to Japan, the Cuban situation, Khrushchev's deceptive peace maneuvers—these events added up to accomplishment for Communist aims. Military defense was made to appear as sufficient and arms reduction without controls followed as a natural entity. Seeds of disunity among the Allies were planted. To the new nations waiting on the threshold of democracy, Russia was made to appear as a benefactor of mankind—despite its hypocritical mouthings about peace and justice.

The events of the year 1960 throughout were worldshaking and produced enormous crises. For years to come, historians will trace their effects upon the course of civilization. Despite the many and great obstacles the Communists have placed in the path of democracy, there have been gains for the free world. Western European countries, having recouped their losses from World War II, have reappraised the world situation and laid foundation for unity and progress.

Today, the Europe of the six—Belgium, France, Germany, Italy, Luxembourg, and the Netherlands—has built a formidable economic machinery on its territory. The Schuman plan, aimed at European integration, has laid the groundwork for a common market. Given time and balanced statesmanship, the combination of the six—mentioned above—and the seven—Britain and her partners: Sweden, Norway, Denmark, Switzerland, Austria, and Portugal—to-

gether with the United States, can bring about a free world as an established fact and not mere wishful thinking.

This unprecedented revival of Western Europe is credited to the selfless U.S. assistance since World War II. With this unprecedented revival, European nations must now become full partners with the United States in defense of the free world. The principle of the rights of man for all persons must be defended—for all people, for all nations. This objective has led the free world into direct conflict with the Communist leaders of the Kremlin, who will use any and all methods to achieve their objectives. This has forced the free world to realize that no nation can go it alone—there must be mutual, cooperative assistance among free people and free nations. In 1948 the Democratic Party initiated the Truman doctrine, which is now agreed upon as successful, but the failure of the Republican Party to take this program from its inception into the space age is the reason for the enormous problem facing the United States in 1960. No matter who the next President may be, his challenge is to reestablish a sound moral foreign policy and a sound U.S. economic policy.

I mention the above because the Subcommittee on Europe of the House Committee on Foreign Affairs issued a report on this subject. It is House Report No. 1226, dated January 25, 1960. I am the chairman of this subcommittee and, after a factfinding trip to Europe in the fall of 1959, we made many recommendations. In the report, I recommended a complete review and reevaluation of the U.S. foreign policy, including a review of the foreign aid program which partly implements that policy.

This will require coordinating of tariff policy, agricultural surplus programs, all bank loans and investments, business investments and Government grants. It would also require cooperation by economic groups—labor and management in particular—because without the cooperation of these groups, Government would not be able to withstand invasion of its rights.

In the same report, I recommended a review of the total picture of the U.S. economic status including all facets of U.S. economy. This survey should include all industry, production, trade, and commerce. The report rendered must be a factual report. Unfortunately, for the past year our imports have exceeded our exports. The U.S. budget is about $80.1 billion. The national debt is $288.7 billion and the interest on this debt is near $10 billion.

NATIONAL ECONOMY

With the new Soviet economic offensive, the overriding issue regarding our economy is whether our rate of yearly economic growth is sufficient. While we have been creeping with a low annual growth rate, Russia has raced ahead of us. This in great part was caused by the administration's restrictive policies. If we are to lead the world, we must institute sound new policies which will permit our economy to once again be dynamic. This cannot be accomplished by increased interest rates for which the administration fought so hard. The passage of time proved the fallacy of such reasoning.

During this session of Congress, our national debt limit was extended from $285 billion to $293 billion; the 52 percent corporate tax rate and excise taxes on cigarettes, automobiles, transport of persons, and telephone calls were continued. The cabaret tax was reduced from 20 to 10 percent.

Public Law 470 will now permit the deduction of all medical expenses incurred by a taxpayer for the care of a dependent parent over 65 years of age.

NATIONAL DEFENSE

Throughout the past year, distinguished experts have questioned the adequacy of our national defense effort. There were those, including the President, who insisted that the U.S. defense organization was the strongest in the world and completely adequate. There were many who felt that the President was placing budgetary consideration above our true defense needs. Suffice it to say that after the Congress appropriated more money for defense purposes than was requested, the military made use of it. The overall defense appropriation was $39,996,608,000 in comparison to $39,335 million requested by the President. In addition, $211.4 million was authorized to the Atomic Energy Commission and $970 million to the National Security Agency.

MUTUAL SECURITY BILL

Part of the U.S. defense is the Mutual Security Act. This was extended for 1 year and authorized $1.3 billion for economic assistance, technical cooperation and special programs; $2.7 billion was appropriated for military assistance and the Development Loan Fund; $600 million additional funds were appropriated for Latin America, including $100 million for earthquake relief for Chile.

Provisions were made for U.S. participation in the International Development Association to help provide assistance to underdeveloped countries.

GOVERNMENT ORGANIZATION

One of the most important pieces of legislation was that which increased salaries for postal workers and classified Federal employees. These loyal Federal employees, who have been subjected to tremendous economic pressures by the rising cost of living, have long been deserving of increased salaries.

The legislation which increased postal workers' salaries by 8.4 percent and other Federal employees by 7.5 percent was initially vetoed by the President. The President's veto was easily overridden.

Unfortunately, the President saw fit to veto legislation which would have extended aid to depressed areas of the country. This once again showed the Republican administration's disregard for the interests of the poor and indigent.

WAGES

At the 1st session of the 86th Congress, legislation to increase the minimum wage was introduced in both Houses. Senator KENNEDY spearheaded the legislation in the Senate. His bill called for an increase to $1.25 per hour and would have extended protection to millions, while the House bill provided for $1.15 per hour. As a result of the absence of Executive leadership and the threat of a veto, this most important legislation was, after passage, stalled in conference. I was deeply disappointed.

CIVIL RIGHTS

The 86th Congress made history by passing the first civil rights bill, under the leadership of Senator JOHNSON in the Senate and Brooklyn's Congressman CELLER in the House. This legislation provides for the appointment of referees by the Federal courts to safeguard voting rights. The law provides penalties for the obstruction of court orders and requires the preservation of Federal election records for 2 years.

VETERANS

Bills were enacted of particular benefit to veterans.

Public Law 665 extends for 2 years authority for VA loans to veterans for homes, farms, or businesses.

Public Law 499 provides additional compensation for disabled veterans with more than three children.

Public Law 663 provides additional compensation to certain disabled veterans.

Public Law 497 waives payment of premiums on national life insurance policies for certain totally disabled veterans.

NATIONAL RESOURCES

Water pollution is a problem which directly affects every man, woman, and child in the United States. It robs us of our health, recreational facilities, and the natural beauty of our country. Any effort we can make to reduce this hazard is for the benefit of the public. The President's veto of H.R. 3610 which would have provided $90 million to help eliminate the problem was unconscionable.

SOCIAL SECURITY

In the past 5 years, more and more attention is being directed toward the problems of our senior citizens. The increased cost of medical care has created an urgent problem for people who are retired on fixed incomes—especially in the case of older people who require more care.

With these problems in mind, the Democratic Congress embarked on a legislative program which would have provided medical care to the aged through the social security system. This legislation created more public interest than any other bill in recent years.

Again, the lack of Executive leadership, and threat of the exercise of the Presidential veto, caused a less effective bill to be enacted. H.R. 12580 provides for a Federal-State program of medical care for the aged. It is not as effective as the Forand bill and is not operated within the structure of the social security system. This was one of the major disappointments of the session.

CONCLUSION

I realize the enormity of the problems of the United States Presidency, including the terrifying responsibilities of this trust. However, I feel that the Republican administration has emphasized "peace and prosperity"—a "don't worry,

everything is all right" policy—at a time when every citizen should be alert to the gravity of the world situation. The administration recognizes the cold war, a cold war which shifted from the Far East and Middle East to the U.S. back door—Cuba and South America, while a hot war rages in Africa. It is well known that all this is instigated and/or ignited by the Communist leaders of the Kremlin.

It is the responsibility of the Presidency to remain ever alert and constantly to remind the American people and the free world that any concession made by the Communists is a tactical maneuver or expediency. The Communists will repudiate without qualm their actions and agreements when necessary for them or when they so desire.

Thanks to the Soviets, peace, mankind's deepest longing, is still a vision. However, the American dream of attainment of world peace and disarmament, based on world order and law, on the mutual respect among free men and on a world economy, is still a noble aim, and with every American shoulder at the wheel can be brought close to accomplishment in this, our time.

The responsibility of serving the residents of my district for the past 11 years has been a great privilege. My office is open 6 days a week and letters sent to my Washington office receive immediate attention. My address is EDNA F. KELLY, Member of Congress, Washington 25, D.C.

During such times as Congress is not in session and I am not out of the country on matters concerning my chairmanship of the Subcommittee on Europe of the House Committee on Foreign Affairs, I am available to see my constituents personally at the Madison Club, 739 Eastern Parkway, Brooklyn, on Monday and Thursday evenings.

United States-Israel Cooperation

EXTENSION OF REMARKS
OF
HON. HUBERT H. HUMPHREY
OF MINNESOTA
IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by me on United States-Israel cooperation.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUMPHREY

As sponsor of the food for peace program and being deeply interested in finding markets abroad for America's agricultural abundance, I derive great satisfaction when I hear of a situation that contributes greatly to the sale of surpluses, utilizes the proceeds of such sales for expansion loans and makes an outstanding contribution to the development of a friendly nation.

We find such a situation in Israel, the biggest per capita market for U.S. grain exports in the world. In 1959 U.S. wheat, feedgrain, and soybean exports to Israel had an f.o.b. value of more than $44 million. Of this, approximately $25 million were local currency sales under Public Law 480. Dollar barter, and section 402 sales totaled about $19 million. The export of this volume of grains to any country is of considerable interest to the farmers of Minnesota and other grain producing States.

Practically all of these U.S. exports move into Israel through the Dagon Silo at Haifa. This facility has benefited from the Cooley amendment to Public Law 480 and contributes to the economy of the country by greatly reducing foreign exchange costs. I believe the Senate should know more about this meaningful and interesting project.

As the visitor to Israel approaches Haifa, by land or by sea, his eye will certainly be caught by the esthetically designed "skyscraper" near the harbor and next door to the railroad station. This is the Dagon Silo, the tallest—almost 200 feet—building in Israel and, based upon its performance record, one of the busiest. But it is not its height nor its artistic design that is of primary interest. Rather, it is the relationship of the functions of this building and the company that operates it to American-Israeli economic cooperation that is dramatic.

With a 51-year concession from the Government of Israel for operation in Haifa Harbor, this facility was incorporated in 1951. The present 20,000-ton silo was completed in the summer of 1955. A model of efficiency, Dagon is also a monument to free enterprise in operation and international financing, including American.

Dagon's American economic ties include the participation by many American investors; the handling of hundreds of thousands of tons of American wheat, feed grains, and soybeans purchased for dollars, bartered for industrial diamonds, and bought under the provisions of Public Law 480; and the expansion of its present facilities through a loan from the Export-Import Bank under the Cooley amendment provision of Public Law 480.

Dagon was founded by Dr. Reuben Hecht of Basel, Switzerland. Dr. Hecht, whose family has handled grain for generations throughout Europe, lives in Haifa and personally directs the operations of Dagon. Dr. Hecht is also the largest individual investor in the enterprise. Investors include Israeli, Swiss, American, Canadian, and Mexican shareholders. One hundred and eighty-four American investors have subscribed to both capital and 10-year loan certificates of Dagon. Of the total investment in Dagon, that from America amounts to 34 percent. For the past 3 years, investors have received dividends of 8 percent per year on share capital.

Because of the importance of the Dagon facility in moving American agricultural products—wheat, feed grains, and soybeans—Dagon applied for, and received, an Export-Import Bank loan of I£1,550,000. This is being used to construct new bins and elevators which will more than double its current capacity. By October 1960, Dagon will have a capacity of 44,000 tons. Further expansion to 70,000 tons is planned in the near future.

The Dagon silo, in 1959, handled a greater turnover relative to its capacity than any other silo or grain elevator in the world. With a total capacity of 20,000 metric tons, the facility discharged and loaded 74 vessels, carrying 659,858 tons of grain, almost 33 times its capacity. This compares with a U.S. record of 20 times capacity, and a European record (in the port of Rotterdam) of 7 times capacity.

This efficiency was recently rewarded when the Israel Institute of Productivity of the Ministry of Labor awarded both Dagon and Dr. Hecht the 1960 Eliezar Kaplan Prize for Efficiency.

On a per capita basis, Israel is the United States most important customer for wheat and soybeans and the second most important for feed grains. Soybean imports, none of which are purchased for local currency, amount to 3 bushels per person. The second highest per capita importer is Denmark at 1.5 bushels.

In 1959, U.S. exports of grains to Israel totaled:

	Metric tons
Wheat	192,700
Feed grains	334,900
Soybeans	176,200

When a grain vessel docks, the long sucker tubes are placed in the vessel's hold, and within minutes, the grain flows over an endless belt through a raised tunnel clearing the docks and railroad tracks into the elevator proper. Discharge is at the rate of up to 265 tons per hour and 5,000 tons per day is not unusual. Once in the bins, grain can be bulk loaded into railroad cars or specially designed truck bodies for inland movement. Facilities are also available for bagging. The entire operation is directed from a master control center in the office section of the building. A huge electronic board indicates at all times the status of grain loading and unloading.

The office building, incidentally, contains interesting archeological exhibits developed by Dr. Hecht, who is recognized as one of Israel's outstanding amateur archeologists.

The ability to handle grain in bulk rather than in bags has resulted in substantial savings to the Israeli economy. It is estimated that for 1959, the Dagon facility saved the Israeli economy $2 million in foreign exchange and I£2.5 million in local currency. The savings resulted from (1) shifting grain handling from bags to bulk; (2) virtually eliminating demurrage costs; (3) earned dispatch; and (4) reduced vessel turnaround time, allowing the lowest possible freight rates for charters.

American visitors to Israel should include on their itineraries a trip to the Dagon Silo. Such a trip will dramatically demonstrate how economic cooperation between Israel and the United States benefits both nations. Most important of all is this living demonstration of how we do use our agricultural surpluses in a positive and valuable manner, how we help ourselves to enlarge our markets and how we cooperate with free people in common endeavors.

Twentieth Anniversary of the Ukrainian Congress Committee

EXTENSION OF REMARKS
OF
HON. EMANUEL CELLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, I am pleased to insert in the RECORD the following message sent by me to the chairman of the Ukrainian Congress Committee of America, Inc., on the occasion of this committee's 20th anniversary:

Mr. LEV E. DOBRIANSKY,
Chairman, Ukrainian Congress Committee of America, Inc., New York, N.Y.

DEAR MR. DOBRIANSKY: I am happy to join with millions of Americans in marking the 20th anniversary of the Ukrainian Congress Committee of America.

There can be no doubt that the 20 years of work of your committee has been of inestimable value, not only to the 2½ million Americans of Ukrainian ancestry, but to all Americans who cherish the ideals of freedom and dedication to the good fight.

Your committee has been an unfailing source of accurate information concerning the captive nations who cannot speak for themselves.

In appreciation,

Sincerely,

EMANUEL CELLER.

The Challenge of the 1960's: Education—Our Greatest Nonmilitary Crisis

EXTENSION OF REMARKS

OF

HON. FRANK KOWALSKI

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, I am proud to have been a cosponsor of the Murray-Metcalf bill, which would have made Federal funds available to the States for school construction and teachers' salaries.

I have said many times, and I say again that, except for our very survival as a nation, there is no more important issue facing America today than the crisis in education. Only with a broad Federal program to supplement the work of the States and local communities can we meet that crisis.

If I am returned to Congress by the voters of Connecticut, I shall again submit my education bill, H.R. 4379, which is identical with the Murray-Metcalf bill and which will provide the means to meet our school crisis.

It is significant that the deciding vote in the Senate against the provisions of the Murray-Metcalf bill—as contained in the Clark amendment—was cast by the man who is now the Republican candidate for President—Vice President NIXON. His vote against Federal funds for school construction and teachers' salaries is typical of the administration's cynical attitude toward education, as demonstrated so often during the past 8 years.

The administration's failure to take decisive action has contributed in large part to the worsening of our crisis in education.

FACTS ON THE SCHOOL CRISIS

We have good reason to be alarmed about our school problem. Consider these facts:

We have a shortage of more than 130,000 classrooms.

One school in every five is an antiquated firetrap and another one in five is on the safety borderline.

Classroom shortages are impairing the education of 10 million children, according to the administration's Secretary of Health, Education, and Welfare.

We have a current shortage of more than 135,000 teachers.

More than half the classrooms in urban districts now have more than 30 children each, although most educators agree that grammar school classes should contain no more than 30 pupils and high school classes no more than 25.

Almost 100,000 teachers—or over 7 percent of all teachers in the country—have only temporary or emergency teaching certificates.

THE YEARS AHEAD

These facts are sobering enough, but the problem will become even more critical in the next decade.

By 1970 we will need 1,500,000 new teachers—at a minimum—which means 150,000 new teachers a year for the next 10 years.

We must provide facilities for more than 20 million additional students in our schools.

Our colleges must erect more new buildings in the next 10 years than they built in the previous 200 years.

SCHOOL NEEDS NEGLECTED

During the past 8 years, our school needs have grown more and more acute.

States and local communities have strained their resources to provide for the ever-increasing school population, but the Federal Government has shirked its responsibility.

State and local spending for education increased from $7.2 billion in 1950 to $15.8 billion in 1958. During this same period, States and local communities increased their bonded indebtedness from $24.1 billion to $58.1 billion, with much of this new debt resulting from school construction. In depressing contrast, all Federal expenditures for education in 1958 totaled $917 million.

Many communities have raised their taxes virtually to the limit but still have been unable to keep up with their school needs.

Half-day sessions mean part-time education, and too many of our children are penalized through the shortage of adequate classroom facilities.

RISING COSTS HURT

Mounting construction costs during the past 8 years have been a key factor in the classroom shortage. Building costs have climbed 42 percent during the present administration.

High interest rates resulting from the tight-money policy have meant higher costs for local communities and school districts. Interest rates on State and local bonds are 91 percent higher than they were in 1952.

In 1952, total interest charges on 30-year bonds for $500,000 grammar school were $164,000. Today they amount to $314,000.

Higher construction costs and higher interest rates have contributed their share to the crisis in education.

OPPOSITION TO SCHOOL AID

Opposition to Federal aid is often based on the claim that it would result in Federal interference with local control of education.

All the major bills, including the Murray-Metcalf bill, contain specific prohibitions against any control from Washington. Full supervision of schools would remain in local hands.

The history of education legislation proves such a fear to be groundless.

Federal assistance for land-grant colleges has been in effect since the days of the Civil War without any claims by the States of interference from Washington.

The Defense Education Act has made Federal funds available for special educational purposes without bringing any allegations that the Federal Government is interfering with State or local rights.

Likewise Public Laws 815 and 874, which provide Federal aid for schools in impacted areas, have been administered without lessening, in the slightest degree, full local control of schools.

MEETING THE CHALLENGE

First. To meet the challenge in education, we must first make Federal funds available to the States for school construction and teachers' salaries.

Second. We must establish a broad Federal program of scholarships and loans to insure that every qualified young American has an opportunity to complete his education regardless of his family's income. It is tragic that in a nation of our vast wealth there should each year be 100,000 talented young people, ranking in the top quarter of their high school graduating classes, who cannot go on to college for lack of funds.

Third. We must improve and expand the Defense Education Act.

Fourth. We must provide for Federal assistance to colleges and universities to help them provide the academic facilities and living quarters that are needed in the decade ahead.

Fifth. We must establish adequate programs for vocational education, adult education, private libraries, use of new techniques including educational television, and exchange of teachers and students with other countries.

Our children are our most precious possession. It is unthinkable that we should continue to shortchange them and dim their future.

We must keep faith with our children, and with America.

De Gaulle Is Right

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, at his recent press conference in Paris, President de Gaulle made some very constructive suggestions which show deep understanding of the many complex international problems with which the world is now confronted, and a keen desire to do something about them.

Pointing out that Khrushchev and his Red cohorts have injected themselves with their ideology and military strength into Africa, the Middle East, southeast Asia, and even the Western Hemisphere, President de Gaulle wants the United States, Great Britain, France, and their allies to meet this menace head on. He sees danger in our lack of unity, and urges that our differences be ironed out so that we may act as a strong, united front.

Although he does not say it in so many words, his meaning is clear. Washington must wake up to the realization that sinister forces are in motion. Russian

planes and so-called technicians in the Congo, and the threat to supply Cuba with rockets are indeed cause for anguish and trepidation. And all we hear from the administration in Washington are pious words of protest. Words, words, and more words. But no action. Words will accomplish nothing. Nor will startled reactions or verbal answers to Khrushchev's propaganda moves avail us anything.

We must take the initiative. We must force Khrushchev to dance to our music. We must take strong diplomatic action that will startle Khrushchev and make him worry about what to do next. His massive propaganda machine must be halted. I have enough faith in our American people to believe that there are plenty of ingenious minds in Washington who can conceive ways and means of silencing Khrushchev.

President de Gaulle very rightly stressed the necessity on the part of the United States, Great Britain, and France to organize politically and strategically, not only on behalf of the democracies of Europe. It is vital, he emphasized, that the Western Powers broaden their horizons and concern themselves also with Africa and the other trouble spots of the world.

Fifteen new nations, all in Africa, have been recently admitted to the United Nations, and several more will gain membership before the end of the current year. We must focus our attention on these nations. We must act to prevent inroads upon them and subjugation by the Soviets.

As it is now constituted, NATO cannot cope with these problems. The first decade of NATO's existence has ended. The world situation has changed immeasurably in these last 10 years, and the organization of NATO must be changed accordingly. It must be revised to meet new conditions. In the words of General de Gaulle, it must be "reactivated." All NATO forces, he says, must revise and coordinate their policies to include not only the continent of Europe, but other parts of the world as well, particularly Africa and the Middle East.

The French President places great emphasis—and rightly so—on the importance of such revision because we cannot afford to allow the aggressive actions of Khrushchev—both overt and covert—in Africa, Cuba, and the underdeveloped areas, to go unchallenged. Our course of action will require the greatest tact, courage, and resourcefulness. To quote President de Gaulle once more, "Divided councils are dangerous. We cannot afford to go our separate ways, nor can we afford the luxury of rivalry among ourselves."

I do not blame De Gaulle for refusing to subordinate French sovereignty to either a united Europe or a NATO. He would like to see France as a coordinate member of a European confederation in which England is also included. I firmly believe that we should encourage this idea. Our greatest strength lies in a European entity—a continent of nations, each maintaining its own identity and sovereignty, but at the same time cooperating in mutual defense, economic welfare, diplomatic and political matters on an international basis, and in cultural affairs. Such a confederation would have a deliberative assembly made up of delegates from the national parliaments of the respective member countries.

General de Gaulle is also correct, in my opinion, in brooking no interference on the matter of Algeria. That country has been an integral part of Metropolitan France for more than 130 years. France has poured her lifeblood and billions of dollars into Algeria. And, if left to her own devices, she will settle her differences with the Algerians without any help or advice from other countries or the United Nations.

We Americans should readily understand De Gaulle's testiness when France is criticized for her policy on Algeria. Suppose we were confronted with cries of independence from Hawaii and Alaska, and France, together with other nations, applauded such efforts. How would we react? What would we say? Would we be complacent or resentful?

There is no doubt that we would firmly resist such a movement for independence on the ground that both Alaska and Hawaii are integral parts of the United States. This is what France claims for Algeria—that it is part and parcel of France. And, just as France maintains, we would tell the world that we will settle our own affairs without the gratuitous counsel of the United Nations.

The carving out of new nations into geographical entities regardless of tribal groupings and affiliations, and the granting of independence without adequate preparation for the responsibilities of democratic government have created new world problems. We must revise our thinking with regard to the precipitous and indiscriminate granting of independence to countries not qualified to cope with it. This is grist for the Communist mill.

I admit that we cannot compare the Algerian Moslems with the Congolese. There is a vast difference in mores, education, background, and ability, to the advantage of the Algerians. But there is a similarity in the complex problems between the French, or Belgians, or European settlers on the one hand, and the civil servants and indigenous populations on the other.

President de Gaulle is trying every possible means of arriving at a just solution by which the Moslems and French can live side by side, safely and harmoniously, in mutual trust and respect.

The United States must refrain from criticizing or interfering with France or Algeria. Let us not become part of an Afro-Asian-Communist anti-French bloc. Let us, rather, stand resolutely behind our oldest, time-honored ally, the Republic of France.

Finally, we must treat France as a trusted ally and not hesitate to share with her our atomic secrets. To continue our policy of informing Great Britain and depriving France of our atomic knowledge causes needless irritation and bitterness and does not redound to our security. We must promptly remedy this situation.

Cheney Division, Wichita, Kans., Project

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. REES of Kansas. Mr. Speaker, I believe it will be helpful for the Members of Congress and others interested to have a little further information with respect to H.R. 4606 and S. 1092, being identical bills that were recently approved unanimously in the Senate and in the House.

The Cheney division, Wichita project, Kansas, is a proposed joint development between the United States and the city of Wichita in which the principal works comprising a dam and reservoir would be constructed on the North Fork of the Ninnescah River some 6 miles north of Cheney, Kans., and some 25 miles west of Wichita, Kans. The Cheney division, Wichita project, Kansas, is proposed as a multiple-purpose project to provide, first, flood protection on a regional basis; second, irrigation to limited tracts of land downstream from the reservoir site; third, recreation benefits on a regional and interstate basis in an area largely devoid of such facilities at the present time; fourth, fish and wildlife conservation benefits of national and international significance; and fifth, an urgently needed additional source of municipal water supply for the city of Wichita.

The Cheney division, Wichita project, Kansas, is a joint venture between the city of Wichita and the United States in which the city assumes its proportionate share of the risk and agrees to repay with interest the project cost allocated to municipal water supply. Construction cost of the dam, reservoir, basic recreation facilities, and fish and wildlife conservation facilities is estimated at $18,274,000. The city of Wichita has approved a proposed repayment contract and has agreed to pay an amount not to exceed $7,396,000 plus interest, which amount is approximately 40 percent of the construction cost and an allowance for contingencies, thus providing a margin of insurance against the necessity of contract renegotiation in the event of advancing prices.

In addition, the proposed repayment contract provides that the city will at its own cost of $7,650,000 construct the pipeline and related transmission facilities required to transport water from the reservoir site to the city concomitantly with the construction of the Cheney Dam and Reservoir by the Federal Government. Thus, it may be seen that the total construction cost of dam, reservoir, basic recreation facilities, fish and wildlife conservation facilities, pipeline, and related transmission facilities approximates $25,924,000, of which amount the city of Wichita will pay approximately $15 million, or some 58 percent.

Public funds for the appropriate investigations and reports have been made available both by the city of Wichita and by the Bureau of Reclamation. Data with respect to the geologic, engineering,

financial, and economic aspects of the project have been exchanged freely and on a cooperative basis between the respective municipal, State, and Federal agencies concerned.

The reconnaissance reports, the geologic reports, and the feasibility reports issued by the Bureau of Reclamation represent the combined best judgment of the various levels of government and are concurred in by the city of Wichita and its consulting engineers.

The project has been conformed to policies and legislation of the three levels of government concerned with respect to matters of water supply, flood control, irrigation, hydroelectric power, pollution, fish and wildlife, conservation, and recreation.

The project recognizes, first, the desirability of substantial financial participation at the local level in accordance with the so-called partnership policy of the Congress and the President; second, the river basin plan as the most practical approach to the development of land and water resources on a regional basis irrespective of municipal limits or State boundaries; third, the economic factors which make it impractical for a single municipality to develop a river basin water resources program without the cooperation and participation of all levels of government involved; fourth, the importance of maximum use of scarce reservoir sites and limited water resources in accordance with an overall river basin land and water resources development plan; fifth, the interdependence of water supply and pollution abatement problems and the consequent responsibility of local government to make the best possible use of its water supply for the benefit of itself and downstream users.

The city of Wichita has complied with every request for cooperative action that it has received from the Bureau of Reclamation, and the city has taken every possible action to conform the project to existing Federal and State policies and legislation with respect to water supply, flood control, irrigation, pollution abatement, recreation, and the conservation of fish and wildlife. Concluding nearly 5 years of such cooperative effort, the city of Wichita, first, has agreed to obligate itself for repayment with interest of the project costs allocated to municipal water-supply purposes; second, has agreed to construct the connecting pipeline and related transmission facilities from its own funds, unrelated to Federal financing; third, has purchased the distribution properties of the local water utility at a cost approximating $30 million; fourth, has obtained approval of the appropriate applications for water rights for the reservoir site from an agency of the State of Kansas; fifth, has complied with a pollution-abatement program as approved by the Kansas State Board of Health and the U.S. Public Health Service, including the construction of $6.5 million of additional sewage facilities; sixth, has obtained the necessary enabling legislation from the Kansas State Legislature to permit a repayment contract for the Federal Government; seventh, has secured the overwhelming approval of the electorate of Wichita in a special election authorizing construction of the proposed reservoir; eighth, has agreed to operate and to maintain the facilities after construction; and, ninth, has agreed to place the management of the reservoir for fish and wildlife conservation and recreation purposes in an appropriate agency of the State of Kansas.

I am advised that the fish and wildlife nonreimbursable costs of $4,598,000 as proposed in the Bureau of Reclamation report were calculated on the basis of established practices and procedures. The estimated fish and wildlife conservation benefits of approximately $290,000 annually were not established by the city of Wichita but were calculated by an agency within the Department of the Interior—the Bureau of Sport Fisheries and Wildlife—in accordance with the same practices and procedures which have been applied in several hundred other projects throughout the country. The capitalized value of the annual benefits represents some $10.6 million in fish and wildlife conservation benefits. Also, I am advised that the Bureau of Reclamation found in 1957 that the cost of providing similar area facilities for fish and wildlife purposes by means of constructing small reservoirs—assuming sufficient other sites are available, which assumption is questionable—would result in a greater cost than the amount allocated in the Cheney Reservoir for such purposes.

Further, I am advised that in the case of multiple-purpose reservoirs certain differences of opinion have existed historically between the Federal departments and agencies concerned with respect to the various allocations of project costs and benefits. I understand that these matters were brought into an orderly solution by the Bureau of the Budget on December 31, 1952, through the issuance of Budget Circular No. A47 providing for a uniform method of allocating project costs in multiple-purpose reservoir projects. The method is known as the separable costs-remaining benefits method. The use of this separable costs-remaining benefits method was agreed to subsequently on March 12, 1954, by the Department of the Army, the Department of the Interior, and the Federal Power Commission. It is my understanding that this formula has been applied for a good many years in the allocation of project costs in multiple-purpose reservoir projects throughout the country. The suggestion of the Budget Bureau that the flood control and municipal water supply costs be allocated on the basis of the separable costs-remaining benefits method and that the fish and wildlife conservation benefits be calculated on the basis of separable cost only is inconsistent with established procedures and the fundamental thesis that costs in all multiple-purpose reservoir projects should be allocated on a uniform basis applicable alike to all projects.

In this particular case I am informed that while an incremental amount, approximately $540,000, as suggested by the Bureau of the Budget, is presumed to provide the facilities desired for fish and wildlife conservation purposes, the proposition may be stated in reverse with exactly the opposite result. The proposed reservoir project provides for an inviolate conservation pool of some 10,000 acre-feet of water, to be maintained at all times insofar as other uses are concerned, and for the acquisition of some 2,500 acres of additional lands for fish and wildlife management. Using the same unit cost applied in the proposed Cheney Reservoir project, it has been estimated that the construction of a single-purpose, 10,000-acre-foot reservoir would cost $12 million. Thus, inasmuch as the capitalized fish and wildlife benefits are $10.6 million, it may be seen that the Federal Government is benefiting approximately $2 for each $1 allocated to fish and wildlife conservation purposes under the separable costs-remaining benefits procedure. Similarly, flood control and municipal water supply purposes are benefiting also from a sharing of joint cost and that is precisely what is intended in the allocation of the separable costs-remaining benefits procedure.

The policy with respect to fish and wildlife conservation benefits was established by the Congress and not by the Secretary of the Interior whose report recommends the amount of project costs to be allocated of conservation benefits pursuant to the statutes as follows: First, the Fish and Wildlife Act of March 10, 1934, Public Law 121, 73d Congress, which provides the basic authority for conservation of fish and wildlife; second, the Fish and Wildlife Act of August 14, 1946, Public Law 732, 79th Congress, which amends the authority of the original act and broadens the base of conservation participation; and third, the Fish and Wildlife Coordination Act of August 12, 1958, Public Law 624, 85th Congress, which further amends the original act and provides for interagency consultation for conservation purposes and for the allocation of costs to reflect conservation benefits in water reservoir projects.

I quote from paragraph 2d of the Fish and Wildlife Coordination Act, Public Law 624, 85th Congress, dated August 12, 1958:

> The Secretary of the Interior, in addition to allocations made under section 9 of the Reclamation Project Act of 1939, shall make findings on the part of the estimated costs of the project which can properly be allocated to means and measures to prevent loss of and damage to wildlife resources, which costs shall not be reimbursable, and an appropriate share of the project costs may be allocated to development and improvement of wildlife resources, with a finding as to the part of such allocated costs, if any, to be reimbursed by non-Federal fish and wildlife agencies or interests.

I quote further from Public Law 624, 85th Congress, paragraph 2f, as follows:

> In addition to other requirements, there shall be included in any report submitted to Congress supporting a recommendation for authorization of any new project for the control or use of water as described herein (including any new division of such project or new supplemental works on such project) an estimation of the wildlife benefits or losses to be derived therefrom, including benefits to be derived from measures recommended specifically for the development and improvement of wildlife resources, the

cost of providing wildlife benefits (including the cost of additional facilities to be installed or lands to be acquired specifically for that particular phase of wildlife conservation relating to the development and improvement of wildlife), the part of the cost of joint-use facilities allocated to wildlife, and the part of such costs, if any, to be reimbursed by non-Federal interest.

In view of the growing water shortage that is developing throughout our country and in view of the fact there are not now being constructed or even being planned sufficient water projects to prevent severe water shortages from developing in various areas within the next decade, it is inconceivable to me that any delay would be prescribed by the Congress. Particularly is this true in the case of a water project as urgently needed as the Cheney project wherein the local interests have agreed to pay a very substantial portion of the costs and have complied with all present Federal requirements.

Social Security and Old-Age Assistance

EXTENSION OF REMARKS
OF
HON. MORGAN M. MOULDER
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, everyone seriously studying our situation has concluded that providing for better health care for the aged is a serious problem.

For all too many of our elder citizens, long life has meant shrunken incomes, increased illness, loneliness, being pushed aside, and the shame, which should not be, of being an applicant for a handout from society.

On the 20th day of January of this year I introduced a bill in Congress to amend title I of the Social Security Act to increase the amount of Federal funds payable thereunder to States which have approved plans for old-age assistance and which maintain their expenditures for such assistance at or above the 1959 level. My home State of Missouri is one.

Mr. Speaker, my bill H.R. 9775 would, first, increase the maximum matchable payment from the present $55 per month to $90 per month; second, would revise the matching formula making it possible for the States to receive additional Federal funds for old-age assistance; and, third, would increase the old-age assistance payments, and relieve the heavy privations and burdens endured by our worthy and deserving elder citizens.

Estimates furnished to me by the Department of Health, Education, and Welfare show that Missouri would receive, under the provisions of my bill, an additional $12 million in Federal money.

I propose that all welfare payments in our States be studied and increased in line with present-day living costs.

I support all necessary appropriations to make these increases possible.

Mr. Speaker, I pledge my earnest support to expansion and improvement of hospital care for our senior citizens and others in need.

I deeply believe there should be in all States a commission established for the purpose of studying the problems of elder citizens and developing programs to give them a more dignified, satisfying old age.

Mr. Speaker, I believe in more widespread employment opportunities for our senior citizens so that they may make the fullest use of the wisdom they have stored and of the maturity that long lives and experience have brought them. Our present system is guilty of great waste.

Mr. Speaker, I pledge my efforts toward a Federal program of medical care for our elder citizens so that 14 million Americans, including nearly 400,000 of them in my State, who receive social security can face the future confident that if disability comes to them they will receive adequate medical and hospital care.

Mr. Speaker, I support an expanded program of public health services for the protection of our elder people.

I have always supported, and I always will fight for, increased benefits for our elder citizens and for aid to our disabled and needy persons.

I believe that our good American citizens who have fought the battle of life, facing the ups and downs of success and failure, facing the wheel of fortune, ought not in the twilight of their lives to be left without adequate means of support; for out of the labor of their lives they are entitled to it, and it is our duty to provide for them a life they can lead in dignity and respect during their later years.

Mr. Speaker, long years they have spent laboring in the vineyard and in paying the tax collectors. Of them, I do not like to think of old age, but of the golden age they have earned and which it is our duty to guarantee.

I remember the teachings of my parents, who told me from the Bible, "Honor thy father and thy mother, that thy days may be long upon the earth which the Lord thy God hath given thee."

Why Glen Echo?

EXTENSION OF REMARKS
OF
HON. CHARLES O. PORTER
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, not far from the Nation's Capital in Montgomery County, Md., residents of the Bannockburn community are helping write some fine pages in American history. These men, women, and children are marching in a peaceful picket line as part of their protest against segregation at the Glen Echo Amusement Park.

That community's fight has been described in detail by one of the "fighters," Hyman H. Bookbinder, in his article entitled "A Community Joins the Fight," which appeared in the July-August issue of the AVC Bulletin. The article, and one other, under leave to extend my remarks in the RECORD, follow:

[From the AVC Bulletin, July–August 1960]

A COMMUNITY JOINS THE FIGHT

(By Hyman H. Bookbinder)

Montgomery County, Md., is right above the District of Columbia border. It is, to all intents and purposes, part of the Nation's Capital, except that as part of Maryland it has the right to vote. And it has used that vote to elect a liberal county government and a liberal Congressman. Many thousands of Government workers live in the county.

The county has for many years boasted of a superb school system, and after the Supreme Court decision it carried out its integration plans quickly and successfully. So much so that when community leaders were consulted about appointing a Negro principal for the Bannockburn Elementary School, which at the time had only white students because there were no Negro children in the area, the response was unanimously affirmative.

A couple of months ago, nobody would have suggested that there was any civil rights problem in the area. Today, the county is full of it.

Glen Echo Amusement Park in the county is a private enterprise with a large swimming pool and a collection of Coney Island rides. It has been closed to Negroes for years, but even liberal Montgomery County never seemed to care very much. Recently, however, some members of the community were distressed at the fact that the county's official recreation program was using Glen Echo Park for its swimming activities. This meant that its buses and its personnel were being used to take white children to Glen Echo, while other children were being sent to the public pools in the District of Columbia. This was considered both illegal and immoral.

The Bannockburn community is adjacent to the Glen Echo community. It consists of about 200 private homes, and started out about 10 years ago as a co-op. It has a higher than average proportion of residents with labor and ADA-type backgrounds. There are a number of AVC members, too. It was no surprise, therefore, that action against the county's use of Glen Echo Park should initiate here. The PTA and the civic association soon passed appropriate resolutions.

On June 30, however, the pattern of protest was changed sharply. Lawrence Henry, a divinity student at Howard University, showed up with picket signs outside the park. He was joined by some other students, both colored and white, who had formed a nonviolent action group. That group had just succeeded in breaking the color bar in northern Virginia restaurants through the sit-in device. Numerous arrests have taken place as a result of various legal tests which were made.

That appearance by Henry and his followers had led from one exciting thing to another in the nearby communities of Montgomery County and throughout the Washington area. As of this writing, the park refuses to yield, and it may successfully hold out until the Labor Day closing.

In nearby Bethesda, a movie theater was picketed round the clock for 100 hours—"1 hour for each year since the Civil War." A Rockville restaurant abandoned segregation after several weeks of picketing led to a policy declaration by the mayor and town council. Several Bethesda restaurants did likewise.

The biggest victory of all, however, is what all of this has done to the community itself. As it has done elsewhere, the student sit-in movement has sensitized the area of activity, and encouraged others to participate in the

fight for human rights. As a parent of a couple of teenagers, I shall forever be grateful for what this has done to educate all the kids in the area.

They saw many of their parents practice what they had been preaching: walk the picket lines, prepare food for the pickets, write letters to Glen Echo and to public officials, attend meetings of the county council, and all the rest.

They saw at first hand that the fight against Negro discrimination is part of the struggle against anti-Semitism and every other form of intolerance. This they learned when the American self-styled Nazi leader Lincoln Rockwell counterpicketed us with his obscene and hateful signs.

They got into the act themselves. What some of us were beginning to fear was a lost generation, with no sense of purpose or sense of urgency, isn't quite so lost. Dozens of Bannockburn teenagers have walked that picket line for hours on end. And they have spent hours talking with the Negro students, learning directly and personally what civil rights really means.

What started as a small student protest at Glen Echo soon became a community responsibility. Then groups throughout the Capital area joined the fight. AVC brought out impressive groups. A Capital area committee for equality has been formed to work on all remaining problems.

I like to think there is a great lesson to learn from the Glen Echo experience. Most Americans believe in the furtherance of civil rights; they would like to see all segregation and discrimination just disappear tomorrow morning. But they don't know how to—or perhaps would rather not—get involved in the actual fight to secure equal rights for all. But once challenged, or given a specific objective, they will respond. They certainly will not patronize establishments known to be segregated; they will sign petitions or write letters when asked; some will walk picket lines; others will feed the pickets.

Unhappily, in these last few years the American people have not been challenged sufficiently and dramatically. President Eisenhower has not once declared that he thinks the Supreme Court decision is right; never has he made a direct and dramatic appeal to the school boards of the Nation to implement the law of the land. He has been content to declare simply that Americans must obey the laws of the land.

My Bannockburn community may be a cut above the average. Perhaps there aren't too many communities where its people will walk picket lines 7 days a week, or hold meetings till 2 in the morning, or invite 50 or 60 pickets to dinner. But I think there are millions of people who will respond if given the opportunity. The sit-in movement has thrown out a challenge to all of us. We dare not reject the challenge.

On Wednesday evening, August 24, five Members of this House went to the scene of the fight for right. I am proud to have been one of them.

I reported to my constituents a few days later in my weekly report to weekly newspapers. That report "Why Glen Echo?" follows:

WHY GLEN ECHO?

(By Representative CHARLES O. PORTER)

The grass is worn bare on the plot of Federal property near the entrance to the parking lot of the Glen Echo Amusement Park in Maryland, a 20-minute drive from Capitol Hill. The oiled surface in front of the main entrance to the amusement center also has been worn down. Nearly every day for 2 months the parking lot has been less than half full.

Americans of all ages, black and white, have been peacefully marching each day from around 5 p.m. to 1 a.m. in protest of the segregation policy of this public accommodation located in a State that claims to be integrated.

The now self-sustaining picket line at Glen Echo follows the successful peaceful "sit-ins" at many Virginia restaurants. This second step has taken longer, but the walls are tumbling.

On Wednesday evening, August 24, four other Members of the House of Representatives and I drove to Glen Echo. Four of us walked in the picket line at the parking lot entrance. I carried a sign upon which was written "Democrats Support Your Party Platform—Stay Out." My friend SEYMOUR HALPERN, Republican, of New York, carried a sign which stated "Republicans Support Your Party Platform—Stay Out."

Marching with us were Representative CHARLES DIGGS, Democrat, of Michigan, and Representative ADAM CLAYTON POWELL, Democrat, of New York. Representative BYRON JOHNSON, Democrat, of Colorado, simultaneously conferred with members of the peaceful picket line.

Students are leading this crusade. The night I marched I was able to arrange that we Members of Congress met with the manager of Glen Echo. He agreed to arrange a meeting between us and the park owners, Abram and Samuel Baker, as soon as possible. Before then, no negotiations had been held. This was a step forward on a long but important road toward equal rights for all citizens.

Activities of the Committee on Un-American Activities During the 2d Session of the 86th Congress

EXTENSION OF REMARKS

OF

HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following report on the activities of the Committee on Un-American Activities during the 2d session of the 86th Congress. This report covers the period from January 1, 1960, to and including September 1, 1960.

Under date of September 18, 1959, I inserted in the RECORD a report on the activities of the Committee on Un-American Activities during the 1st session of the 86th Congress.

REPORT BY CHAIRMAN FRANCIS E. WALTER ON THE ACTIVITIES OF THE COMMITTEE ON UN-AMERICAN ACTIVITIES DURING THE 2D SESSION OF THE 86TH CONGRESS

During the period beginning January 1, 1960, and ending September 1, 1960, the committee interrogated 108 witnesses in public session.

AIR RESERVE TRAINING MANUAL

In February 1960, the Secretary of the Air Force, Dudley C. Sharp, was quoted in the press as categorically repudiating the Air Reserve Center Training Manual as representing Air Force views. Much of the manual dealt with problems of Communist infiltration of church groups in the United States. Some of the material contained in the manual was derived from publications of the Committee on Un-American Activities. Accordingly, Secretary Sharp was invited to appear before the committee to testify on the subject matter.

In response to committee questions, Secretary Sharp testified, among other things, that he did not intend in his prior statements to repudiate the integrity, validity, or accuracy of the testimony before the Committee on Un-American Activities which is quoted in the manual.

COMMUNIST TRAINING OPERATIONS—ACTIVITIES AND PROPAGANDA AMONG YOUTH GROUPS

Continuing a series of hearings on Communist training operations, begun in 1959, the committee held hearings in Washington on "Communist Activities and Propaganda Among Youth Groups." These hearings explored the history and background of Communist penetration of youth groups, surveyed typical Communist propaganda publications which are entering the United States destined to schools and colleges, and developed factual information respecting the Communist-controlled youth festival held during the summer of 1959 in Vienna, Austria.

ESPIONAGE

Pursuing its continuing investigation of Communist espionage operations in the United States, the committee released testimony taken in executive session from Lt. Col. Frantisek Tisler, former military and air attaché of the Czechoslovak Embassy in Washington.

Colonel Tisler had defected and asked for political asylum in the United States on July 25, 1959. He testified that he had been trained in espionage techniques before coming into this country in 1955 and that, from the time of his arrival until his defection, he had served as chief of the Czechoslovak Military Intelligence Directorate Residentura which had its headquarters at the Czechoslovak Embassy in Washington, D.C. In this capacity, he stated, he had five officers serving under him—four attached to the Embassy and one to the Czechoslovak United Nations delegation in New York. Prior to leaving Czechoslovakia, Colonel Tisler said, he was told that his title of military and air attaché was primarily a legal cover for espionage activities and that his principal job would be to recruit U.S. agents and get information from them on classified U.S. materials. He estimated that during the period of his services in the Czechoslovak Embassy in Washington, 45 percent of the Embassy personnel and personnel of the U.N. delegation in New York was engaged in espionage activities against the United States.

He also testified that an American Communist, Antonin Krchmarek, of Cleveland, had been in frequent contact with Embassy personnel during this period; that the Embassy had provided funds for Krchmarek's defense when he was on trial under the Smith Act; that Krchmarek had contacted the Czechoslovak Foreign Institute (a propaganda agency) when he visited that country in 1950, and that Krchmarek had provided information to Czechoslovak Ambassador Petrzelka on the U.S. Communist Party, the 1958 elections and other matters for transmittal to the Communist Government of Czechoslovakia.

Colonel Tisler also identified Charles Musil, editor of a Czechoslovak language newspaper in Chicago, as an intermediary between Krchmarek and the Czechoslovak Ambassador.

When Krchmarek and Musil testified on May 26, 1960, they repeatedly invoked the fifth amendment in response to questions concerning the testimony of Colonel Tisler. Krchmarek, however, did deny that he had ever received funds from the Czechoslovak Embassy or any of its personnel. He also said that he had never given any classified information to the Czechoslovak Ambassador.

Musil denied that the Embassy or Czechoslovak Government had ever paid any expenses for him, or that he had served as an intermediary between Krchmarek and Ambassador Petrzelka.

NORTHERN CALIFORNIA COMMUNIST PARTY

In hearings held in San Francisco in May, during which 42 witnesses testified, the committee explored the organization and operations of the northern California district of the Communist Party. In the course of these hearings, this unit of the Communist Party demonstrated its strength—and danger—as a Soviet fifth column operating on American soil. By means of a carefully organized campaign and with the assistance of a number of Communists fronts, as well as some non-Communist groups and individuals, it not only succeeded in turning out thousands of demonstrators to protest the committee hearings, but also prodded hundreds of them into mob violence on the second day of the hearings. On the very first day of the hearings, a group of hardcore leaders of the northern California district of the Communist Party succeeded in taking virtual control of the hearing room and forcing suspension of proceedings for a period of about 40 minutes. Despite the disruptive activities of these Communists and their dupes, however, the hearings produced extensive information on Communist Party strategy and tactics on the national level, as well as in California.

COMMUNIST ACTIVITIES AMONG THE SEAMEN AND ON WATERFRONT FACILITIES

The grave danger to the Nation's security posed by the lack of any effective waterfront security program was highlighted in hearings held by the committee in Washington, D.C.

Support for a bill introduced by the committee chairman to correct this situation—which has been brought about by court decisions invalidating the former seamen's security program, was voiced in the hearings by Vice Adm. James E. Hirshfield, Assistant Commandant of the Coast Guard; Ray R. Murdock, Washington counsel for the Seafarers International Union of North America; H. Howard Ostrin, general counsel of the National Maritime Union, and Hoyt S. Haddock, director, seafarers section of the maritime trades department, AFL–CIO.

Two former Communists who had served in the waterfront section of the Communist Party in various U.S. ports, pointed out that Communist seamen were a grave security threat because they could be used for espionage and communications networks, for sabotage, and in the smuggling of Communist espionage agent and couriers into and out of the country.

Representatives of the maritime unions pointed out that under present conditions the United States has no jurisdiction over seamen employed on flag of convenience ships, which are owned by U.S. civilians but sail under foreign flags with largely foreign crews.

Nine witnesses, all of whom currently hold papers as seamen or ships' radio operators, invoked the fifth amendment when asked questions concerning Communist Party membership and Communist activities.

COMMUNIST PENETRATION OF RADIO FACILITIES

The threat to the integrity of the Conelrad defense system, stemming from Communist radio operators, was explored in committee hearings conducted in Washington on H.R. 12852, a bill introduced by the chairman. This bill, designed to cope with Communist infiltration in the field of radio communications, prohibits the issuance of a radio operator's license to any individual who willfully fails or refuses to answer certain questions relating to Communist activities when summoned to appear before designated Federal agencies.

Representatives of the FCC, the Air Force, broadcasting and cable companies testified in the hearings, in addition to a number of uncooperative witnesses who either hold licenses or have applications for them pending before the FCC and who invoked the fifth amendment on present Communist Party membership.

REPORTS

COMMUNIST TARGET: YOUTH

The Communist success in the student riots during the May hearings of the committee in San Francisco proves that it can happen here, J. Edgar Hoover, Director of the Federal Bureau of Investigation, stated in a report entitled "Communist Target: Youth," published by the committee.

The Communists demonstrated in San Francisco just how powerful a weapon Communist infiltration is, Mr. Hoover stated. He continued:

"They revealed how it is possible for only a few Communist agitators, using mob psychology, to turn peaceful demonstrations into riots. Their success there must serve as a warning that their infiltration efforts aimed not only at the youth and student groups, but also at our labor unions, churches, professional groups, artists, newspapers, government, and the like, can create chaos and shatter our internal security.

"Throughout the world today, governments are toppling with stunning rapidity. Whether large or small, the role Communists are playing in these events must not be discounted. The growing strength of our Nation over the years has not proven a deterrent to relentless efforts on the part of the Communist Party, U.S.A., to destroy our security and prepare our Nation for a similar fate."

Commenting on Communist infiltration and agitation tactics among youth, Mr. Hoover stated:

"The successful Communist exploitation and manipulation of youth and student groups throughout the world today are a major challenge which free world forces must meet and defeat. Recent world events clearly reveal that world communism has launched a massive campaign to capture and maneuver youth and student groups."

In the United States the Communist Party is engaged in a major campaign among youth, with campuses throughout the Nation as prime targets for Communist infiltration and recruitment efforts, Mr. Hoover warned.

Using the Communist success in inciting the student riots against the House Committee on Un-American Activities as an illustration, he stated that it is particularly unfortunate that the many youth and student groups in our Nation today are totally unaware of the extent to which they can be victimized and exploited by the Communists.

WORLD COMMUNIST MOVEMENT

The first volume of a selected chronology of major developments in the history of world communism, covering the years 1818–1945, was prepared for the committee by the Legislative Reference Service of the Library of Congress.

The volume documents the expansion of communism throughout the globe and, in the words of the committee chairman, provides "a basis of judging the continuity, tenacity, and all-encompassing character of the world Communist movement."

The chronology reveals that Communist Parties in all nations, including the United States, have, throughout their existence, followed slavishly the orders of the Kremlin.

Subsequent volumes will document major Communist developments through the year 1957, and an index to the overall chronology will be published.

CONSULTATIONS

Lest we forget

This pictorial account of communism in action—a vivid portrait of what communism really is as opposed to what it claims to be—is composed of photographs of events in the Soviet Union and 11 other nations which have become captives of communism. A commentary on the pictures and their significance is given by Klaus S. G. Romppanen, president of The Fight for Freedom—a Pictorial Exhibit from which the photographs were obtained.

The "liberating" Communist troops, torture instruments and chambers, mass graves of the murdered victims of communism, the "living dead" survivors of Communist concentration camps and organized starvation campaigns portrayed in this document throw the cold light of undeniable truth on the terror and violence used by Communists to subject the captive peoples of Europe to Communist domination and to crush the resistance of rebellious nationality groups within the Red empire. The photographs drive home, in a manner which words alone cannot, the true nature of the enemy that this country and all humanity faces.

SOVIET JUSTICE AND SLAVE LABOR CAMPS

A detailed account of the mockery that is Soviet justice, from initial arrest without any legal authority to final imprisonment in Siberian slave labor camps, was given the committee by Adam Joseph Galinski, a former Polish Government official who had fought in both the anti-Nazi and anti-Communist undergroud in Poland before spending almost 12 years in the Soviet prisons and slave labor camps in the Vorkuta area. Mr. Galinski also described the horrible conditions under which inmates of Soviet labor camps and prisons live. He stated that no one, not even Soviet Communist Party members, was allowed inside Soviet slave labor camps and described certain accounts of conditions in these camps, written by Americans who had allegedly visited them, as a tale out of "A Thousand and One Nights." He could account for the reports of these people which contradict all he learned of Soviet slave labor camps during his 12 years imprisonment, he said, only by information he heard while a prisoner that the Soviet Government operated "showplace" prisons which were populated by secret-police personnel posing as prisoners in order to hoodwink visiting foreigners. He branded as false the reports that the MVD (secret police) had been shorn of power over Soviet slave-labor camps in 1953. He also stated that America was a legend with the prisoners; that they hated the regime and looked forward to the downfall of the Communist regime.

COMMUNIST ECONOMIC WARFARE

Under present conditions trade with non-Communist nations may play the most important role in Moscow's drive for world domination, Dr. Robert Loring Allen, associate professor of economics at the University of Oregon, stated in a consultation with the committee. Military action is increasingly risky for the Soviet Union because of U.S. preparedness and the tremendous destructive power of nuclear weapons. The Kremlin is therefore stressing the use of nonmilitary weapons. Trade, Dr. Allen said, appears to most people to be a completely neutral, nonideological act. For this reason the Soviet Union, which uses trade as a weapon of conquest, might find it possible to utilize it in areas where other weapons such as political pressure, propaganda, and military action were not feasible. Trade is probably the cheapest and most profitable of the nonmilitary weapons in the Soviet arsenal, he said.

For the time being, Dr. Allen stated, the primary aim of the U.S.S.R. is not necessarily Communist Party rule of other nations but rather the transfer of their sovereignty to Moscow. This can be accomplished through trade which, in the vital economic field, can give the Soviet Union effective domination of other nations.

He also said that the Soviet Union has certain built-in advantages in its use of economic weapons against other nations: Soviet trade negotiators have behind them the full power of their Government, an element which their opposite numbers lack;

loan negotiations provide a means for obtaining detailed information on a nation's economic condition, and trade relations provide openings for political propaganda and also for the achievement of Soviet foreign policy objectives through economic pressure.

DUPING FOREIGNERS IN RED CHINA

A carefully calculated and highly organized procedure costing huge sums of money and including thousands of persons has been developed by the Red Chinese government to deceive visitors to that country, according to Robert Loh, who escaped through Hong Kong in the summer of 1957, after serving as a showcase capitalist and receptionist-host for visiting foreigners in Red China. Certain cities, he explained, have been designated by the regime for visits by foreigners. In each one there is a bureau employing thousands of interpreters and other highly trained personnel to take care of the visitors and to see that they are permitted to enter only certain mills, factories, and homes. Special hotels have been designated for the housing of visitors. These, too, are staffed with specially trained personnel and feature restaurants and shops in which are found better food and products at lower prices than are available to the Chinese people.

When important foreign dignitaries visit a city such as Shanghai, he revealed, as many as half a million people will be selected and trained to give the dignitary a proper "spontaneous" reception.

This huge Chinese operation of deceit has been so carefully prepared that the regime is successful in deceiving even trained newspapermen and skeptical anti-Communists who visit the country.

In China, Mr. Loh said: "Whatever the foreign visitors ask, they are bound to hear lies. No truth can be heard." He also said that the Chinese Communists use the same tactics of deception on visiting Communists that they use on the non-Communists.

LEGISLATION

Based upon extensive investigations and hearings, the committee reported favorably to the House the bill (H.R. 12753) introduced by the chairman to amend the Subversive Activities Control Act of 1950, so as to require the registration of certain additional persons disseminating political propaganda within the United States. On August 22, 1960, the bill passed the House.

The committee also reported favorably the bill (H.R. 11580) introduced by the chairman to amend the Subversive Activities Control Act of 1950, so as to provide that no individual who willfully fails or refuses to answer, or falsely answers, certain questions relating to Communist activities, when summoned to appear before certain Federal agencies, shall be employed on any merchant vessel of the United States, or within certain waterfront facilities in the United States.

Poland and America

EXTENSION OF REMARKS
OF
HON. PAT McNAMARA
OF MICHIGAN
IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. McNAMARA. Mr. President, at their 15th biennial national convention, the Polish Legion of American Veterans adopted a series of significant resolutions.

The resolutions reflect a great awareness by this group of patriotic American citizens of the basic conflict that exists in our world today—the conflict between freedom and totalitarianism.

Perhaps it is natural that the members of the Polish Legion of American Veterans would exhibit this awareness. These men are, of course, veterans of the American Armed Forces, and thus they know the horrors of war.

At the same time, however, they have another common bond, that of a cultural relationship with a Polish homeland, and quite frequently, a blood relationship with those who are citizens of that nation.

We all are proud of our Americanism, but we also can be proud of the homeland of our fathers. In the case of Polish-Americans, this pride is tempered by the fact that Poland is still under the heel of communistic totalitarianism.

The fact that Poland, no doubt because of the will and the spirit of her people, has done much to resist total communistic encompassment, still does not ease the pain that exists when there is not complete freedom.

Thus, the resolutions adopted by the PLAV take note of the need for their America to remain strong and also of the necessity that the plight of Poland and her sister nations not be forgotten.

I ask unanimous consent that excerpts from these resolutions be printed in the RECORD as part of my remarks.

There being no objection, the excerpts from the resolutions were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM RESOLUTIONS ADOPTED BY THE POLISH LEGION OF AMERICAN VETERANS AT THEIR 15TH BIENNIAL NATIONAL CONVENTION, CHICAGO, ILL.

1. As loyal patriotic American citizens, we pledge our loyalty to the United States of America, and we hereby renew our military oath to defend and fight for our country.

2. In memory of those comrades who have given their lives for their country and in honor of those who have suffered combat wounds and disabilities, we pledge ourselves to fight communism at home and throughout the entire world in order that we spread democracy and promote free enterprise everywhere.

3. On this 21st anniversary of the invasion of Poland and the commencement of World War II and in light of Soviet domination of Poland through military occupation, we pledge ourselves to continue our demands for the restoration of freedom to our brothers in Poland. We urge the President of the United States to use his high office for this purpose.

4. We urge that military appropriations of the United States be kept at a high level with the primary goal being an adequate military defense and that fiscal and budgetary considerations be made secondary. We urge a reappraisal of our entire defense policy in order to determine its adequacy with the following objectives in mind: (a) An adequate retaliatory force to deter any aggressor in a nuclear war; (b) an adequate Military Establishment to assure victory in the cold war; (c) economic power sufficient to assure victory in economic warfare with Communist imperialism.

5. In this presidential election year we urge the candidates for that high office to use restraint in their campaign promises, in order that the cruel hoax perpetrated by one of the candidates in 1952 should not be repeated, when he promised to wage war for the liberation of Poland; he gained votes at the price of human misery.

We further urge that our Government carry on its dealings with the people behind the Iron Curtain on a high plane and at a realistic level so that there be no repetition in any part of the world of the 1956 Hungarian uprising with its bloodletting; this uprising was the result of false hope of liberation and aid which had been promised to the Hungarian peoples.

6. The impending visit of Mr. Khrushchev to the United Nations and the United States is met with mixed feelings by the PLAV. In the light of the aborted summit conference of May 1960 and the indignities to which President Eisenhower was exposed in Paris at that time, we, of the PLAV, urge that there should be no enthusiasm shown for Mr. Khrushchev on his arrival in the United States. However, in the event that the head of the Russian Government desires to confer with our President on the subject of disarmament, or to discuss other problems in order to relieve world tensions, we feel that it is the duty of President Eisenhower to receive Mr. Khrushchev for this purpose. It must never be said that the United States is unwilling to discuss world problems with those whose views differ from our own. A failure to accede to the request for a conference with Mr. Khrushchev would be utilized to the fullest by the Russians in their propaganda in the uncommitted parts of the world.

7. We support our comrades in arms—the Veterans of Foreign Wars—in their stand that American schools should teach all children the basic principles of communism. This course should be included in order that our children may compare our way of life with the Communist methods and in order that they may determine for themselves the superiority of democracy and free enterprise over totalitarianism and communism.

8. We urge that the Federal Government assist primary and secondary education throughout the entire United States by substantial appropriations in order that (a) the education standards of the entire country be raised to the highest level possible; (b) that those portions of the country whose standards fall below the national average be elevated in order that all children in the United States be given the same education; (c) that gifted children be given the opportunity for advanced training and study on a college and graduate level, without regard to their own financial situation.

Mr. McNAMARA. Mr. President, it is vitally important that we Americans never forget that millions of human beings—literally, our brothers and sisters—are forced against their will to live under dictatorship.

As soon as this is forgotten, as soon as we become complacent with our material benefits and lazy in our minds, we, ourselves, run the risk of becoming easy prey for the dictatorship of the Communist or the Fascist.

But when we keep firmly in mind that totalitarianism has subjugated millions of persons, and will take over still more if left alone by the free world, then we will be constantly alert to the dangers.

We cannot, of course, be content only with combating the Communist ideology in our own Nation. This is not good enough. It is intolerable to the American concept of freedom that people anywhere can be deprived of their liberty by force of arms.

That is why the fate of Poland—the dramatic fight of the Polish people—is also our fight.

In the case of Poland, we have a unique opportunity to combat communism.

In the first place, the peoples of America and Poland are historically friendly. Millions of Poles have emigrated to the United States, many of them to my own State of Michigan.

This has established a strong bond between our two countries, a bond which, we trust, never will be severed.

But there is another common ground between us: the inherent love of freedom.

The Polish Constitution of 1791 is a remarkable document, one that established a parliamentary system and which noted:

All power in civil society is derived from the will of the people.

Unhappily, events in Europe conspired to stifle that birth of freedom—stifle it but not kill it, because freedom's flame still burns.

We will never forget when that flame burst out in 1956 when the heroic people of Poznan turned on their Communist oppressors.

The common bond of the love of freedom and the cultural ties between our two countries make it all the more necessary that our Government maintain a constructive relationship with the Government of Poland, even though it is a Communist government.

In so doing, we can help keep the flame of freedom burning, and we can show the people of Poland that their faith and their hopes have not been shattered.

In recent years, more than $200 million in agricultural commodities have gone to the people of Poland.

We must continue that sort of properly administered aid. We must liberalize our immigration laws to provide a haven for the displaced.

We must keep alive the traditions and the heritage of Polish freedom, as with the issuance in October of a "champion of liberty" commemorative stamp honoring Ignace Jan Paderewski. I am honored to serve, incidentally, on the Paderewski Centennial Committee.

I must make special note, however, of the resolution numbered 5 which I have placed in the RECORD.

This resolution emphasizes the danger in making false promises to the people of Poland and the other Communist-controlled countries; promises too often recklessly made by some politicians. These can lead only to bloodshed and not to freedom.

But with the constructive efforts I have mentioned, I believe that the day will come when, with the help of God, Poland will again be free.

Congressman Moeller Reports to His District

EXTENSION OF REMARKS

OF

HON. WALTER H. MOELLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MOELLER. Mr. Speaker, for more than three decades the 10th Congressional District of Ohio—the great district I now have the honor and privilege to represent in Washington—was served by my good friend, the late Tom Jenkins, of Ironton.

During his many years of service, Tom Jenkins kept his district informed about what was going on in Washington, particularly those legislative issues affecting the 10th District. I have tried to do the same by sending a periodic newsletter, prepared at my own expense, except for the privilege of the frank, to the people of the 10th District. This newsletter, "News Briefs From Washington," has been so well received that the initial printing of 3,000 copies has been increased to 7,000. These are distributed solely to constituents who have specifically asked me to send the newsletter whenever it is issued.

The overwhelming response in favor of my newsletter now prompts me to prepare and circulate a concise report on the 86th Congress for the information of all residents of the 10th District. Every public official in or out of office, in my opinion, has the just and proper obligation—and I might add, the moral duty—to comply with that Biblical injunction: "Give an account of thy stewardship." Luke 16: 2.

While it is obviously impossible to record in this brief account every word and every action I took in behalf of the people of the 10th District, I am placing into the public record this summary of my efforts and work in their behalf and my personal views and stand upon some of the great issues which came before the Congress.

Some of the most satisfying and rewarding moments of my work during the past 2 years for the 10th District came from the very many favorable results I managed to obtain for those persons who came to me for help. While vitally important to the people concerned, these problems often found quick solution either through a phone call to the Federal officials in charge or a telegram or letter to the field office having jurisdiction. Others were more challenging, requiring concentrated effort and many hours of work. At all times, however, it was my privilege to share the problems and uncertainties of someone in need and deserving of help. The cherished and heartwarming expressions of thanks from the very many people I have managed to help will remain always with me as the greatest reward public service can offer.

Early in the 86th Congress, Mr. Speaker, I was tremendously pleased to be given the highly coveted assignment to the House Committee on Science and Astronautics, the new major standing committee of the House which is the legislative pioneer on the vital problems of space research and development. Dealing with highly technical, scientific research activities and exercising jurisdiction over almost entirely new frontiers of science, the committee has been one of the busiest and hardest working in the House, so much so that it has earned the Holmes Alexander Award as the Outstanding Congressional Committee of the Year.

In the second session alone, this committee conducted some 27 investigations, in many of which I was privileged to participate, whose scope ranged from exploration at the bottom of the sea to Army plans for construction on the moon. My experience and background on this vital committee have already provided direct benefits to Ohio and I shall continue my efforts to see to it that our State receives its equitable share of all Federal awards dealing with space research, missile and allied activities.

The distinguished chairman of this committee, the Honorable OVERTON BROOKS, has indeed been kind to single out my work as a member of subcommittee No. 2 and the special investigating subcommittee. Just recently, Chairman BROOKS wrote me in part, as follows:

I would like to take this opportunity to let you know how much I value your efforts on behalf of the committee during the past 2 years, and how much I have enjoyed the close association we have had in working together to make the committee what it is today.

Your contributions to the success and recognition of the committee are immeasurable. Among these, I feel you have made a major contribution because of your work on subcommittee No. 2 and the special investigating subcommittee, and your record of attendance at committee meetings is outstanding.

As a freshman Member of Congress, I was deeply honored—and in a sense overwhelmed—by my designation early in the 86th Congress to be an official delegate of the U.S. House of Representatives to the NATO Parliamentarians' Conference in London. My attendance at this conference, made up of some 650 delegates from the NATO countries of the world, was a stimulating and instructive experience in international relations. It was my good fortune to be named a member of the Spiritual and Cultural Committee at the London Conference which attracted such world leaders as Prime Minister of England Harold Macmillan; Lt. Gen. James M. Gavin; the late Clement Attlee, former Prime Minister of England; Dr. Richard Jaeger, vice president of the West German Parliament; and Nils Langhelle, president of the Norwegian Parliament.

Mr. Speaker, the 86th Congress dealt with many issues. In fact, the House alone during 1959 and 1960 considered nearly 2,000 individual pieces of legislation. Of necessity, I am prevented from full comment on all this varied and extensive legislation and, therefore, will touch only upon some of the major legislative issues affecting the people of the 10th District.

One of the greatest tragedies I have observed during my professional life and more recently during my service in Congress has been the spectacle of many of our older citizens, in what should be the golden years, actually finding themselves in the evening of their lives in privation and want. After a lifetime of toil in industry or on the farm, after spending their earnings in bringing up, supporting, and educating their children, and after contributing their productive years to the strength and wealth of this Nation, these worthy folks often find themselves discarded and unwanted.

The plight of these good people has been of deep personal concern to me and that is why I actively supported and worked for the liberalization of the social security program. My live interest in the aged, based upon conditions I have observed personally, has been intensified by the very many pleas for assistance which have been reaching me in increasing number.

As they enter the fifties and sixties, many American citizens are faced with new problems and new changes in their lives. Often the serious illness of one partner has meant exhausted savings, depleted resources, and often the bare necessities of life if public charity is to be avoided.

While the Congress has grappled periodically with the problem of adequate social security retirement benefits to meet steadily rising living costs, this year a small step toward effectuating a medical care program for the aged was taken by the 86th Congress with the passage of H.R. 12580, which I supported.

However, this is not the complete answer to the high cost of hospitalization and chronic sickness for the aged and their families. Many instances have come to my attention where substantial, hard-working people, suffering from chronic illness after and sometimes before retirement, have had their entire life savings eaten away by heavy medical expenses for hospital, medical, and nursing care.

For the rich and poor alike, this is no problem. The rich can afford to pay. The poor have our social and welfare agencies to which they can turn. For the rank and file of our people, for the hard-working little businessman, the great middle class, professional people and the like who cannot turn this burden over to others, the high cost of medical and hospital care is truly staggering.

I pledge myself anew to continue my work in the Congress to correct the imperfections and injustices of our present laws dealing with the aged so that all these worthy persons, who are truly one of America's great assets, instead of an unwanted liability, such as is now tragically often the case, may enjoy the peace of mind that comes from security from want and misery. This is the sacred cause to which I shall continue to devote unstinted energy and devotion.

Mr. Speaker, inflationary conditions present another tremendously serious problem to all Americans, whether young or old. Constantly rising prices bring new demands for corresponding rises in wages and thus the vicious spiral continues unabated to the point where purchasing power lags far behind consumer prices. The Federal Government must encourage and stimulate increased industrial production and capacity; not hinder or obstruct small business through bureaucratic interference, confiscatory taxes, and the unwise manipulation of interest rates.

The Presidential veto of the depressed areas bill, which had my strong support and vote because of its tremendous potential to the 10th District, was most unwise. I believe the President was not given all the facts when this bill came to him for signature. In May of this year, I urged the President to sign this needed legislation and during the debate in the House, I cited the three counties in Ohio, including our own Meigs County, where this Federal program would do much to revive industrial growth and help provide jobs for our people.

I shall continue to work vigorously in Congress for a Federal program of action to provide jobs—and that is what my people want, not handouts—to maintain a greater and more prosperous American economy.

It is my belief that we should rehabilitate those areas in need in our own country instead of fostering industries abroad which compete with American plants. I sponsored legislation to protect American industry against foreign competition and will continue my fight in the next Congress to obtain adequate safeguards to protect our industries and the jobs of American workers against the influx of cheaply produced foreign goods which are flooding this country. This cut-throat foreign competition is threatening our industries and prosperity, reducing Federal revenue and creating unemployment in many areas of the country and is hurting our own industries in Ohio. I cite particularly those producing clay products, glass, leather goods including baseball gloves, and canvas footwear. Ohio cannot afford to lose any industries in competition with the 10- and 12-cents-an-hour wages in some countries of the world which have built up their industries under our foreign aid program at the expense of the heavily taxed American worker and American industry.

We must not promote the disintegration of our own essential domestic industries at the expense of our own hard-working people who pay the bill for grandiose foreign aid handouts. I, for one, will continue to seek a more realistic regard and consideration for the interest and needs of American workers and American industries and the general prosperity of the Nation.

Another pressing domestic problem in an area where the Federal Government plays a vital role is the completion of the comprehensive program to end disastrous floods in the Ohio Basin. Much has been done to alleviate flood conditions in many parts of the basin, but there still is work to be done, especially in those areas which were hit by last year's floods.

During the 86th Congress, I vigorously worked for the vital Belleville locks and dam project, which upon completion will do so much to prevent a repetition of the disastrous floods of the past. I held many conferences with the Army Engineers in Washington and in Ohio on this $57 million project and also sought the aid of my colleagues on the House Appropriations Committee, including Ohio's distinguished Congressman MIKE KIRWAN, to make available the necessary funds to get this project under way.

My pleas were successful and the Army Engineers will now be able to complete the necessary detailed planning of the Belleville project with the $250,000 appropriated by Congress this year. The Congress voted $125,000 last year for preliminary Belleville planning.

While additional funds for actual construction would have been desirable, budgetary restrictions and professional engineering estimates have deferred construction until such time as the planning is in the advanced stages. The Belleville work, which will require 5 or 6 years to complete, will be the largest Federal project ever constructed in the 10th District and, naturally, I shall seek construction funds in the next Congress. I have already been assured of the support of the Army Engineers and some members of the House Appropriations Committee in this vital matter.

During the 86th Congress, Mr. Speaker, I sought by voice and by vote to support a truly people's government. I have worked for world peace and freedom for oppressed people everywhere, being the sponsor of the Peace Agency bill which has attracted wide interest and support. I have stood for tolerance and understanding, supporting such bills as civil rights, expanded social security, Federal pay raise, emergency housing, extension of GI home loans, minimum wage, and many other progressive measures.

I believe that it has become generally recognized in the 10th District that I have acted at all times to insure, by voice and deed, higher standards of living for our people, that I have sought equal opportunities for the humblest citizen, that I have worked for health and education benefits, that I have supported legislation providing more generous aid for the aged, the needy, and the infirm, that I have actively promoted legislation seeking to encourage small business and American industry.

These are all on the public record. These are actions that have received the unqualified endorsement of very many individuals and groups within the 10th District who have given me their wholehearted approval of the record of honorable public service I have sought to give my district.

For the second time, I am sponsoring for the 10th District a U.S. Government Day, which has attracted wide attention and support from the various Federal agencies which serve Ohio. This has been termed an unprecedented service to the district in some quarters because in no other part of our great land has there been such an extensive program evolved for the sole benefit of a congressional district so that the people might meet and discuss problems of mutual interest directly with the Federal officials concerned.

In addition, this year with the cooperation of the various school leaders in my district, it was possible for me to bring to Washington at my expense several outstanding boys and girls who saw their Federal Government in action. This program received wide acclaim in educational and other circles and attracted wide interest not only in Ohio but throughout the country. These talented youngsters spent a week as my guests in Washington where they took active part in the operation of my office and also had the opportunity to observe, in between several rounds of

sightseeing, the intricate workings of their Federal Government.

These are simply some of the highlights so to speak, Mr. Speaker, of my first term of office as Congressman from the 10th District of Ohio. As it can be seen, I have always endeavored to work in the best interest of the people of my district and have done my very best to provide them with responsible representation, clothing the office with the dignity and honor it deserves. I know that the people of the 10th District, mindful of the many years of dedicated service rendered by the esteemed Tom Jenkins to this district, and knowing what I have sought to accomplish for this same district, will want to continue this record of devoted and honorable service.

Congressman Harold R. Collier Reports to the People of the 10th District of Illinois

EXTENSION OF REMARKS
OF

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. COLLIER. Mr. Speaker, under leave to extend my remarks in the RECORD, I take this opportunity to provide the residents of the 10th Congressional District of Illinois with a brief résumé of major legislation and of my activities as their Representative in the 86th Congress.

Looking back over my 4 years as a Member of Congress of the United States, I say unhesitatingly that my two greatest concerns have been maintaining peace in a world of great international tensions, as well as a strong national defense through military and economic stability.

In spite of the delicate and critical situations which have developed in the face of Communist threats, we can still look with optimistic hope that a permanent peace will be achieved. To accomplish this, we have strengthened our national defense to a point where today we are the most powerful nation on earth. This has been accomplished in the face of maintaining a balanced budget in both 1959 and 1960.

Certainly our national security is dependent upon the economic strength of our free-enterprise system, which can only be weakened unless prudence in national fiscal affairs is exercised by those who control the Federal purse strings.

While there are those in the Congress who prefer to avoid any discussion of the national debt through expansion of increased Federal spending programs, we must inevitably face this problem realistically if we are to keep our internal security abreast in strength with our national defense.

We must never lose sight of the fact that the services and the doles provided by the Federal Treasury come alone from tax dollars. We must remember, too, that tax dollars sent to Washington for expenditure by the Federal Government shrink in their spending power because of excessive administrative costs of bureaucracy. The businessman, factory workers, and housewife alike feel the squeeze of inflation and higher taxes, and a retiree and pensioner is in no way immune from the effects of inflation. It is my opinion that a good legislator must keep this in mind when the temptation of yielding to pressure groups confronts him, particularly during an election year.

The 86th Congress has certain achievements to which it can point with pride and failures which certainly the American public have been quick to recognize.

SUMMARY

The 86th Congress convened on January 7, 1959, and adjourned September 1, 1960. The Senate was in session 280 days and the House 265 days. Both Houses filled nearly 36,000 pages of the CONGRESSIONAL RECORD. From the standpoint of legislation introduced, there were 20,164 public and private bills, joint resolutions, and so forth, introduced in the Senate and House of Representatives. Only a fraction of these bills were finally enacted into law. To date, 1,130 new public laws have resulted from the work of the 86th Congress; many of these were private bills or legislation of a minor nature, however.

COMMITTEE ASSIGNMENTS

During the 86th Congress I served as a member of the Committee on Interior and Insular Affairs during the first session and the full session on the Committee on Interstate and Foreign Commerce. Both are major legislative committees. I am also on the Subcommittee on Transportation and Aeronautics of the Committee on Interstate and Foreign Commerce. In extracurricular duties in Washington, I was the past year reelected to the board of governors of the National Rocket Society, vice president of the Illinois State Society of Washington, and a member of the legislative Republican policy committee of the House.

HAWAIIAN STATEHOOD

After many years of deliberation, the 86th Congress voted statehood for Hawaii in one of the most historic actions in recent history. As a member of the Interior and Insular Affairs Committee during the 85th Congress and the 1st session of this Congress, I helped formulate the legislation which granted statehood for the Territory of Hawaii, as well as our 49th State, Alaska, which gained its status as a State a year prior.

NATIONAL DEFENSE

With a current defense budget of approximately $40 billion, we have built a well-balanced, flexible and retaliatory force to keep the peace, and I have supported necessary appropriations for these measures. My support of our national defense program is based on my convictions that we must be constantly alert and ready to meet any additions and revisions necessary to produce the unmistakable margin of military supremacy upon which our national security rests. A strong national defense is, in the world in which we live today, a deterrent to war; for those who would attack us would do so perhaps quickly if we were a vulnerable nation.

LABOR

Enactment of the Landrum-Griffin bill went down in history as the major legislative achievement of this past Congress. After many months of hearings by the McClellan Subcommittee on Labor Union Abuses, Congress passed this law in one of the most heated legislative sessions in history. There were those who said the law did not go far enough and others who insisted that it went too far. The fact of the matter is that the Landrum-Griffin bill, while not everything that the proponents and opponents found entirely satisfactory, was basically a sound and effective compromise. It prescribed regulations for the accounting and reporting of union dues and funds and outlawed blackmail picketing and secondary boycotting.

Title I of the act, generally known as the bill of rights, is designed to guarantee rank-and-file workers important, fundamental democratic rights within their unions. Many examples could be cited to demonstrate this legislation has had a wholesome impact upon the conduct of union affairs.

BUDGETARY ANALYSIS

In his state of the Union address in January, President Eisenhower predicted a budget surplus for 1960–61. As the current session came to an end, it appears that this surplus will approximate $1 billion.

There were certain legislative proposals which would have completely eaten away this surplus and created a deficit had it not been for the efforts of the determined minority and executive leaders to hold the line. Certainly, however, the pressures were perhaps greater in this election year than at any other time during my tenure of office. Ardent supporters of the big spending programs will undoubtedly renew their fight when the 87th Congress convenes in January. There are those who have little conception of the costs of the national debt which has accumulated over the past three decades. As a matter of fact, if all the spend-ourselves-rich bills had been passed, it is estimated that our annual budget would be in excess of $125 billion annually. So much for the budget.

THE FARM PROGRAM

The patchwork quilt of farm legislation with its system of controls offers no visible solution in our agricultural economy. Such proposals as might have been identified as a reincarnation of the old Brannan plan were offered during this session. Needless to say, the basic impracticality of the program doomed it to failure. The Senate did pass a wheat bill which would have cut both acreage allotments and support prices. All in all it seemed that there were those in Congress who obviously preferred a political issue to any possible solution. As a result, one program after another went down the drain and into pigeonholes and Secretary of Agriculture Ezra Taft Benson was made the "whipping boy" as

every sound program was watered down until nothing workable remained.

SOCIAL SECURITY AND MEDICAL CARE

The proposed Forand bill which would have provided medical care for a portion of the elder citizens failed. Instead, the social security legislation adopted liberalized the $1,200-a-year earning limit for recipients and further provides disability payments at any age instead of after 50 years. This was adopted instead of a proposal lowering the retirement age for the men to 62 years.

The medical care bill for elder citizens finally adopted provided for $202 million a year in Federal contributions to the States to help pay medical bills for elderly people on the welfare rolls.

The fight over this legislation was one of the major political issues of the session, and the medical care bill finally adopted was the result of a complete inability to agree on any of the more sweeping proposals.

TAXATION

A bill to permit American business firms that operate in more than one foreign country the option of lumping all their overseas profits and losses in figuring taxes was adopted this year. A bipartisan majority supported this program which they said encourages overseas assistance in undeveloped countries. This, however, remains to be seen.

There were many proposed tax changes but most were put over until next year when rate cuts, as well as an overhauling of depreciation provisions will be a major issue.

Congress did reduce transportation excise tax from 10 percent to 5 percent but reversed the original House position on a bill to remove the excise tax on telephone service. Your representative was one of those who introduced original legislation in these fields.

A WELL-INFORMED CONSTITUENCY

In my opinion, a well-informed constituency is paramount to an understanding of a Congressman's work and the important functions of government. For this reason, I established a policy of publishing a newsletter on congressional activity as well as my stand on every major legislative issue. More than 500,000 of these were mailed to citizens and taxpayers in my district. Everyone who indicated his or her desire to be placed on my mailing list received these reports. In addition, my staff sent out news releases regularly and special reports on more complex legislation.

I also conducted a public opinion poll throughout my district in the form of a questionnaire sent to approximately 50,000 homes representing a random cross section of the people.

Shortly after my election to Congress, I established a district congressional office which was open this past session every day 8 hours to assist the public in problems which arose while Congress was in session and during the recess.

Following adjournment of Congress in August of last year, I remained in my district until we reconvened and delivered 60 speeches of a nonpolitical nature on congressional activity, appearing before civic and church groups, service organizations, and even high school classes throughout the district.

My staff assisted several hundred residents of the district who visited Washington with their families during the past 4 years. In fact, we dedicated our efforts to being as close to each and every citizen as was humanly possible because we felt the need of bringing the activities of the Federal Government close to those who are affected by the laws which we pass and who must assume the burden of the cost of the vast operation of the Federal Government. My district office is located at 6608 West Cermak Road, Berwyn, Pioneer 9–4115. I welcome the opportunity to hear from you.

The Best Naval Reserve Unit in the Country

EXTENSION OF REMARKS

OF

HON. ALBERT H. BOSCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BOSCH. Mr. Speaker, last year it was my pleasant duty to attend the ceremonies awarding the coveted Forrestal trophy to a unit of the Naval Reserve Training Center at Whitestone, in my home county of Queens. This trophy is awarded to the best Naval Reserve surface division out of the more than 300 throughout the country. These Reserve units are judged on the basis of achievement in the following areas: on-board strength, attendance at drills, active duty for training, petty officer participation and advancement in rating. The unit with the highest cumulative score wins the trophy.

I have just been advised that the same unit, Surface Division 3–77, has accomplished the singular achievement of winning this award again this year and, as Vice Adm. Charles Wellborn, Jr., said in his telegram of congratulations:

> It is hard to reach the top position but in this program, it is harder to repeat the performance.

In further recognition, the Chief of Naval Operations, Adm. Arleigh A. Burke, said in a telegram to the division:

> By repeating your 1959 performance you have become the first division ever to win the James V. Forrestal trophy twice. My heartiest congratulations to each member of your Surface Division 3–77 for your sustained outstanding record.

The U.S. Naval Reserve Training Center at Whitestone comprises two surface divisions, 3–77 and 3–76; a CB Division 3–17; a Naval Security Group 3–1; CED Company 3–42; Ship Activation Maintenance and Repair Division 3–3. It is also the home of the Reserve crew for the U.S.S. *Harris*. These units afford training for approximately 800 men and officers. The commanding officer of this important naval training center, Comdr. Robert J. Stankowski, who now has to his credit two winners in 2 consecutive years, also should be commended for bringing in his CB Division 3–17 in third place this year in national competition, and for the fifth-place spot that was awarded to Naval Security Group Division 3–1. Such accomplishment could only be achieved by deep and sincere dedication and devotion to the cause of the Navy, unceasing work, and intelligent leadership—my hat is off to him.

No less honors should go to Comdr. A. D. Oder, commanding officer of Battalion 3–22, who commanded Surface Division 3–77 during the period of its Forrestal winning competition last year, and who has since understandably been promoted to the command of the entire battalion.

The commanding officer of the winning Division 3–77 is Lt. Comdr. Prentice Cushing, Jr., of Douglaston, Queens, who guided his division to victory in grueling competition, and who has demonstrated the ability to keep a top team in topflight shape.

It is indeed gratifying to me to know that the Navy has an active, vigorous, training program. I am glad also that the best Reserve unit in the entire country is in my own county of Queens. I hope that the Whitestone Training Center will continue to be the finest and it is my hope that the Department of the Navy will give appropriate recognition to these splendid officers.

Report to the People of the First Congressional District of Idaho

EXTENSION OF REMARKS

OF

HON. GRACIE PFOST

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. PFOST. Mr. Speaker, as you know, this recently adjourned session of the 86th Congress was one of the longest and most spirited in history. I was kept busy representing the people of Idaho not only in the House, but also on my committee assignments with the House Interior Committee and the Public Works Committee. As part of my duties as chairman of the Public Lands Subcommittee I steered through Congress scores of important measures vital to our State and the Nation. In addition, I testified before both House and Senate committees on various matters affecting the Gem State. I took part in House debates on many bills and answered the many thousands of letters from the people in the First Congressional District of Idaho. The Outdoor Recreation Resources Review Commission of which I am a member has also required much of my time in studying the recreation, conservation, and development needs of our country.

IDAHO MATTERS

Important to Idaho was an amendment to the $2 billion omnibus highway bill under which our State will get some $2 million in extra funds for forest access and development roads during the next 2 years. Legislation which I cosponsored expanded the Federal school milk program and provided Idaho schoolchildren

with more than 5 million half pints of milk during the past school year.

The State's library program was aided through passage of the Library Services Act under which Idaho will receive almost $73,000 in Federal funds next year, and roughly similar amounts for the succeeding 4 years. Two of my bills clarifying land titles for the Nez Perce Indians were approved. I backed legislation authorizing the Government to strike 10,000 special centennial medals for the celebration of Idaho's 100th anniversary as a Territory in 1963. I sponsored a bill transferring a 2,400-acre area along the Cascade Reservoir in Valley County from the Reclamation Bureau to the Forst Service, thus paving the way for its development as recreation and camping sites.

FARMING

Little was done to help the farmer in the 86th Congress, mainly because of the wide gap between the congressional viewpoint and that of the Eisenhower-Nixon administration. A bill designed to benefit the wheat farmer, which I cosponsored, was vetoed by the President. Another bill I sponsored to lift the income level of the small family farmer also fell by the wayside. Net farm income is still $3.5 billion below 1952, even though the Republican administration has spent more on its farm programs in 7 years than was spent by all previous administrations since the Department of Agriculture was founded in 1861.

I sponsored a bill under which funds were appropriated to underwrite a more effective program for eradication of the dread cattle disease, brucellosis. The administration tried to cut this program back drastically. I was able to cut red-tape and help secure a number of rural electrification loans, including $284,000 for the Idaho County Light & Power Co-op Association.

After viewing frost damage to the fruit of Canyon, Gem, and Payette Counties, I helped get them designated as emergency loan areas for the farmers. Congress rewrote the sugar laws and there is a good chance Idaho's sugar beet quota will be increased in the near future. I vigorously opposed extension by the United States of its sugar-buying agreement with Castro's Communist-controlled Cuba, and I sponsored a price support bill to improve conditions for the dairy farmers which is now law.

MINING

I sponsored—and helped push through the House—a bill to aid the hard hit lead-zinc industry, including many small mine operators in Idaho. As you know, the measure was killed by a Presidential veto. I supported a depressed areas bill, under which the Government would have pumped fresh economic life into depressed areas, including Shoshone County, but this, too, was vetoed. I also went to bat for our torpedoed cobalt industry, urging that domestic mines—mainly in Idaho—be favored over foreign imports.

BUDGET

The 86th Congress pared White House budget requests by $211.6 million. This brought the overall amount by which Democrats have slashed administration budgets during the past 7 years by $12.7 billion. And, despite taxing you more than ever before in American history, this administration has added $20 billion to the national debt during those years. The interest on the national debt alone is now costing us taxpayers more than $8 billion a year—almost $1 million every hour. Roosevelt's highest peacetime budget totaled just $9 billion and Mr. Truman's peacetime budget $39 billion. Truman trimmed the national debt by $3 billion during his 7 years in office.

MEDICAL CARE—SOCIAL SECURITY

Congress approved a very modest medical-care-for-the-aged program. This measure will largely help those presently on public assistance, if the State provides enabling legislation to match Federal funds. Congress also made slight improvements in social security laws—raising the earning limitation from $1,200 to $1,500 for those who must work to supplement their income.

SCHOOLS

I supported a broad school program designed to strengthen the Nation's educational system, with no Federal control. Despite official figures from the U.S. Office of Education showing the Nation to be short 132,000 classrooms this fall, with 800,000 children on double shifts, the House Rules Committee blocked final action on the measure.

In summary, the adjournment of the 86th Congress marked the longest period of divided Government in history. For 6 years, the executive branch of the Government has been controlled by one political party and the Congress by another. This past Congress did not accomplish all I had hoped for, but it faced up to some of the most controversial issues of our times. In view of the circumstances, its achievements were substantial. Important gains were made for both Idaho and the Nation.

Plan Needed To Stabilize Domestic Livestock Prices and Create Methods To Expand Trade in Our World Markets

EXTENSION OF REMARKS

OF

HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WOLF. Mr. Speaker, in light of the growing seriousness of this problem, I have urged the Secretary of Agriculture to call an emergency nationwide conference of livestock producers in order to formulate an overall plan which will stabilize domestic livestock prices and create methods and procedures by which our world markets in this vital area of our economy can be expanded.

I have asked the Secretary of Agriculture the following questions, the answers to which I believe will shed some light on this fast deteriorating situation:

First. Are there any Agriculture Department policy decisions which might have caused the astonishing rise in the importation of red meats while our export markets for most livestock industry products have remained very sluggish?

Second. Have rapidly falling farm livestock prices been the result of the tremendous increase of red meats from abroad, plus the decision of certain meat processing industries to constrict the domestic market in a quest for greater and greater profits in the short run?

Third. Why is it that our agricultural producers who are acknowledged to be the most efficient in the world are not only losing their own domestic markets but are unable to increase their markets abroad?

Fourth. In light of the fact that the annual fall hog market glut will be upon us in a very few days, do you now have any plans to deal with the problem? I need not tell you that it becomes more urgent than ever that a comprehensive plan go into effect immediately.

Congresswoman Dwyer Reports on the 86th Congress and Union County

EXTENSION OF REMARKS

OF

HON. FLORENCE P. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. DWYER. Mr. Speaker, in keeping with the custom of many Members of Congress—and with a practice I have followed for the past 3 years—I am reporting to the people of the 6th Congressional District of New Jersey on the 2d session of the 86th Congress.

First, I shall review the record of this election-year Congress, and then my own activities as the Representative of the people of Union County.

I have found it an immensely challenging and rewarding experience to represent the more than half million people of our county in the House of Representatives. With this report go my thanks and gratitude for the privilege of acting in your behalf here in our Nation's Capital.

A DOUBLE FAILURE

I cannot recall another session of Congress which denied a President so many of his major legislative requests and which failed to enact so much of the program of the leadership of that Congress.

Here are several of the bills which died at adjournment:

Assistance to the States for construction of schools and classrooms.

An increase in the minimum wage, and broader coverage of the wage-and-hour laws.

Legislation to help keep passenger trains in operation.

Aid to economically depressed areas.

Liberalization of the immigration laws, which have made it difficult to reunite families.

A revised farm program which would ease the burden of surpluses on the consumer and taxpayer.

Establishment of a commission to help assure equal job opportunity under Government contracts.

Home rule for the District of Columbia, where residents are still denied the right to vote.

Creation of new Federal judgeships to help relieve the strain on the Federal courts.

A clean elections bill.

Authority to manage the public debt in a noninflationary manner, and a great many other important measures.

Ultimately, the blame for this failure must be placed on the partisan attitude of an election-year Congress—an attitude which valued political advantage more than legislative achievement, and made reasonable compromise frequently unobtainable.

This means that the 87th Congress will be faced with an unusually demanding schedule of major legislation—legislation, including several bills I have helped get started, which will require of Congressmen their devoted and effective attention if further valuable time is not to be lost.

ANOTHER BALANCED BUDGET

There was relatively little talk this year about balancing the budget or cutting Federal spending—for several reasons. The economy is in good shape. Employment and personal incomes reached record high levels. The budget submitted by the President to Congress last January indicated a surplus of about $4.1 billion, and since no budget-busting legislation was allowed to become law, there is reason to expect some kind of surplus next June 30. Since last year's Federal budget was also balanced, this will mean 2 straight years of black ink in the Nation's account books.

We are still benefiting, too, from the big tax reduction which President Eisenhower put through in 1954. Our national tax bill this year is approximately $10 billion less than it would have been had income taxes not been cut. That is an average tax saving of nearly $60 for every man, woman, and child in our country today.

Legislatively, the two big issues dominating this 2d session of the 86th Congress were civil rights and medical care for the elderly. In both cases, the legislation finally adopted by Congress fell far short of the hopes of sponsors, although all-out opponents of civil rights and medical care legislation were also displeased.

An intensive, well-organized filibuster by southern Democrats in the Senate stripped the President's civil rights recommendations to little more than a voting rights bill, and even this was hedged about by so many cumbersome procedures that the bill may be difficult to enforce.

MEDICAL CARE FOR ELDERLY

In the case of medical care for the elderly, Congress established a brand-new program, but it also gave new strength to the political issue by approving the weakest, least adequate version of the legislation.

The bill finally adopted by Congress did two things, principally: First, it provided more generous Federal grants to States for medical care for people on relief under existing old-age relief programs, and second, it initiated similar medical care programs for elderly persons not on relief but who are determined by States to be unable to pay their medical bills.

While the House was prevented from voting directly on either of the two more comprehensive versions of medical care legislation, it was clear from the Senate voting that the great majority of Senators favored a broader program than the one adopted. This means, I feel sure, that medical care for the elderly will be a major issue in the fall elections and, with the beginning of the 87th Congress next January, renewed efforts will be made to broaden the program or to replace it with a social security-type program. Recommendations of the White House Conference on the Aging, meeting in January, will be important in clarifying this issue.

Although the medical-care legislation was not made a part of the social security system, it was incorporated in a bill making broad changes in the social security laws. Some of these changes will be of special interest to Union County, where 30,000 or more retired people are now receiving social security benefits.

SOCIAL SECURITY CHANGES

The bill made persons eligible for benefits who worked in jobs covered by social security only one calendar quarter of every three quarters, rather than in one of every two. It authorized payment of benefits to survivors of workers who died before 1940 and had at least six quarters of coverage. It increased benefits for surviving children. It brought new categories of employment under social security, including employees of nonprofit organizations.

The bill also changed investment provisions so as to obtain a higher yield from social security trust funds; increased annual authorizations for maternal and child health services, services for crippled children, and child welfare; permitted persons receiving aid to the blind to earn additional income without sacrificing benefits; and extended the coverage of the unemployment compensation system.

The bill also made a rather weak gesture in the direction of liberalizing the present earnings limitation which penalizes persons receiving social security who earn more than $1,200 a year. The change would reduce somewhat the amount of benefits lost by persons earning between $1,200 and $1,500—but not much.

The time is long overdue, I believe, when the earnings limitation should be raised at least to $2,400, as I have proposed in bills I introduced in both the 85th and 86th Congresses. This is not only a matter of justice to people who have earned their social security benefits, but it is also sound national policy to encourage older people who wish to do so to continue to use their experience and talents after they have formally retired. Medical authorities are virtually unanimous in recommending this, and certainly the country cannot afford to lose the skills of its people automatically at age 65.

FOREIGN AFFAIRS

In the field of foreign affairs, where it is critically important that Congress and the President work harmoniously toward the one great goal of peace and freedom, Congress took significant steps, all of which I supported in the House.

Latin America: Authorized a new program to aid in the economic growth and social development of Latin America—a great continent on which we depend for friendship and help, but which we have often neglected—and to assist the recovery of Chile from the floods and earthquakes which recently devastated that country.

The Foreign Service: Raised the standards for Foreign Service personnel in the State Department by, among other things, requiring greater proficiency in foreign languages by diplomatic personnel assigned to foreign countries and by encouraging the learning of especially difficult languages by Foreign Service officers.

Refugees: Provided for admission of approximately 5,000 refugees, without regard to U.S. immigration quotas, as part of the International Refugee Year program for resettlement of European refugees still in temporary refugee camps.

Congo crisis: Increased the contingency fund available to the President for use in such emergency situations as the Congo crisis.

Cuba: Empowered the President to determine the amount of sugar to be imported from Cuba as an important diplomatic tool in dealing with Cuban Premier Castro; President Eisenhower then abolished the unfilled portion of Cuba's sugar quota for the present year.

NATO: Authorized the appointment of a U.S. Citizens Commission to participate in the NATO Citizens Convention to explore ways to develop democratic freedom by economic and political means.

Mutual security: Restored part of the funds cut from the mutual security program after the President warned Congress that the cuts would "jeopardize the security of the country."

International health research: Made it possible for the President, the Secretary of Health, Education, and Welfare, and the Surgeon General to conduct an international cooperative program in health research, training, and planning.

IDA: The Banking and Currency Committee, of which I am a member, entered the foreign policy field when we approved legislation authorizing U.S. participation in the International Development Association—an agency designed especially to help such newly emerging nations as those former European colonies in Africa to achieve a degree of economic stability and progress and thus avoid the chaos we have seen in the Congo. IDA will also place economic assistance on a much more businesslike basis, with other industrialized nations sharing the cost with the United States.

PROGRESS TOWARDS PEACE

The Senate alone acted on three additional measures which should be recorded here. It adopted the food for peace resolution endorsing the President's plan

to present to the United Nations this month a proposal "whereby we and other fortunate nations can, together, make greater use of our combined agricultural abundance to feed the needy of the world."

The Senate also ratified two treaties: the new Mutual Security and Cooperation Treaty with Japan, and the Antarctica Treaty to restrict the use of that continent for peaceful purposes only. This latter treaty is particularly significant because it marks for the first time since the cold war began that the United States and Soviet Russia, together with other nations, have succeeded in negotiating a binding agreement which prohibits military operations and nuclear testing and provides for complete freedom of inspection and aerial reconnaissance—objectives we have been seeking, on a larger scale, for many years.

The House, too, acted alone in approving two important resolutions—one of which expressed the sense of Congress that the fundamental freedoms and human rights of the people of captive nations should be restored and which urged the President to pursue this goal at international conferences; while the other expressed congressional condemnation of the Nazi-like desecration of houses of worship and other sacred sites earlier this year.

DEFENSE POLICY

The Defense appropriations bill, traditionally the vehicle Congress utilizes to influence U.S. defense policy, provided funds just short of $40 billion—more than 50 percent of the Federal budget—an increase of about $780 million over Defense Department estimates. The bill was passed by rollcall votes in the House of 402 to 5 and in the Senate of 83 to 3, and included these principal items: Increased funds for military airlift—transport of arms and men; approval of the controversial administration-proposed aircraft carrier; a go-ahead for the B–70 supersonic bomber project; doubled funds to prepare for a more complete airborne alert; speeded up the Army's equipment modernization program; greatly increased the immensely successful Polaris missile submarine program; initiated a new Air Force antimissile system; and added funds to increase our antisubmarine warfare capability.

One of the most potentially important changes made by Congress in the defense budget, however, has gone largely unnoticed. This was a 3 percent across-the-board reduction in the appropriation for procurement of military equipment, a cut totaling about $400 million. Congress insisted on this cut, as the conference report noted, "in an effort to compel prompt remedial action" by the Defense Department against waste and duplication in military purchasing.

CONGRESSIONAL INTEGRITY

Among congressional achievements which I supported wholeheartedly and of which I am especially proud, was a series of three amendments designed to prevent congressional abuse of certain of its own privileges. The first, which you may remember I discussed in an earlier report to the people, killed an attempt in the House to allow Congressmen in urban areas to use their congressional frank for junk mail, addressed only to occupant. The second prevented Congressmen and other Government officials from receiving free or reduced-rate transportation on U.S. merchant ships, most of which are heavily subsidized by the Government. And the third amendment required public itemizing and accounting of all kinds of funds, American dollars and foreign money alike, spent by traveling Congressmen and committee staff members.

This was a good, though too long delayed, beginning toward eliminating conflict-of-interest situations in Congress. I hope that additional progress will be made next year, and I shall continue my own efforts in this direction.

SOME ACCOMPLISHMENTS

Other legislative accomplishments this year, all of which I supported, were these:

Pure food: To protect consumers of foods, drugs, and cosmetics from color additives found to cause cancer when used by human or animals.

Pay raise: A modest one for postal workers and other Government employees.

Health training program: To encourage specialized public health training in nursing, engineering, and public health schools.

Housing: A limited bill, in place of general housing legislation, to continue three existing programs: the FHA home improvement loan program, the college housing loan program, and the community facilities loan program—which would otherwise have been halted.

Broadcasting: To prohibit payola and other unethical practices in radio and television broadcasting and adoption of regulations and penalties to be enforced by the Federal Communications Commission.

Tax revision: To permit taxpayers a personal income tax deduction of all medical expenses incurred by them in the care of dependent parents over 65 years old.

Veterans loan program: Extended for homes, farms, or businesses purchased by veterans.

High price supports for wheat: Rejected, as encouraging further overproduction and high prices.

Library Services Act: Extended to bring the riches of the world of books to many who had never known them.

Special milk programs: Continued for children.

Obscene mailings: Strengthened Post Office Department's authority to prevent the use of the mails for distribution of obscene or fraudulent matter.

Narcotics: Established a system of licensing and control over the manufacture of narcotic drugs, and passed a House resolution encouraging the President to call a White House Conference on Narcotics to seek ways of controlling this pernicious evil.

Again this year, both my committees—the Banking and Currency Committee and the Government Operations Committee—where so much of the work of shaping legislation is done, were unusually active, in several cases on matters of direct interest to Union County and the metropolitan New York-New Jersey area.

SAVED $85 MILLION

The Intergovernmental Relations Subcommittee of the Government Operations Committee, of which I have been ranking minority member, continued our intensive study of various aspects of the Government's multi-billion-dollar agricultural price support program, in particular its increasingly costly surplus grain storage activities.

In accord with our recommendation, the Agriculture Department decided recently to reduce the storage rates it pays to commercial warehousemen by an average 19 percent. This will save taxpayers, I am pleased to report, between $85 and $100 million in the present storage year.

The chief objective of farm policy, we urged in our reports, should be to assure an adequate supply of food and fiber for consumers at fair prices. We also recommended further economies in the storage of surplus crops and, in an operation involving more than $600 million a year, economy is very much to be desired.

Additional savings in storage costs should also be realized as a result of the Agriculture Department's adoption of my recommendation that greater use be made of the "mothball fleet" of World War II Liberty ships anchored in the Hudson River for storage of surplus grain. As I pointed out to the Department, these ships provide high-quality storage at much lower costs. The Department's recent decision to more than double existing stocks of grain there was good news, not only for taxpayers but also for the economy of our region.

CONTROVERSIAL BILLS

The Banking and Currency Committee had more than its share of controversy this year. An overall housing bill was blocked by the Rules Committee, and the President vetoed the depressed area bill.

A substitute bill, which I supported strongly, called for nearly as much assistance as the committee bill and would have directed it far more effectively into areas of deep and chronic unemployment, such as former textile towns in New England and coal mining areas in West Virginia—which is the whole purpose of such legislation. Unfortunately, the majority on the committee preferred to have an issue rather than provide help, and so they refused even to consider the substitute.

Among its more constructive accomplishments, the committee approved amendments to the Small Business Investment Act facilitating the extension of credit to small business enterprises, a bill I cosponsored.

A major disappointment, however, was the committee's failure to act on another bill I introduced in the House, the mass transportation bill, which would provide both financial and planning assistance to metropolitan areas to preserve and improve commuter facilities. The bill was especially significant, I believe, because for the first time it ap-

proached the commuter problem on a broad basis and integrated the transportation needs of urban areas with all the other aspects of land use and the future growth of our metropolitan regions.

COMMUTER SITUATION

While we persuaded the committee chairman to hold hearings on the bill, at which I testified, he would take no further action without an OK from the House leadership—which, I regret, never came. Nevertheless, this will be a priority matter for the 87th Congress.

The same blindness to the needs of urban areas blocked another of my commuter bills, a measure to require greater consideration of the public interest by the Interstate Commerce Commission before it permits railroads to abandon passenger service. Here, again, the committee—in this case the Interstate and Foreign Commerce Committee—held hearings on my bill, but then refused—on three separate occasions—to send the bill to the House floor.

Despite these disappointments, I can report some progress in reaching solutions to our grave commuter transportation problem. The Advisory Commission on Intergovernmental Relations, which was created last year by legislation I cosponsored, began operation this year. As one of three House members of the Commission, I obtained the cooperation of my colleagues in giving the transportation problem priority attention. Specific action will be recommended to Congress and to the States, counties, and cities in metropolitan areas early next year.

PORT OF NEW YORK AUTHORITY

One of the most dramatic events of the year was the vote by which the House cited for contempt three officials of the Port of New York Authority following their refusal to submit the authority's files to a House committee investigating the extent of the port authority's jurisdiction. The issue arose, you will remember, when it was learned that the port authority planned to build a huge jet airport in nearby Morris County and to initiate jet operations at Newark Airport.

Since the House had unanimously approved the investigation, and because the Constitution specifically assigns to Congress jurisdiction over interstate compacts, such as the compact establishing the New York-New Jersey Port Authority, the House had no alternative but to approve the contempt citations.

As a result, the issue can now be referred to the Federal courts for an authoritative decision as to the extent of congressional responsibility for interstate compacts.

UNION COUNTY IN CONGRESS

Union County was also directly affected by other actions of the 86th Congress:

New Jersey-New York port: The public works appropriations bill included funds for additional navigation work in the port area, for which I testified before the Appropriations Committee. Constant attention to navigation needs in the waters along the shores of Union County and in other parts of the port area is essential for the continued job-producing growth of this greatest port in the world. The rapid development of our own Port Elizabeth is an impressive example.

Air pollution: A particularly hazardous problem in parts of Union County, it came under renewed attack when we approved legislation authorizing an intensive study of the effects of automobile exhaust fumes on public health. This may lead, I hope, to practical developments reducing or eliminating exhaust fumes.

Teenage drinking: Our campaign to persuade New York State to raise its legal drinking age to 21, in conformity with all five of its neighbor States, received added impetus recently when seven Vermont teenagers were killed on their way back from drinking in New York. Unfortunately, it takes a tragedy like this to arouse the public and their elected representatives to the need for corrective action, but we must seize every opportunity to dramatize the dangers. At my request, Governor Rockefeller has agreed to meet with me to see what can be done, and if nothing else will work, I plan to ask the Advisory Commission on Intergovernmental Relations to find a way in which our five States can cooperate in bringing pressure to bear on New York.

Highways: The continuing investigation of our national highway troubles by the House Public Works Committee may produce some changes which will help protect our own communities from unnecessary destruction by poorly planned superhighways. Meanwhile, I shall continue to do everything possible to help areas like Springfield and Union in their fight to win approval of more acceptable alternate locations.

Post offices: To meet Union County's postal needs, which have multiplied in recent years under the impact of heavy population growth, new post offices have been authorized this year for Springfield, the Mountainside branch of Westfield, Fanwood, Scotch Plains, the Bayway, and North Section stations of Elizabeth, and the Hillside branch of Elizabeth. New buildings in Kenilworth, Roselle Park, and Garwood are scheduled, and a new Muhlenberg area station is under study in Plainfield. In addition, extensive expansion and modernization work has been OK'd for the Summit Post Office. Many other improvements in equipment, facilities and service have been made throughout the county this year. So the many, many hours I have devoted to on-the-spot study of our postal needs and to discussion with regional Post Office officials and the Postmaster General himself are now paying off.

Other Federal-aid programs which I have supported are now contributing to the well-being of our people. For example, funds have been granted for major hospital construction projects in Plainfield and Elizabeth. Public housing, housing for the elderly, and urban renewal projects are in various stages of work in Rahway, Elizabeth, and Plainfield. And a comprehensive project is under way to plan for a water distribution system to serve 30 northern New Jersey communities, including some in Union County.

HELPING PEOPLE

However, the most rewarding activity of a Congressman, in my judgment, is in the area best described as "helping people." More of my time, I think, is devoted to the multitude of individual problems of individual citizens in Union County than to anything else. This is as it should be, for there is no more important responsibility of a Congressman than to serve as the channel through which individual citizens control their Government.

We cannot always succeed with every request, but we do try. You can be sure, therefore, that your problem is understood, that bureaucratic redtape will be cut, and that within the law and propriety everything that can be done will be done.

This year, to cite a few instances, my staff and I helped to expedite dozens of immigrant visas which meant happy reunions for dozens of families. We helped speed up the issuance of passports, filled requests for thousands of Government documents, answered endless questions about the complexities of Federal regulations, helped servicemen obtain leaves, transfers or, in emergency cases, discharges.

We straightened out numerous snarls which were holding up veterans or social security benefits, including one especially worthwhile case in which a widow of a World War I veteran had been denied for several years her rightful pension benefits.

We have helped to arrange weddings, on the one hand, and obtained the cooperation of diplomatic missions abroad in case of death away from home.

We have obtained military bands for Fourth of July parades, had flags flown over the Capitol for organizations and individuals, and welcomed thousands of you—alone, with your families, or in larger groups—to the Nation's Capital and tried to make your visit here as interesting as possible.

Special mention should be made of Union County's young men at West Point, Annapolis, the Air Force Academy, and the Merchant Marine Academy. Since my election to Congress in 1956, I have made every one of my congressional appointments on a merit basis, as determined by competitive civil service examinations and subsequent Academy exams, rather than on a personal or political basis.

The results speak for themselves. Not a single boy has failed to make good. All of them have ranked well up in their classes, and several have made the dean's list or other honor rolls—an overall performance well above the average. Union County has a right to be very proud of our representatives in the service academies and to be confident that their future careers as officers in our Armed Forces will reflect great merit on themselves, their families, and their communities.

KEEPING IN TOUCH

Finally, as many of you know, I have continued and in some cases expanded my efforts to keep in touch with the people I represent, to seek your views about important issues, and to be ever alert to

the needs and interests of Union Countians.

Through my biweekly report to the people, our annual congressional questionnaire, occasional legislative open houses at my home in Elizabeth, a full-time district office, office hours in other communities, a huge volume of correspondence, and as many weekend visits to Union County as I can manage during sessions of Congress, we have kept each other well informed.

I greatly appreciate the effort, the interest, and the cooperation you have shown in this mutual endeavor. You have made my work here very worthwhile and very satisfying.

Throughout it all, I am pleased to report, I have maintained a nearly perfect record in answering rollcalls—the point of decision, of course, in every legislative issue. Of the 180 rollcall votes in both sessions of the 86th Congress, I missed only 1, and on that I was paired. This is an attendance record of better than 99 percent and an on-the-record percentage—for 4 straight years—of 100.

In reviewing the year's activities, I have been impressed repeatedly by the way in which everything we do fits together as parts of the pattern of our American way of life. Each of us has a role to play in keeping our country strong and our people free, and in making our America ever more worthy of the traditions and heritage we have received from the past.

Over the Speaker's chair in the Chamber of the House, there has been placed a quotation from Daniel Webster, which may serve to remind us all of the opportunities ahead:

> Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.

Together, we can meet this challenge.

Testimonial Dinner for James P. Mitchell, Secretary of Labor

EXTENSION OF REMARKS
OF
HON. CLIFFORD P. CASE
OF NEW JERSEY
IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. CASE of New Jersey. Mr. President, it is my pleasure to speak a few words of praise on behalf of a respected and dedicated public servant whom I am fortunate indeed to count as a fellow resident of the State of New Jersey. He occupies with distinction and high ability one of the most sensitive Cabinet posts in the Eisenhower administration, that of Secretary of Labor.

In the 7 years that he has held that important office, he has been the valued and trusted adviser to both President Eisenhower and Vice President NIXON. He is held in high esteem by working men and women everywhere. He is respected by members of the business community. And he has won the admiration and affection of those who work under him in the Department of Labor.

I am sure, Mr. President, that everyone in this Chamber knows that I am referring to the Honorable James P. Mitchell. Because he is a friend of the workingman, because he is a statesman in labor affairs, because he has administered his office with dignity and fairness Secretary Mitchell was recently honored at a testimonial dinner sponsored by the leaders of the unions which comprise the AFL–CIO and by the United Mine Workers. It is the first time in history that such a high tribute has been accorded a Secretary of Labor by leaders of the labor movement.

His testimonial, which was signed by the James P. Mitchell testimonial dinner committee in recognition and appreciation of the years of service he has rendered to the working men and women of America as Secretary of Labor, was presented him "on behalf of the working men and women of the United States as a symbol of affection and esteem to their friend, the Honorable James P. Mitchell, in grateful appreciation and recognition of his untiring and selfless devotion to their welfare, in tribute to his intelligent statesmanship and competence as a public administrator, and for his human understanding, wise counsel and good sense in providing extraordinary leadership as Secretary of Labor in advancing the welfare of the people of the United States."

I ask now, Mr. President, unanimous consent to have included in the RECORD the text of the address by President Eisenhower at the testimonial dinner.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY DWIGHT D. EISENHOWER, PRESIDENT OF THE UNITED STATES, AT TESTIMONIAL DINNER HONORING JAMES P. MITCHELL, U.S. SECRETARY OF LABOR, JUNE 29, 1960

Mr. Chairman and distinguished guests, I feel that there is something possibly symbolic about my appearance here this evening. I stand in front of you in plain view, and for some years I have been the target for some of the sharpest barbs that some of you have had to launch in my direction, and I don't know of any time when I've been more exposed than I am at this moment.

But there are two specific areas outside of our common patriotism and love of country in which I find myself always in agreement with the AFL–CIO and indeed the other unions here represented. Those two are: In our recognition that we are but one Nation in the world and that our own prosperity, our own progress, and our own peace depend upon our friendship with those nations and our leadership of them in the paths of peace; and the second: Our common admiration for your guest of honor, Jim Mitchell.

Now, I'd like to talk for just a moment about these two subjects. Time and again I have been encouraged in heart-warming fashion by the members of all our unions in efforts to increase the spirit of friendship and the depth of understanding between this Nation and other nations who, like us, believe in the dignity of man and his possession of inalienable rights given to him by his Creator.

There is in the Cabinet a committee that has as its job trying to promote better markets throughout the world, so that our economy may prosper as we help others to prosper. As their purchasing power rises, our prosperity rises with it.

This is the kind of thing that we understand together and this is the kind of thing in which the AFL–CIO has always been in the forefront in supporting. I cannot tell you how much this has meant to me, because there are those shortsighted people who believe that by building around ourselves walls, walls of guns and walls of tariffs, that we can live in a secure and prosperous isolation.

My friends, you at least, the people of these organizations, have shown that they recognize the falsity of any such belief and indeed have been on the positive side of working to destroy such illusions and delusions in this country.

Fortunately, the number of people that so believe is diminishing, and I am completely sure that part of that result has been because of your enlightened efforts, and for this, on behalf of the entire Nation, I must thank you.

Now, I get to my second subject, Jim Mitchell.

I was once told by a very distinguished soldier that practically every general's reputation as it was recorded in history was a result of his skill in picking a chief of staff. I rather think, if I am going to live in history, one of the reasons is the wisdom I had in selecting Jim Mitchell as your Secretary of Labor. Because he and I both have learned this about the leaders of labor. They do not see eye to eye with us always, but they respect a man of courage, of honesty, of integrity, and who tries to dig under the facades of slogans, of wisecracks, and to get at the facts, get them out so that people looking together at the same problem are not talking about something that is false or distorted, but things as they are, the realities of situations.

I have had the great fortune, the great good fortune of having Secretary Mitchell at my side now these 7½ years. For that good fortune, I thank the Almighty, because he has constantly championed the cause of labor as such and its right to get its proper due because the people who with their hands and their heads and their thinking produce the wealth of this country are entitled to their proper dues and at the same time say that in a free enterprise country, if we're to be preserved as such, that we must recognize the needs for profit, because if there are no profits there will be no investments and free labor as we know it will not continue to exist.

This is the kind of thing he's taught, the kind of thing he's preached, outside and within the confines of the Cabinet room.

Each of us, you of labor, we of Government, have got a very deep responsibility to the United States, the Nation that we believe under God is destined to lead the entire earth to better paths, finer paths, toward peace and justice in this world.

And so I think, regardless of the points of difference you have found and discovered and criticized within this administration, which was not only your right and probably at times your accurate calculation—I don't know—

But I say this, no man has ever been more dedicated to the idea that whatever is good for the United States is good for labor than has Jim Mitchell.

And, therefore, as I salute you, all of you, of the labor movement, I salute him and his family who are so fortunate to be here as part of the group that you're honoring along with him this evening.

Thank you and good night.

Mr. CASE of New Jersey. Mr. President, at this point I want to submit for the RECORD a letter written to Secretary

Mitchell on the occasion of the testimonial dinner by the top career civil service officials of the Department of Labor.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JUNE 29, 1960.

Hon. JAMES P. MITCHELL,
Secretary of Labor,
Washington, D.C.

DEAR MR. MITCHELL: The honor paid you tonight by the American labor movement is well deserved. You have made an outstanding contribution to the welfare of the working people of our Nation.

We career civil-service officials of the U.S. Department of Labor desire to express our own admiration, affection, and respect for you. We consider ourselves most fortunate to have had your wise, fair, and able leadership during the past 7 years. It has been a pleasure, a privilege, and an inspiration to work with you.

Your distinguished service as Secretary of Labor has brought prestige and respect to the Department of Labor. Under your direction, its services to the people of our Nation have grown immeasurably.

Sincerely,

Millard Cass, Deputy Under Secretary; James E. Dodson, Administrative Assistant Secretary; Nelson M. Bortz, V. S. Hudson, Seymour L. Wolfbein, Charles D. Stewart, Deputy Assistant Secretaries; Harold C. Nystrom, Acting Solicitor; John Leslie, Director of Information; Edward E. Goshen, Bureau of Apprenticeship and Training; Robert C. Goodwin, Bureau of Employment Security; A. W. Motley, Bureau of Labor Standards; Hugh W. Bradley, Bureau of Veterans' Reemployment Rights; Aryness Joy Wickens, Economic Adviser to the Secretary; Edward J. McVeigh, Director of Personnel; Leonard R. Linsenmayer, Bureau of International Labor Affairs; John L. Holcombe, Bureau of Labor-Management Reports; Ewan Clague, Bureau of Labor Statistics; Clarence T. Lundquist, Wage and Hour and Public Contracts Division; Frances A. Ambursen, Women's Bureau.

Mr. CASE of New Jersey. Finally, Mr. President, I ask unanimous consent for inclusion in the RECORD several newspaper editorials, as well as a column by a respected newspaper commentator, which will show the extent of the public's awareness of, and appreciation for, the fine record of Secretary Mitchell.

There being no objection, the editorials and column were ordered to be printed in the RECORD, as follows:

[From the New York Times, July 1, 1960]

A TRIBUTE TO MR. MITCHELL

The testimonial dinner given to Secretary of Labor James P. Mitchell, sponsored by 28 top leaders of the American labor movement, was a tribute to a man who has amply deserved it. The occasion was unique both because of the kind of people responsible for it and the character of the recipient himself. It would be almost unbelievable, if it hadn't happened, that so large and influential a group of unionists, whose politics are traditionally Democratic, should honor a Cabinet member in an administration whose policies labor has so bitterly attacked.

Remarkable, too, is the man who for almost 7 years has kept the confidence and respect of a Republican President and members of his Cabinet and of leaders of organized labor—with all of whom he often differed widely. This could only have been done by an unassuming person of stubborn integrity, dedicated to the welfare of the Nation's workers, intimately familiar with the conditions of their life and well aware both of the possibilities, and the limitations, of methods to improve their lot.

Mr. Mitchell, in short, is an idealist of rare sophistication. We, too, applaud his achievement.

[From the Washington Post, June 29, 1960]

SALUTE TO JAMES P. MITCHELL

Secretary of Labor James P. Mitchell will be the recipient of a unique tribute tonight. He is to be honored at a testimonial dinner sponsored by President George Meany, of the AFL–CIO, and numerous other leaders of the labor movement in recognition of nearly 7 years of public service in his present post. The event is the more noteworthy because Mr. Mitchell is part of an administration that is often criticized as being probusiness, and he has himself sometimes felt the barbs of sharp labor criticism.

When Mr. Mitchell was chosen in 1953 to succeed Martin P. Durkin as Secretary of Labor, some union leaders found the appointment incredible. For a long time his standing among the labor chieftains seemed very doubtful. As the years passed, however, his sincerity in promoting the welfare of labor has come to be widely recognized. Secretary Durkin had tried to bring about a spectacular agreement upon modification of the Taft-Hartley Act and failed. Secretary Mitchell concentrated on more basic and immediate problems, and he has succeeded in considerable measure both in improving working conditions and in securing amendment of the Taft-Hartley law.

His efforts in behalf of migratory workers have been especially outstanding. In many instances he has contributed to better understanding between employers and employees and to the settlement of stubborn disputes over wages and working conditions. Though he advocated many of the stiff legislative reforms that were written into the Labor-Management Reporting and Disclosures Act of 1959, some of which were vehemently opposed by organized labor, his persistent work for advancement of the status of wage earners has earned their respect and appreciation. It is refreshing that political differences have been laid aside for recognition of Mr. Mitchell's good work in behalf of all those who toil.

[From the St. Louis Globe-Democrat, June 28, 1960]

TESTIMONIAL DINNER FOR JIM MITCHELL

Tomorrow night in Washington a large group of the top labor leaders of the country are tendering a testimonial dinner to Secretary of Labor James P. Mitchell.

This is a truly remarkable acknowledgment of the public service of one of the most effective men ever to occupy labor's chair in the President's Cabinet. During the 7 years Jim Mitchell has been Secretary, he has worked indefatigably to bridge the historic gap which has unfortunately existed between all Republican administrations and the organized labor management.

On the record and behind closed doors, Secretary Mitchell has won the personal respect of the great majority of labor leaders. Dealing with a group which has traditionally demanded 100 percent compliance as the price of their affection—and then will rarely bestow it on a Republican—Jim Mitchell has been no doormat.

More important, however, he has inculcated a sense of mutual give-and-take which has been helpful and which will bear even more fruit in years to come. The dinner is of such importance that the United Mine Workers are joining with the AFL–CIO in honoring Mr. Mitchell.

Jim Mitchell needs no accolade such as this to give him his "well done," but it must, nevertheless, be reassuring to him to know that his 7 years of dedicated public service are being recognized by the most important men in the labor movement today and, beyond this, by the public as well.

[From the Jackson (Mich.) Citizen-Patriot, July 1, 1960]

A GREAT SECRETARY OF LABOR

The testimonial dinner tendered Secretary of Labor James P. Mitchell by the Nation's labor leaders (James R. Hoffa excepted—he was not invited) was a tribute to a man who has done a fine job.

It was unusual in that the guest of honor and President Eisenhower may have been the only Republicans in a crowd of Democrats.

But partisan politics did not keep the men who lead the Nation's unions from their expression of gratitude for the work of a friend. They also recognize the fact that the Cabinet post most directly concerned with their interests finally is being given the stature it deserves.

Mitchell might be classed as the first great Secretary of Labor. Since the Department was created as a separate agency in 1913, it has been filled with a succession of comparatively weak administrators or labor men who were so close to the forest they couldn't see the trees.

Strangely enough, the Labor Department fell to its lowest estate under the direction of Miss Frances Perkins during the Roosevelt administration when labor exerted the greatest influence on government.

In his first appointment to the Department, President Eisenhower repeated the mistake of his predecessors by naming a card-carrying plumber, Martin P. Durkin. On his departure the President turned, not to a labor man, but to a labor expert in the form of Mr. Mitchell.

The result obviously has been pleasing to the unions and to Mr. Eisenhower. With one voice they praised this man who has served so well in a difficult time.

[From the Kansas City Star, June 18, 1960]

LABOR HONORS THE SECRETARY

James P. Mitchell became Secretary of Labor in 1953 with the promise to do "the best possible job for the people of the United States." Now we hear testimony to his success from a source that traditionally has taken a dim view of Republican Secretaries of Labor. The American labor movement will honor Mitchell at a testimonial dinner in Washington June 29.

Perhaps the most remarkable aspect of labor's tribute is that only a few months ago union leaders were still roundly denouncing the Secretary for his part in writing the labor law of 1959. For that purpose, the dusty old phrases once applied to Taft-Hartley were hauled out. Apparently the union leaders are beginning to realize that they can live with—and prosper under—the 1959 law. It is by no stretch of the imagination the slave labor act that it has been called. Perhaps the Mitchell dinner is a small indication that labor is beginning to realize as much.

Mitchell has been no exception to the rule for men in his job. He has been attacked by both labor and management. That's the nature of his post. But he has worked hard at steering a moderate course in the public interest. He has been the President's articulate spokesman on industrial relations. He has worked closely with business and labor and, as all Cabinet officers do, occasionally has "put his foot in his mouth." He has infuriated some labor leaders, but one union man recently commented:

"He understands our problems. He speaks our language."

No doubt Jim Mitchell still has his share of critics, but he certainly has some solid accomplishments for his record.

[From the New York Herald Tribune, June 26, 1960]

LABOR'S FRIENDLY CRITIC

(By Roscoe Drummond)

WASHINGTON.—The interests of American labor have never been better represented in Government than during the 6-year tenure of James P. Mitchell in the Eisenhower administration.

Partisanship and presidential politics aside, the labor leaders are giving almost unanimous evidence of their high regard for Mr. Mitchell with a testimonial dinner in Washington June 29 sponsored by the combined union movements, including the CIO-A. F. of L. and the United Mine Workers.

U.S. labor leaders are rarely united on anything. They are completely united in paying this tribute to Mr. Mitchell for his role in the conduct of the Labor Department and in labor-management affairs in an administration toward which they have been critical and distant.

There is no political purpose in this gathering of some 500 leaders of the labor union movement to express their appreciation for his public service. Though not one of their own—like Martin Durkin—Mr. Mitchell has proved an able spokesman for but not a prisoner of organized labor. Nearly all of his hosts will be supporting the 1960 Democratic presidential nominee a month hence. On this occasion they will be acknowledging the fairness and the effectiveness of Secretary Mitchell, who is working for the nomination of Vice President NIXON.

Mr. Mitchell would himself not be averse to being Mr. NIXON's running mate and it is known that this would give President Eisenhower no pain. Other than Attorney General William Rogers, no one has worked more intimately with the Vice President than Secretary Mitchell. They have been close allies in the administration. Together they negotiated the settlement of the steel strike last fall. They have developed great respect for each other.

The labor movement's testimonial dinner does not imply political support for Secretary Mitchell if he becomes the Republican vice-presidential candidate. He would be entirely on his own. It also does not imply that the union leaders like everything in Mr. Mitchell's record.

It is Mr. Mitchell's foremost conviction that U.S. unions must do more than they have thus far in seeing that their own interests are parallel with the public interest.

"Too many labor leaders," Mr. Mitchell told me on one occasion, "tend to make the same mistake which many industrialists made a half century ago when their attitude was interpreted as being—'the public be damned.' There is a disregard of public opinion on the part of quite a few labor leaders. Their sense of public responsibility is not equal to the powerful role they play in public affairs.

"The American labor leader has become too important and powerful a figure not to heed fully his responsibility to the community and to public welfare. Unions operate in a much wider area now, one far removed from the basic bargaining operations. They influence legislation. They administer funds. They invest their members' money. They publish newspapers. They take part in oversea programs and international conferences. They take economic, social, and educational actions which have little bearing upon their traditional bargaining function."

Mr. Mitchell is not suggesting in the least that labor's national role should be narrowed but rather that its national responsibility should be equal to its power. What he is saying is that he would like to see labor more consistently and, symbolically, accept the motto that "what's good for the Nation is good for labor"—rather than vice versa.

One thing is certain: a great merging of national interest is needed to produce the increased productivity and economic growth to win the contest with the Soviets during the decade of the sixties.

[From the Decatur (Ill.) Review, June 27, 1960]

TESTIMONIAL DINNER FOR MITCHELL

Secretary of Labor James P. Mitchell will be honored Wednesday night by a wide range of top labor leaders in the Nation. The testimonial dinner is doubly noteworthy because of Mr. Mitchell's political affiliation, one, few labor leaders share.

Secretary Mitchell has served the Eisenhower administration for 6 years. Most of the country's top labor officials feel, on the whole, that he has done a fair and effective job in labor-management relations. His role in helping settle the long and costly steel strike is a recent example. His work in the Eisenhower Cabinet has earned him strong support for the Republican vice presidential nomination, a possibility discussed by columnist Victor Riesel elsewhere on this page.

The testimonial dinner, however, does not mean labor goes wholeheartedly for the Secretary of Labor, nor does it mean he is completely in agreement with the labor union leaders. In an interview with Roscoe Drummond, New York Herald Tribune service columnist, Mr. Mitchell gave some of his basic views on labor leadership:

"Too many labor leaders tend to make the same mistake which many industrialists made a half-century ago when their attitude was interpreted as being 'the public be damned.' There is a disregard of public opinion on the part of quite a few labor leaders. Their sense of public responsibility is not equal to the powerful role they play in public affairs.

"The American labor leader has become too important and powerful a figure not to heed fully his responsibility to the community and to public welfare. Unions operate in a much wider area now, one far removed from the basic bargaining operation. They influence legislation. They administer funds. They invest their members' money. They publish newspapers. They take part in overseas programs and international conferences. They take economic, social, and educational actions which have little bearing upon their traditional bargaining function."

These are telling words. Labor today must broaden its range of public responsibility. The power of such unions as the Steelworkers and the Teamsters over the Nation's functioning is obvious. To go with that power, Secretary Mitchell rightly says, there must be a sense of public responsibility.

[From the Union City (N.J.) Hudson Dispatch, July 2, 1960]

LABOR LEADERS DINE SECRETARY MITCHELL

We thought we had seen just about everything in our long career as a newspaperman but something new was added Thursday night when between 400 and 500 American union labor leaders gave a testimonial dinner at $20 a plate to none other than Republican Secretary of Labor James P. Mitchell, of New Jersey.

This was a most extraordinary turn of events, for it is estimated that 90 to 95 percent of organized labor's tycoons vote straight down the line Democratic. Had such a dinner been staged for New Deal or Fair Deal Democratic Secretaries, it would have been taken as a matter of course.

Not so in the case of the Labor Secretary in President Eisenhower's Cabinet, who has survived 7 years at the laborious post, and we hasten to say no pun is intended.

To make dinner even more remarkable, Mr. Eisenhower, enmeshed in the amenities attendant upon the visit of the King and Queen of Siam to Washington, managed to break away long enough to put in an appearance at the Mitchell tribute. He joined in the festivities and lauded the man who has been his labor aid since 1953.

The idea behind the unusual affair was stated to be personal and nonpartisan. Labor leaders said they wanted to express their appreciation of Mr. Mitchell's efforts on behalf of the workers, even though they felt he had not been able to deliver on issues they regarded as top priority.

"There have been times, we know, when Jim Mitchell could have done a much more effective job for labor's justified objectives if he had enjoyed greater authority—times when it appeared he was fighting with both hands tied behind his back," William F. Schnitzler, secretary-treasurer of AFL–CIO, said.

Others who spoke were Jacob Potofsky, president of Amalgamated Clothing Workers of America, and George Harrison, president of Railway and Steamship Clerks. George Meany, president of AFL–CIO, was honorary chairman.

On the dinner committee were such union labor bigwigs as Walter Reuther of United Auto Workers, A. E. Lyon, of Railway Labor Executives Association, and Thomas Kennedy, who recently succeeded John L. Lewis as president of United Mine Workers. Particularly noticeable by his absence was James R. Hoffa, beleaguered boss of the Teamsters' Union.

Those who promoted the tribute to Secretary Mitchell declared the dinner was not a political insurance affair. Much was made of this point by Arthur J. Goldberg, counsel for the Steelworkers, who with AFL–CIO Vice President Joseph D. Kiernan, handled many details of the unprecedented testimonial.

[From the Elizabeth (N.J.) Journal, July 1, 1960]

LABOR'S LOVE FOR MITCHELL

Organized labor is the most militant segment of the Democratic Party and when it arranges a tribute for a Republican Cabinet official on the eve of a presidential campaign, the motives speak for themselves.

The dinner that 500 labor leaders held to honor Secretary of Labor James P. Mitchell was formal acknowledgment that in his 6 years in Washington, he has done an outstanding job. President Eisenhower's appearance spoke for administration approval.

Just as significant as the list of those who turned out to honor Elizabeth's Jim Mitchell was the absence of James R. Hoffa. The Teamster leader, whom many regard as the symbol of what's wrong with labor, had no reason to honor the hard working Secretary.

Mr. Mitchell has been among the foremost in the fight to clean up unionism. He consistently has defended the good in the labor movement despite the unpopularity of the cause among some members of his own party.

The Secretary's accomplishments in establishing good will with a traditionally hostile group stand out even more sharply when they are compared with the failings of some other members of the Eisenhower team. Mr. Mitchell has been an unsung, but valuable, member of the administration.

The remarkable aspects of the labor tribute were well publicized and undoubtedly one of the most interested readers of all the news copy was RICHARD M. NIXON. Mr. NIXON, presumably mulling over vice presidential possibilities, must be giving considerable thought to Mr. Mitchell.

[From the Asbury Park (N.J.) Press, July 3, 1960]

MR. MITCHELL'S PERFORMANCE

The testimonial dinner given to Secretary of Labor James P. Mitchell, by hundreds of union leaders emphasizes the unique role Mr. Mitchell has filled with distinction as a member of President Eisenhower's Cabinet.

It is no secret that many of the union leaders prefer a Democratic administration to a

Republican administration. A number of the speakers at the dinner made this point clear, but they also said that in the difficult assignment Mr. Mitchell has carried out for President Eisenhower there is almost unanimous agreement that only a person of Mr. Mitchell's ability could have met the tests that confronted him.

New Jersey residents will be quick to join in organized labor's admiration for Mr. Mitchell. They have noted that he has been available for all interests whenever management or labor have required his services. Moreover, they have come to respect the understanding and ability he has brought to the function of Government in resolving controversies which affect the Nation's welfare.

Mr. Mitchell has been honored by many of the Nation's leading colleges for the administrative talents he has contributed as a member of the President's Cabinet. This is because he has consistently devoted his efforts toward more efficient use of the Nation's manpower and has repeatedly sounded the call for young people to prepare themselves for the serious tasks ahead when the Nation must rely on today's students as its leaders of the future.

Mr. Mitchell, as a New Jersey resident, has honored his home State by the distinguished service he has rendered to the Eisenhower administration and the Nation. President Eisenhower, as stated by Jacob Potofsky, president of the Amalgamated Clothing Workers of America, "reflected great credit on the administration by the appointment of the Secretary of Labor."

In the closing days of the Eisenhower administration many have expressed the view that Mr. Mitchell would add competence and stature to the Republican presidential ticket as a nominee for vice president. Whether political considerations will dictate this turn in his career must await developments. But in any event the Nation should make certain that Secretary Mitchell is not lost to the public service.

[From the Detroit Free Press, July 6, 1960]

HIGH TESTIMONIAL TO A REPUTATION

Labor Secretary Mitchell has a right to feel that his integrity and fairness have been unusually well certified.

For close to 7 years he has given satisfaction to a Republican administration as one of its Cabinet officers.

A few nights ago he was honored with a testimonial dinner tendered him by 28 of organized labor's principal leaders. These men, traditionally Democratic and often hostile to the administration of which Secretary Mitchell is a member, wanted him to know that he is appreciated and trusted.

Plainly Secretary Mitchell has achieved exceedingly well in his dealings with men and the affairs under his jurisdiction.

He told us once that between his family's desires and the need to attend to his personal fortunes he wouldn't be altogether sorry to be out of public life. If he does leave it when the next inauguration occurs, he will do so with a hearty "well done."

[From the Toledo (Ohio) Blade, July 1, 1960]

LABOR'S SECRETARY

When a Cabinet officer in an administration often accused by labor of being probig business hails a union leader, it's worth mentioning. But when the combined AFL–CIO leadership, plus that of the United Mine Workers, goes out of its way to fete a cabinet officer in the same administration, that's really news.

Such an event was held the other evening in Washington, where 800 labor leaders and guests—including President Eisenhower—gathered to honor Secretary of Labor James Mitchell.

Mr. Mitchell took over his Cabinet post nearly 7 years ago under inauspicious circumstances. He was succeeding a trade union official—Martin Durkin—as Labor Secretary. He was moving into an administration already under fire from unions for supposed business influence. And his own background in the field of business was viewed dimly by many union chieftains.

Yet, through the years, Mr. Mitchell proved to be an eloquent and sincere spokesman for the cause of the laboring man. He fought hard for labor's causes in administration circles, and not always successfully. He managed to reflect the views and objections of union leaders in administration thinking to a far greater degree than labor thought possible. And he gradually won the respect and admiration of some of his stanchest critics within the family of labor.

Jacob Potofsky, Amalgamated Clothing Workers' president, expressed labor's view of Mr. Mitchell probably as well as anyone at the recognition dinner when he said, "It is no secret that we of labor have not viewed with enthusiasm some of the present administration's appointees. But there was one appointment that we believe reflects great credit on the administration and that is the appointment of the present Secretary of Labor."

The timing of labor's honoring Mr. Mitchell, on the eve of a presidential campaign, was not lost on political observers. And labor may yet see more of him, even though the present administration is drawing to a close. For just a few hours before its big dinner for him, one labor official—Lee Minton, president of the Glass Bottle Blowers Association—called upon the Republican Party to nominate Secretary Mitchell as its vice-presidential candidate.

Obviously, from labor's viewpoint, it could do worse.

Statement by Senator Dodd in Regard to Judge J. Joseph Smith and Mr. William Timbers

---

EXTENSION OF REMARKS

OF

HON. THOMAS J. DODD

OF CONNECTICUT

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. DODD. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by me about Judge J. Joseph Smith and Mr. William Timbers.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DODD

On September 1, 1960, I received unanimous consent to insert at a later date a statement about Judge J. Joseph Smith and Mr. William Timbers who, on that day, were confirmed by the Senate for the posts of U.S. circuit judge for the second district and U.S. district judge for Connecticut, respectively.

Judge Smith has long been recognized as one of the greatest jurists ever to sit on the bench in Connecticut. Prior to his appointment to the Federal bench in 1941, he served with great distinction three terms in the U.S. House of Representatives. A dedicated and thorough scholar of the law, exceptionally well fitted by temperament for the judiciary, a man of brilliant perception and insight, an experienced jurist with two decades of service on the Federal bench behind him, Judge Smith is the universal choice of the Connecticut bar for this post on the second circuit.

I have had the privilege of appearing in court and trying cases before Judge Smith. I feel for him the admiration and respect that are felt by all attorneys who have engaged in litigation before this outstanding jurist.

And so, along with all of those who have known and worked with Judge Smith, I am deeply gratified by his confirmation for the post of U.S. circuit judge for the second circuit.

I am also pleased with the confirmation of Mr. William H. Timbers to succeed Judge Smith as U.S. district judge for Connecticut. During the hearings concerning the confirmation, we heard a series of impressive tributes to Mr. Timbers' qualifications for this post. He was consistently lauded for his legal ability, his judicial temperament, and his experience in complex legal questions. The first of those testifying in favor of Mr. Timbers included outstanding private attorneys, university professors of law, and high-ranking Government officials. I have worked on legal matters with Bill Timbers and can personally vouch for his outstanding legal competence.

I congratulate Mr. Timbers upon his confirmation and I am sure that he will maintain in his new post as district judge for Connecticut the same standard of excellence set by his predecessor, Judge Smith.

Ukrainian Congress Committee

EXTENSION OF REMARKS

OF

HON. WILLIAM T. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MURPHY. Mr. Speaker, it is with pleasure and pride that I insert my message of greetings in the CONGRESSIONAL RECORD commemorating the 20th anniversary of the founding of the Ukrainian Congress Committee of America which is being celebrated this fall by the branches and member organizations of the Ukrainian Congress Committee of America, Inc.

This year we mark the 20th anniversary of the Ukrainian Congress Committee of America. The year 1960 also marks the beginning of a new decade that all men hope may bring peace, justice, and freedom to all the peoples of the world.

No people has hoped and dreamed more of this freedom, or struggled harder for it, than the Ukrainians. Whether they are the 40 million people still enslaved by Russian communism or their 2½ million free brethren in America, they have never ceased to dream and to fight for a free Ukrainian nation.

No one could fail to admire the indomitable will of a people who have kept alive their dream through centuries of oppression. And no one who loves freedom can fail to hope that the freedom may at last be achieved.

To this purpose, the Ukrainian Congress Committee of America has waged an unceasing battle against communism.

They have continually exposed the dangers of communism to all free peoples when some might forget their peril.

All Americans join with me in hoping that the 1960's will see the culmination of the hopes of the Ukrainian Congress Committee of America, and of Ukrainians everywhere, for a free Ukrainian nation.

Report to the People of the Ninth Congressional District of Indiana

EXTENSION OF REMARKS
OF
HON. EARL HOGAN
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. HOGAN. Mr. Speaker, I have had the honor and privilege of representing the people of the Ninth Congressional District of Indiana in this 86th Congress and I believe it is an obligation of a Member of the Congress to report to the people he represents.

The duties of a Representative are many and varied, but generally fall in three categories. First, it is his responsibility to legislate; second, he must serve the needs and requirements of his constituency; and third, he must act as a clearinghouse for the opinions and views of those he represents on legislative and administrative matters.

My devotion to these three responsibilities has been clearly demonstrated. I have been present at more than 98 percent of all quorum calls and votes. I have had the honor to serve on the Agriculture Committee charged with the responsibility for legislation pertaining to our plaguing farm problems. Because Congress does much of its work in committees, attendance at committee meetings is important. In committee meetings witnesses are heard; Members work with the professional staff on research and background information pertinent to legislation being deliberated upon before it comes to the floor of the House. My agricultural background has been an invaluable asset and, I believe, an aid to the work of the committee during my tenure, reflecting credit to the Ninth District.

Endeavoring to serve my constituency I traveled the entire 14 counties comprising the Ninth District on three different scheduled tours to conveniently afford all an opportunity to personally discuss any matter with me. Correspondence has been carefully and expeditiously answered. Gratifying results have been forthcoming from social security, veterans, and other cases which have had my personal attention.

The first session, which ended on September 15, 1959, was the longest peacetime session in 37 years, adjourning immediately before Khrushchev was about to arrive in Washington for what was to have been an exchange visit with our President.

History will record that this Congress has worked under extremely difficult circumstances to draft laws which would best meet the urgent needs of the American people and survive the threat of a veto. The President's veto threat hung ominously over the Congress throughout its deliberations and was often used to cut the substance from worthwhile measures.

The record of the 86th Congress will show also, that contrary to the President's prediction that the 86th Congress would engage in a cold war of partisan politics, on a number of issues important to our Nation, the President received more support from the Democrats in Congress than he did from the members of his own political party. A number of needed and constructive Democratic-sponsored bills, however, were either vetoed or stopped by threat of veto. Included were proposals to advance a solution to the problem of chronic unemployment and economically depressed areas, to promote home ownership and stimulate lagging home construction, to clean up the polluted water of our Nation, to provide adequately for the needs of our elder citizens—all affecting the human needs of our Nation.

The 2d session of the 86th Congress began on January 6, 1960, and ended September 2, 1960.

Although veto in the 1st session of the 86th Congress delayed flood control by a year, funds for the beginning of flood control activity for the Whitewater River, Franklin and Dearborn Counties, has been secured in second session action. The French Lick Creek watershed project received approval also in the second session. It is encouraging to look forward to giving a helping hand to other areas in their development of watershed projects.

The towns of Napoleon and Sunman were aided by Federal grants-in-aid for sewage projects. The President's veto of the water pollution control legislation adversely affects a half-dozen Ninth District towns needing assistance.

The veto of the wheat bill last spring was topped only by the tobacco price stabilization veto. The second session saw the tobacco bill pushed through to a successful conclusion. Wheat legislation, however, passed in the Senate during the second session, was not acted upon in the House.

The depressed area development legislation would have benefited areas in Indiana. The veto action will retard development of needed assistance on a loan and grant basis to help fellow Americans get on their feet.

Much has been said about the Federal budget. Of over $77 billion expenditures in fiscal year 1960, almost $42 billion was spent for national defense, $3½ billion for foreign aid which related to the national security, $2½ billion for atomic energy development and research, $5½ billion for the cost of services to veterans, present, past, and future. In addition, $9.2 billion was spent in fiscal 1960 to pay interest on the Federal debt which interest payment has almost doubled from $5.8 billion in 1952 because of administration policies favoring a hard-money policy with higher interest rates to lenders.

With the addition of $5½ billion on the farm support program, slightly over $10 billion remained for all of the other important functions of the Federal Government—including its criticized welfare programs.

Amendments were made to the Social Security Act by this Congress. A program of Federal grants to the States for medical care for the low income and aged was approved. The earning restriction was relaxed and the disability age requirement was dropped.

The Railroad Retirement Act was revised, increasing benefits to retired employees; Congress also extended the benefits of temporary unemployment compensation for 3 months in States whose payments had expired.

Veterans legislation was vigorously pursued in the 86th Congress. Twenty-eight public bills were enacted directly affecting the veteran and his family.

Requested increases in gasoline tax, postal rates, and interest rates on commercial bonds were denied by Congress. A slight increase in interest rates on series E and H bonds that individuals can own, was granted.

The Federal aid to education through school construction passed by both the House and the Senate, died with adjournment as the House Rules Committee refused to let the legislation go to a final conference.

A 5-year extension of the Library Services Act, providing matching funds to States for the extension and establishment of public library service in rural communities was passed. Although the State of Indiana has not taken advantage of this program in the past, future administrations can look forward to the opportunity.

Labor abuse legislation was enacted in the first session and civil rights received consideration. The second civil rights law in almost 100 years was passed, involving voting rights. Federal employees were given an increase in pay, overriding a Presidential veto, and the opportunity to participate in a health insurance plan.

Hawaii was admitted to the Union by an act of the 86th Congress.

Suspension of the Federal Communications Act equal time requirement so that the 1960 presidential and vice presidential candidates can stage TV-radio debates without obliging broadcasting networks to give corresponding time to fringe-party nominees for those offices, was legislated.

In international affairs, the Congress again appropriated $3.5 billion in the first session and $3.7 billion in the second session for the mutual security program. I voted against the bill in both sessions. I do not feel that the vast appropriations being made year after year can go on indefinitely while we preach economy in our domestic appropriations. The entire program must be overhauled and the excessive waste and extravagance pruned.

Our foreign affairs are governed by policies of the President which he in turn requests Congress to implement. The events of the year 1960 are world shaking and have produced crises which may well mark the course of civilization. We

have learned that no one nation can stand alone in our world today. The most challenging task for the next administration is the reestablishment of a sound moral foreign policy and a sound U.S. economic policy.

Many other bills have become law in the 86th Congress. Some bills which I believe were worthy did not pass and a good many that were not worthy did not pass. Certainly, this Congress has worked far more days than most Congresses. Each and every piece of legislation considered was given my close study and conscientious vote.

Inquiries are most welcome at all times. I have done my best to be responsive to the needs and opinions of the residents of the Ninth District and to discharge my responsibility as a Representative in the U.S. Congress in a manner that reflects credit and honor to those I am privileged to represent.

Medical Care Program Under Social Security Is the Only Answer

EXTENSION OF REMARKS
OF
HON. FRANK KOWALSKI
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. KOWALSKI. Mr. Speaker, only by enactment of an adequate medical care program, under social security, for our senior citizens, can the Government of the United States keep faith with its people and with the future.

I regret that bitter opposition to an adequate, truly meaningful program limited congressional action to a bill which makes only a token approach to this grave problem and which, at administration insistence, includes requirements for a means test which is entirely repugnant to Americans.

INADEQUATE BILL PASSED

The medical care bill which was passed at this postconvention session is inadequate and unfair. Many of us who recognized its grave faults were forced to vote for it because the Republicans made it plain that it was the only bill they would allow to go through, and the only bill that the President would not veto.

It should be remembered, Mr. Speaker, that we were prevented from even having a vote on the Forand bill—a bill which I had the honor to cosponsor.

Let us look at the bill that was passed.

It involves two separate programs.

First. It will provide additional Federal assistance to the States for medical care for those receiving public relief.

Second. It will make Federal assistance available to States which set up their own new medical assistance programs, but the assistance will be available only on a matching funds basis. Thus, each of the 50 States must establish by law its own program and must appropriate the necessary money. Also, and most importantly, even when this is done, if it is, help will be available only to those who meet a means test. In other words, to get any help in meeting medical costs, the applicant must show that he is unable to pay the costs himself.

This pauper's oath provision is a revolting requirement.

Let us have a medical care program which is not based on the idea of public charity.

THE NEED FOR PROTECTION

The need for an adequate Federal program to help our senior citizens meet the cost of illness is plain.

Let us look at some of the facts:

Each year, there are 150 Americans out of each 1,000 who require hospital care, but for those in the 65 to 74 age group the rate is 292 per 1,000—or almost double the rate for the general population.

We all know how hospital and medical costs have zoomed, with hospital costs alone now more than double what they were 13 years ago. The cost of medical care has risen 49 percent.

Older people must spend an average of three times as long in the hospital as younger patients.

Illness for the elderly comes at a time when their incomes are at a minimum level. They simply cannot afford the staggering costs of illness, nor can they meet the cost of adequate private insurance.

It would be a happy state of affairs if all our senior citizens did have incomes sufficient to meet all their reasonable needs, including the cost of illness. Unfortunately, such is not the case.

Almost two-thirds of our senior citizens have incomes, from all sources, of less than $1,000 a year.

Nor do our older Americans have assets which could be readily converted into cash to meet the costs of illness. At least half have less than $500 in such assets.

The elderly just cannot afford to be sick.

PRIVATE INSURANCE?

As a Representative from Connecticut, home of the great insurance industry, I would be delighted if private insurance provided the answer to this great social problem.

The insurance companies have made great strides in the field of medical care insurance. They are to be congratulated for what they have done.

But private companies simply cannot afford to provide the coverage that is needed, at prices that our senior citizens can afford.

It is reported by the Department of Health, Education, and Welfare that about 6 million people of our 16 million Americans of 65 or older have some kind of insurance protection against costs of illness. But only 27 percent of those have policies which will pay for as much as half of their medical bills. The insurance carried by the other 73 percent of this minority fortunate enough to have any insurance will pay for less than half of their medical costs.

I believe that the insurance industry would benefit by enactment of a Federal program of medical care under social security.

It would allow the companies to withdraw from an unprofitable field and concentrate on supplemental coverage which can provide good protection at reasonable rates which will allow fair return.

The basic social security law was opposed by some insurance experts yet it has proved to be of great benefit to the insurance industry by providing a base for the establishment of many new life insurance and pension plans.

It would be well to recall what the President's Commission on Health Needs of the Nation said about this problem of medical care for the elderly. I quote from its report to the President in 1955:

> It is clear that the solution to the problem of payment for health services to the aging does not lie in currently available private insurance programs with premiums paid by the aged. Nor does it lie in any reasonably anticipated increase in cash benefits under old-age assistance or old-age and survivors insurance. Rather, the situation requires a new approach.

DR. MAC LEAN'S STATEMENT

The former president of the National Blue Cross Association, Dr. Basil C. MacLean, gave eloquent support to Forand-type legislation.

Such a bill, he said, "provides a way of dealing with the question with dignity and effectiveness."

Said Dr. MacLean:

> As a physician, I have had an intimate look at the special and personal health needs of the aged. As a hospital administrator, I have seen that need reflected as a burden of obligatory and uncompensated service that acted as a constant drag upon the hospital's economic support and growth.
>
> As New York City Commissioner of Hospitals, I have seen these problems further translated into financial and social deficit for the entire community. As president of the National Blue Cross Association, I participated first hand in the attempt to meet some of those problems through existing voluntary prepayment organizations.
>
> A lifetime's experience has led me at last to conclude that the aged simply cannot afford to buy from any of these the scope of care that is required, nor do the stern competitive realities permit any carrier * * * to provide benefits which are adequate at a price which is feasible for any but a small proportion of the aged.

KOWALSKI BILL SUMMARY

It is my intention, Mr. Speaker, if I am reelected to the House of Representatives, to submit again my bill, H.R. 7778, identical with the Forand bill, to establish a Federal program of medical care for senior citizens, under social security.

Here is a summary of my bill:

First. The proposal: To amend old-age and survivors insurance so as to provide insurance against the cost of hospital, nursing home, and surgical services to all those eligible for old-age and survivors benefits or who would be eligible if they applied.

Second. Its purpose: As people grow old, they need more medical care but usually have less money to meet its rising cost. Most of them cannot get adequate protection through private insurance, and a severe disability may mean financial disaster.

Individual health insurance policies are expensive; they usually exclude a preexisting condition; they may be refused or canceled. Group insurance

also is unavailable to most retired persons and aged widows since they have no employment connection such as normally is required.

Young widows and children similarly have low incomes and little opportunity to obtain private insurance.

Many hospitals have constant and serious financial difficulties because they have to provide free service to these people. Private charities and public assistance agencies frequently pay for such hospital care or help make up hospital deficits.

The proposal would transfer to the self-supporting insurance system a financial burden which now falls on individuals and private charities, and on public assistance financed by taxpayers. Thus it would work in the direction preferred by Congress.

Fifteen million persons would be eligible in 1961.

Third. The benefits:

A. Hospital and nursing home services: Each eligible person would be insured against the cost of hospital care, including a semiprivate room and all the hospital services, medical care, drugs, and appliances which the hospital customarily furnishes its bed patients. The insurance system would not pay the attending doctor's bills, except for surgical services.

Skilled nursing home services would be covered if the patient is transferred to the nursing home from the hospital and if the services are for the same condition or one arising from that for which he received hospital care. The care in the nursing home could be extended so that up to 120 days of combined care would be provided in a 12-month period but only 60 days could be hospital care.

B. Surgical services: The insurance system would pay the cost of surgical services provided in a hospital, or in case of an emergency or for minor surgery, in the outpatient department of a hospital or in a doctor's office. Any individual may freely select the surgeon of his choice provided the surgeon has attained specified professional recognition—subsection (c)(2), except in cases of emergency or where the requirement of such certification is not practical. The cost of oral surgery by a dentist in a hospital would be covered.

C. Procedures for insured persons: The insurance procedures would be like those already developed for patients covered by private insurance plans that provide service benefits.

A person eligible for hospital or nursing home insurance would, as at present, be admitted to such an institution on his physician's referral. The patient could receive insured services from any qualified practitioner or institution which has agreed to participate and to be paid for services insured under the plan. In emergency situations, referral or prior agreement could be waived.

Fourth. Administration: The program is to be administered by the Secretary of the Department of Health, Education, and Welfare. The OASI system would use its existing recordkeeping system to certify eligibility, to issue insurance cards, and the like. For aged beneficiaries, this would mean paid-up hospital and surgical insurance for life.

Any qualified provider of services would have the right to participate. Payments could be made at such rates as are provided in each agreement, covering the actual costs incurred, or on some other mutually agreed basis. Widely used patterns for determining rates have been developed under Government and private programs.

The agreements are to stipulate that the payment at the agreed rates shall constitute full payment for the contracted services; the patient may not be billed for additional sums for the contracted services. Agreements of this type are now in effect under the Federal program for medical care for dependents of members of the Armed Forces.

The Secretary could make agreements directly with providers of services or with their authorized representatives. Group practice prepayment plans would be included.

The Secretary shall prescribe regulations and establish an advisory council. He may utilize the services of private nonprofit organizations to the extent that he determines that their utilization will contribute to effective and economical administration.

Fifth. Special safeguard: Nothing in the bill shall be construed to give the Secretary or administering agencies authority over the internal management of participating institutions or over the practice of medicine or the manner in which medical services are provided.

Sixth. Exclusions: Persons eligible for permanent and disability benefits are not included. The proposal does not apply to costs incurred in Federal hospitals, or in tuberculosis or mental institutions, or in other countries. It does not cover all types of nursing homes or apply to institutions that provide primarily domiciliary care. It does not apply to workmen's compensation cases unless arrangements are made to reimburse the insurance system. It does not include elective surgery, or nonsurgical medical services, except those customarily furnished by hospitals as an essential part of hospital care for bed patients.

Seventh. Financing: The bill would increase contribution rates of employers and employees by one-fourth percent each and of the self-employed by three-eighths percent.

SUPPLEMENTAL BILL

It is also my intention, Mr. Speaker, to submit a bill establishing a special program of medical care for those not eligible for protection under the social security system.

This would provide coverage for the several million of our senior citizens who are not within the social security program.

A CHALLENGE TO AMERICA

The problem of adequate medical care for our senior citizens, under a program that will preserve their dignity and independence, is a challenge to America. It is a challenge we must meet.

The needs of our older citizens have been neglected long enough. It is time that we faced up to those needs and took the action that is necessary.

The basic question is a simple one of social justice. We have a moral obligation to our senior citizens—an obligation which we must fulfill.

A medical care program under social security will be a sound program, a humane program. It will show to the world that America keeps faith with her citizens, that she recognizes the great contributions of those who have done so much to build and strengthen our great land.

I shall keep fighting for such a program, with all my energy, until it becomes law. Despite the bitter opposition, right shall prevail.

Medical Care for the Elderly

EXTENSION OF REMARKS

OF

HON. FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BOW. Mr. Speaker, I take this means to report to hundreds of constituents who have sent me messages concerning medical care for elderly citizens.

In response to their requests and those of thousands of other Americans, the Congress has taken a great step toward broadening Government responsibility for medical care for the aged.

As many as 10 million elderly Americans—those who most need help—can be helped by the new medical care program.

The Federal Government stands ready to begin this program October 1, 1960. When it will go into effect will depend upon action taken by the 50 States, for this is a Federal-State cooperative program in the same category as aid to dependent children, unemployment compensation, vocational rehabilitation, old-age assistance, and many others.

Each State may determine, within the broad provisions of the Federal law, how it will administer the medical care program.

The Federal law does not require, as has been claimed, that any individual take a pauper's oath, and it specifically forbids any State to require a lien on the home of any individual so long as he or his wife, or husband, is living.

As Senator GORE has said:

> Under different circumstances, this proposal would be regarded as a very great, liberal advancement in social betterment.

The circumstances, as all of us understand, were the political controversies arising out of demands for the much more far-reaching proposal by our colleague from Rhode Island, Mr. FORAND. Again quoting the liberal Democrat Senator, Mr. GORE:

> The circumstances really do not detract and should not be allowed to detract from the very great benefits and the very large forward steps encompassed in the bill.

I supported this measure in the belief and hope that it will bring relief and ease the burdens of millions of older people who are entitled to its benefits. I urge

the State of Ohio to use whatever legal authority it now possesses and to enact such additional legislation as may be required to give the fullest advantages of this generous Federal legislation to our people.

International Space Law and Outer Space

EXTENSION OF REMARKS
OF

HON. STYLES BRIDGES

OF NEW HAMPSHIRE

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. BRIDGES. Mr. President, the distinguished Senator from Iowa [Mr. MARTIN] delivered a most thoughtful and enlightening address before the 11th International Astronautical Congress at Stockholm, Sweden, on August 16, 1960.

Senator MARTIN's speech was entitled "International Space Law and Outer Space," which I know is a subject of deep interest to all Americans. I therefore ask unanimous consent to have a copy of this address printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INTERNATIONAL SPACE LAW AND OUTER SPACE

(Address by U.S. Senator THOMAS E. MARTIN, of Iowa, before the Space Law Colloquium of the 11th International Astronautical Congress, Stockholm, Sweden, Tuesday, August 16, 1960)

I am pleased and honored to have been invited to speak before you today. The International Astronautical Federation has since its foundation in 1950 provided a valuable international forum for the review of outer-space problems and for the stimulation of action in governmental and international public bodies. I hope it will continue to provide this valuable service. In view of the uncharted nature of much of the work in astronautics, the contribution of private thinking and analysis can be of immense importance to the future development of man's efforts in outer space.

The stirring era in which we live is witness to the extension of man's activity into a medium entirely new to him. In the realm of space exploration man is faced with technical and scientific demands of unparalleled difficulty. At the same time, he is given priceless opportunity—a chance to establish new relations with his fellow man in a new environment, relatively free from the limiting influence of precedent.

Starting with a clean slate, man should so plan his activities in outer space as to preclude the possibility of the armed conflicts and controversies which have characterized his history on this planet. He can promote a new atmosphere, based on scientific cooperation and the rule of law, which might serve as an example for his earthbound relations with his fellow man. As Ambassador Henry Cabot Lodge stated in an address to the 14th General Assembly:

"International cooperation in the exploration of outer space offers an avenue along which nations may approach mutual understanding and peace. Working together on the great challenges of explorations beyond the confines of earth can create a new perspective, in which national boundaries and national rivalries recede in importance."

Certainly we can agree that the incentives for international cooperation in outer space are many and very substantial. Tremendous expense is involved in space exploration. Geographically widespread and yet tightly coordinated observation stations are required. Coordination of operations is imperative if we are to avoid mutual interference and minimize the danger of accident and damage as traffic in outer space increases in intensity. All these factors urge the importance of international cooperation.

And there is another grim argument for cooperation: Scientific progress has inevitably made possible the use of outer space for new and more dangerous means of waging war. This fact requires that maximum cooperative efforts be made among the nations to guard against the use of outer space for aggressive purposes. Recognizing the great dangers lurking in such use, the United States over 3 years ago proposed a study of means to reserve outer space for peaceful purposes only. Today the United States stands prepared to enter upon such a study separately from the overall problem of disarmament. A concrete proposal in this direction has been made by the 5 Western Powers to the Geneva Conference of the 10-Nation Committee on Disarmament. These nations have urged the banning of weapons of mass destruction in orbit or stationed in outer space.

I hope very much that outer space can be reserved as a great area for peace. It would be a tragic thing indeed if the wars and national rivalries which have too often characterized relations among the nations here on earth were to be projected into outer space.

It is gratifying to note that the strong incentives for international cooperation in outer space which I have mentioned have not been without effect. Even in the initial stages of space exploration, such cooperation has made an important contribution in the tracking of earth satellites and the assembly of scientific data. Wide recognition of the desirability of mutual assistance in this new field is reflected in the intelligent and significant cooperation of states, organizations and individuals during the International Geophysical Year (1957–58). It is also reflected in the continuation of these activities under the aegis of the Committee for Space Research of the International Council of Scientific Unions.

A special and important example of international cooperation, is furnished by the transmission by the United States to the U.S.S.R. of a number of tape recordings of the data received from Sputniks I, II and III.

As the pace of outer space activities increases, there will grow, in addition to the need for cooperation, a need for regulation and control of such activities in order to minimize conflicts of interests and operations. This involves the establishment of broad principles and specific regulatory measures to meet operational requirements.

Because of the very newness of the field of outer space exploration, the context and nature of many potential problems are not yet clear. I therefore believe that it is premature, at this time, to attempt to draw up a comprehensive legal code to cover all contingencies in outer space. It is, after all, a cardinal rule that the development of international law must follow the dictates of concrete need. We do not know enough about the difficulties that may be encountered in outer space to foresee the precise nature of the entire range of regulatory measures which may one day be necessary.

There are, however, certain problems which can be identified at present and studied with regard to possible regulatory and control measures. In this task, as you know, the United Nations ad hoc Committee on the Peaceful Uses of Outer Space has made preliminary identification of a number of areas which call for international coordination and control on a priority basis.

Now I would not go so far as to suggest that we install stop-and-go lights in outer space in order to control traffic there. But just as some regulatory measures become necessary for traffic on our international highways and on the high seas, so a certain degree of regulation and control will be essential with respect to outer space activities.

Among these problems, it is interesting to note a useful connection between identification and registration of space vehicles, advance notice of their launchings, and a possible system for guarding against surprise attack or use of outer space for aggressive purposes. It may well be that experience gained in this field may be useful in disarmament and arms control measures.

Regarding freedom of outer space for exploration and use, the ad hoc committee took a liberal and forward-looking view. It pointed out that "during the IGY * * * and subsequently, countries throughout the world proceeded on the premise of the permissibility of the launching and flight of space vehicles * * * regardless of what territory they pass 'over' during the course of their flight."

This premise appears to have been supported by the fact that such space activity has been undertaken and that no nation has raised objection to the launching of space vehicles by another. Thus it would seem to me there has been acceptance of the principle of freedom of exploration and scientific observation in much the same manner as was agreed in Washington last December 1 with respect to the continent of Antarctica.

A similar possibility exists regarding the exploration of and assertion of claims to celestial bodies. Last year agreement was reached by the signatory states to the effect that no territorial claims are to be submitted under the Antarctica Treaty. Why should not serious consideration be given to adherence to such a practice with respect to bodies in outer space? Certainly at the present state of man's knowledge and capabilities it would seem that the resources of natural bodies in space, like the vast regions of space itself, represent sharable assets of the community of nations. Scientific exploration of a planet conducted under the national auspices of one country should in no way involve the prohibition of similar, noninterfering, exploration by other countries.

The question of the establishment of a recognized boundary between air space and outer space is an especially complex one; in my estimation, it represents a surprising number of difficulties—difficulties which may possibly prove insuperable. The main argument for determining a space boundary is that it would help to preclude states from making claims to sovereignty over large parts of space on the assertion that they are air space rather than outer space.

The criteria for such a boundary determination, however, are not easy to establish. Should the division between air space and outer space be defined in terms of the physical characteristics of the air? Or should it be based upon the purpose of flight or on the physical characteristics of flightcraft? There are, for example, vehicles which have the characteristics of both aircraft and spacecraft. These operate on aerodynamic principles in one part of their flight and on pure rocket principles in another.

In order to avoid these difficulties, it has been suggested that an arbitrary limit might be chosen. But where would the line be drawn? Would it be at an altitude of 50,000 feet, or 70,000 feet, or perhaps as high as a manned plane might fly? The result of any arbitrary limit, it seems to me, would likely be either to fetter space activities by inappropriate rules or to interfere unnecessarily

with the existing regime of international aviation.

Even if the difficulties of fixing a stationary boundary were overcome, the achievement would not solve all problems. This would be most obviously the case were the boundary to be fixed at a relatively high altitude. For example, artificial satellites often come much closer to the earth at some points in their orbits than at others. In some cases the perigee, or point nearest the earth, falls within one or more boundaries which have been proposed, while the apogee, or farthest point, falls outside. To me, it would make little sense to impose one legal regime, or status on the satellite at perigee and another on the same satellite at apogee.

Another problem would arise in connection with establishment of a high altitude space boundary. As altitude increases, the relevance and adequacy of normal air space boundaries decrease. There is progressively less relationship between objects located or activities taking place above specific national territory on the surface of the earth. For example, reentry and landing of an object traveling at high speed and high altitude are apt to take place hundreds, or even thousands, of miles farther on in its line of travel.

Rather than seek to limit space activity on the basis of altitude alone, other factors might be equally relevant. Should not one consider the trajectory of the space vehicle or object, its flight mission, the instrumentation and other functional characteristics of the vehicle in question, for example, in the search for appropriate criteria? Even with the resort to such criteria, however, much will remain in dispute. It would, I think, be ill advised to accept a boundary for outer space before its practicality and utility are thoroughly established.

These are some of the imponderables with which we are faced in the formulation of legislation and procedures governing man's activities in outer space. The factors which must be taken into consideration are exceedingly complex, and the technical and scientific information as yet available concerning many aspects of such activities is far from complete. These facts underline the need for considerable caution in drawing up legal provisions relating to outer space activities.

Despite this complexity, however, the accelerating rate of outer space exploration renders indispensable the early consideration of regulatory measures in certain specific areas, as I have indicated earlier. With the growth of customary practice and the accumulation of laws and agreements dealing with particular subjects, a system of laws governing human relations in outer space will gradually be filled out.

In the growth of such a system, the international community will wish to see its basic policy aims, as affirmed in such documents as the United Nations Charter, reflected in the body of outer space law. These aims include the reservation of outer space for peaceful purposes, the encouragement of international cooperation and the encouragement of scientific research, particularly in the interest of achieving practical benefits to increase human welfare.

The hope of cooperation in outer space was put eloquently not long ago by Dr. T. Keith Glennan, Administrator of the National Aeronautics and Space Administration, when he said:

"Out of the efforts of the dedicated and inspired men of all nations may yet come that common understanding and mutual trust that will break the lockstep of suspicion and distrust that divides the world into separate camps today."

Faced with the tremendous opportunities presented by outer space, we owe it to ourselves and to all posterity to rise to the occasion and meet the challenge with statesmanship and breadth of vision.

The Significance of Flowers

EXTENSION OF REMARKS
OF
HON. GEORGE GRANT
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. GRANT. Mr. Speaker, recently during the recess of Congress, accompanied by my family, I traveled in England and several other countries on the Continent. I was particularly fascinated by and interested in, not only the innumerable flower gardens and small plots, but by the potted and boxed plants in homes, factories, and business establishments. Especially did this seem to be true in France, Italy, Holland, Scotland, and Germany. From a hotel in Rome, I could see countless apartments, and each window had pots or boxes of flowers; also they could be seen blooming in practically every skylight opening. As I gazed upon the serene loveliness of these flowers, there came to my mind a thought which grew stronger each day—if the whole world could see and feel the significance of these flowers, it would be a great forward step toward peace.

Someone has written:

There is a tongue in every leaf—
A voice in every rill;
A voice that speaketh everywhere.

It was Wordsworth who said:

To me the meanest flower that blows can give
Thoughts that do often lie too deep for tears.

Longfellow wrote:

Wondrous truths, and manifold as wondrous,
God hath written in those stars above;
But not less in the bright flowerets under us
Stands the revelation of His love.

In all places, then, and in all seasons,
Flowers expand their light and soul-like wings,
Teaching us, by most persuasive reasons,
How akin they are to human things.

Yes:

Flowers sing a song,
Flowers preach a sermon;
If we will only hear
A song, a prayer of peace.

It is said that music has the power to charm the savage beast. Why cannot this be said of flowers? For, like music, flowers are a universal language. There is no language barrier in flowers. Two people do not have to understand each other's language or way of life in order to appreciate the same beautiful flowers. Flowers tell a story; they have a language all their own; perhaps, this is nature's secret language, one of peace, serenity, and kindness.

Flowers are the lexicon of love—peace and tenderness—as opposed to hate and malice. Can one who loves flowers be a mean person or be one who really hates a foreigner? Flowers are a silent token of worthwhile sentiments and a message of peace and love—"Peace on earth, and good will to men."

Many of the nations of this earth have national flower emblems. The United States has not officially adopted a flower as its national emblem. However, most of the 50 States do have an official flower. While petitions have been circulated, polls taken, and legislation introduced to adopt this and that flower as the national emblem, such has not been done. Perhaps it would be an excellent idea to bunch all of the individual State flowers together and adopt this bouquet as the national flower emblem of the United States.

Regardless of what flower may be the State or national emblem, all flowers silently emblazon love and peace. In the language of flowers, the Madonna lily signifies sweetness; the water lily, purity of heart; lily-of-the-valley, happiness; red rose, love; blue violet, faithfulness; purple lilac, emotions of love; goldenrod, encouragement; and countless others, too numerous to mention, give messages of peace.

If only every person who plants a flower would dedicate it to peace, what a wonderful world we would have. These seeds would grow, not only in the flowerpots, boxes, plots, and gardens; but their message would grow in the hearts of all; a message of hope and faith and one that preaches the futility of war.

We all realize that before this idea can engulf the world that man's attitude toward the ideology of war and distrust must be changed, but herein lies the seed to help bring about this change. If patriotic, civic, flower, and garden clubs in just one country would accept this idea and contact like organizations throughout the world, a possibility of universal peace exists.

Since music is universally loved,
And we can appreciate its tone;
Why not help the white dove,
By a peace flower in each home?

May not a simple flower
Proclaim the end of war?
'Tis true it has the power
To do this and far more.

Then let all nations combine,
In one universal score,
To use the flower as a sign
That war shall be no more.

God in his goodness to every land
Gave each His flowers to love;
So let's join a great brotherhood band
To give thanks to our Father above.

May we through the goodly message of flowers hasten that day when "They shall beat their swords into plowshares, and their spears into pruning hooks"; and war shall be no more.

General of the Armies John J. Pershing

EXTENSION OF REMARKS
OF
HON. HAROLD C. OSTERTAG
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. OSTERTAG. Mr. Speaker, this month we will celebrate the 100th anniversary of the birth of a great American and a great soldier, General of the Armies John J. Pershing. Many of us here were inspired to serve under his vic-

torious leadership in the first great war of this century.

Before playing his historic role in the First World War, General Pershing fought in the Spanish-American War and the Philippine insurrection, and commanded the troops sent into Mexico in pursuit of Villa in March of 1916. After serving as commander in chief of the American Expeditionary Force in World War I from 1917 to 1919, he was appointed Chief of Staff of the U.S. Army on July 1 of 1921, in which capacity he served until his retirement in 1924.

General Pershing was a product of our democracy. No nobler example of the rise and progress of a humble citizen to greatness and a nation's gratitude is anywhere presented to us. He was a soldier of human liberty. The glory of his achievements is an epic. The historians who come after us to record the events of our times will linger in admiration over the career of this great American. Wherever men enjoy liberty, there will descend upon his memory the benediction of their heartfelt prayers.

May his spirit ever guide us with a truer and nobler courage, to stand as soldiers should stand in the battle to preserve our liberties.

Statement by Congressman Earl Hogan at 12-State Democratic Conference and Rally

EXTENSION OF REMARKS
OF
HON. EARL HOGAN
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. HOGAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the statement I was privileged to give in behalf of Indiana farmers during the 12-State Democratic conference and rally at Des Moines, Iowa, August 20–21, 1960:

PRESENTATION BY CONGRESSMAN EARL HOGAN, DEMOCRAT, NINTH INDIANA DISTRICT, AT 12-STATE DEMOCRATIC CONFERENCE AND RALLY, DES MOINES, IOWA, AUGUST 20–21, 1960

Mr. Chairman, it is a real privilege to come before this meeting in behalf of the farmers of the great State of Indiana, for they are in a squeeze and are hurting.

The official research conducted by Purdue University on farmers' accounting records have been completed for 1959. Briefly, they show one of the most drastic drops from 1958 to 1959 of any year since the Hoover depression. But even more disastrous these records for much better than average Indiana farmers show that the farmers in my State are going in the hole and going in the hole rapidly.

These university analyzed farm records show that if farmers in my State were to get just a national legal minimum wage for their labor and that of their families, they would not have earned any return whatsoever on their large investment of capital and operating expenses. Or to put it the other way, if these farmers had been required, as indeed many of them were, to pay going rates of tight-money interest on their capital investment, they would have been working the entire crop year of 1959 for less than nothing, with no return on either their labor or their management know-how. In fact the figures show that the best, most efficient farmers in Indiana had to work for nothing and pay something besides for the privilege of farming in 1959. I know these figures are quite accurate because I had the same kind of results on my own small farm.

One of the first things I did after I was elected to Congress was to work out a proposal with the help of the farm leaders in my district and I introduced it. If my bill, H.R. 7188, had been enacted it would have raised farm income, cut Government costs of the farm program, and set up a conservation program that would make a major contribution to the future strength of our Nation.

Needless to say the Republican administration sent up an adverse report on my bill. However, more than a score of my colleagues and I got together early this year and developed a Family Farm Income Act which contained the provisions of the bills we had introduced separately. And, Mr. Chairman, we added other neded features and found that that bill, too, faced the stubborn opposition of the Republican administration, some of their banker and processor allies, and all of the Republican members of the House Committee on Agriculture of which I am honored to be a member.

There is no secret of what is needed in the way of an improved farm program; we need something that will begin to raise farm income imediately before still more family farms have gone down the drain; a program that will reduce the drain on the Federal Treasury; a program that will not stack up more and more wheat and feed grains in the Commodity Credit Corporation warehouses where large sums are being paid for interest, handling changes, and storage of no benefit to farmers.

All of us know, Mr. Chairman, that we need a program that will conserve and develop our soil and water resources. A program that will give farmers a means to raise their incomes to a fair parity level; that will help them preserve their farms; that will allow them to use marketing orders, marketing quotas, and acreage allotments to balance their production, and market sales to a volume that will clear the market at a fair price.

There's nothing unique about the proposals I have made. They are fully covered in the fine farm plank adopted by the great Democratic Convention in Los Angeles. I think most of you agree with me that the Democratic platform farm plank is the most forward looking most meaningful farm plank that any political party has ever written into its platform.

Our farm plank is dedicated to the family farm. The kind that you and I grew up on. The kind of farm that the Nation should preserve and promote for the national best interest. The kind of farm that Thomas Jefferson and the other Founding Fathers considered to be the foundation and backbone of the democracy in this Republic.

It states several basic principles: Parity of farm income so that efficient family farmers can earn as much on their labor and capital investment as can be earned by similar productive resources in other parts of the economy; the use of abundant food and fiber for unemployed and our needy here at home and to encourage the undecided nations around the world to adopt democracy, to balance farm production with demand; to set up a national safety reserve of food and fiber; and to once and for all set up a farm program that will improve and stabilize farm income—get the issue off the front pages into operation and get on down the road—instead of forever and always having to fight continuing rearguard actions against those who keep on wanting to destroy the farm program and the family farm with it.

The farm problem is not just a sudden emergency; it is not a problem that is temporary. The farm income problem is caused by deeply underlying continuing features of a national economy that are continuous and continuing.

To solve the farm income problem will take continuing programs and continuous effort. But if we set up such a program that can be carried out by the democratically elected farmer committees making adjustments every year to tailor the overall program to local needs, then we'll have an ongoing program that can be adapted to emerging needs by farmers themselves within congressional safeguards and Congress won't be called upon to consider a farm program bill every year. Constant public controversy over farm policy is no good kind of farm program. We need a policy that we can set in motion and quit having public political fights about in Congress every day.

Words Nullified by Deeds—A Look at the Administration's Middle East Policies

EXTENSION OF REMARKS
OF
HON. ERNEST GRUENING
OF ALASKA
IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. GRUENING. Mr. President, I ask unanimous consent that there be printed in the CONGRESSIONAL RECORD a statement which I have prepared on the administration's Middle East policies.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GRUENING

Almost 4 years ago, on November 2, 1956, Vice President NIXON stated: "There can be no double standard of conduct in international affairs."

On June 26, 1958, in soothing the fears of party officials concerning the effects on their political fortunes of the Sherman Adams affair, Vice President NIXON stated: "The public memory is short."

Probably in no other aspect of its administration of public affairs does the Eisenhower-Nixon administration hope that the public memory will be shorter than with respect to its double standard of conduct in the Middle East—of its words nullified by its deeds.

President Truman acted to give U.S. recognition to Israel as a sovereign state in May 1948. The United States was the first nation in the world to take this step.

President Truman acted promptly and decisively and adopted a policy of support and friendship for the new Republic of Israel because he was a realist facing up to pertinent and deeply significant facts.

For the fact was that Israel, with a land area of only 7,800 square miles and a population of 650,000, was the only true democracy in the Middle East.

The fact was that its people were free people and its political institutions founded on America's own cherished principle of government by consent of the governed.

The fact was that it was an oasis of civilization in a desert of backwardness, an oasis surrounded by dictatorships controlling areas and populations many times greater than those of Israel and ruling them

without regard to individual rights or freedoms.

The fact was, and has increasingly become, that this long savagely persecuted people, with unprecedented effort, dedication and determination and in the face of incredible obstacles, were converting this tiny arid sliver of earth into a civilized homeland blooming with agriculture, flourishing with small industries and setting up in that long stagnant backwater of the world new high standards of education, health, and welfare.

The fact was that if peace was to come to that troubled area of the world, the example of democracy, working and progressing, that was Israel, must be encouraged and maintained, an example to shine as a beacon to lead the neighboring backward and oppressed peoples to better living standards and greater freedom. Clearly, while the feudal Arab chieftains had no interest in the greater emancipation of their own people, how obviously desirable was such a policy for the United States to proclaim and follow.

But instead, the Eisenhower-Nixon administration, while occasionally professing sympathy with the aims and aspirations of Israel, has acted to the contrary.

There was the administration's buildup of the prestige and power of the Arab nations without an equal effort to maintain the status and strength of Israel as the democratic outpost in the Middle East—the symbolic gift of a pistol to General Naguib, Nasser's predecessor—the invitations to heads of state of the Arab nations, quickly offered and readily accepted—the economic aid granted without regard to whether it would merely intrench the feudal rulers or benefit their people.

There was the policy of impartiality in which the Eisenhower-Nixon administration, professedly dedicated to peace, studiously overlooked the fact that the Arab nations were proclaiming unabashedly that they were at war with Israel and were united in the purpose to achieve Israel's destruction and the extermination of its people. It was a policy almost tantamount to a declaration that the United States would look the other way while Israel's neighbors undertook its annihilation.

There was the pressure on the British by the United States to give up the Suez Canal, without a commitment from Egypt guaranteeing free transit for the trade of all nations.

There was the disavowal of the tripartite agreement under which the boundaries of Israel were guaranteed and the United States, France, and Great Britain were pledged to prevent any change in the relative armed strength of the countries of the Middle East.

There was the persistent refusal of the Eisenhower-Nixon administration to supply arms to Israel to meet the ever-growing imbalance in armed strength between Israel and her hostile neighbors due in great measure to the fact that Soviet Russia, recognizing the vacuum left by the disavowal of the tripartite agreement, was hastening to make Egypt an armed camp.

There was the heightening tension between Israel and its Arab neighbors because of the hit and run raids of Egyptian fedayeen units into Israel's territory resulting in 364 Israeli wounded and 101 killed in the course of 1,843 cases of armed robbery and theft, 1,339 cases of armed clashes, and 172 cases of sabotage, all on Israeli soil—with Israel's continued unheeded protests to the United Nations, none of which resulted in the application of any effective sanctions against the Arab nations.

There was the continued and mounting blockade of the Suez Canal by Egypt against shipping to and from Israel regardless of the flag flown by the vessel carrying the Israeli goods and the reaching into the cities of the United States by the Arab nations to enforce the blockade by requiring American firms doing business in Arab countries to discriminate against employees of the Jewish race, even in their offices in the United States.

Then came the Aswan Dam fiasco. First the Eisenhower-Nixon administration promised financial aid to Nasser for the construction of the dam. Then, suddenly, for reasons never adequately explained the administration withdrew its offer. Nasser promptly retaliated by seizing the Suez Canal. At that time, Nasser assured the world that there would be free and open transit through the canal without discrimination, overt or covert; this covers both political and technical aspects. Further, Nasser promised that the operation of the canal should be insulated from the policies of any country.

These promises were not kept.

The blockade of the Suez Canal continued.

The raids by the Egyptians, urged by the propaganda machinery of the United Arab Republic, were stepped up.

Finally, in October 1956, in desperation Israeli troops marched into neighboring areas to seize the enemy's operating bases.

It was then that the Eisenhower-Nixon administration, after ignoring for years the warning signs of danger in the increasing tempo of Egyptian raids across Israeli borders, the blockage of the Suez Canal, which was slowly cutting off Israel's economic lifeline, and Israel's repeated but unavailing appeals to the United Nations, moved against its traditional friends and allies, Britain and France, and against the only democratic nation in the Middle East, Israel.

Ambassador Lodge, on behalf of the United States, called for a meeting of the United Nations Security Council to consider a resolution of the United States. That proposed resolution, introduced by the United States in anger at Israel's action to prevent further marauding attacks, not only demanded that Israel withdraw, but called upon all members of the United Nations "to refrain from giving any military, economic, or financial assistance to Israel so long as it has not complied with this resolution."

A taut world then witnessed a curious voting pattern in the United Nations. On that resolution the United States and Soviet Russia voted for the imposition of sanctions against Israel—a strange bedfellowship that Henry Cabot Lodge had wrought for the United States—while France and Great Britain voted against such action.

And the next day—on a Soviet resolution calling merely for a cease fire and for Israeli withdrawal—the United States abstained from voting because, as Ambassador Lodge explained it, he could not vote for a resolution which did not contain the sanctions against Israel which he had first proposed. (He is the man whom Presidential Candidate NIXON now proposes to send to the Middle East to straighten out its difficulties.)

It was at that point that Vice President NIXON treated our break with our traditional allies—France and Great Britain—as an accomplishment rather than a setback. He stated:

"For the first time in history [as a result of the Suez crisis], we have shown independence of Anglo-French policies toward Asia and Africa which seemed to us to reflect the colonial tradition. That declaration of independence has had an electrifying effect throughout the world."

The electrifying effect upon the world was closer to dismay than to rejoicing.

In pressing for the withdrawal of Israeli troops, President Eisenhower himself appeared before a nationwide television audience and made the solemn pledge that if the Suez Canal were blockaded in the future such action "would be dealt with firmly by the family of nations."

Israel withdrew its troops. It relinquished the fruits of its brilliant triumph on the field of battle.

But Nasser, emboldened by what, after a crushing military defeat, had become, thanks to the U.S. action before the U.N., a clear-cut victory, tightened the noose around Israel's economic existence by stringently enforcing his ban against all ships dealing with Israel using the Suez Canal.

In December 1959, despite strong congressional protests, the International Bank for Reconstruction and Development made a loan of $56 million to Nasser to widen and deepen the Suez Canal.

No quid pro quo, no conditions relating to freedom of transit, were requested or exacted from the United Arab Republic in exchange for this munificent financial and moral support.

This loan was granted at almost the precise moment when a Danish and a Greek ship were being detained at Port Said because they were involved in trade with Israel—at exactly the hour when Egypt was publicly and defiantly repudiating its pledge of "free and open transit through the canal without discrimination, overt or covert," and was acting in violation of President Eisenhower's proclaimed commitment.

It should be noted that all the U.S. representatives on the International Bank voted for this loan. The president, the three vice presidents and the treasurer of the Bank are all American citizens. The United States controls 32 percent of the voting strength of the Bank. With European nations interested in preserving free transit through the Suez Canal, the United States controls over 50 percent of the Bank's vote. A simple word from the White House to the Bank's officialdom indicating that it was the policy of the United States not to grant such a loan without a commitment on the part of the Egyptian Government to allow freedom of passage to ships of all nations, would have been accepted and acted upon by the U.S. officials at least and would, undoubtedly, have prevailed with the other board members.

Either the commitment to allow freedom of transit would have been made, or the loan would not have been made.

The promise of President Eisenhower that any action to blockade the Suez would be "dealt with firmly by the family of nations" was nullified by the action of the International Bank, with the United States having almost one-third of the votes, in granting the $56 million loan without even an attempt to secure a commitment for the free passage of all ships. A negative vote by the United States—and the Bank—until and unless there was an assurance of free transit through the canal would have been understood—an affirmative vote for the loan cannot be understood except in terms that the Eisenhower-Nixon administration does not mean what it says about championing freedom of transit through the Suez Canal.

This action is in marked contrast to the following high-sounding words recently uttered by Vice President NIXON in reply to an inquiry from President Label A. Katz of B'nai B'rith:

"I believe that we must continue to press for the effective implementation of the principle of freedom of the seas and free access to international waterways, and the protection of the interests of American seamen and shipping now being discriminated against by the Arab boycott and blacklisting policy."

It seems obvious that the United States, by not matching its deeds to its words, has continued and aggravated the tension in the Middle East.

The question of freedom of transit through the Suez Canal was considered by Congress this year in connection with the passage of the Mutual Security Act Amendments of 1960.

Senator PAUL DOUGLAS, of Illinois, proposed an amendment to the bill to the effect that it was the sense of the Congress that assistance under the Mutual Security Act be

administered so as to give effect to the principles that the United States favors freedom of navigation in international waterways and economic cooperation between recipient nations.

This provision was bitterly fought by the administration in the Senate. The amendment was adopted by a vote of 45 to 25 with 77 percent of the Democrats voting for it and 60 percent of the Republicans voting against it. Both Senator KENNEDY and Senator JOHNSON voted for the amendment.

Senator JOHNSON's motion to table a motion to reconsider the vote carried by a vote of 40 to 29 with 73 percent of the Democrats voting for it and 71 percent of the Republicans voting against it. Actually the amendment carried with it no compulsion since it gave the President discretion to follow or not to follow the Senate's recommendation to use economic aid as a lever to enforce freedom of navigation. Since that time it has become clear that the Eisenhower-Nixon administration has disregarded the Senate's suggested policy.

Indeed, the administration's strong reaction against conditioning foreign aid upon adherence to the principle of freedom of transit through international waters is in marked contrast to its insistence in October 1956, in the United Nations that all member nations withdraw economic aid to Israel.

Four years ago—and about 2 weeks before Israeli troops marched to capture neighboring Egyptian bases from which the murderous raids on Israel had been launched, and Ambassador Lodge asked the Security Council to impose economic sanctions against Israel, Vice President NIXON said:

"As an example, President Eisenhower's patient yet firm leadership in the crises that developed over the Suez Canal is making itself felt throughout a tense world today. I can report to you that we are making headway in this difficult matter; we have kept the peace; and it appears that Mr. Eisenhower's tolerance and wisdom and leadership will serve to avert armed conflict in that part of the globe."

But these high-sounding words have been nullified by the actions of the Eisenhower-Nixon administration since taking office.

They have been nullified by:

U.S. pressure upon Great Britain to withdraw from the Suez Canal without receiving assurances from Egypt as to free transit of the canal.

Denial of arms to Israel while arming Saudi Arabia and while Communist Russia was arming Egypt.

Ignoring the increased tempo of Egyptian raids upon Israel.

The consistence of Ambassador Lodge of the imposition of sanctions upon Israel.

The vote by the U.S. members of the International Bank in favor of a loan to Egypt for the Suez Canal without the receipt of assurances that there would be free transit.

The strong fight by the Eisenhower-Nixon administration against the adoption of an amendment by the Congress expressing its opinion that economic aid should not be granted to nations which did not honor their commitments regarding freedom of transit in international waters.

The Eisenhower-Nixon record must be judged not by its words but by its deeds, and by the wide gap that exists between promise and performance.

As Senator KENNEDY has said in referring to the mutual security amendment that gives the President the power to crack down on the violators of freedom of navigation if he chooses to use it:

"If America's word to the world is to have any meaning, if the decisions and resolutions of the United Nations are to be binding on all parties, if the mutual security amendment which I cosponsored with Senator PAUL H. DOUGLAS is to have meaning, if the clean, thoughtful language of the Democratic platform is to have meaning—the influence of this Nation and other maritime powers must be brought to bear on a just solution that removes all discrimination from the Suez Canal."

For the past 7½ years that "influence of this Nation" has conspicuously not been brought to bear.

Report by Congressman William H. Avery to the 1st Congressional District of Kansas on the 86th Congress

EXTENSION OF REMARKS
OF

HON. WILLIAM H. AVERY

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. AVERY. Mr. Speaker, as is my usual custom, I am submitting a report to the 1st Congressional District on the 2d session of the 86th Congress. In a report of this nature it is only possible to present the accomplishments of the session and workload of the office in brief outline form.

Almost 6,500 bills and measures were introduced during this 2d session of the 86th Congress. The total bills and measures introduced for the entire Congress was 20,500. This was the first session of Congress to include a special "bobtail" session since the 80th Congress in 1948.

In contrast to the 1st session of the 86th Congress, in which case most legislative action was in the field of domestic matters, the major accomplishments of the second session have been in the field of foreign affairs. Two major exceptions were the enactment of the Civil Rights Act and the medical aid program for the aged.

Turning to the topic of legislative activity during this session, I am submitting for your information and interest a brief résumé of congressional action on legislative proposals and bills introduced by your Congressman. Following this is a listing of my vote on major legislative actions. In the event you should desire additional information on any particular vote, I will be most happy to attempt to furnish such. The listing includes voice votes as well as recorded votes.

First, the action on Avery sponsored bills and proposals:

Introduced and urged passage of amendment to limit Commodity Credit loans to $50,000. Avery proposal adopted by rollcall vote in first session for 1960 crop. Avery bill and other similar bills for 1961 crop rejected by majority. During debate in House your Congressman stated it was never the intention of Congress to subsidize corporation farms. Yet without some limitation the Agriculture Secretary is powerless to refuse to grant loans to a producer who planted within acreage allotment. Under this practice, some loans have exceeded $1 million.

Avery bill to eliminate inequities in the law pertaining to VA dependency and indemnity compensation awards to certain widows of veterans who die as a result of service-connected disability. Avery bill passed Congress and enacted as public law.

Avery proposal to permit duty free entry of experimental flour milling equipment for Kansas State passed Congress and became public law.

Avery legislation to provide payment for certain losses to displaced property owners in Tuttle Creek Reservoir passed House unanimously and is now embodied in a public law.

Avery bill to improve and remove hardships from law covering application for moving costs incurred by displaced landowners in Tuttle Creek Reservoir adopted by the Congress and included in a public law.

Avery proposal to provide health benefits program for retired Civil Service workers passed Congress, is now public law.

Avery bill to amend law to insure adequacy of national railroad freight car supply passed by House Interstate and Foreign Commerce Committee and reported to House.

Avery legislation to amend Social Security Act to eliminate age 50 requirement for disability insurance benefits embodied in bill passed by Congress and is now public law.

Avery proposal to grant consent of Congress to Kansas and Nebraska to enter into a compact for equitable distribution of waters of Big Blue River passed Congress and is now public law.

Avery introduced legislation to grant tax relief to small business through allowable deductions for capital equipment investment.

Listing of the votes cast by your Congressman during second session of Congress:

Voted for bill to create an Agricultural Research and Development Commission to find and promote new industrial uses for farm products. Enacted as a public law. Your Congressman testified before Agriculture Committee in support of this type of legislation stating:

Agriculture must speed up its research efforts in developing more uses for farm commodities. It is not necessary to create any new so-called Government agency. We should utilize our land-grant colleges. Such an approach would permit the facilities at Kansas State to be used.

Voted for civil rights legislation to safeguard voting rights for all citizens and other provisions. Enacted as public law.

Supported extension of Library Services Act to provide mobile facilities for rural areas, is now public law.

Voted against bill to increase the spending of Federal funds from $45 million in present law to $90 million for water pollution control. Passed Congress, vetoed by President.

Opposed unreasonable spending of $250 million as a Federal grant to depressed areas bill. Passed Congress, vetoed, supported President's veto on motion to override.

Voted for authorization for Post Office Department to seek court orders to curb use of mails for distribution of obscene or fraudulent matter. Enacted as public law.

Supported extension of special milk program for children, is now public law.

Voted against motion to override the President's veto of Federal pay raise legislation. The veto was overridden and pay raise enacted as public law.

Helped draft and supported legislation to fix penalties for acceptance of *"payola"* and for other abuses and questionable practices of the radio and TV industry. Enacted as a public law.

Supported minimum wage legislation granting increase to workers now covered of $1.15, bill would not include "local retail establishments." Did not support the Kennedy-Roosevelt bill to extend coverage to businesses not customarily considered as engaging in interstate commerce. Legislation died in conference committee due to disagreement.

Voted for funds for fiscal 1962 and 1963 for primary and secondary highway systems and their urban extension. Enacted as a public law.

Supported liberalization of amount of loans Small Business Administration may have outstanding and of extension of credit to small business enterprises. Enacted into law.

Voted for tax deductions for professional self-employed who set aside income for voluntary pension plan (H.R. 10). Passed House, no Senate action.

Supported extension of GI loan program for home, farms, or business, is now public law.

Supported President's request for funds for the mutual security program, or foreign aid, is now public law.

Voted for amendment to Criminal Code to permit prosecutions for espionage committed outside the United States. Passed House, no Senate action.

Supported bill to authorize Secretary of State to deny passports to persons furthering international communism and whose presence abroad would endanger American security. Passed House, no Senate action.

Voted for bill to exclude or deport any alien convicted of violation relating to illicit possession of marijuana. Passed House, no Senate action.

Voted for U.S. participation in International Development Association to help provide assistance to underdeveloped countries. Enacted as public law.

Supported proposal to provide tax relief incentives to encourage investment of private capital in underdeveloped countries. Passed House, no Senate action.

Endorsed resolution authorizing President; Health, Education, and Welfare Secretary; and the Surgeon General to conduct an international cooperative program in health research, training, and planning. Now a public law.

Voted for resolution expressing the sense of the Congress that the Communist China regime should not be seated in the United Nations as representative of China. Passed House, no Senate action.

Supported bill to permit application of loan provisions of Watershed Protection and Flood Prevention Act to other soil conservation projects. Enacted as public law.

Favored bill authorizing donation of Federal surplus property to cooperative agricultural extension agencies of States and counties, is now a public law.

Supported a cooperative Federal-State program of medical care for aged and liberalization and extension of coverage of old-age, survivors, and disability benefits program, is now law.

Voted against Federal aid to education legislation for school construction. House and Senate passed different versions, Rules Committee refused to send bill to conference to work out differences, bill died.

Supported extension of corporate, liquor, cigarette, and automobile excise tax and the provision raising temporary national debt limit for 1 year, is now public law.

Voted against Treasury expenditure of $1 billion for Government purchase of FHA and VA mortgages. Passed House, no Senate action.

Voted for legislation providing additional compensation for disabled veterans with more than three children, education and training for children of veterans dying of service-connected disability. Enacted as public law.

Voted for bill to establish wheat price supports at 85 percent of parity, reduce acreage allotment by 20 percent, and provide payment in kind for retired cropland. Bill failed on rollcall vote.

SUMMARY OF CONGRESSIONAL AND COMMITTEE ACTIVITY

One hundred percent voting attendance record.

Answered 108 of 113 quorum calls, for 97-percent record.

Attended 75 sessions of Interstate and Foreign Commerce Committee, for a 99-percent record.

Seven hundred and thirty-eight bills referred to Interstate and Foreign Commerce Committee.

Attended all meetings of the Small Business Committee.

One hundred percent attendance as Private Calendar Committee ranking minority member, studying 250 private bills as member of committee.

One of two Congressmen selected to appear on special panel at National Watershed Congress.

Held over 150 conferences with officials in Government agencies on cases for constituents.

To give you some idea of our office operation, for the period of January 6, 1960, to September 1, 1960:

Received 6,941 first-class letters from district for an average of 35 per working day.

In total, received and answered 15,000 pieces of mail.

Mailed out 39,302 pieces of mail, of which 26,890 was first-class mail.

Processed cases with VA for veterans from every county in district.

Handled over 600 matters dealing with Agriculture Department.

Four hundred and forty-eight individuals visited the office in Washington.

Received 100 newspapers per week from district, 15 per week from elsewhere.

One of the most significant activities of your office in Washington was the continuation of the "Week in Washington" nonpartisan academic program for Kansas, Kansas State, Washburn, St. Benedict's College, and Mount St. Scholastica College.

The students are selected by their schools impartially on the basis of merit. The purpose of the program is to learn government firsthand. AVERY's office is the only one to carry out this educational program in such broad detail. American Political Science Association rates Avery program tops in objective coverage. The students interview Congressmen, White House aids, Budget Bureau officials, State Department officials, visit both national political party headquarters, observe Congress in session, attend committee hearings, and other features. The program has been in operation for 1 year, with 12 students participating.

The following is a brief summary of the appropriations and Federal activity for our district:

Flood-control projects, $19,718,700.

Military construction, Federal buildings, and VA operations, $14,666,870.

Equipment improvements and repairs to post office facilities, $175,135.

During the recess, I will be in the district. While your office in Washington will be open to take care of your inquiries, we will also have an office in the Hotel Jayhawk, Topeka. Please contact me at any time if you feel "Your Office in Washington" can be of assistance.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS

OF

HON. HAROLD C. OSTERTAG

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. OSTERTAG. Mr. Speaker, the Ukrainian Congress Committee of America deserves our most heartfelt congratulations on its 20th anniversary to be observed this fall. It is a purposeful and patriotic group of Americans of Ukrainian descent. Its excellent publications, its sterling principles, its dedicated membership, its outstanding leadership—all have made it an outstanding exponent of everything the free world stands for and must fight for.

The Ukrainian Congress Committee of America is indeed fortunate to have for its chairman Dr. Lev E. Dobriansky. Many of us here in Congress are happily acquainted with Dr. Dobriansky through his successful crusade for the Captive Nations Week resolution and through his unswerving efforts on behalf of captive nations. In the face of many obstacles he has led the crusade for recognition of the sorry plight of the non-Russian nations enslaved by the Soviets, for an awareness of the true nature of Russian imperialism, and for greater understanding of the strategic significance of these nations to the free world.

Dr. Dobriansky and the Ukrainian Congress have advocated policies that

are sufficiently flexible to effectively counter the twists and turns of Soviet foreign policy and yet solidly implant on all of us the grim truths and the need for hard work to help the captive nations achieve their rightful place in the free world. We all must pledge our efforts that these policies may be crowned with success.

Our Great American College Fraternity System

EXTENSION OF REMARKS
OF
HON. GEORGE GRANT
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. GRANT. Mr. Speaker, during the last few years, an attempt has been made by certain persons to bring about a change in our great American college fraternity system. These would-be changes seem to overlook the fact that college fraternities, as they have functioned through the years, have rendered a distinct service to college life in many ways. For example, friendships due to close association in undergraduate years, are kept alive by alumni members throughout life. However, it is not my purpose here to defend the college fraternity system, as such; this I would gladly do in another forum. The pros and cons of the college fraternity system is not the issue at this time; I am here to call attention to the membership of this House the real threat that will eventually destroy these organizations through forcing them to lift all restrictions relating to membership.

I believe I can approach this subject with an unbiased opinion. Upon entering college, I did not join a fraternity. Later, when I did, this was the first secret organization of which I became a member. Some of my best friends in college were not members of any fraternity while others were members of fraternities for which I could not meet the membership qualifications. My college fraternity accepted only those students who professed the Christian religion and were members of the Caucasian race. Generally speaking, the membership of the Ancient Free and Accepted Masons is restricted to those of the Jewish and Protestant Christian faiths, Elks, members of the Caucasian race, and so on.

My college fraternity was founded by two Protestants and a Catholic. Later, I joined the Woodmen of the World, Elks, Moose, and the Masonic bodies, including the Shrine. I have sat in Masonic and Shrine meetings with members of the Jewish faith and in the Elks and other secret orders with members of the Protestant, Catholic, and Jewish faiths. Certainly, there has been nothing other than brotherly relations in these groups. Now, do you mean to tell me that this is un-American?

Members of the Negro race have a Masonic and Elks order of their own which are large organizations. To confuse this issue with that of civil rights is pure folly. This has nothing to do with civil rights or any phase of integration. Certainly, I would not propose to all Negro fraternities and sororities that they be required to accept members of the Caucasian race; nor would I say to a Jewish fraternity that it must accept those of other faiths, to a Catholic fraternity that it must accept members other than Catholics, to Acacia that it must accept members other than Masons—none of these things would I do—any more than I would tell a church what members it must accept.

While the present challenge of changing membership restrictions seems to be directed only toward college fraternities, if its advocates are successful on this level, they will eventually move to all fraternal orders, such as the Masons, Knights of Columbus, Knights of Pythias, Woodmen of the World, Benevolent and Protective Order of Elks, Moose, Shrine, and many others.

By nature, there is a feeling of fraternalism in the heart of man; do nothing to suppress it. Because man wants to limit this close, social fraternalism in no way signifies that he does not believe or give voice to hope and faith in universal brotherhood or that he necessarily believes in discrimination in the sense it is today used, particularly in politics and political life. Keep politics out of fraternities.

We must be careful that in our zeal for democracy we do not destroy democracy itself; keep up this trend, and in time fraternities will be mere instruments of the state—being told whom, when, and how they must initiate. Change the membership restrictions because of the explanation of its advocates that this is all they want, and the next thing will be "Now that you claim to have changed your constitution and bylaws relating to membership, show evidence of good faith; in other words, show that you mean it by initiating a certain number of those whom you did not heretofore solicit."

Everything in America is not wrong. Change for the sake of change should never be. Everything that is old is not necessarily wrong. The principles upon which college fraternities were founded will never change. There are certain truths that are eternal—the same yesterday, today, and tomorrow. Truth, love, and honesty will never change; and, in my opinion, this great American college fraternity system should not either.

You cannot have a fraternity in name alone. The college fraternity is a product of our college life. Either this system, as we know it, is worth fighting for; or, it is not. If there is no will to fight for its survival, then it is not worthy of continuance. It is high time to make up our minds. As for me, mine is made up. This is one place where there can be no compromise. Either the selective system of membership is right, or it is wrong. If it is wrong, then the whole fraternity system is wrong. If fraternities are a bad influence on college life—let us prohibit them—either by legislation in State universities or by action of the board of trustees or other proper authorities in private schools. If one believes that the fraternity system has no place in American colleges, then let him come out in the open and advocate the abolition of all fraternities. In other words, let us admit that the whole idea is wrong and go out of business.

The founders and pioneer members of our college fraternities did not have easy sailing. Stumbling blocks of many kinds were thrown in their pathways. And over the years both State and private institutions have from time to time forbidden fraternities on the college campus.

I recall one particular instance, where even though fraternities were not forbidden, the school authorities forbade those students who were fraternity members to participate in any extracurricular activity, such as athletics, glee club, and so forth. However, this restriction was later withdrawn. In other colleges, subrosa chapters existed; but mark well that in none of these instances was there ever any challenge to the method of membership selection.

For many years, there have been rules and regulations, and properly so, by college authorities setting out scholarship requirements, particularly those with respect to rushing. But the present challenge is something new and of an entirely different order. This, too, will pass if it is met by a united front on the part of a great majority of the fraternities. "United we stand; divided we fall" could never be applied to a more appropriate situation than in the instant case. Every fraternity should join forces and serve notice to these would-be do-gooders to keep their hands off these private organizations.

I am aware that this issue has popped up from time to time over the years, but it never got anywhere until in recent years when there has come a pressure from without seeking to pick up a few converts from within and have them bore within their individual fraternities. This new philosophy is not catching on in the way some of its proponents had hoped it would, but their form of ideology never gives up; rather, it continues and continues.

I believe in progress; I like to call myself a progressive. But do not let us in our desire to accept so-called universal brotherhood feel that it devolves upon us to dictate to all fraternal orders as to just what their principles and requirements of brotherhood are to be.

Do this today, and tomorrow you will be told whom you must take in. This effort is only the beginning; continue to give ground, surrender the principles upon which your fraternities are founded, do away with the cornerstone of the organization, the "arc of covenant," so to speak, and all is lost. The very foundation of every fraternity is its freedom of choice in selecting its members. Destroy that landmark and you destroy all.

Either we are going to have fraternities, or we are not. If we do, they can exist only as real fraternities and be worth anything where each organization has the God-given right to set its own qualifications for membership.

Over the past years we have noted from time to time where in a few isolated instances some local chapter would pledge or sometimes initiate a person who did not meet the qualifications of the national organization; and, in turn, the local chapter would be penalized in some manner or have its charter withdrawn. You cannot, of course, have a national organization which is worth its name that does not maintain discipline and enforce its constitution and bylaws.

Recently, a national fraternity holding a convention changed its membership requirements which led to the resignation of one of the founders of this fraternity.

Webster defines a fraternity as the state or quality of being a brother or brothers; brotherliness; a group of men joined together by common interests, for fellowship, and so forth. "Baird's Manual of American College Fraternities" defines fraternity as a mutually exclusive, self-perpetuating group which organizes the social life of its members in accredited colleges and universities, as a contributing factor to their educational program, and draws its membership primarily from the undergraduate body of the institution. If college fraternities are forced to change their membership qualifications, then the foregoing definitions would be only hollow shells.

If college fraternities do not escape this attempt being forced upon them and is what I conceive to be an un-American trend, then make no mistake about it, the effort will next extend to all fraternal organizations, and on to all private clubs, and then even to the churches. So, I say, hands off—hands off before it is too late to control this spreading infection.

This challenge behooves all liberty-loving persons—whether members of a college fraternity or not—to stop, look, and listen at some of the trends in our Nation today. This is no time for fraternities to act under duress. Many founders of your individual orders were faced with problems and more difficult situations than this, and they certainly did not meet the issue by compromising. Today is not too late to overcome this threat; tomorrow may be.

My Final Report to the District

EXTENSION OF REMARKS

OF

HON. MERWIN COAD

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. COAD. Mr. Speaker, it is again my privilege to summarize my activities during the 86th Congress in my report to the people of the Sixth Iowa District.

Since the close of the bobtail session of Congress, I have worked full time to get this report finished and into the hands of the RECORD clerk as soon as possible. It is my hope that we can get it out in the mail without further delay.

AGRICULTURE

On the last day of the session we considered a farm bill which would give some assistance in helping the farmers who need assistance so desperately. This bill will raise dairy price supports from $3.06 to $3.22 per hundredweight. This level of price support serves to raise the floor under the market for the market price of milk is presently higher than this figure. However, this will effectively raise the floor level and in this manner serve to stabilize the dairy industry at a higher price level and for this urgent reason this bill should be enacted.

The farm situation is so critical in the Midwest that farm auctioneers are already booked up months ahead. They are going to sell out the family farmers who have struggled so valiantly against the harsh economics of increasing production at lower prices. This philosophy which has been espoused and practiced by the Republican administration has brought economic ruin to many of our farm people. This I say is cruel treatment to some of the finest of American citizens. I am told that in some communities up to 25 percent of the family farmers are going to be liquidated. This is a great tragedy. It is useless and a needless tragedy. It need not have happened and it should not have happened.

President Eisenhower signed this bill, but indicated he would have vetoed it if this were not an election year. It was the last opportunity the President had to redeem, if in such a small way, the glowing campaign promises which he made while a candidate for office in 1952. In 1952, Mr. Eisenhower promised 100 percent of parity in the marketplace by pledging himself to the continuation of the 90 percent supports. We know that during the eight sessions of the Congress Mr. Eisenhower has never lived up to any of the promises he made to the farmers of America. But now, as one of his official acts of signing farm legislation he takes this opportunity of doing a little for the American farmers who are engaged in dairying.

But if Mr. Eisenhower had vetoed this bill, as he has vetoed five other farm bills, he would have a record of 100 percent against our farmers. His remarks about this bill prove that what he said earlier this year about realizing his demands on farm legislation were just so many words spoken in the arena of politics.

In 1956 he vetoed H.R. 12, the Agricultural Act of 1956, passed by the 84th Congress. This was a measure to restore 90 percent farm parity prices for basic crops—corn, wheat, cotton, tobacco, grains, and milk.

In 1958, he vetoed Senate Joint Resolution 162, a Senate joint resolution passed by the 85th Congress. This provided for freezing farm price supports at the 1957 level to forestall a price reduction.

In 1959, he vetoed S. 1909 for tobacco price supports, passed by the 86th Congress. This bill, covering a single commodity, would have set the price supports at 90 percent of parity on tobacco for which marketing quotas were established.

Again in 1959, the President vetoed S. 1968—H.R. 7246—the wheat price support bill passed by the 86th Congress. This bill would have raised price supports from 75 to 90 percent in return for a 25-percent acreage reduction.

Once more, in 1959, the President vetoed a bill to give final REA loan authority to the Rural Electrification Administration instead of leaving it with the unsympathetic Agriculture Department.

Our farmers cannot afford the luxury of having their livelihoods cast about as the whim of politics may choose. Our farmers need assistance. They need assistance in balancing production at a fair price so that their families can live as first-class citizens. It is not fair that the American people should expect the farmers of our land to subsidize the grocery bill forever. The American farmer deserves the best, but he has been receiving only crumbs. The enactment of this legislation, sponsored by Democrats, is a step in the right direction for the economic improvement of American agriculture.

BALANCED BUDGET MYTH

Much has and will be said about the balanced budget which was achieved in fiscal 1960. Completely obscured to the public will be that fact that during the past 6 years, $29.4 billion have been added to the Federal debt.

It may be entirely coincidental that budget surpluses occurred in fiscal 1956, 1957, and 1960, conveniently for the national elections involved. The 8-year total gives the true picture of a debt increase of more than $29 billion.

In analyzing the fiscal operations of the Government, the American people should also be aware of the fact that the surplus for fiscal 1960 was in no small part due to the extraordinary contribution to the Federal Treasury by the so-called independent Federal Reserve bank.

In fiscal 1959, when the Nation was facing a $12½ billion deficit, the bank could make only a $491 million contribution. In 1960, however, this contribution was multiplied to $1,093 million. Thus, in order to balance the budget for fiscal 1960 and in order to show a political surplus, the Treasury had to call on the Federal Reserve Board to double its previous contribution. At the same time, heavy defense spending was deferred until July 1, 1960, the beginning of fiscal 1961.

When the true circumstances are brought to light, the 1960 "balanced budget" will prove to have been a fraud on the American people.

VOTING RECORD

Those who try to condemn by accusation without proof have little faith in our American way of life and even less respect for the intelligence of the American people.

We can be thankful for the truthful historic documentation of the acts of public officials ungarnished with half-truths, insinuations, and partisan commitments.

I do not intend to be indicted and condemned by headlines when the record itself shows quite a different story indeed.

On June 12, 1959, I voted for the wheat price support bill, H.R. 7246, to provide an increase from 75 to 90 percent price support on wheat in return for a 25-percent acreage reduction. This bill also contained provisions for cross-compliance, increased penalties on wheat from acres in excess of the farm acreage allotments, limiting total payment to any one operator and payment in kind.

While this bill was under consideration by the House Committee on Agriculture, I offered the amendment to the bill to provide for payment in kind. This amendment passed the committee, weathered debate in both House and the Senate and emerged in the final draft, as passed by Congress.

In their statement on the final draft of the bill, the House conferees projected that:

The overall effect of the bill as agreed upon by the conferees and reported herewith will result in a wheat program for the years 1960 and 1961 which will (1) reduce wheat production an estimated 200 million to 300 million bushels per year; (2) result in a cash savings to the Government of an estimated $150 million to $200 million per year.

On June 25, the President vetoed this bill.

Another very controversial issue came up early in the 86th Congress; this was H.R. 3, the so-called States rights bill. This bill provides a rule to guide the Supreme Court in construing statutes of Congress. It was bred in vengeance against the Supreme Court for what it said in the segregation decision of 1954 and nurtured in the contempt for national unity held by Civil War secessionists.

In my judgment, this bill would have created a morass of litigation, ambiguity, and doubt upon the rights, responsibilities, and liabilities of every American citizen. As stated in the CONGRESSIONAL RECORD, it should have been entitled "A full employment bill for lawyers," because it put in jeopardy of dual interpretation by the Supreme Court nearly every act passed by the Congress since 1779. I voted against this bill and although it passed the House it did not pass the Senate.

One of the most difficult decisions I had to make as a Representative from a primarily rural district was my vote for the Landrum-Griffin labor reform bill. It was tagged as a "get Hoffa bill," and although since its enactment into law it has failed to get Hoffa, its provisions have penalized the unionman who works for a living by taking away his union's rights at the bargaining table. The House Labor Committee bill, which I favored, provided for a more democratic process in union affairs, safeguarding pension and welfare funds, as well as providing protection from "fixed" union elections, but because this bill did not penalize the union workers at the bargaining table, it was considered a weak bill by the antilabor proponents of labor reform who really wanted to break the labor unions, rather than help the man who must work for his living.

One issue was climaxed in an unusual situation during this session of the Congress. That issue was school construction assistance. Separate bills passed both the House and Senate, but neither was sent to the President for final action. I supported H.R. 10128, the School Construction Assistance Act of 1960, because we are short over 130,000 classrooms in this country which today is impairing in varying degrees the education of over 10 million of our young people. This is about one out of every four American children in school. With the unconditional and absolute guarantee that all control in policy and administration remain at the local level, I believe it is not good sense to expect local property taxes to pay for the bulk of the growing costs of education. Already 40 cents of every State and local revenue dollar goes to the support of education. Our current and future needs in this field can be met only by increased assessed property evaluations and/or increased school millage rates unless the more flexible tax sources of the Federal Government are used to close the gap between present actual facilities and the documented current educational needs of this country. H.R. 10128 provided for a temporary 4-year program of grants totaling $325 million a year to be divided among the States for distribution to local school districts according to the needs of each district. The bill specifically prohibited any Federal intervention, direction, or control over any school system.

Another important vote came on June 23, 1960, when the House of Representatives considered and defeated H.R. 12261, the Poage farm bill, which provided for a referendum vote by the wheat producers to choose one of two programs designed to reduce wheat production by reducing wheat acreage allotments by 25 percent with the price support raised to 85 percent of parity for the 1961–65 crop years. Price supports would be available only to producers who cooperate in the program in the event the producers by a majority vote do not disapprove marketing quotas. If such quotas are disapproved, price supports would be lowered to 50 percent of parity; or two, set price supports on wheat in balance with the support level of corn with adjustments made on the basis of the comparative weight and nutritive value of the two commodities. No production controls would be involved but CCC sales of wheat would be subject to certain restrictions and surplus wheat could be used for donation to friendly countries. A 3-year period of soil bank contracts would be authorized so that 60 million acres would be placed in the conservation reserve. Also included in the bill were provisions for the creation of a feed grain program development committee and a program to increase the amount of dairy, poultry, and meat products distributed to the needy.

It was said and is my contention that we are paying more and getting less out of the wheat program than any other commodity programs. This bill would have provided a means to end the wheat glut. It gave the producers a choice of ways to do it and still stay in business. Since pay-in-kind provisions were again included in the bill the costs of the program would have been reduced.

Another vote rated as important to the Nation's farm families during this Congress by farm magazines was the overwhelming override vote of the President's veto on a bill to provide a 7½-percent pay raise for certain Federal employees. The bill increased the average letter carrier's gross salary $28 a month. Testimony at hearings on this bill showed that workers in private industry doing comparable work receive higher salaries than postal workers and in one example, it was brought out that actually they were offering to pay janitors in larger cities more money, as starting salaries, than the postal carriers and clerks who have been working months and years for the Post Office Department. In our depressed agricultural economy here in Iowa it is hard to believe that postal employees' salary scales are so low, but all the facts and figures are in the record.

I have been in a running battle with the top officials of the Post Office Department on many matters since first coming to Congress, but just because I do not always agree with many policies of that Department, there is no reason to penalize the clerks and carriers who work under these policies.

In conjunction with my belief that the working man and woman deserves a living wage, I supported and voted for an amendment to increase the minimum wage from $1 an hour to $1.15 an hour within a 3-year period and to extend the coverage of the act to employees of certain businesses engaged in interstate commerce, which are not now covered by the law. Although separate bills passed both the House and the Senate, the conferees stood in disagreement at the adjournment of Congress, so no finalized bill was enacted.

These six votes during the 86th Congress are my votes on so-called key issues. This is a Coad box score. There were many other votes during this Congress in the transaction of the people's business in Washington, D.C. I have worked and studied the issues as they have come up before the House of Representatives in order to do the best job I can to see that your best interests, as well as the welfare and security of this great land are preserved.

Although it has been said many times that the 86th Congress was controlled by the Democrats, the record shows that neither the House of Representatives nor the Senate has had the two-thirds majority which is necessary to override a Presidential veto. The simple majority of the Democratic Party was not enough to overcome the Presidential veto threat and the organized coalition of the opposition.

GOVERNMENT SPENDING

Apparently the major difference between our two national parties insofar as spending the tax dollars is concerned, is who gets the benefit of the public spending. When I voted for appropriations for such things as aid to airport construction, flood control, and conservation, loans for electric transmission lines in Iowa, veterans' housing loans, a mutual security program, public housing, and agriculture trade development, I am a big spender? I am the worst in the State of Iowa according to one newspaper editor, but nothing is said when

the administration's policies of tight money and high interest rates are put into effect and the public is forced to pay more interest on the private and public debt. We get nothing in return for it and the vested interests on Wall Street pocket the high interest windfall. During the period 1953–59 interest costs on the public and private debt were $23.1 billion more than they would have been at the 1952 level of interest rates. This kind of fiscal irresponsibility does irreparable damage to the national economy for we got nothing in return for this added expense—no schools, no roads or runways, no housing, no wage increase, no military protection—nothing and for this we paid $23.1 billion in the past 7 years.

This 86th Congress actually appropriated $2,093,048,591 less than the President requested in his budgets for 1959 and 1960. Despite the fact that Congress cut appropriations in nearly every area of Government spending, the budget requests were the highest in the history of the country. The table below shows the breakdown of appropriations approved by the 86th Congress.

In fact, the expenditures for the 8 years of the Eisenhower administration will exceed $579 billion, topping the Truman administration by 46 percent and F.D.R.'s—including the entire cost of World War II—by 68 percent. This administration has asked the Congress for five increases in the legal debt ceiling and has added about $15 billion to the national debt. This would have been even greater had not the Congress under Democratic control since 1955, cut the administration budget request by $9.9 billion. As I see it, the spending of which the administration complains, is evidently only that which benefits the ordinary citizen.

The Berean Institute, Philadelphia, Pa.

EXTENSION OF REMARKS
OF
HON. HERMAN TOLL
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. TOLL. Mr. Speaker, America is unique in its dedication to the proposition that the role of education in a free and democratic society is to encourage and promote the development of the fullest potential of each individual. No other country has so endeavored to provide the wide diversity of educational programs as has this Nation. The Berean Institute of Philadelphia is representative of this spirit of educational challenge and opportunity for all people.

Berean Institute was founded as a vocational school in 1899 by Matthew Anderson, a prominent Negro Presbyterian minister. Its initial purpose was to provide a school for Negro youths and adults in need of guidance, training, and vocational orientation.

The institute was opened in the basement of the Berean Presbyterian Church where it was housed until 1904 when the trades building was erected, and the school was incorporated as a nonprofit institution. Around the time of the erection of the trades building, the institute began receiving partial support from the State of Pennsylvania. It continues to receive such State appropriated funds and derives other income from individuals, organizations, and student fees.

The Berean Institute programs have been developed along the lines of a community college. In this manner, it has provided unique community services. This educational service to the community has long been extended beyond the narrow confines of the Negro race, and programs of training have been opened to all segments of the population in the Philadelphia area regardless of race, creed, or color.

The institute's programs have been concentrated upon meeting the special needs of the underprivileged who cannot afford to pay high tuition costs, but who are deserving people with intellectual potential. Student fees are purposely kept at a minimum level in order to assure maximum educational opportunity to everyone, and, in keeping with this philosophy, an extensive scholarship program has been set up to aid worthy students in need of financial assistance to cover the cost of their studies.

Berean study programs provide the last 2 years of high-school training and 2 years of post-high-school training. These programs have proved to be especially helpful to persons who left school before completion of their studies, and to foreign speaking adults in the area who are not conveniently served by regular and traditional high-school programs. Particular emphasis is placed upon developing skills that will enable students to be beauticians, dressmakers, tailors, and office workers. At the same time, preparation in the fundamentals of English and related mathematics provides a basis for the more capable student who may wish to pursue further technical training. The school fulfills a valuable service to the community by helping to meet the increasing demand for expert craftsmen and reliable artisans. The 2-year post-high-school training provides an opportunity for the acquisition of skills and the general educational exploratory experience often reveals undiscovered abilities.

Berean Institute has also developed a program of parental-vocational education designed to help high school students who have dropped out of school because of childbirth. The program is designed to teach motherhood standards and child care and thereby insure the development of a wholesome and integrated personality for both child and mother. At the same time, the program encourages the development of vocational competency.

The parental-vocational education program is viewed as having long range beneficial effect in reducing the need for public assistance aid to teenage mothers; as well as other continued financial aid forthcoming from the department of welfare for such mothers. Teenage mothers who are reluctant to resume their studies in their former high schools, for personal or age reasons, through the parental-vocational education program of the institute are able to pursue high school training with particular emphasis on developing skills that will enable them to be economically self-supporting.

Berean is located in a densely populated section of Philadelphia surrounded by concentrations of the city's Negro and Puerto Rican populations. The institute's location affords educational chal-

lenge and opportunity for these groups which are frequently handicapped by economic and language barriers. It has been pointed out, for example, that there is a very small percentage of these population segments attending the Philadelphia area post-high-school institutions. In December 1957, a study of higher educational opportunities in the Philadelphia area revealed that of 45,145 students enrolled in 42 institutions there, only 1,144 of such enrolled students were Negro. Yet, it is estimated that about 41 percent of the current enrollment in the city's 22 public high schools is Negro.

Moreover, there is a special need for orientation, guidance, and vocational training of non-English-speaking Puerto Ricans in the city. One of the suggested expansion programs for Berean is the introduction of courses for Spanish-speaking persons. It is reported that one of the greatest handicaps Puerto Ricans face in the United States is the lack of knowledge of the English language. The total question of the educational and related needs of the Puerto Rican community in the Philadelphia area is presently being considered by an advisory committee for a Puerto Rican center at Berean Institute.

Programs of study at Berean presently include: Community college level training—graduation from an accredited high school is the admission requirement for this level of training; high school training—completion of 10th grade or comparable background is required; vocational training—certificate courses are open to all adult persons 21 years of age or over; or young people who have completed at least 10th grade of high school training. Vocational training certificate courses include instruction in business, homemaking, tailoring and dressmaking, and beauty culture. The following is a breakdown of courses of study in each of these areas: Business: shorthand, typing, accounting, business law, office practice, economics, English, salesmanship, management, finance, retailing, mathematics; homemaking: institutional dietetics and nutrition, food preparation, child care, care of the home, personal finishing, selection and care of clothing, color design, children's clothing; tailoring and dressmaking: clothes construction, designing, drafting; beauty culture: operator's course, manager's course, teacher's course, manicurist's course.

The institute also affords student library facilities. The local chapter of the Association for the Study of Negro Life and History is housed in Berean Institute. Thereby, the institute library contains a wealth of general and specialized material on the American Negro.

Student activities at the institute are encouraged as a form of assistance to students in the development of personality, social effectiveness and citizenship. The school sponsors varied activities such as student government, drama, choral music, social groups, and both intramural and interscholastic athletics.

Berean maintains a free job placement service to assist its graduates in finding meaningful and rewarding employment. This service has been successful in placing most of the graduates over a number of years. Most of Berean's graduates are performing service in industry, business, government, and professional and social agency offices. Because of the ever popular demand for a Berean graduate, the institute reports that it has not been able to meet the demand for its trained workers.

Certainly, the fine record of achievement over a 60-year period of the Berean Institute is worthy of praise. Through its programs of study especially designed to meet the needs of underprivileged segments of the population, regardless of race, creed, color or economic background, Berean Institute is making a significant contribution to the American manpower team, as well as to the economic and social advancement of each individual student. I am proud of my association with this institute and my former membership on its board of trustees.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS

OF

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. DENT. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to pay tribute on the occasion of the 20th anniversary of the Ukrainian Congress Committee of America.

It is my pleasure to join in the congratulations and celebration for the 20th anniversary of the Ukrainian Congress Committee of America. This industrious committee is a veritable superorganization, in the true sense of the term. It is a leader among leaders, coordinating as it does the Ukrainian associations throughout the country.

The Ukrainian people and their descendants have spread widely throughout the United States since their first concentration in Pennsylvania. They and their organizations have made superior contributions to the American way of life. Both in the size of their groups and in the quality of their participation in the national effort have they been outstanding.

Many people in the United States, unacquainted with the details of the many and varied ethnic groups in this country are apt to think of these organizations as simply a nostalgic effort to sustain the traditions, the ideologies, the customs, and the hopes of their former homeland in the land of their adoption. That they are far more than this is amply demonstrated by the Ukrainian Congress Committee, whose 20th anniversary we celebrate at this time.

These organizations are a means of assimilation of their people into the new society to which they have emigrated. They are a source of contribution to that society. They are the instrument through which the newcomer adjusts himself to the new life, and through which in many ways he enriches the land to which he has come.

In no case is this more true than with the communities of Ukrainian-Americans in the United States. Noted as they are for the fervor of their approach to religious, political, and fraternal matters, they have at once retained their admirable ethnic features and become among the best of our American citizenry. Proud and independent in spirit, industrious, conscientious, and devout, dedicated to family life and communal charity, the Ukrainian-Americans have been notable for their contribution to the building of this Nation.

They have, nevertheless, been dedicated—and perhaps even more so than most of our ethnic groups—to a continuing loyalty to the land of their origin, to the Ukrainian people scattered about the globe, and to the never-dying idea of eventual independence for the Ukraine. Mindful of the centuries of domination, of oppression, of suffering of their forefathers, and a current similar ignominy of their contemporaries in the Ukrainian S.S.R., they have never ceased to hope and to work for a future free and autonomous nation of these truly superior people. All too much aware of the tyranny and terror suffered at the hands of a lesser breed of men, the Ukrainians have persisted in their determination to lift from their homeland the yoke of Soviet domination.

The fiction of autonomy with which the Ukrainian S.S.R. was clothed for the purpose of a United Nations vote on the side of the Soviet Union is a travesty on true independence. The Ukrainians are first in protesting this sham. They deplore this semblance of freedom which serves but to emphasize the fact that they are totally unfree to make their own decisions. They seek a real, a lasting, an unfettered state of political independence.

After the revolution of 1917, this rich and cultivated area of western Russia, with its advanced economy and superior culture, became independent for the brief period of 3 years. An enforced Russification had for centuries been the sad lot of these brave, sensitive, cultured, and independent-minded people. The national enslavement and economic exploitation of their superior agricultural and mineral resources of Czarist Russia was soon to be repeated and intensified under the Soviet Union. Unwillingly, they were absorbed into the Communist state.

The resistance and the indignation of the Ukrainians was resented by the inexorable proponents of the new type of dictatorship. The Soviet Union became the most overbearing tyrant of all. Intent on the subjugation of these indomitable individualists, the Communist regime inflicted upon the hapless people of the Ukraine horrors and oppression of incredible proportions. Ukrainian energy and endurance were taxed and tormented by the repression of their advanced culture, by economic exploitage to the point of local deprivation, and by political harassment. Forced labor, mass deportations, massacres followed upon the heels of misery and affliction. Liquidation of the kulaks and an artificial famine, causing the deaths of no less than 5 million persons, were the extreme

measures taken by the Communists in their efforts to quell Ukrainian resistance. Yes; incredible though it seems, the politically inspired terrorists attempted to force the liberty-loving Ukrainians into submission by the means of a purposely arranged famine as a weapon.

Yet these unconquerable souls continued to resist. So the tortures and the horrors were perpetuated as dictator followed dictator among the Communist overlords. Intent on subjugation of the rebellious, none was more cruel than Khrushchev. With the continuous system of purges and daily executions he won for himself the epithet of "hangman of the Ukraine."

Still the hope of liberation of the Ukraine has never been extinguished. It persists among the Ukrainians the world over. They number some 40 million in all. Outside the homeland the greatest numbers of them are in the Western Hemisphere.

Here in the United States, represented by the organizations coordinated in the one we honor today, they carry the torch of freedom not only for their beloved motherland but for all the captive nations languishing beneath the Soviet yoke. The liberation struggle of all the non-Russians subjected to forcible Russification, to communism with all its brutality, is stimulated by this torchbearing group, the Ukrainian-Americans.

The Ukrainians have ever felt a greater kinship with the West than with the Russian peoples. This is true with respect to their efficiency in agriculture, in trade, in their handicraft, in the leaning toward individual enterprise in their economy, as it is in their social and cultural advancement.

It is no wonder that those who have settled in America have established a reputation for good citizenry. Not only have they evidenced it in their progressive undertakings, their ability, and their social consciousness. They have demonstrated that their heritage, their political ardor and their loyalties can be applied constructively to the American way of life.

It is our privilege and pride to take part in this occasion honoring this representative organization of the Ukrainian-Americans, the Ukrainian Congress Committee of America on its 20th anniversary.

Address by Senator Thomas E. Martin at the Dedication of the Ardennes Cemetery and Memorial

EXTENSION OF REMARKS

OF

Hon. EVERETT McKINLEY DIRKSEN

OF ILLINOIS

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. DIRKSEN. Mr. President, I am privileged to have printed in the CONGRESSIONAL RECORD, a speech delivered by our colleague, the junior Senator from Iowa, at the dedication of the Ardennes Cemetery and Memorial, Neuville-en-Condroz, Belgium, on July 11, 1960. As you know, Senator MARTIN was designated by the Vice President to participate in the dedication of World War II American military cemeteries in Europe and north Africa. His impressive tribute to those who gave their lives in the service of their country should be read by all Americans.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE THOS. E. MARTIN, U.S. SENATOR OF IOWA, AT THE DEDICATION OF THE ARDENNES CEMETERY AND MEMORIAL, NEUVILLE-EN-CONDROZ, BELGIUM, JULY 11, 1960

It was with genuine humility that I accepted the invitation of the Battle Monuments Commission of the United States and the assignment by Vice President RICHARD M. NIXON to assist in the dedication of the Ardennes Cemetery and Memorial.

It is also with genuine pride that I represent the Government of the United States on this memorable day. To the sympathetic people of Belgium, the people of the United States offer their grateful thanks. The peace and beauty of this spot and the memories it recalls are witnesses to the respectful tribute we bring here today. We profoundly honor the memory of those who fought bravely and died valiantly.

It is nearly 15 years since those who rest in these quiet acres gave their lives in the service of their country during the fierce fighting of what history now records as the Battle of the Bulge. Here lie 5,260 American soldiers and airmen. Among them are 750 upon whose white marble crosses is inscribed: "Here lies in honored glory a comrade in arms known but to God." Among these graves also, we count no less than 11 in which 2 brothers lie side by side—the reminder of a double tragedy for their sorrowing families. That all may be reminded of the achievements of our valiant men the Government of the United States has erected the memorial which you see before you.

The full cost of this battle—indeed, the full cost of World War II—will never be known—either in intrinsic value or in intangibles.

Emerging from the most widespread and most disruptive war in history, in 1945 the world faced many major political, economic, and social problems of great importance to the peace and well-being of humanity. The growth of nationalism and the desire of many, less active peoples to improve their political positions and their standards of living have been factors which have presented various problems throughout the world. Tremendous advancements in communication facilities during the past 15 years, greatly accelerated by the demands of military necessity, have brought all peoples closer together in their human relationships. Technological progress leapt forward under the pressure of war. It suddenly became a sobering thought that world political and moral developments had lagged behind technological developments.

During the war the Allies lived in a unity and sustained a partnership in spirit, in mutual effort, and consent. It was the hope of the supreme commander of the Allied Expeditionary Force—and his entire staff—that this kind of fellowship could be extended to all nations.

When Dwight D. Eisenhower became President of the United States, it was with growing concern that he watched the difficulties arising in the path of an enduring peace. In his 1954 state of the Union address, President Eisenhower said, and I quote:

"In the unity of the free world lies our best chance to reduce the Communist threat of war."

Again in 1954, the President of the United States attested to these truths when he said:

"A sound peace—with security, justice, well-being, and freedom for the people of the world—can be achieved, but only by patiently and thoughtfully following a hard and sure tested road."

In these words can also be found the thought that we, the living, must show the same selfless courage in peace that those who lie in this cemetery showed in war; otherwise, the sacrifices remembered today, and the beautiful memorial dedicated at this hour, will have no purpose.

To speak in memory of our war heroes is not a simple matter and our task is not easy. All that we can even hope to do in our time is to follow their example of courage.

Here lie men who loved America because their ancestors long ago helped in her founding. Here lie other Americans who loved her with equal passion because they themselves, or their own fathers, migrated to America's shores in search of freedom. Here lie men of all ranks—officers, noncommissioned officers, and privates—together. Here no man prefers another because of his faith or despises him because of any political disagreement. Within this beautiful cemetery lie no prejudices, no hatreds. Here is a high and pure democracy.

Thus do we, the living, consecrate this ground and give ourselves to carrying on the struggle they began. Too much blood has gone into this soil for us to leave it barren. Out of the records and memories of the Battle of the Bulge should come our promise to assist in a new birth of freedom for the sons of men everywhere.

It was Gen. Omar N. Bradley who said:

"Freedom—no word was ever spoken that has held out greater hope, demanded greater sacrifice, needed more to be nurtured, blessed more the giver * * * or came closer to being God's will on earth."

Freedom is a costly thing. And since it is a costly thing, it entails a responsibility which limits our rights. How costly freedom is, and how valuable, we learned anew from the battles in World War II. Freedom costs the sacrifice and the blood of men. Indeed, all the benefits we enjoy have cost a long and continuing price of the generations that have gone before us. The very receiving of these benefits lays upon us a responsibility for our fellow man and his rights—and the rights of future generations.

We, therefore, do not have the right by our carelessness to let slip these liberties which cost so much. We do not have the right to make mockery of liberties for which our war heroes died. We do not have the right to plunder the resources our predecessors have given us as if we were to be the last generation to inhabit this globe. On the contrary, we have received anew today the responsibility to protect our liberties and our resources for future generations.

Someone has said that God has laid upon man the responsibility for being free, for safeguarding the freedom of spirit, no matter how much sacrifice and suffering it may require.

Out of the battles and bloodshed and horrors of World War II came the United Nations, dedicated to the dignity of mankind, to the freedom of all nations, to the principle of the abolition of war. Within this body is the NATO group of nations subscribing to common civic ideals—banding themselves against encroachment by those who might forget the principles upon which the United Nations is founded. Among these is our longtime friend and ally, the Kingdom of Belgium. It was with more than ordinary pride, therefore, that we in the United States learned that it was American troops who were privileged to help in freeing so much Belgian territory and so many Belgian people from the invader. It is our fervent hope that our two peoples will go forward shoulder

to shoulder down the years in the achievement of the ideals and in the maintenance of the freedoms for which this cemetery is part of the price. These solemn rows of headstones are an eternal reminder of our duty to the cause of peace.

In behalf of the American Battle Monuments Commission and of the people of the United States, I now dedicate this cemetery and this memorial in proud memory of the achievements of our brothers in arms and in humble tribute to their sacrifices.

Congressman Celler's Report to His Voters

EXTENSION OF REMARKS
OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, as this year comes to a close, I want to render the accounts of my stewardship to the voters of the 11th Congressional District of New York.

With the close of the 86th Congress, I count the 10 years of my chairmanship of the Committee on the Judiciary as the most productive of my 37 years in Congress. I have taken great comfort in serving some 19 terms and wish to continue in this service as your Congressman and hope you will reelect me in the coming elections.

CIVIL RIGHTS

The Judiciary Committee of the House under my chairmanship succeeded, after almost four decades of inaction, in initiating and having enacted two civil rights bills; one the Civil Rights Act of 1957 and the other the Civil Rights Act of 1960, both bearing my name.

Only a portion of the work to be done in this area is complete. I shall continue the long fight, to assure the rights guaranteed by the Constitution to every citizen regardless of race, creed or color, in all areas, including housing, public facilities, schoolrooms, jobs, and the right to vote.

I have been named by the Democratic nominee for President, the Honorable JOHN F. KENNEDY, to serve together with the Honorable JOSEPH S. CLARK, U.S. Senator from Pennsylvania, to draft the necessary legislation to bring to life the pledges of the Democratic Party platform on civil rights, which I helped draft as a member of the drafting committee of the Democratic platform committee at the Los Angeles Democratic National Convention.

IMMIGRATION

Under my chairmanship, the Judiciary Committee has taken big steps toward the eradication of inequities in the Immigration and Nationality Act: We have enacted legislation enabling thousands of alien orphans to be brought into the United States and suitably adopted; we have enacted legislation that has hastened the reuniting of families and shortened the wait by many years; we have eliminated many of the burdensome procedures such as preexamination, and have permitted an adjustment of status without leaving the country; we have enacted legislation allowing for the participation of the United States in World Refugee Year; we have enacted legislation which changes from 25 to 15 years the residence requirement which precludes the loss of citizenship by a naturalized citizen residing in a foreign country.

Here again is a task that has not been completed. I shall continue my efforts to amend the Immigration and Nationality Act so that the national origins quota system may ultimately be eliminated and to the end that all distinctions between native-born and naturalized citizens be assured of the full protection of our laws and to the end that in our selection of immigrants from Europe there shall be no discrimination as to setting up of quotas against people of southern and eastern Europe, like Italians, French, Spanish, Hungarian, Czechs, Poles, and so forth, and in favor of northern and western European groups. All must be treated alike.

DOMESTIC POLICIES—GENERAL

I have sponsored and supported legislation increasing the minimum wage, granting Federal aid to education, extending and strengthening urban redevelopment and slum clearance, and giving aid to depressed areas.

I have opposed all of the legislation that would interfere with the rights of labor.

I have supported, and shall continue to support, medical care benefits for the aged as part of the social security insurance system. I have supported, and shall continue to support, housing construction of more than 2 million homes a year.

DISTRICT OF COLUMBIA VOTE

I believe, too, that the Judiciary Committee can take pride in the fact that it succeeded in sending to the States the constitutional amendment, offered by me, which, when ratified by three-quarters of the States, would permit the people of the District of Columbia to vote for President and Vice President for the first time in its history. This is an issue not far removed from the voters of my district since, in a very true sense, it is an extension of civil rights and the wiping away of unwarranted disabilities in the exercise of the ballot. The adoption of the constitutional amendment was one of the most gratifying experiences of my life.

PRESIDENTIAL INABILITY

While the question of what will happen should the President become disabled while in office was never resolved by the Congress, I am proud of the work my committee and I accomplished in clarifying many of the difficulties. The work of the committee in hearings, special reports, and questionnaires have brought us closer to the solution of this problem.

PUBLIC DEFENDERS—APPORTIONMENT

Some battles go on Congress after Congress, but it is wrong for any legislator, convinced of the rightness of his view, to despair. Just as the Celler Anti-Merger Act against monopolies finally became law, after a 20-year battle, just so, it is my hope that the legislation which I have sponsored again and again will become law. I have particular reference to an act which would provide attorneys for indigent defendants who cannot afford to hire counsel and, to that other important piece of legislation, to provide for more just representation of the people in the Congress—doing away with gerrymandered districts for political gain.

FOREIGN AFFAIRS

I have supported all legislation to permit the economic growth of the underdeveloped world. It is my belief that this is one of the most potent instruments in the search for peace with honor. International cooperation is an absolute necessity in the world today—we cannot withdraw from the world in isolation. The farthest point in the world today is as close as a rocket ship can make it.

I have strenuously opposed boycotts and blockades imposed by the United Arab Republic upon Israel. I have petitioned the President and the Secretary of State to keep America's promise that the Suez would be free for all shipping, including that of Israel. I have introduced legislation that would prevent the Department of Defense from recognizing the Arab boycott and, hence, preventing American citizens from obtaining shipping contracts to Arab lands if they had traded with Israel. I have urged every reasonable financial aid to little Israel.

I have supported, without reservation, that portion of the Mutual Security Act which permits the President to withhold foreign aid from any country which boycotts and blockades a friendly nation.

I have urged, both in the press and on the floor of the House, increased aid to India since I believe that in the Asian world, India, vis-a-vis Communist China, must prevail.

ANTITRUST

The work of the Antitrust Subcommittee, of which I am chairman, has been particularly fruitful. The committee succeeded in having enacted into law a bill designed to help enforce the prohibitions of the Clayton Act against price discriminations, tie-in arrangements, mergers, and interlocking directorates.

In connection with its investigation of the Federal Communications Commission's relationship to negotiations for the American Telephone & Telegraph Co. consent decree, the subcommittee ascertained that the Commission had failed, despite repeated recommendations by its staff over a number of years, to investigate telephone rates or even to conduct a general telephone rate inquiry. The subcommittee noted, also, that as a result of a $65 million long-distance telephone rate that had been authorized by the FCC in 1953 without a hearing, long-distance telephone users may have been overcharged $159 million in the years 1955, 1956, and 1957.

To remedy this situation, the subcommittee recommended that the FCC institute "promptly a comprehensive formal rate investigation." Shortly after the report was issued, the FCC acted upon the subcommittee's recommendation. As a result, on July 24, 1959, the

FCC ordered A.T. & T. to cut long-distance telephone rates by $50 million a year.

As a result of the subcommittee's investigation, the Department of Justice brought four cases to enforce the provisions of the oil-pipeline consent decree. In three of these cases the defendants agreed to the Department's interpretation and stipulated that they would follow the Attorney General's rulings in the future. On the remaining issue, the Supreme Court on June 8, 1959, ruled against the Department of Justice. This particular issue, the "shipper-owner share" question, was one of the most important that had arisen under the consent decree. The adverse decision of the Supreme Court underscores the need for additional action by the Justice Department if the goal of common-carrier pipeline transportation in the oil industry is to be realized.

Also as a result of the subcommittee's investigation of shipping, the subcommittee was able to refer 127 possible instances of violations of the Shipping Act to the Federal Maritime Board and 26 other possible violations of law to the Department of Justice.

The Attorney General, on the basis of the subcommittee's hearings record to that time, embarked upon grand-jury investigations of steamship industry practices in San Francisco and in Washington. Numerous subpenas duces tecum were issued, directing more than 150 firms to produce documents for use of the grand jury. Preliminary litigation, seeking to quash the subpenas, initiated by approximately 60 of those served, was terminated favorably to the Government in June 1960 and the investigations are under way.

The Federal Maritime Board, in response to the subcommittee's referral of possible violations, opened a number of important investigative and rulemaking dockets.

PORT OF NEW YORK AUTHORITY'S INQUIRY: CONTEMPT CITATIONS

In March 1960, at the request of members of the New Jersey congressional delegation, the staff of the Antitrust Subcommittee was directed to make a study of the activities and operations of the Port of New York Authority, including a review of the scope of the authority's major operations.

The Port of New York Authority is an interstate, regional development authority established under bistate compacts between the States of New York and New Jersey, approved by Congress in 1921 and 1922, for the purpose of dealing with the planning and development of terminal and transportation facilities and improving the commerce of the port district. It was the declared expectation of Congress that the effectuation of these compacts would "better promote and facilitate commerce between the States and between the States and foreign nations and provide better and cheaper transportation of property and aid in providing better postal, military, and other services of value to the Nation." Under the Constitution, all interstate compacts must be approved by Congress. When the Port of New York Authority compact was originally approved, Congress inserted therein a most important reservation; namely, that Congress reserved the right "to alter, amend, or repeal" the compact. The present investigation is in part based upon this reservation. In addition, the operations of the authority exercise a farflung influence on interstate commerce. They yield tax-exempt revenues in excess of $100 million annually from tunnels, bridges, terminals, airports, and shops valued at more than $900 million. The port authority's operations affect the economic lives of millions of Americans living outside as well as inside the port development area and the States of New York and New Jersey. They intimately affect the operation of Federal agencies responsible, among other things, for the national defense, navigable waterways, and air, rail, and highway traffic. In short, they profoundly affect Federal interests of many and various kinds.

Nevertheless, although there were 2 days of hearings before the subcommittee in 1952 on a resolution that would have withdrawn congressional consent from the compacts and the authority, neither the Judiciary Committee, to which is assigned responsibility for interstate compacts of this character, nor any other congressional committee, has ever conducted a general investigation of the Port of New York Authority to determine its conformance or nonconformance to the limits of its authority or the extent or adequacy of its performance of its responsibilities in the public interest.

What is more, in recent months, complaints varying widely in character and gravity concerning the operations of the port authority under the compacts, have come to the attention of the subcommittee. For example, it has been alleged that the port authority, in combining revenues for financing purposes from all its facilities, rather than reducing tools on each facility as it is amortized, places an undue burden on the channels of interstate commerce and is contrary to national transportation policy. It has been alleged that the port authority has extended its operations beyond the geographic limits contemplated by the Congress. It has been alleged that in the letting of certain service and construction contracts, the port authority has not permitted competition and has failed to grant the award to the lowest qualified bidder. It has also been asserted that the overall operations of the port authority have at no time been subjected to a comprehensive independent audit by any governmental agency.

By letter dated March 11, 1960, I initiated the inquiry by requesting the executive director of the port authority to make certain of the authority's files available for examination by committee staff members. Notwithstanding this request, the port authority failed for the most part to make available the documents requested. Rather, it limited itself to supply documents virtually all of which were already matters of public record.

Against this background, the subcommittee voted on June 8, 1960, to begin a full inquiry into the activities and operations of the Port of New York Authority under the 1921 and 1922 compacts. Also on the same date, the subcommittee addressed a letter to the executive director of the authority requesting him to make available for examination by subcommittee staff representatives specified documents dating from January 1, 1946, and indicating that counsel for the subcommittee would call at the offices of the authority on June 15 for the purpose of examining these files at that time.

Two days later, by letter dated June 10, the executive director of the authority raised a number of objections to the request for inspection of documents in the port authority's files. In the same letter he nevertheless expressed the hope that when subcommittee counsel called at the offices of the authority and met with its general counsel, those present would reach agreement as to the materials to be furnished in aid of the subcommittee's inquiry. On June 15, counsel for the subcommittee met with the executive director and the general counsel of the authority at its office. The port authority failed to make the requested documents available.

Accordingly, on June 15, 1960, subpenas duces tecum were served upon Austin J. Tobin, executive director, S. Sloan Colt, chairman, board of commissioners, and Joseph G. Carty, secretary to the board of commissioners, of the Port of New York Authority, directing them to appear before the subcommittee on June 29, 1960, and to bring with them certain records and documents of the port authority.

On June 29, the three port authority officials appeared before the subcommittee and brought with them part of the documents demanded in the subpenas, but failed and refused to produce certain other documents in compliance with the subpenas or as ordered by the subcommittee. The withheld documents are necessary to the subcommittee's inquiry. On the same day, following the appearance of the witnesses, the subcommittee unanimously resolved to report the failure of the officials to honor the subpenas to the Committee on the Judiciary and to recommend that the committee report this conduct to the House with recommendation that the port authority officials be cited for contempt. On June 30, 1960, the Committee on the Judiciary adopted this recommendation. On August 23, 1960, the Committee on the Judiciary filed its reports—Reports Nos. 2117, 2120, and 2121—on the matter and the House of Representatives adopted House Resolution 606, House Resolution 607, and House Resolution 608, whereby the Speaker of the House was directed to and did certify the reports of the Committee on the Judiciary to the U.S. attorney for the District of Columbia.

It is now the duty of the U.S. attorney to bring the matter before the grand jury for its action—title II, United States Code, section 194. By citing the port authority officials for contempt, the House has thus cleared the way for a judicial determination of certain constitutional and legal issues concerning the scope of the investigative powers of Congress which the port authority has seen fit to raise.

RECORD OF PUBLIC LAWS

I believe the voters are entitled to know which legislation I introduced in the past Congress which ultimately became law. This the voters must know in order to judge the scope of my activities, the success of my efforts, and the interests which I have pursued.

I attach herewith a list of the bills and the public law numbers of the 86th Congress which I authored and are now part of the U.S. law.

Public Law	Title	Bill No.
86-24	To amend ch. 13, Wage Earners' Plans, of the Bankruptcy Act	H.R. 4852.
86-49	To repeal clause (9) of subdivision a of sec. 39 of the Bankruptcy Act (11 U.S.C. 67a(9), respecting the transmission of papers by the referee to the clerk of the court.	H.R. 4345.
86-64	To amend secs. 1, 18, 22, 331, and 631 of the Bankruptcy Act (11 U.S.C. 1, 41, 45, 731, 1031) to provide for automatic adjudication and reference in certain cases.	H.R. 4692.
86-107	To amend sec. 11 of the Clayton Act to provide for the more expeditious enforcement of cease-and-desist orders issued thereunder, and for other purposes.	H.R. 2977.
86-110	To amend the Bankruptcy Act so as to consolidate the referees' salary and expense funds	H.R. 4693.
86-135	To eliminate all responsibility of the Government for fixing dates on which the period of limitation for filing suits against Miller Act payment bonds commences to run.	H.R. 4060.
86-138	Relating to the maintenance and travel expenses of judges	H.R. 74.
86-144	To amend secs. 43 and 34 of the Bankruptcy Act (11 U.S.C. 71, 62) to simplify the filling of referee vacancies	H.R. 4340.
86-221	To amend sec. 752 of title 28, United States Code (relating to appointment of law clerks and secretaries by district judges)	H.R. 2979.
86-223	To amend sec. 2734 of title 10, United States Code, so as to authorize the Secretary of the Treasury to settle claims arising in foreign countries incident to noncombat activities of the Coast Guard.	H.R. 2741.
86-238	To amend title 28 of the United States Code to increase the limit for administrative settlement of claims against the United States under the tort claims procedure to $2,500.	H.R. 6000.
86-243	Relating to the authority of the Customs Court to appoint employees, and for other purposes	H.R. 7126.
86-259	To amend sec. 4161 of title 18, United States Code, relating to computation of good-time allowances for prisoners	H.R. 4347.
86-282	To amend sec. 1870 of title 28, United States Code, to authorize the district courts to allow additional peremptory challenges in civil cases to multiple plaintiffs as well as multiple defendants.	H.R. 2978.
86-287	To amend the act of Sept. 2, 1958, establishing a Commission and Advisory Committee on International Rules of Judicial Procedure	H.R. 8461.
86-293	To amend the Bankruptcy Act in regard to the verification of pleadings	H.R. 6889.
86-312	To fix the official station of retired judges assigned to active duty	H.R. 2982.
86-352	To change the designation of Child Health Day from May 1 to the 1st Monday in October of each year	H.J.Res.317.
86-411	To amend sec. 2734 of title 10, United States Code, to extend the statute of limitations in the case of certain foreign claims	H.R. 2740.
86-449	To enforce constitutional rights, and for other purposes (civil rights)	H.R. 8601.
86-504	To amend the Bankruptcy Act in regard to the closing fee of the trustee and in regard to the fee for the filing of a petition	H.R. 6557.
86-546	To make the uniform law relating to the record on review of agency orders (Public Law 85-791) applicable to the judicial review of orders issued under the Federal Aviation Act of 1958 and the Food Additives Amendment of 1958.	H.R. 7847.
86-586	To validate certain payments of additional pay for sea duty made to members and former members of the U.S. Coast Guard	H.R. 9921.
86-621	To amend the Bankruptcy Act to limit the use of false financial statements as a bar to discharge	H.R. 4346.
86-631	To amend sec. 678 of the Bankruptcy Act (11 U.S.C. 1078) relating to the transmission of petitions, notices, orders, and other papers to the Secretary of the Treasury in ch. XIII proceedings.	H.R. 7726.
86-662	To amend subdivision c of sec. 39 of the Bankruptcy Act (11 U.S.C. 67c) so as to clarify time for review of orders of referees	H.R. 6556.
86-682	To revise, codify, and enact into law, title 39 of the United States Code, entitled "The Postal Service"	H.R. 2339.
86-702	To clarify certain provisions of the Criminal Code relating to the importation or shipment of injurious mammals, birds, amphibians, fish, and reptiles (18 U.S.C. 42(a), 42(b)); and relating to the transportation or receipt of wild mammals or birds taken in violation of State, national, or foreign laws (18 U.S.C. 43), and for other purposes.	H.R. 10329.
86-726	To amend title 28 of the United States Code relating to actions for infringements of copyrights by the United States	H.R. 4059.

Also I am proud to indicate that over the years while in Congress I succeeded in procuring the passage of many important laws, among them: The Federal Register Act; the Celler-Kefauver Anti-Merger Act; the Celler-Sparkman Act providing for finality of Clayton Act orders; the Celler-O'Mahoney Automotive Act; the Foreign Trade Zones Act; the Federal Tort Claims Act; numerous refugee acts; and Celler Civil Rights Acts of 1957 and 1960.

A Tax Loophole That Must Be Plugged

EXTENSION OF REMARKS

OF

HON. THADDEUS M. MACHROWICZ

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MACHROWICZ. Mr. Speaker, I should like to call the attention of my colleagues in the House of Representatives to a most unfortunate development that has recently occurred with regard to imports into the United States from our insular possessions, a development which could not only lead to the loss of millions of dollars in duty revenue to the Government but could also seriously disrupt important industries in this country.

Under section 301 of the Tariff Act of 1930, as amended, articles imported from our insular possessions are permitted to enter the United States free of duty, provided that foreign materials utilized in such articles represent no more than one-half of the total value of the article. This provision was intended, of course, to promote the growth of industries, employment and skills in the island possessions, and to a certain extent this is being accomplished.

Unfortunately, however, in other instances the effect of section 301 is simply to permit avoidance of the duty that Congress intended on foreign imports. Some products are being imported into the island possessions from foreign countries in subassembly form, a very few finishing touches are added in the islands—requiring a negligible amount of labor or investment—and the completed articles are then imported duty-free into the United States.

This duty-avoidance loophole is now available to many industries where the rate of duty is high. This is because the total value of the article imported into the United States is generally considered—under section 402 of the Tariff Act—to be the wholesale price which the article could bring in the U.S. market—and the wholesale price naturally reflects the duty. In other words, imports from the insular possessions get the protection of the duty in establishing their wholesale price or total value, even though they themselves are not subject to the duty.

In any industry where the duty is 100 percent, the total value of the article imported into the United States would be certain to be at least twice the value of the subassemblies shipped into the insular possessions, even though virtually no labor is expended in the islands. Therefore, the duty-avoidance loophole is wide open in all such cases.

It is my understanding that certain industries, including at least one watch company, have already established operations in the Virgin Islands which will allow them to avoid duty payments. Employing only a handful of men, this firm can turn out more than a thousand watch movements each week because so little work is required to screw the subassemblies together into a working timepiece. This one tiny operation can avoid several hundred thousand dollars in duty a year, yet it is of virtually no benefit to the Virgin Islands economy. Certainly, this is a serious revenue loss to our Government, and I understand that the U.S. watch industry—domestic producers as well as bona fide importers—consider the situation a definite threat to this important industry.

There is no question in my mind, Mr. Speaker, that the Congress should look into this situation as quickly as Congress reconvenes and should take prompt action to plug this loophole. No Member of this body believes more strongly than I in the principles of reciprocal trade, nor is any Member more anxious to see the healthy economic growth of our island possessions. I do not believe for one moment that the Congress should allow these possessions to become havens for duty avoidance in operations which clearly do not fulfill their stated objective of stimulating economic growth and self-sufficiency for the islands.

I was pleased to learn that the Treasury Department is aware of this loophole,

and has suggested a legislative remedy which has been introduced by the chairman and ranking Republican member of the House Ways and Means Committee. While I do not believe the Treasury suggestion goes far enough to close the loophole, I am in total agreement with its purposes and am convinced that the Congress will enact effective legislation early next year.

A Report on Agriculture: Democrat Disillusionment, Disappointment, and Defeatism

EXTENSION OF REMARKS
OF

HON. CHARLES B. HOEVEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HOEVEN. Mr. Speaker, it has become abundantly clear that the American farmer was the political football for this Democrat-controlled 86th Congress. Although unfortunate, this situation is not unexpected. In the field of agriculture the record of the Democratic Party has consistently been one of disillusionment, disappointment, and defeatism.

This 86th Congress which began its final "rump" session with a good many empty saddles at the New Frontier has produced very little in the way of constructive farm legislation. It has, however, produced a great deal of misleading and distorted "farm facts" designed for purely partisan consumption. I would like to review some of these political statements and compare them with past Democrat performances.

DISILLUSIONMENT

One popular fantasy that Democrat soothsayers perpetuate is the image of the "good old Democrat days" and the bad, bad Republican days commencing on the very day in 1953 when President Eisenhower took office. By comparing the last 7 years with the previous 7 years, these same soothsayers come up with the conclusion that the Eisenhower administration has precipitated a farm income disaster. Now let me say at this point that I know farmers are in a financial cost-price squeeze that no other segment of the economy must bear. Farmers need a sound farm program, but scant hope is offered them by Democrats as based on the record. Now anyone can compare the last 7 peacetime years with the previous 7 wartime and post-wartime years and come up with a set of figures showing that farm income was greater in the latter period. But I submit, this does not in any way support the idea that the Democratic Party can promote farm prosperity.

One need only look at the realized net farm income figures for pre-World War II to see how the Roosevelt-Wallace regime fared. During the 3-year period, 1939 through 1941, realized net farm income averaged only $5.9 billion per year, or about one-half of the present figure. If the last 7 Republican peacetime years are compared with the last 7 Democrat peacetime years, the record shows farmers' realized net income was $7.7 billion more in the 7-year period since 1952. This is true in spite of the alltime high farm income figures set in the peacetime years just following World War II.

Another ridiculous claim is that the Eisenhower administration has driven great numbers of farmers from the land. As anyone who is familiar with the facts knows, our farm population has been steadily declining throughout our entire history, particularly since 1933. One misleading statement compares farm population in 1952 at 24,283,000 with that of 1959 at 21,172,000 to prove this political claim.

When one studies the official reports, the record is clarified. The comparison using the year 1952 is obviously based on the Republican victory that year. What is not noted, however, is that population estimates are made on April 1 of the year and elections are held in November. It was not until 1953 that the Eisenhower administration took office and in April 1953, the GOP was just beginning to clean up the mess in Washington.

If the Democrats are trying to compare farm population in the Truman administration with that of the Eisenhower administration, they should in all fairness use the April 1953 population estimates. I would note, however, that you will very seldom see a Democrat make such a comparison. The reason is that in the last 6 years of the Truman regime, farm population declined from 27,124,000 on April 1, 1947, to 22,679,000 on April 1, 1953, or at an average of 740,000 per year. In the last 6 years of this administration farm population has declined from 22,679,000 on April 1, 1953, to 21,172,000 on April 1, 1959, or at an average of 251,000 per year.

In other words, an average of approximately 489,000 more farmers left their farms each year during the last 6 years of the Truman administration than did during the first 6 years of the Eisenhower administration.

When one further examines the record it is no wonder so many more farmers left their farms during the Truman administration. The cost-price squeeze, fired in part by inflationary Democrat policies, really hit farmers hard. In 1952 farm production expenses were $22.6 billion or up $9.7 billion from 1945 when these expenses were $12.9 billion. In 1959 these same expenses were $26 billion, or up $3.4 billion, since 1952. In other words, farmers saw their costs of production go up nearly three times as much during the Truman administration than during the Eisenhower administration.

DISAPPOINTMENT

While there are many other examples of Democrat efforts to offset facts with fallacies, I would like to dwell on some more recent Democrat disappointments.

The shortcomings of the Roosevelt and Truman administrations in agriculture cannot begin to compare in despair with futility shown by Democrat farm leaders in recent years.

The Democrat nominee for President has exhibited a fundamental lack of leadership and understanding in this important field. In a Senate controlled by the Democrats 66–34, Senator KENNEDY failed to exercise any initiative in securing passage of an agricultural research bill which held great promise for the development of industrial and other uses for our surpluses. He failed to assist in the enactment of the House-passed Farmers Home Administration bill which would have simplified and streamlined the credit facilities of this important Government agency. He also failed to take any steps toward extending one of our most effective and valuable farm programs, the conservation reserve program, which will now expire in December 1960. He took no interest in any payment-in-kind and soil conservation programs enthusiastically supported by many midwestern Congressmen. The Democratic standard bearer's apathy toward agriculture was especially callous, however, in view of his statements and promises made at the Los Angeles convention.

An Associated Press story dated July 13, 1960, stated as follows:

> Senator KENNEDY announced yesterday he will sponsor an emergency farm aid bill in the Congress session resuming next month, with the aim of getting "full parity prices for farmers."

The story then goes on to tell how the Senator described the farm problem as the "No. 1 domestic problem today," and how the drafting of the bill was then under way. The strange thing is that no such bill was ever introduced by Senator KENNEDY, nor did any such bill receive any attention by either the House or the Senate.

It is now apparent that the Democratic Party rests its application for national leadership in the hands of a candidate for President who as late as August 1960 completely ignored the same farmers to whom he had promised full parity prices just 1 month earlier.

DEFEATISM

While Democrats just naturally seem to be pessimistic on most everything concerning our great country, they plunge to the depths of melancholy when assessing the farm problem. Their negative-minded mentality in turn affects their effectiveness and it often leads them down the road of defeat and discouragement. But they claim an alibi—President Eisenhower's veto power.

During the past several years the President has been forced to veto several major farm bills. Only one of these vetoes resulted in no further legislation. That was the veto of S. 144 of the 86th Congress, the Rural Electrification Administration reorganization bill. This bill, which was merely a political power play, had nothing to do with interest rates to be paid on REA loans nor had it anything to do with increasing the farmers' income.

One veto—S. 1968, the wheat bill of the 1st session of the 86th Congress—was

followed by another wheat bill which passed the Senate, but was killed in the House. The other three vetoes—S. 1901, the tobacco price-support bill of the 86th Congress; Senate Joint Resolution 162, the "freeze resolution" of the 85th Congress; and H.R. 12, the general farm bill of the 84th Congress—were each followed by subsequent congressional action which resulted in the enactment of important legislation.

In spite of the fact that four of these vetoes were later turned into legislative results, the Democrat leadership has consistently used them as an apology for their own ineptness and failure. Not only was the conservation reserve killed, the agricultural research bill strangled, the FHA bill suffocated, and the payment-in-kind bills buried, but their very own unworkable proposals were rejected by their colleagues in the House.

The House Agriculture Committee reported two bills which were killed by the Rules Committee controlled by the Democrats by an 8 to 4 margin. These bills, which would have raised price supports on all feed grains—except corn—and set up a Brannan plan for hog farmers, never saw the light of floor debate.

In 1958 the House Agriculture Committee put together an omnibus farm bill which was so objectionable that the House refused to even consider it and rejected the rule which would have made debate in order.

This year the Democrat farm leadership fared slightly better. The so-called Poage farm surplus reduction bill was debated on the floor, but 100 House Democrats joined in killing it. This bill was the skeletal remains of the ill-fated family farm income bill which 13 midwestern Democrat Governors urged us all to enact. The original version was so bad that it was not able to clear the House Agriculture Committee until 251 of the original 256 commodities originally included were able to escape its unwanted coverage. The final version which was repudiated by the Democrat-controlled House presented farmers and taxpayers with the bleak prospects of $110 million per year more expenditures on an ineffective wheat program which would have an especially adverse effect upon the Corn Belt; a Brannan-plan direct-payment scheme calling for abdication of congressional responsibility carrying a price tag of at least $600 million per year; and a complete duplication of the food distribution facilities by the Department of Health, Education, and Welfare, costing an additional $500 million per year which was based on a completely unproven theory having no basis in the record.

Rather than face up to their own miserable record, however, these farm-the-farmer politicians spend their time dwelling upon gloomy facts like those concerned with farm credit. The statement is made that farmers' debts are at a record high, above $24 billion. Standing alone this is statistical hogwash which presents only the half-truth. The whole truth is that while total farm debt is now $24.3 billion, the highest on record, it is equally true that farm assets are also at an alltime high of $203.6 billion and owners' equities are likewise at an alltime high of $179.3 billion.

The farm credit record also shows that farm mortgage foreclosures are near the alltime low—less than one out of three farms has a mortgage at all. In addition, farm ownership is at an alltime high.

GOP RECORD IN CONGRESS

I need not remind you that for a good many years Republican Members of the House and Senate have worked long and hard in the interest of rural America. The last Republican Congress, the 83d of 1953 and 1954, was a good example of this worthwhile service. The Pakistan wheat transaction, the strengthening of the Extension Service, the enactment of emergency drought relief legislation, the establishment of the Farm Credit Administration as an independent agency, the Agricultural Act of 1954 including the Wool Act, the establishment of the school, armed services, and veterans milk programs, and the enactment of Public Law 480, all stand as monuments to the effectiveness of a Republican Congress. Under Public Law 480 alone over $10.5 billion worth of surplus farm commodities have been sold to foreign nations for their currencies, bartered for strategic and other materials, or donated to hungry people both at home and overseas.

As the ranking minority member of the Committee on Agriculture during the 86th Congress, along with other Republican members, I supported many beneficial pieces of legislation such as amendments designed to strengthen the Federal Insecticide, Fungicide, and Rodenticide Act, the extension and expansion of the school milk program, the extension of Public Law 480, the extension of the Sugar Act granting President Eisenhower the authority to deal with both Castro and Trujillo, the dairy price support bill, the forestry bill establishing the principle of multiple use and sustained yield on our national forests, the land-grant college bill, and strengthening amendments for the farm credit system.

In addition, we urged the administrative action which resulted in U.S. hog markets being protected from a flood of cheap, foreign government subsidized pork.

A good number of constructive Republican proposals for the benefit of farmers never got to first base. For example, the many payment-in-kind land retirement proposals introduced by midwestern Congressmen never received serious attention even though endorsed by the Department of Agriculture.

THE FUTURE

I agree with the junior Senator from Massachusetts, Mr. KENNEDY, when he said—before the special session—that agriculture is the No. 1 domestic problem today. I submit, however, that it is high time for the political shadowboxing to stop if we are to carry out our responsibilities to this most vital portion of our Nation and our economy. We should move forward with confidence in the ability of our vigorous farm people. We should promote programs which embody the great American ideals of freedom, opportunity, liberty, and individual dignity.

Specifically, we should work on the rural development program, expanded agricultural research, extension and expansion of the conservation reserve, land retirement and soil conservation through payments-in-kind, continuation of the Eisenhower food-for-peace program, and realistic price support programs geared to individual commodities. The time for constructive action is here.

The Republican Social Security Record

EXTENSION OF REMARKS
OF
HON. JOHN W. BYRNES
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. BYRNES of Wisconsin. Mr. Speaker, the Republican Party has a proud record in the development of legislation improving the Nation's social security program.

Since 1953 under the leadership of a Republican administration, and particularly during the years 1953 and 1954 when that administration was supported by a Republican majority in Congress, genuine progress has been achieved in improving the adequacy, equity, and soundness of each of the programs included in the Social Security Act. These programs include the old-age, survivors, and disability insurance program, the public assistance programs of aid to the aged, blind, dependent children, and disabled, and the unemployment insurance program.

The public assistance programs have been improved under Federal-State cooperation to provide more realistically for the citizens to be benefited under the various programs. Cash benefits have risen, medical services have been greatly expanded and improved, and rehabilitation endeavors have been strengthened and encouraged to provide increased opportunity to the individual for self-reliance.

The Federal-State unemployment insurance system has been improved through the extension of coverage to more than 5 million individuals, the strengthening of the program's financing structure, and by the action of every State to increase benefit levels and by 40 States to lengthen the duration of benefit eligibility. With respect to benefit levels and duration, it is significant to note that the States generally have acted to increase benefit levels by 40 percent since January 1953 and potential benefit entitlements by 50 percent since January 1953. These achievements represent real advancement in the improvement of the employment security of our American citizens.

Mr. Speaker, the balance of my remarks will pertain to the accomplishments achieved since 1953 under the

leadership of the Republican Party in improving the old-age, survivors, and disability insurance program of the Social Security Act.

President Eisenhower upon taking office in 1953 described the social security system as the "cornerstone of the Government's programs to promote the economic security of the individual." The deep-rooted interest of the Republican Party in human welfare has been evidenced by the Republican achievements in the area of social security.

The most significant and important improvements in the social security program since the inception of the Act were prepared by the Republican 83d Congress in cooperation with the Republican administration. These improvements included:

First. Coverage extension to 10.2 million additional individuals who were working in occupations previously excluded from the protection of the Act such as farmers, certain farmworkers, most professions, ministers, certain State and local employees, and other miscellaneous groups.

Second. Benefit increases were enacted for the more than 6.5 million people then on the benefit rolls including a 20-percent increase in the minimum benefit. For those retiring in the future a new benefit formula was established resulting in a higher benefit for new beneficiaries.

Third. Retirement test liberalization permitted higher earnings without loss of benefit entitlement and the earnings limitation was made inapplicable at age 72 instead of 75 as under prior law;

Fourth. Five-year dropouts of periods of lowest or no earnings in computing benefit amount resulted in a general upward adjustment of future benefit levels and protected persons who had not previously been covered;

Fifth. Disability protection of eligibility for, and levels of, benefits through the so-called wage freeze preserved the benefit rights of persons sustaining a total extended disability;

Sixth. Financing adjustments were made to maintain the actuarial soundness of the program.

These highlights are only a few of the many meritorious improvements in the social security program prepared by the Republican 83d Congress. As I have indicated these changes constituted the most far-reaching improvements ever enacted in the history of the program.

Further changes of a more modest nature were made in the OASDI title of the Social Security Act by the amendments of 1956 and 1958. The principal changes can be summarized, as follows:

The 1956 amendments: First, disability benefits payable to totally and permanently disabled workers aged 50 and over and for certain disabled children; second, coverage was extended to an additional 250,000 individuals; and, third, tax schedule was adjusted to defray the added cost of the liberalizations.

The 1958 amendments: First, benefit levels were increased for present and future beneficiaries; second, maximum monthly family benefit increased from $200 to $254; third, benefits provided for dependents of disabled beneficiaries; fourth, retirement test changed to prevent loss of benefit for any month in which beneficiary earned $100 or less rather than $80 or less as under previous law; and, fifth, financing adjustments were made to defray the added cost of the changes.

Mr. Speaker, these changes received the overwhelming support of the membership in the Congress. However, it is appropriate to say that as these proposals were enacted into law the nucleus of support for the legislation came from the Republican Party, and in large measure the changes were the result of recommendations by the Department of Health, Education, and Welfare. In making this observation I stress the fact that I am commenting on the legislation as enacted into law. This nucleus of Republican support also existed with respect to the 1960 amendments. I will comment on these amendments at this time.

Mr. Speaker, the 1960 amendments to the OASDI title made a number of changes in the coverage provisions, revised the benefit eligibility qualifications, liberalized the retirement test, and made certain revisions in the financial structure of the program.

The development of these changes to title II of the Social Security Act had its beginning with able work done by a subcommittee of the Committee on Ways and Means in the fall of 1959 through an inquiry into the administration of the Social Security Act. This project was aided by the full cooperation of the officials and staff of the Department of Health, Education, and Welfare, who recommended many of the legislative changes included in the bill.

The specific changes made in the OASDI title by the 1960 amendments can be highlighted, as follows:

First. Disability insurance benefits are payable to disabled workers under age 50 and their dependents on the same basis as benefits are now provided with respect to disabled workers age 50 to 64. It is estimated approximately 125,000 additional disabled workers, plus their dependents, will qualify for benefits under this change beginning with the month of November.

Second. Disability rehabilitation is strengthened by providing a benefit-paid 12-month trial work period for disabled beneficiaries without the previously existing limitation that such trial work must be done under a formal Federal-State vocational rehabilitation plan. Also a disabled worker who returns to work and again becomes disabled within 5 years would not be required to meet a 6-month waiting period before resumption of benefits.

Third. Coverage extension is made to an additional 180,000 persons. The occupational groups include family employment—e.g., a parent by a son or daughter under certain circumstances—additional employees of nonprofit organizations by eliminating the requirement of two-thirds concurrence by employees concerned, additional ministers by extending the time for a coverage election to April 15, 1962, and other miscellaneous groups.

Fourth. Retirement test is liberalized by providing that earnings above the ceiling of $1,200 annually up to a $1,500 level will result in a reduction of benefits on the basis of $1 in benefits for every $2 earned. Earnings above $1,500 will result in a $1 benefit loss for each $1 earned. Under previous law a month's benefit was lost for each $80 of earnings above $1,200 a year. The result of this change is that a beneficiary earning above $1,200 will always have more in benefits and earnings than if he limited his earnings to $1,200.

Fifth. Eligibility requirements are modified so a person can become eligible for benefits by having 1 quarter of covered work in every 3 quarters elapsing after 1950 or the year he attained 21 whichever is later and before the year he becomes eligible for benefits. The previous requirement was 1 quarter of work in every 2 elapsed quarters. The present minimum requirement of 6 quarters and the maximum requirement of 40 quarters are retained. It is estimated that 400,000 individuals will be eligible for benefits under this change, including 250,000 aged.

Sixth. Child's benefit computation is liberalized so that 400,000 children will receive increased benefits. In addition a child's benefit will be available to a child of a disabled worker where the child is born after the disability or becomes a stepchild of the worker after disability occurs. A child's benefit based on his father's earnings will be payable even though the child is being supported by a stepfather.

Seventh. Benefit entitlement for dependents based on a primary insured individual's wage record is changed in many respects so as to facilitate benefit eligibility for spouses, children, and other dependents.

Eighth. Financing of the OASDI program has been changed with respect to return on trust fund investment so that interest earnings on new investment of funds will approximate the rate of return paid to open market purchasers of Government securities.

Mr. Speaker, for the most part the 1960 OASDI changes will tend to improve the equity of the program and simplify the law. The changes were not sweeping in scope but they were important and meritorious to the people affected by them. It is also significant to note that these changes were accomplished without an increase in the contributions schedule. I will have more to say about the contributions schedule later in my remarks.

Under the leadership of the Republican Party, the social security system has become a program of the people. Virtual universality of coverage has been accomplished so that 9 out of 10 jobs are covered; the system's tax and benefit schedules now have tremendous significance for our economy; the security of our citizens in important part now rests in the maintenance of a financially and actuarially sound system to provide protection at the time of retirement or survivorship.

Let us now look to see how the changes in social security taking effect under the

Republican Party in the last 8 years have improved the program.

The growth in the OASDI program during the last 8 years is indicated by the fact that its coverage has been extended to approximately 12 million additional jobs including farmers and many other occupational groups; disability benefits and liberalized survivors' benefits are provided; a lower retirement age for women to age 62 is established; and two upward adjustments in the benefit level have occurred. I would point out to you that these increases in benefit amounts were accomplished under a Republican administration that maintained a relatively stable cost of living so that from 1953 through 1959 the annual average increase in the cost of living was 1.5 percent compared with an annual average increase in the Roosevelt-Truman years of 1939 through 1952 of 7 percent.

The development of the program is also indicated by the cold statistical facts of the growth in the number of beneficiaries and benefit disbursements. During the fiscal year 1952 OASI disbursements were $2 billion whereas for fiscal year 1960 the OASDI disbursements were $10.8 billion. The number of monthly beneficiaries in June 1952 was 4.6 million whereas in June 1960 it was 14.3 million. The average benefit for a retired worker was $42 a month in June 1952 and in June 1960 it was $74 per month. The corresponding monthly figures for a retired worker and his wife are $68 for 1952 and $124 for 1960.

The widowed mother with two dependent children in 1952 received an average check of $107 per month whereas today the average amount approximates $160 per month. We have gone from 50 million individuals working in occupations protected under the OASDI system to almost 60 million individuals. In 1952 80 percent of our total paid employment was covered by OASDI and today the percentage is over 90 percent.

That is the record of accomplishment by Republican leadership in the area of social security. It is a record of leadership that has found Republican campaign promises matched by Republican performance. It is a record of leadership that has shunned the cruel course of promising appealing but unattainable liberalizations in our social-security law in a selfish quest for votes. In short, Republican leadership has outperformed but has not tried to outpromise anyone in regard to social-security improvements.

Against that backdrop of responsible Republican leadership in improving the adequacy, equity, and soundness of the social security system, let us now look to the future.

In terms of Republican Party principle in the area of human needs the 1960 Republican platform states:

> The ultimate objective of our free society and of an ever-growing economy is to enable the individual to pursue a life of dignity and to develop his own capacities to his maximum potential.

In this context our 1960 Republican platform pledges our party first, to improve the adequacy of the social security program on a basis that maintains the fiscal integrity of the system; second, to improve Federal-State programs providing better health care and greater security to our aged; third, to promote programs enhancing the economic opportunities of the aged so that their wisdom, skill, and experience may be put to productive use; and fourth, to give prompt consideration to the recommendations of the White House Conference on Aging called by the President for January 1961.

In summary, the Republican objective—the Republican position—with respect to social security has been and is a dedication to the principle that our aged and other citizens should have the right of self-determination in an environment of maximum individual opportunity without compulsory subservience to Government bureaucracy and without fear of loss of self-respect.

By contrast the Democratic platform for 1960 asserts that "the Democratic administration will end the neglect of our older citizens." The Democratic platform then devotes more than two full pages to promises of massive Government bounty with little or no recognition of the rights of the individual to self-determination and to self-respect.

As Republicans we pledge ourselves to the support of any meaningful effort to strengthen and improve the OASDI system which is soundly financed and which is not unfair to any group.

Mr. Speaker, I would at this time direct my remarks to a few pertinent observations relative to the actuarial status of the OASDI program and its financial structure.

The actuarial status of the OASDI trust funds is vital to the welfare of our people. It is the solemn responsibility of the Congress and Government officials connected with the administration of the OASDI program to safeguard the system against insolvency. Only in this way can the reliance on the system by the American people—whether they be current beneficiaries or future beneficiaries—be justified. The combined balances in the OASDI trust funds currently approximate in excess of $22 billion. When it is considered that annual payments out of the funds in calendar year 1960 are estimated to exceed $11.5 billion, it is apparent that the funds contain a total principal sufficient only to pay benefits for 2 years in the absence of continued fund income. This is not a great margin of surplus and demonstrates the reliance of the system on current income and the existing tax schedule for current solvency. The actuarial tables on which these observations are based are included as a part of my remarks as table I and table II:

TABLE I.—*Progress of old-age and survivors insurance trust fund under 1960 act, high-employment assumptions, intermediate cost estimate at 3.02 percent interest* [1]

[In millions]

Calendar year	Contributions	Benefit payments	Administrative expenses	Railroad retirement financial interchange [2]	Interest on fund [1]	Balance in fund [3]
	Actual data					
1951	$3,367	$1,885	$81	----------	$417	$15,540
1952	3,819	2,194	88	----------	365	17,442
1953	3,945	3,006	88	----------	414	18,707
1954	5,163	3,670	92	----------	468	20,576
1955	5,713	4,968	119	----------	461	21,663
1956	6,172	5,715	132	----------	531	22,519
1957	6,825	7,347	[4] 162	----------	557	22,393
1958	7,566	8,327	[4] 194	−$121	549	21,864
1959	8,052	9,842	184	−275	525	20,141
	Estimated data (short-range estimate)					
1960	$10,747	$10,726	$205	−$308	$503	$20,152
1961	11,486	11,658	227	−270	520	20,003
1962	11,790	12,326	221	−250	530	19,526
1963	13,882	12,913	223	−270	558	20,560
1964	14,609	13,424	225	−265	620	21,875
1965	14,925	13,880	229	−250	694	23,135
	Estimated data (long-range estimate)					
1970	$20,006	$16,132	$245	−$160	$1,289	$41,270
1975	21,673	19,044	260	−91	1,846	63,305
1980	23,327	22,092	270	1	2,377	81,581
2000	31,477	30,704	356	86	4,101	140,161
2020	38,291	42,127	456	86	7,779	263,268

[1] An interest rate of 3.02 percent is used in determining the level-premium costs, but in developing the progress of the trust fund a varying rate in the early years has been used, which is equivalent to such fixed rate.

[2] A positive figure indicates payment to the trust fund from the railroad retirement account, and a negative figure indicates the reverse. Interest payment adjustments between the 2 systems are included in the "interest" column.

[3] Not including amounts in the railroad retirement account to the credit of the old-age and survivors insurance trust fund. In millions of dollars, these amounted to $377 for 1953, $284 for 1954, $163 for 1955, $60 for 1956, and nothing for 1957 and thereafter.

[4] These figures are artificially high because of the method of reimbursements between this trust fund and the disability insurance trust fund (and, likewise, the figure for 1959 is too low).

NOTE.—Contributions include reimbursement for additional cost of noncontributory credit for military service.

TABLE II.—*Progress of disability insurance trust fund under 1960 act, high-employment assumptions, intermediate-cost estimate at 3.02 percent interest*

[In millions]

Calendar year	Contributions	Benefit payments	Administrative expenses	Interest on fund [1]	Balance in fund
	Actual data				
1957	$702	$57	[2] $3	$7	$649
1958	966	249	[2] 12	25	1,379
1959	891	457	50	41	1,825
	Estimated data (short-range estimate)				
1960	$1,012	$570	$44	$53	$2,276
1961	1,040	802	52	65	2,527
1962	1,066	864	51	76	2,754
1963	1,092	924	53	88	2,957
1964	1,126	978	55	98	3,148
1965	1,154	1,029	57	107	3,323
	Estimated data (long-range estimate)				
1970	$1,177	$1,229	$53	$111	$3,354
1975	1,275	1,401	58	95	3,108
1980	1,372	1,550	62	75	2,438
2000	1,852	2,048	80	[3]	[3]
2020	2,252	2,701	103	[3]	[3]

[1] An interest rate of 3.02 percent is used in determining the level-premium costs, but in developing the progress of the trust fund a varying rate in the early years has been used, which is equivalent to such fixed rate.

[2] These figures are artificially low because of the method of reimbursements between the trust fund and the old-age and survivors insurance trust fund (and, likewise, the figure for 1959 is too high).

[3] Fund exhausted in 1993.

NOTE.—Contributions include reimbursement for additional cost of noncontributory credit for military service and transfers to or from the railroad retirement account under the financial interchange provisions of the Railroad Retirement Act.

The existing tax schedule without any upward adjustment to defray the cost of any future liberalization that may be enacted provides for the combined employer-employee tax to reach 9 percent by January 1, 1969, and the tax on the self-employed will be 6¾ percent. The tax is applicable to the first $4,800 of earned income without allowance for personal exemptions or deductions. I will include the tax schedule provided under existing law as table III.

Application of the following tax schedule to a typical family situation produces the following result: Assume a wage earner with $4,800 of income in the year 1969 who is married with two dependent children. Under existing tax rates his income tax liability will be $389 and the combined employer-employee social security tax will be $432. The self-employed person under similar circumstances will pay the same income tax of $389 and a social security tax of $324. Thus, under existing tax schedules our citizens in 1969 will be paying approximately as much for social security as they pay for all other Federal Government functions, including national security.

It is important, therefore, that future changes in the OASDI program must be evaluated with the greatest of care. It is only in this way that the best interests of the social security system and the American people can be served.

TABLE III.—*OASDI financing*

Item	Present law
C. Maximum taxable amount	$4,800 a year.
D. Tax rate for self-employed	Taxable years beginning after— Percent 1959 — 4½ 1962 — 5¼ 1965 — 6 1968 — 6¾
E. Tax rate for employees and employers	Calendar years: 1960–62 — 3 1963–65 — 3½ 1966–68 — 4 1969 and after — 4½

Future liberalizations that add any significant increase in cost will inevitably require an increase in taxes over and above those tax rates presently provided if the system is to be actuarially sound. It is important that the Congress avoid any action that would cause the system to lose public acceptance through the addition of items of cost without careful study of the benefits resulting therefrom. This point was ably pointed up by the remarks of the distinguished chairman of the Committee on Ways and Means, the gentleman from Arkansas [Mr. MILLS], at the time the House was considering the Social Security Amendments of 1960. Chairman MILLS then said in part, as follows:

Whatever we do we must ever keep firm in our minds the requirement that there must be revenue in the fund in time and over a period of years to pay for those benefits that we think our people are entitled to receive * * * we are not discussing small matters when we discuss amendments to the Social Security Act; we are discussing terrifically large matters because of their application to so many people, and because of the great number of important policies that are involved in carrying out this program. * * * I think when this scheduled tax is fully effective in 1969 we are going to find that there is unwillingness on the part of a great number of people to see this tax go higher * * * what I am trying to say is that we must not carry this program beyond the point of willingness on the part of the American people to support it.

I associate myself with these remarks of my esteemed chairman and colleague. I might add that there has been no Member of Congress who has worked more diligently and responsibly to improve the social security system for the benefit of all the people than has Chairman MILLS.

Mr. Speaker, the Republican record on social security demonstrates the fundamental belief of our party in the worth and dignity of the individual. Under Republican leadership the social security program has progressed to provide meaningful protection to our aged and to dependent survivors in terms of a secure basic income. The Republican Party stands for the fiscal and actuarial soundness of our social security system. Within the framework of a sound system we promise continued diligence in our endeavors to improve the program so that it more adequately meets the needs of our people. Such is the responsible record of past performance and future promise of Republican leadership in regard to social security.

Duty-Free Importations Into the United States

EXTENSION OF REMARKS

OF

HON. EUGENE J. McCARTHY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. McCARTHY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by me on the tendency of some companies to use the duty-free import statute for our insular possessions as a means of avoiding higher rates of duties.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MCCARTHY

I am sorry that in the closing days of the Congress there was insufficient time to act on a matter which, it seems to me, merits prompt legislation. I refer to the fact that in recent months there has been a growing tendency for companies to establish themselves in U.S. insular possessions on a basis that results in their escaping the proper payment of duty on products they wish to import into the United States.

Section 301 of the Tariff Act of 1930, as amended, was intended to promote the development of employment opportunities in our insular possessions, in the hope that they would be able to raise their standards of living. This section permits the duty-free importation into the United States of articles produced in the islands, provided that the foreign materials utilized in these articles is less than one-half their total value.

While the objectives of this section are most worth while, in practice it has developed into a potentially dangerous loophole. This is because many foreign products which carry a high rate of duty can be shipped into the insular possessions in a subassembled condition; assembled in the islands with a negligible amount of effort; and then automatically qualify for duty-free importation into the United States.

The key to the situation is the method of computing the total value of such articles imported into this country. Under the present statute, the total value is computed in such a way that for articles bearing a high rate of duty, the total value is almost certain to be more than double the cost of the foreign subassemblies imported into the possession, even though there has been little or no value added there, and consequently little benefit to the economy of the U.S. insular possession.

In brief, section 301 has become an avenue for the avoidance of very substantial amounts of duty in certain industries, while failing in these cases to achieve its objective of stimulating employment and investment in the islands.

I understand that the situation has intensified in recent months as concerns producing high-duty articles, such as watches, have started operations in the Virgin Islands. The entire U.S. watch industry, do-

mestic producers as well as legitimate importers, oppose this development as an improper use of the Virgin Islands preference.

While I do not favor the high rates of duty which such industries are now forced to pay, there is no doubt in my mind that it is totally improper and unfair to permit such duty avoidance by their competitors' misuse of the Virgin Islands preference. Continuation of such practices will merely serve to upset more responsible elements in such cases as the watch industry and will, of course, lead to very substantial revenue losses by our Government.

The Treasury Department has recognized the loophole in section 301 and has urged corrective legislation. While time did not permit congressional action in the 86th Congress, I sincerely trust that the Congress will give this matter its prompt attention in January.

Congressman Ludwig Teller Reports to His Constituents

EXTENSION OF REMARKS
OF
HON. LUDWIG TELLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. TELLER. Mr. Speaker, almost 4 years ago, in early January of 1957, I presented myself at the bar of the House of Representatives of the Congress of the United States, to take the oath of office of the position to which the voters of my district had paid me the honor of electing me. The following 4 years—because I was reelected in 1959—may not turn out to be the best years of my life; I will have to live longer to answer that question. But, up to date, I have never experienced anything in any way comparable to my service for 6 years as a member of the New York State Legislature and in the past four sessions as a Member of the Congress for the 20th Congressional District on Manhattan's West Side.

The sense of responsibility evoked can be appreciated only by the fortunate few who have been Members of the Senate or of the House. The subjects of legislation with which we have dealt are fascinatingly interesting. The continual contact with my constituents in the full-time district office which I have maintained in New York—not just those who voted for me but citizens of all parties in my district whom I represent regardless of political affiliation—has been a deeply enriching experience. The acquaintanceship with my fellow Members in Congress from all parts of this country has taught me to appreciate the breadth and the wealth of the United States, and the complex character of its problems.

On the opening day of my first session in January 1957 that wise elder statesman, Speaker of the House SAM RAYBURN, expressed my feelings of today. After his many years of service in the Congress he stated his own conclusions, as follows:

This is the highest theater that anyone plays in upon this earth today. I must refer again to the tremendous and at times appalling responsibility that falls upon the shoulders of each and every one of us. We must so act in the days to come that we will merit the confidence and the faith not only of our own people but of the people of the whole world, because your country and mine has been challenged to take the leadership of the free world. If we do not with courage and judgment accept that leadership, then the world will be a place in which good men and women will be unhappy.

The simple, honest, sincerity of this admonition was deeply impressive at the time and I believe that, underlying all the often sharp differences of opinion and judgment which have made the headlines during the past 4 years, my fellow Members and I have agreed with the Speaker's conception of the nature of our responsibility, and that we have tried to base our action on it.

The special postconvention session of the 86th Congress, which recently concluded its work, was extremely disappointing. Efforts were unsuccessful to increase the national minimum wage and extend the Federal minimum wage law to millions of workers not now covered. The Congress also failed to pass the much-needed bill which provides medical insurance for our senior citizens. The critical housing shortage and the need for urban renewal was left unremedied. And Federal assistance for local school construction and raising teachers' salaries failed of enactment. My bill for an enlightened immigration law also failed to pass, but it seems clear to me that we must, if our status as the leader in the free world is to be maintained, completely revise our immigration statute—the McCarran-Walter Act—so as to admit worthwhile persons who are now denied entry into this country because of discriminating quota systems. Our present immigration policy should also be revised to abolish its arbitrary provisions which discriminate between native born and naturalized citizens.

In 1957 and 1958 and 1959, at the end of each session of the Congress, I distributed to all my constituents a brief evaluation of our work—both the accomplishments and the shortcomings. Today, I want to take a longer look. Instead of telling you simply of the highlights of the 1960 session I want to go back over the past 4 years and pick out what might in larger perspective be called the high highlights. A little perspective—even the distance achieved during the brief period of the sessions of two Congresses—modifies and corrects some of the more immediate judgments. I cannot, to be sure, range in order of importance all the legislation which we enacted during this period. Only history can do this, if even history can. But certain of our actions appear to warrant an "outstanding" rating, and these I wish to recall to you.

In the 1957 session I believe that every one would agree that the Civil Rights Act was the most important legislative action. This was the first major legislation on the subject in the 80 years since the Reconstruction period following the Civil War. Far from satisfying those—of whom I count myself one—who wanted much stronger guarantees of civil rights, this compromise measure nevertheless marked a substantial advance. The act created a Federal Civil Rights Commission and a special Civil Rights Division within the Department of Justice, and it gave formidable new powers to the Federal Government to protect a basic civil right, the right to vote.

This kind of legislation was so new and so difficult to formulate to meet the existing conditions that the Congress found it necessary during the past session to amend it very considerably. Under the 1960 law, Federal courts, through appointed referees, are authorized to safeguard voting rights; penalties are established for obstruction of court orders and for flight to avoid prosecution for vandalism; Federal election records must be preserved for 22 months; and the availability of funds is authorized for the education of servicemen's children in areas where schools are closed by integration disputes. It is my hope that later Congresses will amplify and amend the laws of 1957 and 1960 to further protect voting rights, and to add the sanction of the Federal Government to guarantees of other civil rights. In the past 4 years we have made a good start, and we must continue resolutely. The American people will not, I am certain, tolerate any more 80-year delays in protecting for all its citizens those civil rights which constitute an essential part of our democratic form of government.

For many years it appeared that the 48 States constituting the United States of America were to be the total membership. Suddenly, we have added Alaska and Hawaii—both outside the continental boundaries which seemed to be unchangeable. The excitement of welcoming our new members has spread all over the country and, I believe, has given us a new appreciation of the meaning of our Nation. The U.S.S.R. has added many a country to her fold, but the contrast in her methods and in the reactions of the peoples of those countries only emphasizes the significance of our action. The Alaskans and Hawaiians sought American statehood as a high privilege and they are proud that it has been conferred upon them. The older States have welcomed them wholeheartedly, realizing full well the values of membership in our democratic Union.

INTERNATIONAL AFFAIRS

The Congress has enacted so much important legislation in the field of international affairs in the past 4 years that it is almost impossible to determine what has been most significant. Probably the total effect, rather than the impact of any one measure, is noteworthy.

In 1957, almost immediately after the session opened, the President asked the Congress to support him in an unusual action—a joint Executive-congressional proclamation pledging the United States to use its military force if necessary to keep peace in the Middle East where a serious crisis had arisen. He also asked for authority to expend foreign aid funds for special projects in this area. The proposal involved an important constitutional question—whether Congress needed to authorize the President to act in the field of foreign affairs. A long

debate preceded the final decision. Congress agreed only to proclaim that the United States was prepared to act militarily if the President should deem it necessary, thus, by implication, placing the responsibility on the President alone. The request for special authority to use foreign aid funds was agreed to by Congress. This year I am proud to have cosponsored an amendment to the foreign-aid program denying further foreign aid to Nasser so long as he remains in defiance of the United Nations Resolution commanding free international access to the Suez Canal. This amendment was enacted into law. It is in line with our traditions of free international trade, and if properly implemented may help to bring peace in the Middle East.

In 1957 the United States ratified the statute of the International Atomic Energy Agency, thus implementing the 1953 atoms-for-peace program. Every year the Congress appropriates millions of dollars to carry out the work of the Atomic Energy Commission, much of which is accomplished in cooperation with friendly foreign nations. The Congress honored me in 1958 when it appointed me a delegate to the Second International Conference on the Peaceful Uses of Atomic Energy, held in Geneva, Switzerland. Here scientists from all over the world assembled, and I had an opportunity to observe at first hand, and to report my findings to the Congress, the incredible possibilities for the good of human beings which exist in the peaceful exploitation of the mysterious world of atomic energy.

In 1958 the Reciprocal Trade Agreements Act was extended for 4 years, a victory for liberal trade forces. This action strengthened and extended the President's authority to make agreements with other countries for the mutual reduction of tariffs.

In 1959 the Congress authorized a $50 million a year plan to improve health conditions through international cooperation in research, training, and planning. The Senate ratified an extension of the 10-year old International Wheat Agreement for another 3 years to July 31, 1962. Our subscriptions to the World Bank and International Monetary Fund were increased by considerable amounts. Congress provided for U.S. membership in the Inter-American Development Bank to aid in the economic development of Latin American countries. The 1959 session thus gave proof of American concern with world affairs and our desire to work cooperatively with other nations.

The 1960 record is also encouraging. This year, in the last days of the session, Congress authorized $500 million for assistance in the development of Latin America and $100 million for aid in the reconstruction of earthquake-devastated Chile. We authorized American participation in parliamentary conferences with Mexico.

While, therefore, the Congress has made progress in our long-neglected responsibilities toward our Latin American neighbors, we still lack an integrated single policy. The many small policies and the several agencies moving in different directions overlap and are wasteful and lack overall unity. Accordingly, in a speech which I delivered in the Congress on Wednesday, August 26, this year, I proposed a Marshall-type plan for Latin America. The Marshall plan saved Europe from communism. A similar plan can, in our own interests, do the same thing for our stanch friends and neighbors in Latin America by helping to develop industrial plants and agricultural efficiency to relieve the people of shockingly high unemployment and, for most of the people in Latin America, near starvation.

The last subject in the area of international affairs should, possibly, have been placed at the head of the list. Every year the Congress gives the most serious consideration to the great mutual security program, preliminary to making the annual appropriations for its operation. To describe the long debates, the differences of opinion between the advocates and the opponents of various phases of the program and of its increasing costs, and the interrelationships between the Republican executive branch which must administer the program and the Democratic Congress which must furnish the funds, this fascinating history is far too long to recount in my brief review. But the program advances and the Congress continues its strong support.

Realistically speaking, the congressional actions which I have been discussing under the heading of "International Affairs" might well be classified as "defense measures," since they most certainly are designed to strengthen our position in the world through improved relations with other countries. But the Congress has not neglected defense in the conventional sense of the term. A most important law, providing for a complete reorganization of the Department of Defense, was enacted in 1958.

It is a well-known fact that Congress has increasingly taken the position that the administration's defense policies are inadequate to secure our safety against the Soviet threat. This was strikingly illustrated during the 1960 session. We appropriated for fiscal 1961 about $660 million more for defense purposes than the President had requested. The additional amount was for such items as increased production of missile-firing Polaris submarines, accelerated development of the B–70 high-altitude bomber and the Samos reconnaissance satellite, preparations for a continuous airborne alert of bombers, and improvement of troop-carrying airlift equipment. The President, of course, has complete authority to spend, or not to spend, these funds, but the intent of Congress that they should be used was clearly expressed.

I wish to call particular attention to congressional interest in the field of space science and investigation—a function undreamed of only a few years ago. In 1958 we created a new Federal agency, the National Aeronautics and Space Administration—usually called NASA—to devise and administer nonmilitary programs for the development and exploration of outer space. The work of the new agency has expanded very rapidly, and has attracted wide public interest and approval. Congress scrutinized its record very carefully in 1959 and 1960, preliminary to appropriating the increasingly large amounts of money needed for space research and development.

Two other civilian programs with important relationships to national security should be noted. Congress continues to give strong support to the work of the Atomic Energy Commission. In 1958 Congress created an independent Federal Aviation Agency, with authority over the Nation's airways which had previously been exercised by subordinate agencies within the major executive departments.

I have spent so much time on international relations and defense matters that I may have created the impression that the Congress is little concerned with domestic matters, which, of course, is very far from the truth. Every year we deal with important legislation relating to agriculture, the general economy, labor, public welfare, and natural resources. These are laws which affect the individual citizen more directly than do legislation relating to international relations and defense, and they are less difficult for him to understand. No one would claim, however, particularly in view of the present international situation, that they are more important to him. Perhaps I can briefly recall to you some of our major accomplishments to refresh your memory.

AGRICULTURE

The major problem during the past 4 years has been the imposition of price supports for basic farm commodities—a very complex matter which has not been settled to anyone's satisfaction. The New York Times on September 2, 1960, in reviewing the work of the recently concluded session stated that "the stalemate between the Eisenhower administration and the congressional Democrats over farm policy continued this session, without even the usual gesture of sending a price-support bill to the White House to be vetoed." I wish that I could say that this was incorrect or unduly pessimistic, but I cannot. One of the least satisfactory records of the Congress during my term of membership is in the area of agricultural legislation. Even though I represent an urban district I realize only too well that this is a matter of serious concern to city dwellers, not merely to farmers, and I sincerely hope that the new Congress assembling next January under new administration leadership will be able to arrive at some solution. There is an additional problem I should like to mention—the fact that the cost of food at the grocery and vegetable and butcher shops has been steadily increasing for the American housewife, but the American farmer has been getting less and less each year for his farm products. I have called for a congressional investigation of this strange situation. I believe the Congress has a duty to get at the bottom of it, and to adopt measures which will remedy it.

LABOR-MANAGEMENT

In 1958, I was gratified that my bill to compel disclosure of private welfare benefit and pension plans was enacted into law. Congress recognized that the mil-

lions of beneficiaries of these plans had been kept in the dark as to their financial operations, and the new law provides for publicity which is in the general interest. I was naturally gratified over my appointment, while still a freshman, as chairman of a special committee of the Congress on Welfare and Pension Plans. The Teller Welfare and Pension Plans Disclosure Act, which the AFL–CIO referred to as the greatest victory over big banking and insurance lobbies in 60 years, was the product of this special committee. I hope to have a hand in improving this law in light of the facts disclosed as a result of the Teller law, which is a beginning in what I hope will become a vehicle for protecting working people in their vested rights under welfare and pension plans.

Billions of dollars of pension and welfare trust funds exist in this country as a result of collective bargaining. Some of these trust funds are administered solely by unions, others established after the passage of the Taft-Hartley Act are jointly administered by employers and unions. The investment of these funds in common stocks of American corporations may have vast repercussions in the way in which management is exercised, particularly if the investors decide to exercise a participating hand in the operation of the business. Union efforts to participate in management may be intensified by increased automation and its effects on employment.

Accordingly, at the request of our House Committee on Education of which I am a member, I have been engaged in a study of existing plans and practices by which unions participate in business management. My study, which has continued this year, led me to examine existing plans and practices in this important field in Great Britain, Germany, and France, and an adequate and well-rounded study will have to examine the situation in Italy where union-management cooperative plans have reached a high point; also in Spain, where we have little specific information available in this country but where these plans are alleged to exist. On Tuesday, February 2 of this year, I made a report to the Congress on my findings in this field of worker participation in business management.

One of the antirecession measures of the 1958 session provided for supplementary unemployment compensation to jobless workers, by granting to the States repayable Federal advances if they would agree to continue benefits to jobless workers who had exhausted their rights under the Federal-State unemployment system. Extra payments ranging to $45 a week for a maximum of 13 weeks were authorized. I was naturally disappointed that my more comprehensive bill on the subject was not passed; we have far to go toward adequately protecting our people against the consequences of unemployment, particularly in time of recession.

In 1959 Congress passed a stiff law dealing with corruption in the union-management field. Some provisions of the act also cut down traditional economic pressures by labor unions. Attempts in the 1960 session to amend these provisions were unsuccessful. As a member of the Subcommittee on Union-Management Relations I was preoccupied for months, spending days and nights often without surcease, in the drafting of this law. My bill aimed at racketeering and corruption—H.R. 7811—was defeated, and the Landrum-Griffin bill prevailed, but to my gratification about 100 amendments from my bill were accepted by Landrum-Griffin because they were convinced that, whatever our political differences, the complicated realities of union-management relations ought to be taken heed of.

In 1960, after prolonged effort to pass an act liberalizing the wage-hour law by increasing the minimum wage rate and extending coverage to several million more workers, failure was conceded and the leaders decided that it would be better to try again in 1961 under a new and fresh political climate, rather than to accept such a weak measure as the only one which it would have been possible to enact.

THE NATIONAL ECONOMY

During the past 4 years the state of the national economy has furnished the background of a vast number of congressional actions. In my reports for 1957, 1958, and 1959 I dealt with the subject at more length than will be possible in the present report, which must of necessity note only a few major enactments.

The Federal Aid Highway Act of 1958 authorized a greatly accelerated program of assistance to the federally aided highway program and provided $1.8 billion of new funds for immediate expansion. This furnished needed aid to highway transportation, and acted also as an antirecession measure. During each session Congress has continued its support.

In 1958 Congress gave the Small Business Administration permanent status, a real victory for public and private forces seeking to assist small business. In the same year we passed the Small Business Investment Act, providing for loans to State and federally chartered small business investment companies.

In 1959 a new Federal program was inaugurated, with an initial authorization of $389,500,000 in loans and grants for industrial redevelopment in economically depressed areas. A measure on the same subject, passed by both Houses in 1958, had been vetoed by the President, and in 1960 he vetoed another measure. The three measures differed in many respects but their common worthwhile purpose was to aid the national economy through assistance to those areas of the country in which unemployment is excessive and the economy is suffering from lack of funds to develop its resources.

HOUSING

Legislation dealing with housing can be considered, with equally good reason as being in the interest of the general economy or in the interest of the individual homeowner or renter. The large amounts of Federal aid to housing have certainly benefited the construction industry which constitutes a major sector of the national economy. I shall review briefly the principal legislation of the past 4 years without attempting to explain the complex background of clashing forces which determined the content of these acts. That is altogether too long and difficult a story to recount in a paragraph or two.

In 1957, Public Law 104 liberalized several existing programs; lowered the minimum downpayment required to purchase a house with an FHA-insured mortgage and provided additional funds for buying home mortgages from banks and other private lenders.

In 1958 an emergency housing law sought to encourage a substantial increase in new housing units, chiefly through expanding existing programs. An omnibus bill in 1959 provided for a $1.375 billion housing program emphasizing low-cost housing, college housing, urban renewal, and a more realistic program for housing for the elderly. One hundred million dollars was provided for direct Federal loans to veterans in rural and small urban areas. In the past session we extended the life of the home repair and improvement program and lifted the ceiling on FHA insurance; increased the revolving fund for college housing loans and the revolving fund for community facility loans. This is a good record considered on its face, but to a large group in and out of Congress, of which I count myself one, it falls far short of what should have been done.

The Eisenhower administration has failed to take account of the national housing crisis. Witness Eisenhower's repeated veto of fairly modest housing bills passed by the Congress. It is my hope that the 1961 session of the Congress will be able to come to grips with the problem. Here are some of the dimensions of the problem:

First. The title I scandal, and the use of urban renewal funds for profiteering.

Second. Adequate funds for housing, including guarantees that Federal funds will be used for a balanced program for low- and middle-income housing.

Third. Adequate assurances that decent relocation practices and adequate compensation policies will be followed for tenants who are compelled to move because of title I urban renewal practices.

Fourth. Protection of small businesses when title I urban renewal programs are adopted. I have proposed the establishment of a Federal commission to examine into the adequacy of compensation on condemning properties for needed housing developments. But in addition it will be necessary to afford to small businesses the opportunity to reestablish themselves at the site where the development takes place.

SOCIAL WELFARE; EDUCATION

As a member of the House Committee on Education and Labor, I have had the opportunity to deal at firsthand with an aspect of social welfare in which I have a great interest—education. This is not easy legislation to formulate because of many conflicts. One of them has to do with Federal versus State control of education, a somewhat fictitious issue since not a single effort has been made in the Federal-aid bills to control local education. Another deals with the problem of school segregation; any Federal school

aid bill would violate our traditions and aspirations if it permitted Federal funds to be used for building segregated schools. A third has to do with the grant of funds for private or parochial schools, but the difficulty of working out machinery for guaranteeing long-term bonds led to abatement of the demand for Federal funds in this area.

It is undeniable that the Nation as a whole must have an educational system which is adequate to the increasingly pressing need for a well-educated citizenry. At the same time we are firmly committed to our traditional belief that provision of educational opportunity is, and must continue to be, within the control of our State and local governments. The problem is to insure that both policies are fully supported.

After failure in 1957 to enact a law providing Federal aid, in 1958 we were able to get agreement on the National Defense Education Act, setting up a 7-year $1 billion program of Federal loans and grants to students and schools to enable needy students to obtain an education. The National Defense Education Act is a milestone because it is the first Federal law of general application in the field of education and emphasizes the national character of our responsibility in this important field.

In 1959 Congress authorized grants up to $1 million to each State to purchase television facilities and equipment, upon the State's agreement to provide land and buildings, to operate and maintain an education channel. Our House Committee on Education and Labor this year approved two bills for consideration of the Congress; one was a straight school construction bill, the other provided Federal aid not only for school construction but for raising teachers' salaries. I cosponsored both of these bills and participated in drafting them. After working throughout the 1960 session, the Congress was unable to agree on proposed legislation for Federal aid to public schools. Compromises were made to suit the administration and southern Members but even these concessions were not sufficient and the bill died at the end of the session. The problem will not solve itself, however, and the next administration and Congress will again be faced with it. Providing first-class educational opportunity is the No. 1 implementation of our national security policy, and failure to make available adequate Federal aid in a suitable form is a serious setback.

Social security legislation is under consideration at every session. In 1958 we passed an act liberalizing social security benefits, the principal feature of which was to increase old-age and survivors insurance by 7 percent. In the recently concluded session of 1960 no measure attracted more public attention than the one which provided medical care for the aged, and increased the coverage under existing social security programs. The high cost of medical care for the aged and the need for increased social security benefits convinced most Members of Congress of the urgency of enacting new legislation, but there were widely different and strongly held views on the specifics of the measure. I participated in drafting, and cosponsored, the Forand bill, which provides for a system of hospitalization benefits, nursing home care, and surgical benefits, for those who are recipents of social security benefits. This is a modest beginning, it provides medical care as a matter of right and thus avoids the abhorrent needs test, is limited to our senior citizens, and is easily administered.

It is undeniable that the coming elections had an important effect on the outcome. The bill that finally went to the White House called for $202 million in grants for relief-type State programs during the first year, with the States paying $61 million. About 1,360,000 needy persons over 65 would be potential beneficiaries under this measure. Coverage under existing social security programs was somewhat increased. The Congress will have to reconsider medical care for the aged in view of the very considerable justified dissatisfaction with the new program.

Legislation relating to health in 1958 included extension for 5 years of Federal grants for hospital construction. This Federal-aid program has been most successful.

In 1959 Congress provided for a voluntary Federal civilian employees health benefit program similar to those available to large employee groups in private employment. The plan is financed by payroll deductions and an equal contribution by the Government. The immediate acceptance of this health benefit program by the very large majority of Federal employees gives evidence of Congress' wisdom in establishing it.

The several programs of aid to veterans are so well established that Congress' principal duty is the provision of the very large amounts of money needed to implement them. In 1957 compensation payments for service-connected disabilities were increased by 10 percent, with more for 100-percent disability.

Juvenile delinquency has been a national scandal, but until this year it was not viewed as a national problem. As a member of the House Committee on Education and Labor, I cosponsored a bill to make a massive national attack upon the roots of the problem, and I am happy to report that the Congress passed the program.

QUESTIONNAIRE

Early this year I circulated among my constituents approximately 80,000 copies of a questionnaire on currently important national issues. The results confirmed that the 20th Congressional District which I have the honor to represent takes a liberal point of view. This is evidenced in the overwhelming support for increased housing expenditures, for Federal aid to education, and particularly for improvements in social security benefits. There was sharp and even division as to whether our country should accord diplomatic recognition to Red China. Interest in preventing inflation was strongly expressed, but at the same time the great majority of responses favored continuation of those spending programs which are necessary for the national security, such as the foreign-aid program.

Above all else, perhaps, the answers to the questionnaire expressed an insistent interest in achieving peace, in the Middle East and in the world generally. A great majority of the responses, for example, favored more aggressive policies for suspending further testing of nuclear-weapons.

A questionnaire has greatest value when a substantial number of responses are received. Of 80,000 questionnaires distributed, approximately 7,500 responses were received. This, of course, together with the difficulty of formulating fair yet specific and plainly worded questions, detracts from the value of the questionnaire as a sufficiently reliable test of sentiment. But repeated use of the questionnaire will undoubtedly increase the number of responses and the reliability of the conclusions to be drawn from them.

CONCLUSION

I believe that my recapitulation of some of the high points of the past 4 years gives point to the truth of Speaker RAYBURN'S statement, which I quoted in my opening remarks, to the effect that Congress bears a "tremendous and at times appalling responsibility." The honor of being chosen to accept this responsibility is proportionately great, and I have never been unaware either of the honor or of the responsibility. We have made history, of course, but the test of our work will be, again in the Speaker's words, whether we have helped to make the world a place in which good men and women will be happy. Strengthening and perpetuating the greatest democratic Government the world has ever seen is the most important action which can be taken to insure the happiness of our own citizens and, through us, of all the peoples of the world. I thank my constituents most humbly for having given me the opportunity to make my small contribution to this magnificent purpose.

The Effect of Congressional Action on the 1961 Budget

EXTENSION OF REMARKS

OF

Hon. EVERETT McKINLEY DIRKSEN

OF ILLINOIS

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. DIRKSEN. Mr. President, with adjournment, the tumult and shouting died away, the captains and the kings departed, an objective evaluation could then be made of the effect of congressional action in the 2d session of the 86th Congress on the President's budget for the fiscal year beginning July 1, 1960, and ending June 30, 1961.

In January of this year the President submitted his annual budget. It was carefully prepared and reflected the profound hope that a surplus of $4.2 billion could be generated to be used in reduc-

ing the public debt. That hope has in large measure been shattered, as the following statement will indicate. The increase in appropriations over and above the President's request, the so-called backdoor financing which bypasses appropriations procedures, the increase provided by new legislation, and the denial of the President's request for additional revenues has in fact reduced the hope for a substantial surplus by nearly $2 billion.

If the revenue estimates made in January 1960 prove to be too high, the estimated surplus will be further reduced and it is fair to assume that on June 30, 1961, unless unforeseen factors may intervene the estimated surplus may have been whittled to a fraction of the original estimate.

One other item in the summary merits attention and that is the accumulative effect of congressional action over a period of years. It indicates that new legislation during the first year it goes into effect may have only a modest effect on the budget. However, as time goes on the real blow to fiscal soundness can be measured and the data included in the report indicating the effect of some of these items over a 5-year period speaks eloquently of how easily budget figures and appropriations tables can conceal the real fiscal effect of such legislation.

I ask, therefore, that the budget summary be made a part of my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

REPORT ON ACTIONS BY THE 86TH CONGRESS, 2D SESSION, WITH RESPECT TO THE BUDGET FOR FISCAL YEAR 1961

The net fiscal impact of all congressional actions in the second session of this Congress upon the President's budget for fiscal 1961 is as follows:

1. Net expenditures [1] for fiscal year 1961 were increased by $2 billion.

2. Net expenditures [1] for a period of years were increased by $9.1 billion.

SUMMARY

[In millions of dollars]

	Expenditure effect in 1961 over budget	Expenditure effect over period of years [1]
A. Congressional action on President's appropriation requests	+212	+272
B. Increases in the budget through "back-door financing"	+94	+1,117
C. Other increases:		
1. In appropriation acts	0	+1,276
2. In new substantive legislation	+971	+2,818
3. Nonapproval of proposals to increase revenues and decrease expenditures	+711	+3,605
Total effect of congressional actions on budget	+1,988	+9,088

[1] The costs over 5 years are shown unless the legislation contains a definite time limitation or involves costs for a specific period of time.

[1] Spending and losses of revenue required by congressional action over budget requests, plus revenues requested by President but not granted.

CONGRESSIONAL ACTION COMPLETED

TABLE A.—*Congressional action on President's appropriation request*

[In millions of dollars]

	Expenditure effect in 1961 over budget	Total increase
Total, appropriations and authorizations (p. 19129, Congressional Record of Sept. 1, 1960):		
1961 appropriations:		
Mutual security programs	−51	−494
Other programs	+159	+347
	+108	−147
1961 loan authorizations	+91	+211
Total	+199	+64
Plus reductions erroneously credited or requiring restoration:		
1. Commodity Credit Corporation, capital restoration. $1,325,000,000 was requested to cover losses already realized and reflected on the books of the Corporation. Congress approved $1,226,500,000.	0	98
2. Liquidation of contract authority. These reductions are for liquidation of obligations in several agencies incurred under contract authority previously provided.	10	17
3. Advance to highway trust fund. The total shown above includes a $40,000,000 decrease in the authorization for a repayable advance to the highway trust fund. Since the amount advanced is repaid by the end of the year, the budget reflected a net zero for this transaction; therefore, a reduction in the advance cannot be counted as a cut in the budget.	0	40
4. Mutual security program—Contingencies. Congressional table includes President's request as $275,000,000, whereas it was (S. Doc. 117) only $250,000,000.	0	25
5. Department of Agriculture—Reappropriation. Congressional table counts as reductions decreases in appropriation request made possible by reappropriation which is in effect the same as a new appropriation.	3	28
Total	+212	+272

TABLE B.—*Congressional increases through "back-door financing"*

[In millions of dollars]

	Expenditure effect in 1961 over budget	Expenditure effect over period of years
Veterans Housing Loan Act. (Budget did not recommend increase in the authorization. Congress provided $300,000,000 new authorization plus use of repayments and balances.)	+94	+420
College housing loans	0	+500
Public facility loans. (Budget proposed $20,000,000 to be provided through appropriations process; $50,000,000 in back-door authority was enacted.)	0	+30
Park, Indian, and forest roads and trails. (Budget proposed to finance through appropriations process, with no appropriation required for 1961. Congress provided contract authority for 1961 and 1962.)	0	+167
Total	+94	+1,117

TABLE C.—*Congressional action on other measures authorizing expenditures or otherwise affecting the budget for 1961 and future years*

[In millions of dollars]

	Expenditure effect in 1961 over budget	Expenditure effect over period of years
1. Other spending provided in appropriation acts above budget:		
a. Increase in merchant marine subsidized voyages (over 20-year life of contracts)	0	+740
b. Agricultural conservation program (1962 only)	0	+150
c. Cost to complete Federal office buildings added above budget	0	+43
d. Cost to complete after 1961 of unbudgeted 1961 public works starts	0	+343
Total	0	+1,276
2. Effect of new legislation and amendments to existing legislation in excess of administration proposals:		
a. Pay increase for Government employees	+746	+3,730
b. Special school milk program	+11	+11
c. Increased payments to land-grant colleges	+9	+45
d. Reduction in cabaret tax	+20	+20
e. Health benefits for retired Federal employees	+2	+60
f. Medical care for the aged (change from administration proposal)	+85	−1,266
g. Increase in maternal and child welfare grants	+12	+62
h. Rural library service extension	0	+30
i. Income tax deductions for all allowable medical expenses incurred in care of dependent parents over 65 without regard to 3-percent limitation	+50	+50
j. Provide alternative method for computing foreign tax credits against U.S. income tax	0	+20
k. Renew suspension of coconut and palm oil taxes	+16	+16
l. Exclusion of local advertising charges from manufacturers' excise tax base	+20	+40
Total	+971	+2,818
3. Failure to enact budget proposals to raise revenues or reduce expenditures:		
a. To increase postal rates	+554	+554
b. To increase aviation fuel tax	+89	+108
c. To repeal diversion of receipts from automotive excise taxes to highway trust fund	0	+2,568
d. To transfer forest and public lands highway costs against highway trust fund	+41	+183
e. To increase premium rate for Federal Home Loan Bank Board	+27	+172
f. To provide for taxation of cooperatives	0	+20
Total	+711	+3,605

Legislative and Activity Report on the 86th Congress

EXTENSION OF REMARKS

OF

HON. W. PAT JENNINGS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. JENNINGS. Mr. Speaker, the adjournment today of this 2d session, 86th

Congress, marks the end of my 6th session as the Representative of the Virginia 9th District—the "Fightin' Ninth." I have endeavored to represent the people of my district to the best of my ability; to always look out for their interests; and to speak up in their behalf when the occasion demanded. Furthermore, I have tried to keep them advised, through statements, speeches, newsletters, news releases, and television-radio reports of the major legislative and other actions in the Congress.

Today, as the 86th Congress concludes its work, I present this general summary of actions taken, and include several items of particular concern to the people of my district.

With both the national and congressional campaigns to begin very soon, the work of this Congress will undoubtedly be debated widely and frequently. In looking back over the two sessions, I think we can honestly say that it has been a highly productive Congress. It would be well to not only consider the legislation approved, in judging this Congress, but some of the various proposals that were not passed. Both are important and reflect the will of the people in really wanting a certain program or opposing it.

In the six sessions I have served in the House, the administration has been under the general guidance of one major party and the Congress of another. We in the Congress have done our best to make this divided government work; we have sought compromises when there was little spirit of cooperation from the administration; and we have tried to fulfill our responsibilities to the people back home despite opposition from the executive branch. In examining the record of the 84th, 85th and 86th Congresses, it is very apparent that the Nation deserves leadership from an executive and legislative branch controlled by the members of the same party. When the 87th Congress convenes next January, I hope to again have the privilege of representing the "Fightin' Ninth," and I believe the people of the Nation will insure that divided government will end by electing both a Democratic Congress and administration.

COMMITTEE WORK

As in the past two Congresses, I have served as a member of the House Committee on Agriculture, and on the Subcommittees of Tobacco; Livestock and Feed Grains; Forests; Research and Extension; Family Farms; Departmental Oversight and Consumer Relations; and Domestic Marketing. Farming is of primary importance to the economy of my district, and membership on this committee has given farmers a direct voice on farm legislation.

It is evident that a major job in the next session of Congress will be legislation to make some changes in the existing farm program. Through 6 years of experience and activity, I believe that my contribution to such work can be helpful, and I will again seek membership on this committee.

Faced with this need to make some adjustments in certain farm laws, the Congress has acted on several bills—trying to make needed changes without completely cutting the ground from under the farmer. But these moderate actions have been met with vetoes and threats of vetoes.

With farm prices and farm income down, with farm debts at a record high, and with farm population still on the decline, we must have a rewriting of certain farm laws by both a sympathetic Congress and administration.

The most successful of the farm programs has been that of tobacco. I have sponsored a variety of legislation on this subject to help our tobacco farmers retain this successful operation which, by the way, has cost the Government very little in appropriated funds. Unfortunately, we have run into an unfriendly attitude on the part of the present administration, whose Secretary of Agriculture has been quoted as believing the law amounts to "rationing of poverty" among tobacco producers.

An example of this attitude is shown in the action on the tobacco price support stabilization bill—known as the Jennings bill—in the 1st session of the 86th. We passed it last year at the unanimous request of tobacco producers and other segments of the tobacco industry—but it was vetoed. With slight modifications, the bill, which I again joined in sponsoring, was passed this year and was signed. We had an unnecessary year's delay because of the administration's attitude on the tobacco program.

This Congress has produced other significant agriculture bills. A wheat bill, vetoed; extension of the Agricultural Trade Development and Assistance Act; continuation and expansion of the school milk program, which I joined in supporting; extension of the Sugar Act, including authority for an adjustment to be made in the Cuban quota; a bill authorizing and directing that our national forests, such as the Jefferson National in the Ninth District, be managed on a multiple-use basis to secure the greatest yield of benefits and products; and a measure relating to price support levels for manufacturing milk and butterfat. Unfortunately, conferees of the two Houses could never agree on the provisions of a compromise bill aimed at establishing a broadened research program to promote industrial uses of farm products.

Between election day and the convening of the next session, Mr. Speaker, I would like to see a "summit conference" on agriculture. This would include representatives of the farm organizations, the Congress, the present and the incoming administration, representatives of the consumer, and others concerned with the farm income situation. Agreement on general principles before the new session convenes would insure early passage of a bill to correct problem areas, particularly wheat.

BUDGET APPROPRIATIONS

We have reduced the President's appropriation requests again this year by more than $211 million. In my six House sessions, cuts in appropriations have been effected that total almost $10.1 billion. This should demonstrate accurately and effectively that economy has been of great concern in the Congress, despite the recordbreaking budget requests submitted by the President.

The reduction in appropriation bills this year has not been as much as originally expected, primarily because of an increase in defense funds approved to insure that our defense programs are sound, ever moving forward, and ever ready to meet the threat from the communistic part of the world. Also, we approved an increase in the appropriations requested for the Department of Health, Education, and Welfare, this being mainly for the all-important medical research activities being carried on by the National Institutes of Health.

A major cut of more than $493.6 million was made in the foreign-aid request of the administration. In the past six sessions of Congress, approximately $19.7 billion has been approved for the foreign-aid operations, and I have voted against these funds. I fully realize that we must continue an aid program during the cold war, but we must not risk a severe weakening of our Nation's fiscal soundness nor ignore needs at home to do it.

In other areas of fiscal legislation, this Congress in each session approved an extension of the corporate tax rate and certain excise taxes; provided more revenue for the Federal highway program, which includes the interstate, primary, and secondary construction that is now taking place throughout the Nation; raised the interest rate that is paid to holders of savings bonds; provided temporary increases in the national debt ceiling as requested by the administration to give "maneuver" room in management of Government finances; and approved a bill to permit a taxpayer to deduct all medical expenses incurred in care of a dependent parent over 65.

NATIONAL ECONOMY

Several bills relating to our national economy and our natural resources were passed. Included were: a major housing bill; extension of the Federal airport program, under which local airport projects are developed on a 50–50 matching basis; a self-financing plan for the Tennessee Valley Authority; new lending authority for the Small Business Administration, and authority to facilitate extension of credit to small business enterprises; and an area development bill to help regions with persistent unemployment problems create a broader economic base through industrial expansion. The President again vetoed this area redevelopment program, as he did in 1958.

Of major interest to the ninth district has been the measure to begin expanded efforts to find new uses for coal through research. In the first session a bill was passed that I cosponsored, to create a coal research and development commission; it was vetoed. In the second session, a modified bill was approved, and currently the authorized Office of Coal Research is being set up. In the final appropriation bill passed this week, $1 million is appropriated for use in this program. As with tobacco, we had a year's delay in this legislation because of the veto. Virginia coal production is

concentrated in my district and this delay could cause future coalfield unemployment. Both large and small coal producers should benefit from this research expansion.

FLOOD CONTROL

Two flood control projects in the ninth district are on their way toward eventual construction as a result of bills being passed in this Congress. In the first session, final planning and initial construction funds were approved for the John W. Flannagan Dam and Reservoir in Dickenson County. These were included in the public works appropriation bill passed over a veto. This year, an additional $3.1 million has been appropriated to continue work on this project that will not only provide flood protection, but give a boost to the local economy through job opportunities during construction, and improve recreation after it is completed. Also, we have authorized a flood-control project on the north fork of Pound River in Wise County, and have provided initial planning funds of $25,000 to begin the preliminary work leading to construction.

OTHER PROJECTS

In addition to the mentioned projects of coal research and flood control, my district is benefiting from other Federal programs that operate for the general well-being of the Nation. These have included new post office buildings, armories, hospitals and health centers, airports, recreation areas in national forest lands, highways, library services, and sewage treatment plant grants. The people of my district are seeking ways to improve the economic development of the area, and I have sought Federal participation in this effort whenever and wherever possible—in many instances it has been a joint local-State-Federal project that brought the improvements.

Mr. Speaker, let me reiterate that the veto has delayed and hindered our development efforts in vital areas: Tobacco price support stabilization, coal research, flood control, area development, and there will probably be others if another administration takes office in January that is not really concerned over economic trouble spots in the Nation.

VETERANS LEGISLATION

The 86th Congress passed a general pension law (Public Law 86–211) that grants increased pensions for non-service-connected veterans, establishes payments on a revised scale based on need, and equalizes the pensions of World War II and Korean war widows with those of World War I. We also approved extension of the direct and guaranteed home-loan program, a bill to allow optometrists to serve veterans with service-connected eye conditions, and the measure to provide medical services to veterans with non-service-connected illnesses requiring treatment preliminary to admission to a veterans hospital.

THE ROUNDUP

Heading the list of major bills not already mentioned in this summary is the Social Security Amendments of 1960, which includes a plan to establish medical care services for the needy aged. The Federal Government will provide grants to the States for this program, which must now be set up and administered in each State. Millions of persons over 65 are expected to benefit, and the States will have wide latitude in putting it into effect. In addition to the medical care provisions, the social security bill makes several other important changes in the existing law. It will remove the requirement that a disabled person must wait until he is age 50 before receiving benefits for himself and family; I joined in cosponsoring this change in the law, as I did in sponsoring and supporting the disability insurance program adopted back in the 84th Congress.

Included in this Congress' work of the first session was the Labor-Management Reporting and Disclosure Act to eliminate abuses and racketeering in labor-management fields. I voted for this bill, which finally contained provisions of three or four proposals that were considered at one time or another. Passage of this important legislation resulted directly from the investigations of the McClellan committee.

Minimum wage legislation did not receive final approval in this Congress, despite prolonged efforts to reach a compromise on different bills. My vote for the House version of the bill was based on several considerations, especially the belief that it had the best chance of being passed. I believed a modest bill would be better than none at all; further consideration to coverage of the law and the wage level can always be given in subsequent sessions of Congress.

Mr. Speaker, as one who voted for the $1 per hour minimum wage bill of 1955, I believe new efforts should be undertaken in this field next session. Surely agreement can be reached on a measure that will do an honest job for the workers who benefit from it, but not upset the basis for the law in the first place.

This Congress also approved changes in the Railroad Retirement Act and an increase in benefits.

Two major bills of interest to Federal employees were the health program and pay raise that were warranted, and which will help the Government retain its dedicated workers. An important feature of the pay bill was that bringing employees of the agricultural conservation and stabilization offices under the Federal employee programs.

Statehood was approved in this Congress for Hawaii, following through on the pledge that was made when Alaska was approved as a State in the 85th Congress.

Among the proposals that I opposed was the civil rights bill, which unnecessarily stalled action on other legislation and caused the windup session to be scheduled after the national conventions.

OTHER JENNINGS BILLS

In addition to those measures already listed, I have sponsored several other bills that received varying degrees of consideration in this Congress. I cosponsored the proposal to allow surplus property to be donated to lifesaving crews and volunteer fire departments; the House approved a bill to make such donations for volunteer departments, but it did not clear the Senate. I have introduced legislation to authorize a Joint Committee on National Fuels Policy, which is of great interest to the coal industry. My bill to authorize naming of the Pound River Dam in honor of the late Congressman John W. Flannagan became law. I joined in introducing legislation to extend the library services program which has been of benefit to the ninth district in expanding library service to rural areas.

Mr. Speaker, sponsoring and supporting legislation is the primary concern of a Congressman. But service to constituents in a variety of ways is of great importance and deserves the attention of every Member of Congress. I have provided such service to all requesting it, regardless of their political party affiliation or their location in my district. A Congressman's job after being elected is to serve all, and this I have tried to do.

It is not possible to cover each of the bills taken up during the 86th Congress, or to summarize services my office has rendered. This report, however, covers a few major actions.

I am proud of the record of this Congress, and the 84th and 85th in which I served. We can look forward, I am sure, to another hard-working and productive Congress when the next session begins in January.

A Short History of the Development of the House Committee on Rules

EXTENSION OF REMARKS

OF

HON. STEWART L. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. UDALL. Mr. Speaker, in recent months we have witnessed a series of events involving the House Rules Committee which has aroused considerable controversy over the power which this group exercises over the affairs of the House.

In order that my colleagues and other interested citizens may be more fully informed on this subject, I include a study of the history of the Rules Committee as prepared by the Legislative Reference Service of the Library of Congress. The study follows:

A SHORT HISTORY OF THE DEVELOPMENT OF THE HOUSE COMMITTEE ON RULES

From the First Congress, in 1789, there has always been a Committee on Rules in the House of Representatives. For 90 years it was the practice of the House to set up a select committee at the beginning of each Congress authorized to report a system of rules. During this period the committee exercised little, if any, influence over the legislative program or the content of policies. So minor a role did the committee play in early days that no appointments were made to it in the 15th, 16th, 18th, 19th, and 21st Congresses. And for many years in the early history of the House the Rules Committee made no reports. The committee continued to be a select committee until the rules revision of 1880 when it was made a standing committee, with its membership fixed at five,

in accordance with the previous usage. And it has remained a standing committee down to the present time.

In its composition the Committee on Rules has apparently always been bipartisan, with the majority party in the House having a majority of its members. In size, it was increased to 11 members in 1910, to 12 members in 1917, and to 14 members in 1935; since 1945 it has had 12 members: eight representing the majority party and 4 the minority party.

COMMITTEE POWERS

The powers and privileges of the Rules Committee developed gradually over the years. Until 1841 its responsibility ceased for all practical purposes after it reported a code of rules at the beginning of each Congress. In 1841 the Speaker's ruling that the committee might "report from time to time" was sustained on appeal by the House. This was the first in a series of innovations by which the Committee on Rules became an instrument through which the House may exercise special power for a particular piece of legislation (V Hinds' "Precedents of the House of Representatives," sec. 6780).

The next step came in 1853 when the House adopted a resolution providing that this committee's report "shall be acted upon by the House until disposed of, to the exclusion of all other business, anything in the rules hereby temporarily adopted to the contrary notwithstanding" (Globe, 33d Cong., 1st sess., vol. 28, pt. 1, p. 4).

In 1958 the House authorized appointment of a select committee, of whom the Speaker was to be one, to revise the rules and report at the next session. This was the first time in the history of the House that its Presiding Officer had served on one of its committees. From 1858 to 1910 the Speaker continued to be a member of the Rules Committee, serving as its chairman and exercising its authority.

From 1789 to 1911 the Speaker also made the committee assignments, including those to the Committee on Rules. Thus, after 1858, the powers of the committee and the authority of the Speaker were closely connected, a circumstance which served to enhance the role of the committee and to strengthen the influence of the Chair.

A major step in the development of the powers of the Rules Committee took place in 1883 when the House upheld a Speaker's ruling that a special order providing for the consideration of a particular bill was properly reported from the Committee on Rules (IV Hinds' "Precedents," sec. 3160). This ruling, in which the Speaker supported the authority of a committee of which he was himself chairman ex officio, initiated the modern practice whereby the Rules Committee has reported special orders providing times and methods for the consideration of special bills or classes of bills, thereby enabling the House by majority vote to forward particular legislation, instead of being forced to rely on unanimous consent or suspension of the rules, which requires a two-thirds vote. After 1883 points of order made against reports of the Rules Committee were seldom upheld by the Chair. Prior to that time it had been the custom for each committee desiring to bring a bill to the House floor to propose its own special order. By 1890 the function of proposing special orders for the consideration of business had become the exclusive prerogative of the Rules Committee. Hinds tells us that this procedure was not in great favor during the 48th, 49th, and 50th Congresses, but that it was used frequently in the 51st Congress, "and since 1890 has been in favor as an efficient means of bringing up for consideration bills difficult to reach in the regular order and especially as a means for confining within specified limits the consideration of bills involving important policies for which the majority party in the House may be responsible" (IV Hinds' "Precedents," sec. 3152).

In 1891 the right to report at any time was conferred upon the Rules Committee, and in 1893 it was given the right to sit during sessions of the House (IV Hinds' "Precedents," sec. 4321).

During the period 1890–1910 the Rules Committee rose to a preeminent position in the congressional committee system under the masterful leadership of chairmen like Thomas Brackett Reed and "Uncle Joe" Cannon. Thanks to a series of favorable rulings by the Speaker, which were sustained on appeal by the House itself, the Committee on Rules acquired the power (a) to consider and report special orders, (b) to sit during sessions of the House, (c) to report matters not previously introduced, reported, or committed to it, and (d) to have its reports immediately considered. By the exercise of these powers the Rules Committee can sift the business coming from the other 19 committees of the House and decide which bills shall have the right-of-way to consideration on the floor and the order in which they shall be taken up. Through its power to report new business it has original as well as secondary jurisdiction over the legislative agenda. By amending their measures or by forcing amendments to bills as a condition of giving them a "green light" to the floor, Rules can substitute its own judgment for that of the great legislative committees of the House on matters of substantive policy. It can also determine the duration of debate on a controversial measure and restrict the opportunity to amend it, thus expediting or delaying a final decision.

Morever, since the Rules Committee is the only channel through which amendments of the rules can reach the House, it is able to promote or prevent changes in the rules and so to promote or prevent parliamentary reform. In short, the Committee on Rules is to a large degree the governing committee of the House. To it the House has largely delegated the power to regulate procedure vested in itself by the Constitution.

Through special rules this powerful committee is able to advance directly, or to retard indirectly, any measure that it selects for passage or pigeonhole. At least three kinds of special rules are reported by the Rules Committee: (1) Closed rules limiting the amendment of pending measures; (2) open rules permitting their amendment; and (3) rules providing that all points of order against a proposition be considered as waived. By the exercise of its powers the Rules Committee can also function as a steering committee, steering the House in whatever direction the exigencies of the hour appear to demand.

TWENTIETH CENTURY DEVELOPMENTS

A potential restriction on the power of the Rules Committee to control access to the House floor was adopted by the House in 1909 when it provided for Calendar Wednesday. Under the rule for Calendar Wednesday, each Wednesday shall be set aside exclusively for the various standing committees to call up for enactment bills and resolutions not otherwise privileged. For many years, however, the "call of the committees" has been dispensed with by unanimous consent, on motion of the majority leader, although occasionally the leadership has resorted to this procedure to bring up measures blocked in the Rules Committee.

The "revolution of 1910," which reduced the powers of the Speaker of the House, left those of the Rules Committee intact. But the Speaker lost his seat on that committee and it was increased in size from 5 to 11 members.

In 1924 the "pocket veto" power of the chairman of the Rules Committee was curbed after Chairman Campbell had exercised his discretion to the extent of holding in his pocket a number of resolutions which he had been authorized by the committee to report some weeks before. In order to prevent a repetition of such arbitrary action, the House rules were amended in 1924 by adding the following paragraph:

"The Committee on Rules shall present to the House, reports concerning rules, joint rules, and order of business within 3 legislative days of the time when ordered by the committee. If such rule or order is not considered immediately it shall be referred to the calendar and if not called up by the member making the report within 9 days thereafter, any member designated by the committee may call it up for consideration."

Subsequently, this paragraph was amended to provide that if such rule or order is not called up within 7 legislative days, "any member of the Rules Committee may call it up as a question of privilege and the Speaker shall recognize any member of the Rules Committee seeking recognition for that purpose" (House rule XI, par. 23).

Another change in the rules of the House was adopted in 1924 which, while it applies to every standing committee, was designed in part to restrict the prerogatives of the Committee on Rules. The discharge rule, first adopted in 1910, was amended in 1924 so as to set at 150 the number of signatures required on discharge petitions. This number was raised to 218 in 1926, lowered to 145 in 1931, and again increased to 218 (a majority of the total membership) in 1935 where it has remained ever since. Under this rule it is in order to file a motion to discharge the Rules Committee from the further consideration of special orders of business provided that the special order has been before the committee for at least 7 days prior to the filing of the motion to discharge. Twice a month it is in order to call up the motions which have been placed on the discharge calendar. When the House begins the consideration of a bill under this rule, it remains the unfinished business of the House until fully disposed of without intervening motion except one motion to adjourn.

Traditionally the Committee on Rules has functioned down through the decades as the responsible agent of the majority party in the House, using its powers to facilitate the legislative progam of the majority party in the House, the wishes of the majority leaders, and the program of the administration. In 1937, however, the New Deal lost control of the Rules Committee when three of its Democratic members joined with the four Republican members to block or dilute floor consideration of controversial administration bills. Since 1937 bipartisan coalition control of the Rules Committee has continued down to date, except for the period of the 80th Congress (1947–48) when the committee again functioned as the agent of the majority party in the House.

As a result of repeated complaints of the "obstructive tactics" and the "undemocratic and arbitrary dictatorship" of the Rules Committee, as it had operated in recent years, the House amended its rules at the beginning of the 81st Congress (January 3, 1949) by adopting the so-called 21-day rule. This rule stipulated that a resolution providing for the immediate consideration of a public bill already reported and which had been before the Rules Committee 21 days without being given clearance to the House floor could be called up on discharge days (second and forth Mondays each month) by the chairman of the committee which reported the bill and that "the Speaker shall recognize the Member seeking recognition for that purpose." The 21-day rule was in effect only during the 81st Congress (1949–50).

COMMITTEE JURISDICTION

The Committee on Rules has jurisdiction over (a) the rules, joint rules, and order of business of the House and (b) recesses and final adjournments of Congress. Primarily the jurisdiction of this committee is over propositions to make or change the rules, for the creation of committees, and directing them to make investigations. It also reports resolutions relating to the hour of daily meeting and the days on which the House shall sit, and orders relating to the use of the galleries during the electoral count (House Manual and Rules, 1959, secs. 715–717).

A Report to the People

EXTENSION OF REMARKS

OF

HON. D. S. SAUND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SAUND. Mr. Speaker, early in 1957, when I first started my career as a Member of Congress, you addressed the freshmen Congressmen and gave us sound advice.

You said:

Gentlemen, you have been elected by your people to be Members of the most powerful legislative body on earth. You will be working with a group of men and women who will do everything in their power to help you stay in Congress if only you will let them.

Then you explained how important it was for a new Member of Congress to cultivate the friendship and win the respect and affection of his colleagues if he was to accomplish any results for his own congressional district or make any sound contributions to the welfare of the Nation.

Mr. Speaker, I valued highly your advice and have attempted to abide by it during my 4 years in Congress. I received my reward with deep gratification during the closing days of the 86th Congress when my date bill was called up for debate and discussion.

The date growers of my district, who produce virtually the entire U.S. crop, have invested millions of dollars to introduce and develop a great industry in the unique Coachella Valley of Riverside County. Since Biblical days, the date has been accepted by mankind as a nutritious and delicious food. The date growers of my district desire to create a better image of this wholesome fruit in the minds of American housewives, so that they will increasingly use dates in the daily diet of their families. The producers have discovered through experience that as soon as they advertise their dates and place them on the market in a certain area, the importers place inferior quality imported dates alongside the good Coachella Valley fruit.

Mr. Speaker, three Departments of the administration—State, Commerce, and Health, Education, and Welfare—opposed my bill for erroneous reasons. Also, there was opposition from the large importers of foreign dates and the manufacturers of candy and biscuits. Even though the bill was reported by a unanimous vote by the House Agriculture Committee, the House Rules Committee denied the rule. As you will recall, on August 22 you personally permitted the bill to be considered by the House under suspension of the rules.

After the debate, when the leading opponent asked for a standing vote, I was deeply gratified and touched to note that not a single Democratic Member voted against my bill and all of my California colleagues on the Republican side also voted for the bill. The bill carried by a majority of more than 3 to 1.

Mr. Speaker, when I look back at my scoreboard during two terms in Congress, I can say this with a sense of modesty and pride: I was successful in attaining my objectives for the benefit of my Congressional District. Projects were approved and moneys appropriated—on many occasions against the stiff opposition of the Bureau of the Budget and other departments of the administration. I will cite a few examples.

In the Coachella Valley, thousands of acres of Indian land were lying idle and barren in the midst of highly productive farms. For 7 years, this issue had remained dormant in the Department of the Interior. During my first term, my bill to provide funds to construct irrigation lines to these Indian lands was passed, money was appropriated and the construction work was begun.

In Palm Springs, valuable Indian land in the heart of that great resort city has been the subject of expensive, long-drawn-out litigation between the Agua Caliente Indian Tribe and the Department of the Interior. The Indian owners of the land were not deriving any income. The development of the city was checked. The future of Palm Springs Airport was insecure.

A few benevolent multimillionaires had conceived a novel scheme. At their recommendation, the Secretary of the Interior submitted to Congress in 1957 a proposition without parallel. The Secretary requested Congress to pass a bill whereby he would be authorized to turn over the title—not the management—of the $12 million worth of property to a commission of seven, four to be appointed by the Secretary of the Interior and only three to be elected by the tribal council. When the significance of this proposal was pointed out to the members of the House Interior and Insular Affairs Committee, meeting in Palm Springs at my request, their ire was aroused.

Believe me, Mr. Speaker, it was a hard fight. The Government agencies are powerful opponents where legislation is concerned. But I am proud to state that last year, with the complete cooperation of the city of Palm Springs and the Agua Caliente Tribal Council, my bill was enacted into law. This will make possible the development of valuable Indian property, the expansion of business in Palm Springs and the acquisition of the airport by the city. The members of the tribe also will be able now to enjoy substantial financial benefits from their holdings.

In addition, another hampering restriction was removed by a second bill which I introduced concerning this land. This bill, which was also passed last year, increases the leasing period for lands of the Agua Caliente Tribe from 25 to up to 99 years, permitting the type of financing required for large scale development in the urban Palm Springs area.

I had a difficult time digging out of a deep drawer in the Corps of Engineers office the plans for the Tahchevah Creek Dam in Palm Springs. It took 4 years of continuous correspondence, long distance telephone calls and personal interviews, but finally the project was authorized this year. I have been assured that money will be appropriated for construction of the dam, thereby safeguarding valuable downtown Palm Springs properties from threat of floods.

On two successive occasions, the Bureau of the Budget refused to include funds for advance planning and construction on the San Jacinto River and Bautista Creek flood-control project in the Hemet-San Jacinto area. Thanks to the assistance of the chairman of the House Appropriations Committee, the Honorable CLARENCE CANNON, of Missouri, the money was appropriated and the work is progressing.

Everybody in my district knows that the Santa Ana River flood levees at Riverside have been completed. The work was finished with funds appropriated during my first term in Congress.

I asked for Federal assistance to complete the lighting and other devices at Riverside Municipal Airport and for improvements at Imperial County Airport.

The money was approved. I also made a strong appeal to the Civil Aeronautics Board for continuance of daily airline service to Blythe, and I was delighted to receive a positive decision.

It will be a genuine pleasure and privilege to participate in the dedication of the new Riverside Armory this fall. With the close cooperation of Riverside city officials, I was able to obtain Federal assistance for this armory which, like so many structures of this kind, will serve the citizens of Riverside long and well.

Only recently authorization for construction of a new post office at Banning was granted by the Post Office Department. This is the 10th new post office approved in Riverside and Imperial Counties since I came to Congress 4 years ago.

Mr. Speaker, March Air Force Base near Riverside is a major military installation of the Strategic Air Command. Air bases in other parts of the country have been closed down. But the Government is still making full use of the excellent climatic conditions and strategic location of this area.

Since the beginning of 1957, with the help of the chairman of the House Armed Services Committee, the Honorable CARL VINSON, of Georgia, and the chairman of the House Defense Department Appropriations Subcommittee, the Honorable GEORGE MAHON, of Texas, we were able to obtain more than $15½ million for new construction at March.

Transfer of an Air Reserve training unit from Long Beach will bring 2,000 men to train at March and the area will benefit from their presence. In the near

future, the base will be augmented by a new activity; a fighter squadron of the Air Defense Command is to be transferred to March. These two units will be in addition to the bomber squadrons for which the base is so famous. Another indication of the secure status of March Air Force Base is the fact that $1½ million soon will be expended for rehabilitation of 644 housing units for base personnel.

Some time ago, the personnel at the Mira Loma Quartermaster Depot was cut down to almost nothing. Now a part of the Air Force—it this year received an important new function that will create 256 new jobs and strengthen the Mira Loma Air Force Station's position in the Air Force's vast contracting activities.

When the Department of the Army requested funds for construction of facilities at Yuma, Ariz., which could have been a duplication of facilities already in existence at El Centro Naval Landing Field, I took immediate action. At my urgent request, a study was made by a House Government Operations Subcommittee. The Military Construction Appropriations Subcommittee, headed by the Honorable HARRY R. SHEPPARD, of San Bernardino, specifically prohibited the Army from building such facilities.

After 3 years of effort, we were finally able to obtain an appropriation of $400,000 to move the big dredge from Needles and set up shop at Blythe for channelization of the Cibola Cut. It was the official understanding that the dredging will begin when the California-Arizona dispute over the State boundary is resolved.

Mr. Speaker, I represent one of the most fertile and highly productive farming areas in the United States with a wide variety of crops. The desert valleys of Imperial, Coachella, and Palo Verde at one time commanded the market for early fresh fruits and vegetables throughout the United States. During the past few years, this market has been constantly deteriorating because of importations of vegetables and fruits grown in the Republic of Mexico.

Under the escape clause of the U.S. tariff laws, the growers are entitled to protection through tariffs and import quotas. They are also entitled to benefits of section 32 money controlled by the Secretary of Agriculture. The Secretary is authorized by law to buy surplus commodities for the school-lunch program and thereby relieve the distress of glutted seasonal markets. Unfortunately, the present Secretary has not used the money for the benefit of the growers as he should have.

In order to properly present our case to Government agencies and the Congress, it was necessary to have a complete study made of the impact of the foreign imports on the growers of vegetables and fruits in southern California. I introduced a bill in Congress directing the Tariff Commission to make such a study. My bill was strenuously opposed by the Tariff Commission. But in spite of that, the House Ways and Means Committee, under the chairmanship of the Honorable WILBUR MILLS, of Arkansas, passed a resolution by a unanimous vote this year, directing the Tariff Commission to make a thorough study of this problem.

Since this action, I have personally conferred with Chairman Talbot of the Tariff Commission and the deputies he has assigned to carry on these studies. The studies are now in progress and a team of investigators will be working in the Coachella, Palo Verde, and Imperial Valleys in October. The growers of my district have offered their full cooperation.

As soon as the studies are completed and a report is made to the Ways and Means Committee, I propose to take action, both through the Congress and the Tariff Commission, to stop this deterioration of a highly prosperous agricultural industry by unfair competition from abroad.

There was a move earlier this year to cut down the export subsidy to western cottongrowers by 2 cents a pound, amounting to a potential loss of $10 a bale on every bale of cotton grown in California. The loss of thousands of dollars would have resulted for cottongrowers in my district alone.

I worked hand in hand with growers of the cotton-producing areas of my district and my congressional colleagues from California agricultural areas. By swift action through the House Agriculture Committee, we were successful in thwarting this move.

Mr. Speaker, there is a great deal of discussion and debate in the Halls of Congress concerning the extension of Public Law 78, which authorizes the Mexican national program. I sincerely believe that continuance of this law is essential to the economy of Riverside and Imperial Counties.

I shall at no time condone company stores at places where braceros imported under the law work or are housed. I have discovered in Washington that the Members of Congress are in no mood to permit unscrupulous exploiters of the program to make profits from the paycheck business of the braceros at the expense of local merchants.

I shall urge the extension of Public Law 78, but I have made my position absolutely clear to the users of braceros in my district: any farmer who abuses this program, or allies himself with people who do abuse it, is directly jeopardizing the program itself. American citizens are entitled to jobs on American farms before any imported labor is authorized.

As Congressman of the 29th Congressional District, I receive communications from thousands of veterans, servicemen, senior citizens, farmers, businessmen, housewives and students concerning their personal and community problems. I have attempted to answer each inquiry promptly and I am happy to say that I have been able to help hundreds of my constituents in solving their difficulties. For example:

A senior citizen's records with the Railroad Retirement Board and the Social Security Administration were in a hopeless tangle and his benefits were long delayed. As a result of my appeal in his behalf, he received a retroactive check of $1,400 from the Railroad Retirement Board and a monthly check of $73.30.

As a result of my inquiries in their behalf, another social security annuitant received a check for $1,338, and a widow received a check for $525.50 for retroactive disability benefits which were due her late husband.

Through a mixup about beneficiary rights, a widow of an Air Force man was told she would not receive the $10,000 insurance. I arranged for her to make an appeal, and the appeals board reversed the decision, declaring her to be the beneficiary.

I have helped scores of servicemen to obtain hardship discharges and compassionate transfers when they were needed back home. Veterans going to school on the GI bill have appealed for help when their VA checks were delayed and my office has been able to straighten out their problems.

It gives me a great sense of satisfaction to be of personal assistance to these citizens of my Congressional District. The many letters of thanks and appreciation which I have received are ample reward for my efforts in their behalf.

Mr. Speaker, the forefathers of our country were men of deep religious faith. They were devoted family men and sacrificed greatly for the welfare of their children. They passionately advocated the freedom of the individual and the dignity of man. They fought valiantly for independence and laid the foundations for a society in which freedom of enterprise, based upon the principle of equality of opportunity for all citizens, was recognized as the keystone of a new way of life.

In our early history, when the Nation acquired hundreds of millions of acres of public domain, a choice had to be made between two viewpoints. It was proposed by some that the Government sell the public domain land to the highest bidding land companies and thus pay off the national debt. This idea was firmly rejected. Instead, it was decided to make the land available for free entry by the people, so that they could develop the land and establish homes and communities as private owners.

The Homestead Act of 1862, signed by President Lincoln, gave the final approval to this philosophy. Thus the frontiers were opened for settlement by individuals who took pride in ownership of their homes and businesses.

America is recognized today as the leader of the free world and its citizens have acquired the highest standard of living in the history of man. This can be attributed to the fact that millions of Americans, in their lifetimes, have enjoyed the benefits of personal liberty, equality of opportunity and freedom of enterprise. If we are going to continue in our onward march of progress and leadership as champions of individual dignity, we must keep the avenues of opportunity open to all American citizens.

In the earliest days of settlement in America, firm foundations were laid to make it possible for the citizens of our democratic society to be informed on public issues.

Newspapers and magazines were transmitted through the mails free of charge or at nominal cost. And Members of Congress were granted the free franking privilege, whereby Senators and Congressmen could communicate with their constituents without postage.

The cost to the taxpayers to pay the subsidy to newspapers and periodicals has reached an astronomical figure. But it has been well compensated by the fact that, throughout their history, Americans have been avid readers and their general level of knowledge is the highest on earth.

Mr. Speaker, I know from personal experience how farsighted the forefathers were when they granted Members of Congress the free franking privilege. This privilege has helped me greatly in my efforts to keep in contact with nearly 400,000 constituents of Riverside and Imperial Counties.

As far back as I can recall, my distinguished predecessor's weekly newsletter was regularly printed in the newspapers of my area. But soon after I took office, for some unknown reason, most of the daily newspapers and many of the weekly newspapers in my district stopped printing my newsletter.

Since then, I have attempted to keep my constituents informed of activities and developments in Washington by printing my newsletters and Washington Reports at my own expense and mailing them under the franking privilege. Those dailies and weeklies that still print my news reports deserve thanks for their public spirit.

In reading the history of the United States, we recognize the fact that the forefathers believed passionately in the benefits of public education. Every community in the wilderness had a red brick schoolhouse on the hill for the instruction of young Americans. We have continued in our zeal for education and have become the best educated people on earth.

Lately, due to the increasing costs of education, entailing expensive equipment and larger teaching staffs, it is becoming increasingly difficult for local taxpayers to maintain the standards of education required in modern times. Local taxpayers, heavily burdened with taxes, are refusing to vote in new school bonds. And yet the needs of modern scientific education for an exploding population must be satisfied.

If local communities cannot raise the property taxes any higher to meet these educational needs, there is only one other source for funds and that is the Federal Treasury.

Recent figures show that in the ratio of local, State, and Federal contributions, the Federal Government pays 46 percent of the cost for public welfare and 12 percent of the cost for the construction of highways. But it pays only 4 percent of the cost for education.

I honestly believe that in this modern, atomic age it will be a disaster for the welfare of our great Nation if we ever lag behind in our standard of education for American citizens. Two years ago, it was discovered in a congressional investigation that Soviet Russia was producing twice as many engineers and scientists as the United States of America. This is a sphere of activity, Mr. Speaker, where we cannot afford to stay behind.

Therefore, I am a strong advocate of Federal aid to education, with the definite understanding that the complete control of curriculum and administration be left in the hands of the local school boards. This has been done in the past and it can be stated in any Federal aid to education law in the future. My own bill on this subject includes a specific clause for this purpose.

During the past 4 years, a number of school districts in Riverside and Imperial Counties have received a subsidy of more than $4 million from the Federal Government. This money, authorized by Public Laws 815 and 874, was paid to school districts in which there were children of parents employed by the Federal Government. I submit that there has been no Federal interference with the administration of these local schools.

The administration's tight money policy and high interest rates are already producing their disastrous effect in curtailing production and creating unemployment throughout the United States. You will recall, Mr. Speaker, when I personally explained to you my strong objection to any increase in interest rates, which was demanded by the administration both in 1959 and 1960.

We need an expanding economy, providing full consumption and full employment. Unemployed Americans do not pay taxes and cannot buy the products of industry and agriculture. Above everything else, we must find ways and means of keeping American factories humming and American citizens working with decent wages, commensurate with the rising cost of living. The great achievement of our way of life in the past has been the constantly increasing standard of living of our people.

I am a strong advocate of our social security laws, providing old-age pensions, unemployment insurance, and other benefits. I voted for the health insurance for the aged program during this session of Congress, which will be a beginning in the establishment of health insurance for our senior citizens. This worthy segment of our population must commend the devotion, affection, and esteem of our Nation.

I voted for the civil rights legislation in 1957 and 1960. It does not make sense for the United States to preach democracy and human dignity to the outside world if we cannot grant equal rights in a realistic way to our own citizens. There is no room for racial discrimination and second-class citizenship in Uncle Sam's family.

Mr. Speaker, I have been deeply thankful to you for my appointment as a member of the House Foreign Affairs Committee in 1957. Throughout my travels around the world as a representative of that committee, as a delegate to the Interparliamentary Union Conference and as a member of the special congressional delegation that toured NATO bases, I have been a keen observer of the operation of our foreign-aid program.

I believe we have carried much too far the idea of winning friends among foreign nations with money. While it is good sound policy on the part of the United States to assist those nations who want to help themselves with economic loans and small grants, it is absolutely absurd to supply expensive and sometimes obsolete military hardware to foreign dictators and kings who have no sympathy for our way of life and use our equipment to suppress the freedom of their own people.

We did a wonderful job of rehabilitating the economies of the countries of Western Europe through the Marshall plan. It saved the freedom of those countries and they are now back on their feet as independent nations. But although it may have been necessary once to furnish these Western European nations with military equipment for their defense, it does not make sense to me now that American taxpayers should pay with American dollars the cost of constructing military equipment in European factories, especially when our national gold reserve is constantly dwindling.

I understand fully the responsibility and authority granted by the Constitution to the President of the United States to formulate and direct the foreign policy of our Nation. I have continually supported the President in his foreign policy decisions. Although he may disagree with the President at times, a Member of Congress has no other choice. Congress can advise the President but it cannot dictate foreign policy to him.

Yet I have consistently voted to pare down the President's budget requests for foreign aid each year. I know that our foreign policy did not suffer because of my vote for these cuts. Perhaps we would have had more friends abroad today if the cuts had been even larger.

I believe fully in the cultural interchange between the United States and other nations of the world. If we are to succeed in winning the newly emerging nations to our way of life, as against international communism, we must provide means for their leaders and educators to learn our culture and our students to understand their civilizations. The expense of such interchange is infinitesimal in comparison with the billions we have spent on so-called military assistance for people who could not use tanks and guns and certainly could not feed their children with cold steel.

I feel sincerely proud that the bill which I introduced in the House of Representatives, concurrently with Senator LYNDON B. JOHNSON'S introduction of a similar bill in the Senate, has become a law. An East–West Cultural Center at Hawaii is being established where scholars from the East and West can meet for study and exchange of knowledge and ideas.

In recent years, an alarming number of small businesses have gone bankrupt in the United States. This is not consistent with our way of life. A basic part of our economic philosophy has been the encouragement of individuals to own and operate their own businesses.

During my two terms in Congress, I have strongly supported the Small Business Administration program, which makes loans to small businesses when financing is not obtainable from banks.

I have endeavored to publicize the opportunities and benefits which accrue to businessmen from the SBA program.

Through the close cooperation of the able regional director of the SBA, Mr. Donald McLarnan, a former vice president of a large banking chain in southern California and long a successful banker, I have been able to obtain approval of $2,309,000 in SBA loans for small business men in Riverside and Imperial Counties in the past 4 years. That is not a large sum of money, but it served to save a few businesses from going broke and enabled others to get on a firm footing or to make needed expansions.

I am glad to observe, Mr. Speaker, that scores of students in my Congressional District have taken advantage of the National Defense Education Act of 1958, which I vigorously supported in Congress. This Act provides Federal funds that make it possible for needy but worthy students to obtain loans from the colleges of their choice that are participating in the program. These funds are interest-free during the student's school years. The Act also includes other programs to improve the quality of education.

In conclusion, Mr. Speaker, may I say that I am deeply grateful to the people of the two great counties of Riverside and Imperial for affording me the opportunity to represent them in Congress during the past 4 years. It has been a wonderful privilege to serve with my colleagues under your leadership. I have formed close friendships and, as I said at the beginning of this report, these associations have been of invaluable assistance to me in serving my constituents. The experience which I have gained, abetted by the constant and willing advice and counsel of my colleagues, has enabled me to broaden and increase the range of my services to my area and my country.

The House Rules Committee and Its Stranglehold Over Legislation

EXTENSION OF REMARKS

OF

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, it should now be clear to all Members of the House that we as a Nation can no longer tolerate abuses of power such as have taken place during this Congress by a small group who control the House Rules Committee. Year after year, we have seen legislation of vital concern to our citizens die at the hands of the Republican-Southern Democratic coalition which has six votes on the committee—enough to keep any bill from obtaining a rule.

It should be well noted that 100 percent of the four Republicans on the Rules Committee generally voted to bottle up the vital legislation, while 75 percent of the eight Democrats on the committee generally voted to permit the House to work its will in debating and voting on such measures.

Mr. Speaker, under leave to extend my remarks, I include the text of a study prepared at my request by the Legislative Reference Service at the conclusion of the last Congress. It traces some of the most flagrant examples of the abuse of power by the House Rules Committee during the past 8 years in the 82d through the 85th Congresses. The study is as follows:

THE RULES COMMITTEE OF THE HOUSE OF REPRESENTATIVES—SOME EXAMPLES OF ITS INFLUENCE ON LEGISLATION DURING THE 82D, 83D, 84TH, AND 85TH CONGRESSES

This report consists of a limited number of examples of the influence on the fate of legislation exerted by the House Committee on Rules. It does not pretend to exhaust the subject, but only to describe those instances which received some attention in newspapers and periodicals. The committee itself issues no annual or summarizing report of its activities; nor have we discovered such information in any other official or nonofficial sources. It is often difficult, therefore, to establish that a particular bill was not considered by the House of Representatives simply because of the committee's disfavor, or for some other reason. In such instances, this report has accepted the judgment of the sources cited.[1]

EIGHTY-SECOND CONGRESS

Grains for India

Early in 1951, the Indian Government requested food grains from the United States to avert a threatened famine. President Truman referred this request to Congress on February 12 and urged that 2 million tons of grain be sent India as a gift. A bill (S. 872) authorizing the shipment, but on a straight loan basis, passed the Senate May 16.

Meanwhile, the House Foreign Affairs Committee had reported a measure (H.R. 3017) on March 5, keeping the program on a gift basis. The bill was sent to the Rules Committee for clearance to the House floor. While the Rules group failed to act promptly, President Truman twice sent messages to Congress emphasizing the importance of quick action. The Rules Committee refused to give the bill clearance for nearly 3 months until it was amended to provide that the grain be sold to India instead of given as an outright grant. This amendment was incorporated into a clean version of the measure, H.R. 3791, which was finally reported on April 25 and passed by the House on May 24.[2]

Absentee voting

During the 2d session of the 82d Congress the Senate passed a bill (S. 3061), sponsored by the Truman administration, to furnish absentee ballots for servicemen from States which did not adequately provide for such voting. The Senate later passed Senate Resolution 349 which called for Federal-State cooperation in aiding absentee soldiers to vote.

In the House, a Rules Subcommittee under Representative OMAR BURLESON held hearings for 2 days on S. 3061 and on a companion bill, H.R. 7571. Two days after the hearings ended, the subcommittee voted to postpone any action on the legislation and the measure was thereby killed.

EIGHTY-THIRD CONGRESS

Income tax reduction

On February 17, 1953, the House Ways and Means Committee filed a report on H.R. 1, a bill introduced by the chairman of the committee, Representative Daniel Reed, which provided, among other things, for the reduction of personal income taxes. Chairman Reed twice requested a rule for the bill in letters dated February 25 and March 5. He was told by Representative LEO ALLEN, then chairman of the Rules Committee, that the measure would not be considered by Rules until at least May 1.

Mr. Reed protested the delay in a number of public statements, terming it pigeon-hole treatment. On one occasion he rose on the House floor and demanded, "What have I done in the last 34 years that I should be subjected to this treatment here?" On April 13 he filed with the Speaker a discharge motion on behalf of the bill. The prescribed number of signatures was not obtained and the bill died in that session.[3]

Statehood for Alaska and Hawaii

A bill to grant statehood to Hawaii passed the House in 1953 by a majority of 2 to 1. On March 11, 1954, the Senate voted 46 to 43 to join Alaskan and Hawaiian statehood in one piece of legislation. The bill finally passed the Senate on April 1.

In the House, unanimous consent was asked to send the two versions to conference. It was alleged at the time that the Republican majority on the conference committee planned to eliminate all Alaskan provisions from the bill. An objection entered by the Democratic leader, SAM RAYBURN, stalled the move to send the measures to conference. The only other way to get the bills to the conferees was for the House to adopt a resolution to that end. Such a resolution was filed April 12, but the House Rules Committee bottled it up until the middle of the summer. On July 26 the Rules group formally tabled the proposed rule to send the bill to conference, thus eliminating any possibility of passage during that Congress.

The Rules Committee also refused to act during the 83d Congress on a House Alaska statehood bill, H.R. 2982, which had been reported by the Interior and Insular Affairs Committee on June 26, 1953.

EIGHTY-FOURTH CONGRESS

During the first session of this Congress, according to a report in Nation's Business, the Rules Committee "exercised its discretionary function frequently."[4]

Small Business Administration

When the House Banking Committee approved a bill to extend the life of the Small Business Administration, a provision was included to double the agency's lending authority. It was reported that Representative HOWARD W. SMITH, then chairman of the Rules Committee, had announced that the bill would never clear through his group with the lending authority boost in it. When the Banking Committee eliminated the offending section, the Rules Committee granted a rule.

Polio vaccine

Similar treatment befell a bill which was reported out of the Commerce Committee providing funds for polio vaccine. It was said that Mr. SMITH objected to a provision of the bill obligating the Federal Government to match any State funds spent for vaccine, and that the Rules Committee

---

[1] Unless otherwise noted, the material for this report was gathered from Congressional Quarterly Weekly Reports, Congressional Quarterly Almanac, and from numerous articles appearing in the following newspapers: New York Times, New York Herald Tribune, Christian Science Monitor, Washington Star, and Washington Post and Times Herald.

[2] Pringle, Henry F. and Katharine Pringle. The "terrible 12" of Capitol Hill. Saturday Evening Post, June 19, 1954: 28.

[3] Ibid.

[4] Here's how 12 men control Congress. Nation's Business, February 1956: 102.

would refuse to act until this open-end provision was stricken. Representative Percy Priest, chairman of the Commerce Committee, eventually complied with this demand and the bill, thus amended, was permitted to come to the floor for action.

Doctors' draft

The House Armed Services Committee reported during the first session a bill to extend the drafting of doctors. It was reported that Mr. SMITH vigorously opposed any continuation of the doctors' draft unless the age ceiling were lowered. The Senate attempted to bypass Rules by tacking the doctors' draft extension to a House-passed bill continuing the regular draft. But House and Senate conferees on the final version of the bill agreed to lower the doctors' age ceiling somewhat in order to get the legislation through without another Rules Committee blockade.

Housing

On June 25, 1955, the Committee on Banking and Currency reported an amended version of S. 2126, a Federal housing bill. A request to the Rules Committee for a rule on the bill was refused on July 1. Rules members divided 6 to 6 on the measure, thus frustrating the attempt to bring it to the House floor.

Pressure was exerted by the House leadership of both parties. The Republican leader, Representative JOSEPH W. MARTIN, promised that Congress would "get a housing bill before we're through." On July 28 the committee finally granted a rule after three Republican members reportedly switched their votes.

Absentee voting

On February 3, 1955, the House Administration Committee reported a bill, H.R. 3406, to give servicemen permanent voting rights instead of restricting the privilege to wartime. The measure included a provision prohibiting poll tax requirements for servicemen. The Rules Committee granted a hearing on the request for a rule on the bill on February 8, but took no action.

On February 10, the majority leader, Representative JOHN W. MCCORMACK, said that, "as a result" of the hearing by the Rules Committee, the Administration Committee was giving "further consideration" to the poll tax provisions in the bill. On February 18 Administration Committee reported a new bill H.R. 4048, "recommending" to the States means by which members of the armed services and other absentees overseas could vote. The Rules Committee cleared this version and the House passed it on February 24. The anti-poll-tax section was reinserted by the Senate, but the House-Senate conference deleted the provision from the final bill.

Alaska and Hawaii

On March 3, 1955, the Interior and Insular Affairs Committee of the House favorably reported H.R. 2535, a bill to admit both Alaska and Hawaii to the Union. The Rules Committee held hearings for a rule on the bill intermittently from March 16 to April 19. On April 26 it granted a closed rule prohibiting amendments and providing for 7 hours of debate. The committee's action precluded any attempts to deal separately with either territory or to alter the terms under which each would be admitted. Under these circumstances the House recommitted the bill on May 10.

During the first session of the 84th Congress the Rules Committee also succeeded in preventing the House from considering bills to strengthen Federal controls over bank mergers and to extend Federal powers to combat water pollution.[5] Both measures, however, reached the floor during the second session.

[5] Ibid.

Federal aid to schools

H.R. 7535 was reported by the House Education and Labor Committee on July 28, 1955. The bill authorized $1.6 billion in Federal grants for local school construction over a 4-year period. Although reported in 1955, it was not cleared for floor action by the Rules Committee until June 20, 1956. In the press of business at Congress' end, the measure did not come to a vote in the House until July 5, when it was defeated, 194 to 224, on a rollcall vote. A civil-rights rider insured its defeat, but the late hour at which it was considered precluded any further action in that Congress.

Civil rights

After extensive hearings, the House Judiciary Committee ordered favorably reported on April 25, 1956, H.R. 627, a civil rights bill.

Soon thereafter a request was made of the Rules Committee for clearance to the floor. The chairman of the Rules group delayed calling a hearing on the bill until forced to do so by a majority vote of the committee on June 14.

The rule hearings began June 20. On the following day Chairman SMITH abruptly adjourned the meeting when Representative WILLIAM M. COLMER raised the point of order that a quorum of the committee was not present. Mr. SMITH was reported to have said that further hearings were subject to his call and to have added, "I'm not interested in calling a meeting."

Five committee members, shortly thereafter, formally requested a special meeting to consider the rule further. The committee met on June 27 and, by a vote of 8 to 3, granted the bill an open rule. However, by the time the measure had passed through the House it was July 23 and its opponents in the Senate easily frustrated action for the short remainder of the session.

Housing

Another housing measure was reported by the Banking and Currency Committee during the second session of the 84th Congress. It was a clean omnibus bill, H.R. 11742, and called for construction of 50,000 public housing units a year for 3 years. It also included sections providing for Federal loans to nonprofit organizations to build housing for the elderly and authorizing the use of 10 percent of the funds in the national service life insurance fund for GI mortgages.

The House Rules Committee voted, 6 to 4, to table the bill on June 29, 1956.

On July 20 Representative WILLIAM B. WIDNALL introduced a compromise bill, H.R. 12328, which reduced the proposed number of units to 35,000 and eliminated the other sections mentioned above.

The following day, July 21, the Rules Committee granted a closed rule to H.R. 11742, the Banking Committee bill, allowing 2 hours of debate and specifying that only one amendment was in order—to substitute the text of H.R. 12328, the Widnall bill, "any rule of the House to the contrary notwithstanding." On July 25 the House passed, by a voice vote, the substitute measure. Mr. SMITH commented: "The rule is probably the most drastic gag rule that I have seen presented in my time here in the House."

Depressed areas

On June 29, 1956, the House Banking and Currency Committee cleared a clean bill, H.R. 11811, which authorized Federal aid to areas suffering large-scale unemployment or low income. Although a request was made for a rule, the Rules Committee failed to clear the bill for House consideration.

EIGHTY-FIFTH CONGRESS

Alaska and Hawaii

Shortly before Congress adjourned in 1957, the House Interior and Insular Affairs Committee reported an Alaska statehood bill. Similar action was taken in the Senate, but by general agreement it was up to the House to act first. For nearly 5 months the House Rules Committee refused to clear the Alaska bill for floor consideration. The measure's supporters then resorted to a special House rule and brought it to the floor as a privileged matter. The motion to consider was approved May 21, 217 to 172, and the bill was passed May 28, 208 to 166.

A bill to admit Hawaii was held up for a considerable time in the House Interior Committee, but was finally ordered reported on August 6. The Rules Committee took no action on the bill before adjournment.

Presidential disability

For the fourth time in recent years, the Committee on Rules pigeonholed during the 85th Congress a Senate-passed resolution to set up a joint congressional committee to study the succession issue and other matters affecting the Presidency.

Federal judgeships

During the second session of the 85th Congress the Committee on the Judiciary reported a bill, H.R. 13672, to provide for the appointment of additional circuit and district judges. The bill was never cleared for action by the Rules Committee.

Premerger notifications

During the first session, the administration requested Congress to amend the Clayton Act to require firms with combined assets of $10 million or more to give the Department of Justice advance notice of their intention to merge. The House Judiciary Committee reported a bill for that purpose in 1957, but the Rules Committee did not clear it.

TVA

On August 1, 1958, the House Public Works Committee reported a bill to permit TVA to issue $750 million in revenue bonds to finance construction or acquisition of new power facilities. The bill had already passed the Senate in 1957. The subject of heated controversy between public and private power groups, the measure died in the Rules Committee.[6]

Housing

The Senate passed on July 11, with little debate, an omnibus housing bill. It authorized the Government to obligate $2.5 billion on various housing programs.

In the House the bill was modified by the Banking and Currency Committee and then reported. The Committee on Rules refused to grant the measure a rule. The bill's supporters then sought to bring it to the floor under a procedure requiring a two-thirds vote of the House in order to suspend the rules. Put to the test on August 18, the House divided 251 to 134, 6 votes short of the required two-thirds. At this point Congress was too close to the end of the session to make another attempt to pass a housing bill.

Area redevelopment

A bill proposing a program of Federal grants and loans to localities for redevelopment was guided through the Senate in 1956 only to die in the House. In 1958 it once more passed the Senate, incorporating a proposed expenditure of $380 million.

In the House, the Banking and Currency Committee knocked out of the bill a $100-million loan fund for public facilities before reporting it on July 1. It was alleged at the time that the House version was "watered down" by the committee mostly because of objections from members of the Rules Committee which actually held up action on the bill until the changes were made.[7]

Record of the Committee on Interior and Insular Affairs During the 86th Congress

EXTENSION OF REMARKS
OF

HON. WAYNE N. ASPINALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ASPINALL. Mr. Speaker, the 86th is the first Congress during which I have had the honor of presiding over the Interior and Insular Affairs Committee as its chairman. My experience has been exhilarating and almost uniformly pleasant. The ranking minority member, the Honorable JOHN P. SAYLOR, of Pennsylvania, has been most cooperative. With his help and the help of my subcommittee chairmen and, indeed, of all the members of the committee, we have turned out a large volume of work that, I am convinced, is and will be profitable for the American people.

It may be that no two of us would agree on precisely what are the dozen or so most important measures that have come out of our committee and been enacted into law. But I do not doubt that there will be general agreement that the Hawaii Statehood Act—Public Law 86–3—is to be counted among these. I think also that the Alaska and Hawaii Omnibus Acts—Public Law 86–70, Public Law 86–624—which cleaned up a great mass of legislation antedating statehood for these two former territories and included wise provisions to assist them during their transitional period, also belong here. Great credit must be given to the Honorable LEO W. O'BRIEN, of New York, for his handling of these bills.

Our jurisdiction over mines and mining matters also resulted in productive legislation. I refer especially to the acts establishing and furnishing implementation for a national helium conservation policy—Public Law 86–777—creating a coal research and development division in the Department of the Interior—Public Law 86–599—and revising and amending several sections of the Mineral Leasing Act of 1920, with particular attention to its oil and gas provisions—Public Law 86–705. The Honorable ADAM C. POWELL, of New York, was the chairman of the subcommittee which dealt with these matters.

Our Public Lands Subcommittee, under the chairmanship of the Honorable GRACIE PFOST, of Idaho, also had 2 busy years. Of particular importance in its field of operation were the bills enlarging the area of public lands which the States may utilize for State parks and other public purposes—Public Law 86–292—and settling an important problem arising from demands for the return of former private lands which were turned over to the United States early this century for incorporation into our national forests and parks—Public Law 86–596. I must mention also, among other things, the acts establishing various new units of the national park system: The Arkansas Post National Memorial in Arkansas, Public Law 86–595; Bent's Old Fort National Historic Site in Colorado, Public Law 86–487; Minuteman National Historical Park in Massachusetts, Public Law 86–321; and Wilson's Creek Battlefield National Park in Missouri, Public Law 86–434.

The work of the Irrigation and Reclamation Subcommittee has also been wide ranging. Its distinguished chairman is the Honorable WALTER ROGERS of Texas. The authorization for the San Luis unit of the Central Valley project in California, Public Law 86–488, stands out in my mind as being especially important, not only because of the large area which will be furnished water by this development but also because of the means the new law affords for cooperation between the State of California and the Federal Bureau of Reclamation in the utilization of a single reservoir site. The authorizations for the Cheney Division of the Wichita project, Kansas, Public Law 86–787, and the Norman project in Oklahoma, Public Law 86–529, are also important because, among other things, of the evidence they afford of our committee's concern for adequate municipal and domestic water supplies. Four other enacted measures authorized construction of the western division of the Dalles Federal reclamation project, Oregon, Public Law 86–745; the Spokane Valley project in Washington and Idaho, Public Law 86–276; the La Feria division of the Rio Grande project in Texas, Public Law 86–357; and the Bully Creek extension of the Vale project in Oregon, Public Law 86–248.

The Honorable JAMES A. HALEY, of Florida, headed the Indian Affairs Subcommittee. To my knowledge, no Member of the House is more diligent than Mr. HALEY in pursuing his assigned tasks. It would be especially hard to isolate and name the most important pieces of legislation that emerged from this subcommittee since nearly all of the bills that come to it deal with urgent problems that affect a single tribe or local group. If I were to name two or three, however, I think I would choose the settlement of the longstanding controversy over equalized allotments of the very valuable Indian lands in Palm Springs, Calif., Public Law 86–326, the provisions for distribution of the assets of the Catawba Tribe, South Carolina, and termination of Federal supervision over the affairs of this small group of Indians, Public Law 86–322, and the act turning over to the Navajo Tribe full control over most of the irrigation works on its reservation, Public Law 86–636.

This rundown does not begin to cover the entire field of our committee's activities. I am proud that, though only about 5½ percent of the total number of House bills, joint resolutions, and concurrent resolutions that were introduced during the 86th Congress were referred to our committee, 11½ percent of all such measures that were reported to the House came from the Interior and Insular Affairs Committee and that about 18¼ percent of all the public laws that were enacted were ours.

To put the matter another way, 926 measures were referred to our committee, 177 were reported, 162 passed the House, and 146 were enacted as public laws. A full summary of all of these is being prepared and will be available, in the form of a committee print, to Members and the public.

The consideration of these measures and other committee business necessarily consumes an immense amount of time. The full committee and its subcommittees met here in Washington 308 times for a total of 511 hours. There were, in addition, a number of field hearings and inspection trips. These include, among others, visits to American Samoa, Guam, the Trust Territory of the Pacific Islands, the Ryukyus, and Hawaii, in the interests of territorial legislation; Puerto Rico and the Virgin Islands for the same reason; Michigan, Minnesota, South Dakota, and Kansas for the study of Indian problems; Oregon, California, Arizona, Missouri, and Maryland on public land and national park matters; Pennsylvania and the tristate area of Oklahoma, Kansas, and Missouri on mining matters; and Colorado, Utah, Arizona, California, Washington, and Oregon on irrigation and reclamation subjects.

As the figures that I have cited above indicate, and I have already said in connection with the work of the Subcommittee on Indian Affairs, not all of the bills that we have handled are of the glamorous, headline-attracting type. Many of them were workaday bills. That does not make them any the less important. Indeed, a bill that settles what, to outsiders, may look like nothing more than a petty local problem involving, say, not more than 10 acres of land may well turn out to be a precedent-setter with important ramifications and, in any event, of just as much consequence to its locality as a much more ambitious measure is elsewhere. The following paragraphs add to the catalog of measures which I have already mentioned but they by no means exhaust the entire field of our activities.

With this in mind, I point out that the Irrigation and Reclamation Subcommittee had 183 measures referred to it and that all of the 23 which it reported became law. This subcommittee met 70 times in Washington for a total of 135 hours. In addition to the bills that I have already mentioned, those that emerged from it cover such diverse matters as the delivery of water to lands served by Federal reclamation projects when the death of a husband or wife would make his or her land excess under normal reclamation law, Public Law 86–684; an amendment to the Reclamation Project Act of 1939 making permanent the heretofore temporary authority of the Secretary of the Interior to grant deferment of construction charge payments in cases of extreme hardship, Public Law 86–308; the disposition of net power revenues from the Grand Valley project in Colorado, Public Law 86–640; apportionment of construction costs on the Yakima project in Washington, Public Law 86–204; negotiations by the States of Kansas and Nebraska of an interstate compact governing the Big Blue River and its tributaries, Public Law 86–489;

and the preservation of historical and archeological data endangered by the construction of reservoirs by Federal agencies and their licensees, Public Law 86–523.

With the admission of Alaska and Hawaii as States, the volume of business referred to the Subcommittee on Territorial and Insular Affairs contracted sharply. Nevertheless there were 52 bills referred to it. Of these 10 were reported and 9 became law. The subcommittee met 21 times for a total of 35 hours. I have already mentioned the most important measures in the field that were enacted. The others include a 17-month extension in the life of the Alaska International Rail and Highway Commission, Public Law 86–78; revision of the Virgin Islands Organic Act to modify the term of office and per diem allowance to members of the Virgin Islands Legislature and to clarify the duties of the U.S. attorney and the Virgin Islands attorney general, Public Law 86–289; and provision for suits against the government of Guam, Public Law 86–316, for acquisition from Guamanian property owners of fee titles to or easements for roads constructed by the Navy Department, Public Law 86–314, and for the disposition to the government of Guam of certain filled and submerged lands title to which is in the United States, Public Law 86–664.

The Subcommittee on Mines and Mining met 39 times for a total of 73 hours. There were referred to it 121 bills and resolutions of which 17 were reported and 12 became law. A concurrent resolution handled and reported by this subcommittee was adopted by both Houses. This resolution, House Concurrent Resolution 177, called on the President for a review of Federal stockpiling, barter, technical assistance, and loan-grant programs which have stimulated mineral production abroad and severely depressed the domestic market. It also declared that the national security and public welfare require the maintenance of a strong and healthy domestic mining industry and avoidance of critical dependence on foreign sources and stockpiles planned merely for defense needs. In addition, this subcommittee also handled, among others, bills extending the coal provisions of the Mineral Leasing Act to Alaska, Public Law 86–252, authorizing the issuance of permits to phosphate producers on the public lands, Public Law 86–391, providing for the acquisition of lands by the Geological Survey for observation wells, Public Law 86–406, and relieving innocent purchasers of interests in oil and gas leases from onerous administrative and judicial proceedings arising out of predecessors' failures to comply with the acreage limitation laws, Public Law 86–294. Three of this subcommittee's bills were vetoed by the President. The most significant of these was one, H.R. 8860, which would have provided for payments to small domestic producers of lead and zinc when the market prices of these commodities, depressed as they are by heavy foreign imports, are below certain specified levels.

Of the 347 measures referred to the Subcommittee on Public Lands, 69 were reported and 60 became law. This subcommittee met 58 times for a total of 96 hours. The bills within its jurisdiction which were enacted are of a wide variety. I have already mentioned some of the most important of them. The others include a bill enlarging eligibility for burial in national cemeteries, Public Law 86–260; 22 measures dealing with, for the most part, specific tracts of land in 16 States ranging from Alaska and California in the West through Nebraska and Michigan in the Midwest, to Virginia, Florida, and Mississippi in the Southeast; 21 measures revising the boundaries of or providing for the acquisition of additional lands for 19 units of the national park system in Arizona, Colorado, Florida, Maryland, New Jersey, North Carolina, Pennsylvania, South Carolina, Tennessee, Utah, Virginia, Washington, West Virginia, and Wyoming; and a number of other miscellaneous subjects.

The Indian Affairs Subcommittee had 188 measures referred to it, reported 55 and 47 of these became law. It met 48 times for a total of 89 hours. I have already mentioned several of the more important bills coming from this subcommittee which became law. Others that deserve special mention are those that supplement the provisions of a 1906 act to permit completion of a program for the disposal of the assets of the Choctaw Tribe of Oklahoma, for a division of the proceeds among the members of the tribe, and for dissolution of the tribal government, Public Law 86–192; enlarge the list of Klamath Indians eligible for loans from the Indian revolving loan fund and permit earlier payment for the Klamath Marsh area than was contemplated by prior legislation, Public Law 86–40, Public Law 86–247; and postpone the date on which the Menominee Termination Act of 1954 is to become fully effective, Public Law 86–733. In addition, there were 16 enactments providing for transfers of surplus Federal land to 15 different groups of Indians, 6 enactments dealing with the sale or lease of lands held by or for such groups, 6 providing for the disposition of judgment moneys obtained by Indians either through per capita distributions or as otherwise allocated by tribal officials, and 11 more which deal with a wide variety of subjects.

I have been speaking thus far of bills on which the legislative process has been fully completed. As usual, we also considered a number of matters on which action could not be finished. Many of these bills will be with us again next year. The time our committee spent on them will not have been wasted, for the foundation has been laid for more expeditious treatment of many of them during the 87th Congress than would otherwise have been the case.

I refer to such bills, in the irrigation and reclamation field, as the one which would furnish a firm and statutory implementation of the policy of developing water resources on a comprehensive multiple-purpose basis by authorizing the establishment of river basin commissions and by prescribing uniform methods for evaluating projects; a whole series of bills embodying various approaches to the problems of Federal-State relations in the water rights field; another group providing for the creation of a Pacific Northwest account in order to give potential Federal irrigation projects in that area a firm statutory basis for assistance from power revenues comparable to those enjoyed in the Missouri Basin, the Upper Colorado Basin, and the Central Valley of California; and still others to authorize construction of the Burns Creek development, Palisades project, Idaho; the Mid-State reclamation project, Nebraska; the Fryingpan-Arkansas project, Colorado; the San Juan-Chama reclamation project, and Navajo Indian irrigation project, New Mexico; and the Garrison diversion unit, Missouri River Basin project, North Dakota.

In the field of territorial and insular affairs we gave long consideration to a number of bills dealing with the status of Puerto Rico in terms of commonwealth, statehood and independence; a series of bills to provide for elective nonvoting representation in the House of Representatives for the Virgin Islands and Guam; and another group concerning the Antarctic programs of the United States.

I have mentioned the President's veto of the lead and zinc bill. Our Mines and Mining Subcommittee spent a great deal of time examining the merits of and perfecting this bill. Perhaps a different approach will have to be taken in the future but I am confident that the basic problem which engendered its introduction and the introduction of other measures in the minerals field—for instance, the bills dealing with beryl, cobalt, and columbium-tantalum on which we also had hearings—are not dead and will be with us for further consideration in the future.

Our Public Lands Subcommittee spent a considerable amount of time and energy on bills to modernize the townsite laws, to provide for the classification and disposition of public lands suitable for urban and business sites, and to curb the activities of so-called land locators. Time also was spent on bills to establish the Oregon Dunes and Cape Cod National Seashore Areas, the Chesapeake and Ohio National Historical Park, the Hubbell Trading Post and Fort Bowie National Historic Sites in Arizona, the Fort Toulouse National Historic Site in Alabama, and other similar units of the national park system. Hearings were also held on a series of major bills to provide for payments in lieu of taxes and special assessments on certain classes of Federal property.

The volume of legislative oversight work which is imposed on or undertaken by the Committee on Interior and Insular Affairs continues to grow and to consume more and more of its time. I can report, under this category of our workload, that the committee examined 12 applications for loans under the Small Reclamation Project Act, 4 findings of the Secretary of the Interior with respect

to repayment arrangements under the Rehabilitation and Betterment Act, 3 contracts under the Drainage and Minor Construction Act, 4 permits of the Department of the Interior for nonexclusive military use of public lands in Alaska, 14 proposed withdrawals or reservations of public land for nonmilitary purposes, and 5 concessionaire contracts under the national park system.

I mentioned at the beginning of this review the great assistance I have had from the subcommittee chairmen, the ranking minority member and other members of the committee. I cannot close, and I would not wish to close, without mentioning also the invaluable service rendered by the four full-time members of the professional staff, by all six full-time members of the administrative and clerical staff, and by former Judge Paul D. Shriver and Mr. Robert J. Hunter, who served for short periods as special consultants on territorial matters, and Mr. Paul Tyler, who served as a special consultant on minerals matters for several months.

The House Rules Committee—Minority Abuse of Power

EXTENSION OF REMARKS

OF

HON. LEE METCALF

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. METCALF. Mr. Speaker, it is with genuine regret that I leave the House of Representatives after having the privilege to serve here for four consecutive terms.

In departing I call attention to the need for procedural reform in the House rules, the need for which has been so dramatically demonstrated here during the past several months. This is not a new subject nor one for which there is any simple cure.

While I will not be a Member of this distinguished body in the next Congress, I sincerely hope that those of my colleagues who will be privileged to serve in the 87th Congress will take affirmative action to restore true democratic procedures to the House of Representatives. Only in this way can responsible government for all Americans ultimately prevail over narrow sectional and economic abuses of power in the hands of a few.

Under leave to extend my remarks, I include the July 2, 1960, and August 26, 1960, news releases of my friend and colleague, the gentleman from New Jersey [Mr. THOMPSON], an article on the Rules Committee from the June 28, 1960, Wall Street Journal, and another article from the August 30, 1960, issue of the same publication on this subject. The releases and articles follow:

STATEMENT OF HON. FRANK THOMPSON, JR., DEMOCRAT OF NEW JERSEY, JULY 2, 1960

With the Democratic Convention only a few days away and with many major bills still awaiting final action, the Congress last Saturday voted to recess until August 15. The more optimistic Members hope that we can return after the two conventions and complete action on important legislation.

My personal feeling is that a session following the nomination of both presidential candidates will result in a political carnival. I voted for the recess resolution, however, because it would be completely impossible to conclude all of the unfinished business before convention time. Adjournment sine die would have meant the death of school construction, housing, medical care, social security, minimum wage, situs picketing, and other important matters.

I have great reservations for several reasons about the session following the conventions, the most important of which is that an effort to make a good political record may result in the passage of legislation consisting of nothing more than a title. A bill entitled "School Construction" which would build no schools would be nothing but a cruel hoax. For instance, if we were to pass the administration's 1959 "do it yourself through loans" school bill, it would be an utterly worthless act. Political pundits are giving all sorts of reasons for the action of the Congress in voting a recess. It seems to me to be true that such actions, leaving essential legislation hanging in the balance, could provide a political tool for some of the presidential hopefuls. "Nominate me and you'll get a bill." Or, "Fail to nominate me, and you'll get no bill." This reasoning, however, is awfully farfetched, especially since the use of a bludgeon would be irresponsible and easily detected.

The real reason for the need of the Congress to return after the conventions is the House Rules Committee. Six willful men, including two Southern Democrats and four conservative Republicans, have arrogated to themselves the power of determining what bills the House shall or shall not consider. They have delayed every major bill of the 86th Congress, and, although they have granted rules in a number of cases, few pieces of important legislation have been given a rule, and this has been done only after interminable delays and in the face of certain defeat. The Rules Committee's delaying actions have created a tremendous backlog of legislation which cannot be acted upon in a few days.

A classic example of the Rules Committee's arrogance and its effect are provided by the school construction legislation, which has passed both Houses, although in different form. Since each body passed a different version, a joint conference is necessary to work out the differences. Under the rules of the House a bill may be sent to conference only by unanimous consent of all Members, or by a rule. If any Member objects, a rule must be obtained. An objection to the school bill was made by Representative JOHANSEN, Republican, of Michigan, and it was, therefore, necessary for it to go to the Rules Committee. It was expected that since it had received a rule earlier (after a 2-month delay) to bring it to the House floor, a rule would be granted by the Rules Committee for a conference. This time, Representative CARROLL REECE, Republican, of Tennessee, who had voted earlier for the rule to debate, switched his position and voted "Nay." REECE was joined by the other members of the Southern-Republican coalition in refusing to let the bill go to conference, so it remains stuck in the Rules Committee.

Twelve years ago, during the 81st Congress, the rules of the House were changed to require the Rules Committee to clear within 21 days bills approved by the legislative committees. In 1951, however, the coalition of Southern Democrats and Northern Republicans repealed the 21-day rule, restoring its tremendous power to the Rules Committee. Last year a fight was brewing to restore the 21-day rule, but those who favored this action withdrew when Speaker RAYBURN suggested to them that they did not have enough votes to win. He also told them that he would make sure that all major bills reported by legislative committees would not be held up in the Rules Committee. It is apparent now that the Speaker cannot obtain the full cooperation of the committee. It is certain that a fight to change the rules will be pushed to a decision next year.

If I am fortunate enough to be elected to the next Congress, I shall join the fight to change the rules. It is an outrage that a committee which was established in 1910 for the specific purpose of making the House procedures more democratic should now become as arbitrary and arrogant as was old Speaker Joe Cannon. My views are shared by a great majority of my colleagues of the Democratic Party. With the help of liberal Republicans, the rules can be changed, and it will be in the national interest to do so. The battle will take place—with or without Republican help—and I feel that it will be won.

STATEMENT OF HON. FRANK THOMPSON, JR., DEMOCRAT, OF NEW JERSEY, AUGUST 26, 1960

Although the Congress is still in session, and will be for several more days, it is now apparent that all but the faintest hope for housing and school construction legislation has disappeared. To say that I am tremendously disappointed is an understatement. My disappointment is shared by a great many others here, including Senator KENNEDY.

The fate suffered by these two bills, and many others, deserves examination. It is not enough to say that the Democrats have overwhelming majorities in both Houses. On the other hand, it is not enough to say it is the fault of the Republicans.

Since 1937 the chief instrument of obstruction in the House has been the coalition between the Republicans and most of the Southern Democrats, and this coalition is directly responsible for the failure of housing and school legislation. It is also responsible for the miserably inadequate minimum wage and medical care bills. In each of these fields you will remember the Senate passed worthy bills only to have them slaughtered in the House by the coalition.

The bald facts are that the Rules Committee of the House, under the leadership of Democrat HOWARD SMITH, of Virginia, runs the entire Congress of the United States. SMITH, in daily collaboration with Republican Leader CHARLES HALLECK, keeps the combination together by which the entire House is denied the right to vote on legislation. The Rules Committee is composed of 12 members, 6 conservatives who work in close coalition with SMITH, and 6 liberals or moderates. Since a tie vote is equivalent to "no," SMITH's boys can effectively block liberal legislation from consideration by the entire House membership. An even-number makeup defies both good logic and rules. Much is written about Senate rule 22, under which filibusters are possible. The power of the House Rules Committee, and it trespasses on the legislative process, is in my opinion, far more evil than the operation of the Senate rule, for at least the Senate can get its legislation before the whole body.

On the first day of the next Congress a determined fight will be made to amend the rules of the House so that the outrageous domination of the Congress by the Rules Committee will be ended. I predict the success of the effort, for more than ever before in recent years the Members resent the two-man domination.

Even a casual student of the legislative process knows that the House is about evenly

divided—with 140 Republicans and 70 Southern Democrats on one side and the remaining Members on the other. The balance of power in most cases is wielded by the six obstructionist votes on the Rules Committee which denies the opportunity to debate and vote on issues of importance to the entire Nation.

The school construction legislation was passed by the Senate some months ago. Subsequently a more moderate bill which I introduced passed the House. This was the first time in history that the House passed a school construction bill. Since there were two versions, the differences could be worked out only by a joint House-Senate conference. To get to a conference, a rule from the Rules Committee is necessary. The committee, its six-man coalition operating smoothly, refused to allow a conference even though a majority of the Members of both the House and Senate had voted in favor of the legislation.

In the case of the Housing bill, the legislative committee approved legislation and sent it to the Rules Committee to be sent to the floor for debate. In their typical cavalier manner, SMITH and his pals refused even to consider the legislation.

As a final note to the school bill's fate, it should be pointed out that two-thirds of the obstructionist votes against it were cast by the four Republicans who voted with Democrats SMITH and COLMER of Mississippi. Therein lies the blame. House Republican Leader HALLECK and Vice President NIXON together could not produce the one Republican vote needed to free the bill.

[From the Wall Street Journal, June 28, 1960]

CONSERVATIVE CITADEL: HOUSE RULES GROUP, KEY CURB ON "LIBERALS," FACES HEAVIER ASSAULT—"LIBERALS" AIM TO ALTER ITS MAKEUP OR CLIP ITS POWER TO BOTTLE UP LEGISLATION—MR. SMITH AND HIS SICK COW

(By Paul Duke)

WASHINGTON.—One of the two great dams which conservatives have long counted on to shield the Nation from a flood of "liberal" legislation is taking a pounding—and could crack open in 1961.

It's the Rules Committee of the House of Representatives, the oldest and most powerful of all congressional committees. It's led by a courtly 77-year-old Virginia Democrat, HOWARD W. SMITH, a farmer, banker, and ex-judge who only a few years ago gave up wearing wing collars. Mr. SMITH is often accused of defying the will of Congress' heavily Democratic majority; he won't even take orders from House Speaker SAM RAYBURN. The Rules Committee, if it pleases, can usually hold back a bill by just refusing to give it the "rule" needed to make it the business of the House. This year incensed "liberals" shoved some key bills over its spillways and dug a few bypass channels around it. Next year they hope to dynamite it.

The other great dam, of course, is the Presidential veto, which Ike has used 160-odd times during his 2 administrations. Since it could be demolished as a conservative dam by election of a "liberal" Democrat this fall, the Rules Committee looks all the more crucial for the future.

EDUCATION, HOUSING, PICKETS

At this moment, the Rules Committee dam may not seem weak. Not only is it endangering a House-Senate compromise on aid to education, but the group is sitting on three other pieces of liberal-backed legislation—bills to boost the minimum wage and broaden its coverage, to pump up Federal housing benefits, and to ease picketing restrictions on building unions. This last bill, supported by the Eisenhower administration, has been stuck in the committee for 4 months. And one or all of these measures may languish right where they are.

The committee stands a good chance to bury such bills because its power is reaching a seasonal peak. With less than 2 weeks left until Congress' early July adjournment for the political conventions, there's little time in which to push bills through or around a reluctant Rules Committee.

The group's usual maneuver is simply inaction. Though it has eight Democrats and four Republicans, the group is philosophically split down the middle:

CONSERVATIVE

HOWARD SMITH, Democrat, of Virginia.
WILLIAM COLMER, Democrat, of Mississippi.
LEO ALLEN, Republican, of Illinois.
CLARENCE BROWN, Republican, of Ohio.
CARROLL REECE, Republican, of Tennessee.
HAMER BUDGE, Republican, of Idaho.

LIBERAL OR MODERATE

RAY MADDEN, Democrat, of Indiana.
JAMES DELANEY, Democrat, of New York.
JAMES TRIMBLE, Democrat, of Arkansas.
HOMER THORNBERRY, Democrat, of Texas.
RICHARD BOLLING, Democrat, of Missouri.
THOMAS O'NEILL, Democrat, of Massachusetts.

Tie votes pigeonhole a bill. Beyond this, Chairman SMITH has special power. He can decline to call committee meetings, decide which bills are to be considered, and drag out deliberations on measures he opposes. If he thinks it necessary now to dodge pressure, some colleagues suspect, Mr. SMITH may fall back on tactics not yet used this year.

He might, for instance, take a vacation amid the preadjournment rush, and so keep his committee from meeting to clear legislation. At crucial moments in the past, he has found it necessary to tend a sick cow on his Virginia farm. Three years ago, he headed home to see about a burned-down barn, at the very time when pressure was mounting on the committee to release a civil rights bill. Now, says a fellow committeeman, "he'd love to sit on some of those pet bills."

The liberals already have two methods for bypassing the Rules Committee, and they've used both of them this year. One involves getting 219 Members of the House—a majority—to sign a petition to discharge a bill from the Rules Committee. The other is a device known as Calendar Wednesday. This lets the chairman of a legislative committee call up on a given Wednesday bills that have been delayed in the Rules Committee.

But the liberals are not content with these parliamentary devices. They're determined to clip the committee's power or alter its conservative position when the 87th Congress convenes in January. Labor's lobbyists, who have waxed more and more impatient with the committee, will throw their weight behind the drive. The uprising could pose the most serious threat in a decade to the power of the Republican-Southern Democrat coalition to sidetrack legislation.

"Changing the makeup of the Rules Committee is certain to be a major liberal objective in 1961," declares Representative LEE METCALF, of Montana, chief of the liberal Democratic bloc in the House.

BANKING ON HOLDOVERS

It's true Mr. METCALF won't be on hand for next year's fight; he's running for the Senate. Some other liberal lights will be gone from the House next year, and the rebels' strength will rise or fall with November's elections. The Democrats are expected to retain a majority, but the size of that majority will influence the course of the revolt. The liberals are counting on likely holdovers to form a 1961 spearhead. It may include, among others, Representative FRANK THOMPSON, of New Jersey, Arizona's STEWART UDALL, and CHET HOLIFIELD and JAMES ROOSEVELT, of California.

It makes no difference that none of today's rebels are Rules Committee members; changes would come through vote of the entire House on revising its rules, as can be done at the opening of each new Congress. And, says Representative THOMPSON, "I think we can do it if we hold our own in the fall elections."

The most extreme step, perhaps, would be to reconstitute the Rules group as a majority-party steering unit, something like the Senate Democratic Policy Committee, to reflect the will of House Democrats generally. Membership would be restricted to the party in control of the House, and members would be elected at the start of each session. At present, Democratic committee members are appointed by Democratic leaders and the traditional seniority system decrees that members retain their places if they wish.

Another talked of possibility is a return to the 21-day rule adopted for 2 years the last time there was a revolt, after Democrats surged to control of the House in the 1948 elections. Under this regulation, the chairman of a legislative committee could call up directly on the House floor any measure bottled up by the Rules Committee for at least 21 days.

Other moves seem more likely now, however. The rebels talk of giving the committee a 13th member, a liberal Democrat, to put the conservatives on the short end of a 7-to-6 count. Or the 8-to-4 Democratic-Republican ratio might be shifted to 9 to 3, with the additional Democrat being picked from the liberals' ranks. Or Speaker RAYBURN could be made an ex officio member of the committee with power to vote in deadlocks. Or the rules could be changed so that a tie vote would send a bill to the floor instead of keeping it in committee.

A more peaceful means of altering the committee might actually be available, if the critics were only patient enough. Both of its two most conservative Democrats, Chairman SMITH and 70-year-old Representative WILLIAM COLMER, of Mississippi, are approaching eventual retirement, and could be succeeded by men of other views. As it happens, the committee's ranking Republican, 61-year-old Representative LEO ALLEN, of Illinois, is quitting after this year, but probably will be replaced by some one equally conservative.

But the liberals are intent on action no later than next year. Their chances for success are iffy—and partly for little-recognized reasons. Many Congressmen actually welcome the Rules Committee as a shield against pressure groups. Often lawmakers, badgered by lobbyists, vote for bills in legislative committees knowing full well they can be quietly buried in the Rules Committee.

BOTTLING UP FAIR TRADE BILL

"I'd bet 90 percent of the House is glad they're bottling up the fair trade bill," declares a Midwest Republican. This measure, to permit manufacturers to set minimum retail prices on national brand products, cleared the House Banking Committee last year, but has been reposing ever since in the Rules Committee. Many members frankly don't like the bill, but might feel forced to vote for it because of pressure from small retailers back home.

For many Republicans, too, the Rules Committee serves as a handy whipping boy. When the committee blocks an administration-backed measure, as it did the civil rights bill for more than 2 months this year, the GOP can accuse the Democratic-controlled Congress of thwarting action—and thus can build up a potential campaign issue. Even liberal Republicans are not red-hot for Rules Committee changes.

On strictly philosophical grounds, the GOP-Southern Democrat coalition is sure to wage a fierce fight in opposition to the drive. "These radicals are bad enough now," complains a top Republican leader, "but without the Rules Committee to throw a few roadblocks they'd be uncontrollable."

So the liberals, for any chance of success, must roughly hold their own in the fall elections; if the Democratic majority is cut sharply or eliminated, the drive would flop. The Democrats now hold 280 seats and the Republicans 152, with 5 seats vacant.

To muster a 219 vote majority for a January showdown on the House floor, the liberals would almost surely have to draw the support of Democratic moderates and at least a few Southern Democrats; only about 170 of the incumbent Democrats can be considered down-the-line liberals.

MR. SAM HAS HAD ENOUGH

The rebels are hoping, too, for the support of Speaker RAYBURN, known to be miffed at the Rules Committee's cold-shoulder treatment of several leadership-backed bills this session. "I think Mr. SAM has about had enough," confides an associate of the Speaker. The liberals already are sounding out Mr. RAYBURN on the possibilities for a change.

The revolt would be helped along by election of a Democratic President clearly bent on passage of New Dealish legislation—notably Adlai Stevenson or Senator JOHN KENNEDY. A President who threw his power behind a drive to change the Rules Committee could use patronage to swing the doubtful votes into line. "With an armtwister in the White House," says an Eastern Democrat, "we could really go to town."

In this 86th Congress that opened for business in January of last year, the Rules Committee turned more conservative in hue while Congress in general became more "liberal." Two Republican committee members who left this House, Representative Hugh Scott, of Pennsylvania, and Henry Latham, of New York, were replaced by more conservative lawmakers, Representative CARROLL REECE, of Tennessee, and HAMER BUDGE, of Idaho.

Thus, despite growing liberal pressure, the committee has at least been able to delay or tone down important liberal legislation. It sat on the aid-to-depressed-areas bill for a year until bypassed this spring; the final outcome was a Presidential veto, which liberals hope to exploit in campaign oratory. The committee has helped prevent passage of an aid-to-education measure until now. And by bottling up a $1.4 billion housing bill, it may force Congress to adopt a milder housing measure.

The committee has apparently buried some minor measures completely, incurring enemies here and there. Kentucky, Pennsylvania, and West Virginia Congressmen are irked because the committee wouldn't sanction a study aimed at finding new uses for coal. The committee's rejection of a bill to continue a Federal program to assist rural libraries infuriated some liberals.

"Here we are in the third year of the space age and the Rules Committee goes on record against increasing man's knowledge," says liberal Democratic Congresswoman GREEN of Oregon, shaking her head.

Nonetheless, the liberals have handed the committee an almost unparalleled series of rebuffs this year. After over 2 months' delay, the committee finally gave a go-ahead to the bill to protect Negro voting rights. By then, Representative ROOSEVELT and Brooklyn's Representative EMANUEL CELLER had rounded up the signatures of 211 House Members on a petition to discharge the bill from the Rules Committee—nearly the 219-vote majority needed for success.

The committee suffered another setback when it refused to clear the bill to raise pay of Government employees. Congressmen of almost every political hue rebelled, and the necessary 219 signatures on a discharge petition were collected in a single day. "It's ridiculous to hold back a bill like this," declares a Texas conservative. "The committee was just asking to have its ears pinned back."

When the Rules Committee refused to bow to Speaker RAYBURN'S wishes for clearance of the depressed areas bill, Democrats routed it to the floor anyway by the Calendar Wednesday device. Though this tactic can be fought by stalling, liberals made the maneuver work for the first time since 1956.

[From the Wall Street Journal, Aug. 30, 1960]

KENNEDY IS EXPECTED TO SUPPORT LIBERAL DRIVE TO CURB HOUSE RULES COMMITTEE

(By Paul Duke)

WASHINGTON.—Democratic Presidential Nominee KENNEDY is expected to throw his political weight behind a drive to curb the power of the conservative-controlled House Rules Committee.

Democratic sources said the Massachusetts Senator has promised, before Congress adjourns, to announce his support of proposals to revamp the 12-man committee to make it easier to pass liberal-backed legislation. There is also a possibility he will join the liberal chorus advocating changes in Senate rules to make it harder for Southerners to filibuster against civil rights legislation.

Representative METCALF, of Montana, leader of the liberal Democratic bloc in the House, recently conferred with Mr. KENNEDY and told him it was imperative that he back the campaign to shake up the Rules Committee. He said such support is necessary to help liberal Democratic Congressmen in their reelection campaigns and to give stronger impetus to the drive to change the Rules Committee's operating procedure or numerical makeup when the 87th Congress convenes in January. The Democratic platform advocates changes in congressional procedures to make it easier to pass liberal legislation.

The Rules Committee's bottling up of major bills pushed by the Democratic leadership this session has also convinced Speaker RAYBURN, Democrat, of Texas, that changes must be made. The House Democratic leader pounded his fist on the desk during a recent conference on housing legislation and angrily asserted, "I'll never let the Rules Committee get away from my control again."

All major or controversial legislation must be approved by the Rules Committee before it can reach the floor for action. Since 1937, the conservative members of the committee have held the upper hand and in many instances have forced Democratic leaders to accept measures far narrower than they would like. At present, the committee has eight Democrats and four Republicans. But two of the Democrats, Chairman SMITH, of Virginia, and Representative COLMER, of Mississippi, frequently team up with the four GOP members to form a conservative coalition against the six moderate and liberal Democrats. Because tie votes can prevent legislation from reaching the floor, the six conservatives thus exercise veto power over the flow of measures from the committee.

Liberal Democrats have felt especially frustrated because the coalition of Southern Democrats and Republicans has been able to block many of their pet bills this session despite the overwhelming Democratic majority in the House. For this reason, they are determined to make a major fight at the outset of 1961 to wrest control of the Rules Committee from the conservatives. During this session, the committee has impeded or blocked legislation dealing with housing, aid to education, civil rights, depressed areas, and Federal pay raises.

Endorsement by Senator KENNEDY of the assault on the Rules Committee almost certainly would add to the problems the 43-year-old Democratic candidate faces in carrying the South in November. It could well mean new defections by conservative Democrats who would prefer to sit out the campaign rather than endorse the Kennedy-Johnson ticket. For example, it probably would rule out completely any slim hope KENNEDY supporters may still hold for gaining the backing of Virginia's Senator BYRD. And similar reluctance probably would come from Mr. SMITH, who campaigned actively for the Democratic national ticket in 1952 and 1956.

Liberal Democrats believe they have the strength to revise the Rules Committee if they can hold their own in the coming elections. Of the 280 House Democrats, all but about 90 come from Northern, Western, and Border States, and the liberals believe they'll be able to control the Democratic caucus next January. If so, they hope to force a majority vote for the election of Rules Committee members rather than continue the time-honored seniority system of letting Members continue from session to session without a formal vote. The liberal strategy is aimed at voting Mr. COLMER out and replacing him with a liberal Democrat on the ground that he deserted the party by indicating sympathy for the independent elector plan in Mississippi.

Other changes are possible, too. One plan would revise the makeup of the Rules Committee to nine Democrats and three Republicans, with the extra Democrat coming from the liberal ranks. Another proposal would count tie votes as affirmative votes, permitting bills to go to the floor. A third strategy would revise a rule tried briefly in 1950 under which any bill remaining before the committee 21 days could automatically be brought to the floor. All of these proposals, however, would require approval by the full House and might be more difficult to accomplish than the suggestion that Rules Committee Democrats be elected in annual party caucuses.

Legislative Record of John R. Foley, U.S. Representative, 6th District of Maryland—86th Congress

EXTENSION OF REMARKS

OF

HON. JOHN R. FOLEY

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. FOLEY. Mr. Speaker, it is customary for the Congressman from Maryland's Sixth District to place in the CONGRESSIONAL RECORD his voting and attendance record. This is done to give to each interested constituent an opportunity to study his Congressman's record.

Printed first below is my record in the 1st session of the 86th Congress. This shows my vote is recorded in 85 of the 87 total rollcall votes. The two nonvoting instances are explained in the footnotes. The total voting percentage is 97.7 percent. In the 89 quorum calls, I was present for 85. The absences are explained in the footnotes. The total percentage of quorum calls answered is 95.5 percent.

1ST SESS., 86TH CONG.

Voting and attendance record of Representative JOHN R. FOLEY, 6th District, Maryland

Roll-call No.	Date, 1959	Measure, question, and result	Vote
1	Jan. 7	Quorum call	Present.
2	Jan. 7	To elect Speaker of House. (RAYBURN 281 to HALLECK 143)	Rayburn.
3	Feb. 4	Quorum call	Present.
4	Feb. 4	H.R. 2256, to recommit motion designed to delete additional funds for direct housing loans. (Defeated 123 to 277)	No.
5	Feb. 4	H.R. 2256, to provide additional funds for direct loans, to remove certain requirements with respect to the rate of interest on guaranteed loans. (Passed 310 to 89.)	Yes.
6	Feb. 5	H.R. 2260, to extend until July 4, 1963, the induction provisions of the Universal Military Training and Service Act. (Passed 381 to 20)	Yes.
7	Mar. 4	Quorum call	Present.
8	Mar. 5	Quorum call	Present.
9	Mar. 11	H.R. 4221, to adopt H. Res. 205, the open rule providing 6 hours of debate on measure to provide for the admission of the State of Hawaii. (Passed 337 to 69.)	Yes.
10	Mar. 1	Quorum call	Present.
11	Mar. 12	S. 50 (substituted for H.R. 4221), to provide for admission of the State of Hawaii into the Union. (Passed 323 to 89)	Yes.
12	Mar. 12	Quorum call	Present.
13	Mar. 13	H.R. 1, to require a study to be conducted of the effect of increasing the diversion of water from Lake Michigan into Illinois Waterway for navigation. (Passed 238 to 142.)	Yes.
14	Mar. 13	S. 79, to amend Federal Food and Drug and Cosmetic Act to permit the continuance of established coloring practices in orange industry. (Passed 213 to 94.)	No.
15	Mar. 16	Quorum call	Present.
16	Mar. 17	Quorum call	Present.
17	Mar. 18	Quorum call	Present.
18	Mar. 19	Quorum call	Absent.[1]
19	Mar. 19	H.R. 1011, an amendment to reduce from $297,000,000 to $200,000,000 the amount of Federal aid for airports over a 4-year period. (Defeated 194 to 214.)	No.
20	Mar. 19	H.R. 1011, an amendment to require annual appropriations for Federal aid for airports. (Defeated 191 to 216)	No.
21	Mar. 19	H.R. 1011 (S. 1), to authorize Federal aid for airports totaling $297,000,000 for a 4-year period. (Passed 272 to 134)	Yes.
22	Mar. 23	H.R. 2575, to authorize the appropriation of $500,000 for the 3d pan-American games to be held in Chicago. (Passed 257 to 109)	Yes.
23	Mar. 24	Quorum call	Present.
24	Mar. 25	H.R. 4452 (S. 1094), to amend the Bretton Woods Agreements Act to increase the U.S. quota in the International Monetary Fund and its subscription to the International Bank for Reconstruction and Development. (Passed 315 to 57.)	Yes.
25	Apr. 14	Quorum call	Present.
26	Apr. 14	Quorum call	Present.
27	Apr. 15	Quorum call	Present.
28	Apr. 15	H.R. 1321, to amend Reorganization Plan No. 11 of 1939 to transfer from Secretary of Agriculture to REA Administration the authority of approving or rejecting rural electrification loans. (Passed 234 to 131.)	Not voting.[2]
29	Apr. 16	Quorum call	Present.
30	Apr. 16	H.R. 5674, to authorize certain construction at military installations. (Passed 377 to 7)	Yes.
31	Apr. 29	Quorum call	Present.
32	Apr. 29	Quorum call	Present.
33	Apr. 30	Quorum call	Present.
34	Apr. 30	To override President Eisenhower's veto of Rural Electrification Administration bill. (Defeated 280 to 146; ⅔ majority required)	Yes.
35	Apr. 30	Quorum call	Present.
36	May 4	Quorum call	Present.
37	May 6	Quorum call	Present.
38	May 7	Quorum call	Present.
39	May 7	H.R. 3460, to recommit to committee, bill to amend TVA Act of 1933 relative to financing its power program with proceeds from revenue bonds. (Defeated 182 to 23.)	No.
40	May 7	H.R. 3460, to amend TVA Act of 1933 relative to financing its power program with proceeds from revenue bonds. (Passed 245 to 170)	Yes.
41	May 11	Quorum call	Present.
42	May 18	Quorum call	Present.
43	May 18	Quorum call	Present.
44	May 19	Quorum call	Present.
45	May 19	Quorum call	Present.
46	May 20	H.R. 7007, to suspend rules and pass bill to authorize appropriations to the National Aeronautics and Space Administration for fiscal year 1960. (Passed 294 to 128.)	Yes.
47	May 20	To recommit Department of Agriculture appropriation bill in order to insert provision limiting farm price-support loans to $50,000. (Passed 262 to 105.)	Yes.
48	May 21	Quorum call	Present.
49	May 21	S. 57 (Housing Act of 1959), to adopt Thomas amendment to require direct congressional appropriation of funds in lieu of present Treasury authorization method of financing. (Passed 222 to 201.)	No.
50	May 21	S. 57, on motion to recommit bill and insert provisions of H.R. 7117, for the text of the committee substitute amendment. (Defeated 189 to 233.)	No.
51	May 21	S. 57, final passage	Yes.
52	May 25	Quorum call	Present.
53	May 26	Quorum call	Present.
54	May 26	Quorum call	Present.
55	May 27	Quorum call	Present.
56	May 27	H.R. 7176, on recommittal motion to insert language limiting President's handling of emergency fund. (Defeated 171 to 229)	Yes.
57	May 27	H.R. 7343, to increase appropriations of Department of Justice by $2,000,000. (Passed 266 to 133)	Yes.
58	May 27	H.R. 7086, on motion to recommit bill to limit the extension of Renegotiation Act to 27 months. (Defeated 153 to 264)	No.
59	May 27	H.R. 7086, to amend and extend for 4 years the Renegotiation Act of 1951. (Passed 375 to 7)	Yes.
60	May 27	Quorum call	Present.
61	June 2	Quorum call	Present.
62	June 2	Quorum call	Present.
63	June 3	Quorum call	Present.
64	June 3	H.R. 7454, on final passage of $38,400,000 defense appropriation bill. (Passed 393 to 3)	Yes.
65	June 4	Quorum call	Present.
66	June 5	Quorum call	Present.
67	June 8	Quorum call	Present.
68	June 9	H.R. 3610, to recommit the bill in order to add an amendment requiring States to match the Federal grants for construction of sewage treatment works. (Defeated 156 to 240.)	No.
69	June 9	H.R. 3610, on final passage of the Federal Water Pollution Control Act. (Passed 254 to 142)	Yes.
70	June 9	H.R. 7590, to add to public works appropriations bill the sum of $500,000 for water lily eradication program. (Passed 199 to 198.)	Yes.
71	June 9	H.R. 7509, to add to public works appropriations bill the sum of $75,000 for planning of a river project in Wisconsin. (Defeated 192 to 203)	Yes.
72	June 9	H.R. 7509, to recommit the public works appropriations bill in order to reduce by 5 percent each construction item of $5 million or more. (Defeated 149 to 251.)	No.
73	June 9	H.R. 7509, on final passage of the public works appropriations bill. (Passed 380 to 20)	Yes.
74	June 10	Quorum call	Present.
75	June 10	S. 1901, to recommit the tobacco price support bill in order to freeze price supports at 1958 level for next 3 years. (Defeated 138 to 260)	No.
76	June 10	S. 1901, to amend sec. 101(c) of the Agricultural Act of 1949 and of 1945 to stabilize and protect the level of price support for tobacco. (Passed 250 to 149.)	Yes.
77	June 11	Quorum call	Present.
78	June 12	H.R. 7246, on recommittal motion to insert provisions of Belcher amendment (H.R. 7611) for text of H.R. 7246, to amend existing laws with respect to acreage allotments and price supports for wheat for 1960–61. (Defeated 141 to 224.)	No.
79	June 12	H.R. 7246, to amend existing laws with respect to acreage allotments and price supports for wheat for 1960–61. (Passed 188 to 177)	Yes.
80	June 12	Quorum call	Present.
81	June 12	H.R. 6596, to encourage and stimulate the production and conservation of coal in the United States through research and development by creating a Coal Research and Development Commission. (Passed 251 to 54.)	Yes.
82	June 15	Quorum call	Present.
83	June 15	Quorum call	Present.

See footnotes at end of table.

1ST SESS., 86TH CONG.—Continued

Voting and attendance record of Representative JOHN R. FOLEY, 6th District, Maryland—Continued

Roll-call No.	Date, 1959	Measure, question, and result	Vote
84	June 15	H. Res. 293, to adopt the rule providing for the consideration of 4 hours of debate on, and the waiving of points of order against, H.R. 7500, to amend Mutual Security Act of 1954. (Passed 277 to 93.)	Yes.
85	June 16	Quorum call	Absent.[3]
86	June 16	Quorum call	Present.
87	June 16	Quorum call	Present.
88	June 16	Quorum call	Present.
89	June 17	Quorum call	Present.
90	June 18	Quorum call	Present.
91	June 18	S. 1968, on accepting conference report on bill to strengthen wheat marketing quota and price support program. (Defeated 202 to 215)	Yes.
92	June 18	H.R. 7500, to amend Mutual Security Act, as amended. (Passed 271 to 142)	Yes.
93	June 19	Quorum call	Present.
94	June 19	H.R. 7749, to increase amount of obligation issued under 2d Liberty Bond Act, which may be outstanding at any one time. (Passed 255 to 177.)	Yes.
95	June 22	Quorum call	Present.
96	June 22	H. Res. 288, to adopt rule providing for consideration and 5 hours' debate on H.R. 3 to establish rules of interpretation governing questions of the effect of acts of Congress on State laws. (Passed 233 to 116.)	No.
97	June 22	Quorum call	Present.
98	June 23	Quorum call	Present.
99	June 23	S. 57, to adopt conference report on Housing Act of 1959. (Passed 241 to 177)	Yes.
100	June 24	Quorum call	Present.
101	June 24	H.R. 3, on motion to recommit bill to establish rules of interpretation governing questions of the effect of acts of Congress on State laws. (Defeated 191 to 227.)	Yes.
102	June 24	H.R. 3, to establish rules of interpretation governing questions of the effect of acts of Congress on State laws. (Passed 225 to 192)	No.
103	June 29	Quorum call	Present.
104	June 30	Quorum call	Present.
105	June 30	H. Res. 294, to adopt rule for consideration of H.R. 5752 relating to observance of legal holidays by Federal employees. (Passed 339 to 42)	Yes.
106	June 30	Quorum call	Present.
107	July 1	On motion to recommit S. 1120, respecting reserves required to be maintained by member banks of the Federal Reserve System. (Defeated 60 to 309.)	Yes.
108	July 7	H. Res. 295, to disapprove Reorganization Plan No. 1 of 1959. (Passed 266 to 124)	Yes.
109	July 7	H.R. 4957, to recommit bill to amend United States Code to provide for admission of certain evidence and confessions. (Defeated 138 to 261)	No.
110	July 7	H.R. 4957, to amend United States Code to provide for admission of certain evidence and confessions. (Passed 262 to 138)	Yes.
111	July 20	Quorum call	Present.
112	July 21	Quorum call	Absent.[4]
113	July 22	On motion to adopt conference report on H.R. 7500 to amend further the Mutual Security Act of 1954 as amended. (Passed 257 to 153)	Yes.
114	July 23	Quorum call	Present.
115	July 23	H.R. 3460, on motion to order previous question on H. Res. 326, a resolution to agree to Senate amendments on H.R. 3460, the TVA financing bill. (Passed 244 to 166.)	No.
116	July 27	Quorum call	Present.
117	July 27	H.R. 7072, to provide for the participation of the United States in Inter-American Development Bank. (Passed 230 to 87)	Yes.
118	July 28	Quorum call	Present.
119	July 29	H.R. 8385, mutual security and related agencies appropriations bill. (Passed 279 to 136)	Yes.
120	July 30	Quorum call	Present.
121	July 31	Quorum call	Present.
122	Aug. 3	Quorum call	Present.

152	June 24	H.J. Res. 649 (S.J. Res. 41): On final passage of the International Health and Medical Research Act of 1960. (Passed 259 to 114)	Yes.
153	June 24	Quorum call	Present.
154	June 25	Quorum call	Present.
155	June 25	Quorum call	Present.
156	June 27	H.R. 8860 (with committee amendment), stabilize the mining of lead and zinc by small domestic producers on public, Indian, and other lands. (Passed 197 to 192.)	Yes.
157	June 27	H.R. 8697, amend the District of Columbia Redevelopment Act of 1945 with respect to the requirements for adoption of a redevelopment plan for a project area. (Passed 348 to 35.)	Yes.
158	June 28	Quorum call	Present.
159	June 28	Quorum call	Present.
160	June 28	Quorum call	Present.
161	June 28	Quorum call	Present.
162	June 29	H.R. 11001, provide for the participation of the United States in International Development Association without amendment. (Passed 249 to 158.)	Yes.
163	June 29	H.R. 7903 amend United States Code to extend the veterans' guaranteed and direct loan program for 2 years. (Passed 391 to 1)	Yes.
164	June 30	Quorum call	Present.
		H.R. 11998:	
165	June 30	On conference report making appropriations for Department of Defense for fiscal year 1961. (Passed 402 to 5)	Yes.
166	June 30	Quorum call	Present.
167	June 30	Quorum call	Present.
		H.R. 1267:	
168	June 30	On Kitchin amendment to replace text of bill with language of H.R. 12853 (to amend the Fair Labor Standards Act of 1938 as amended). (Passed 211 to 203.)	No.
169	June 30	H.R. 12677, amend Fair Labor Standards Act of 1938 as amended to provide coverage for employees of interstate retail enterprises and to increase minimum wages under act to $1.15. (Passed 341 to 72.)	Yes.
170	June 30	H.R. 12311, extend for 1 year the Sugar Act of 1948 as amended. (Passed 390 to 0)	Yes.
		H.R. 9883 (adjust rates of basic compensation of certain Federal employees):	
171	July 1	On motion to override President's veto. (Passed 345 to 69)	Yes.
172	July 1	Quorum call	Present.
173	July 1	Quorum call	Present.
174	July 1	Quorum call	Present.
		H.R. 8665:	
175	July 1	On motion to recommit to committee bill to establish a memorial to Theodore Roosevelt in the National Capital. (Defeated 50 to 308)	No.
176	July 2	Quorum call	Present.
177	July 2	H. Res. 596, providing for House consideration of Senate amendments to H.R. 12740, supplemental appropriation bills for 1961. (Passed 291 to 79.)	Yes.
		H. Res. 596:	
178	July 2	On agreeing to the resolution providing for consideration of Senate amendment to H.R. 12740, supplemental appropriation bill. (Passed 257 to 109.)	Yes.
179	July 2	H.R. 2467, adopt committee amendment that supplied new text of bill to authorize reimbursement of owners and tenants of land acquired by Federal Aviation Agency for Chantilly relocation. (Passed 182 to 166.)	Yes.
180	July 2	H.R. 2467, authorize the reimbursement of owners and tenants of land acquired by Federal Aviation Agency for their moving expense in Chantilly relocation. (Passed 182 to 167.)	Yes.
181	Aug. 15	Quorum call	Present.
182	Aug. 17	Quorum call	Present.
183	Aug. 22	Quorum call	Present.
184	Aug. 22	H.R. 12753, amend the Subversive Activities Control Act relative to registration of foreign agents' disseminating political propaganda in United States. (Passed 395 to 3.)	Yes.
185	Aug. 22	H.R. 5383, clarify status of faculty and administrative staff at U.S. Merchant Marine Academy. (Passed 291 to 90)	Yes.
		H.R. 9866:	
186	Aug. 22	On motion to suspend rules and pass bill to establish Federal agriculture service to Guam. (Deferred 202 to 151.) (⅔ needed)	Yes.
187	Aug. 23	Quorum call	Present.
188	Aug. 23	H. Res. 607, contempt citation S. Sloan Colt. (Passed 270 to 124)	Yes.
189	Aug. 23	H. Res. 611, citing Consuelo Burgos De Saez Pagan for contempt of Congress. (Passed 382 to 0)	Yes.
190	Aug. 24	Quorum call	Present.
		H. Res. 587:	
191	Aug. 24	On rule to consider legislation favoring a convention of delegates from Atlantic democracies looking to greater cooperation and unity of purpose. (Passed 349 to 49.)	Yes.
192	Aug. 24	S.J. Res. 170, favoring a convention of delegates from Atlantic democracies looking to greater cooperation and unity of purpose. (Passed 288 to 103.)	Yes.
193	Aug. 25	Quorum call	Present.
194	Aug. 25	Quorum call	Present.
195	Aug. 26	Quorum call	Present.
196	Aug. 26	Quorum call	Present.
197	Aug. 26	H.R. 12580, adopt conference report on Social Security Act amendments, aged, medical care. (Passed 368 to 17)	Yes.
198	Aug. 31	Quorum call	Present.
199	Aug. 31	H.R. 13161, amendment to provide an additional $65,000,000 for defense support under mutual security program. (Passed 203 to 193)	Yes.
200	Aug. 31	H.R. 13161, amendment to provide an additional $26,000,000 of special assistance funds for mutual security program. (Defeated 176 to 216)	Yes.
201	Aug. 31	Quorum call	Present.
202	Aug. 31	Quorum call	Present.
203	Aug. 31	Quorum call	Present.
204	Aug. 31	Quorum call	Present.
205	Sept. 1	Quorum call	Present.
206	Sept. 1	Quorum call	Present.

[4] Gave principal address at the annual Maryland Convention of the Fraternal Order of Eagles at Hagerstown, Md.

Committee on Interstate and Foreign Commerce—Summary of Major Legislative Activity, 2d Session, 86th Congress

EXTENSION OF REMARKS
OF
HON. OREN HARRIS
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. HARRIS. Mr. Speaker, pursuant to section 136 of the Legislative Reorganization Act of 1946, Public Law 601, 79th Congress, and House Resolution 56, as amended, 86th Congress, I should like to submit a summary of the major legislative accomplishments of the Committee on Interstate and Foreign Commerce for the 2d session of the 86th Congress.

During the second session, 237 House bills and resolutions were referred to the committee. Total referrals for the Congress were 783 House bills and resolutions, and 42 Senate bills and resolutions. This year, 21 were enacted into public law; 2 were vetoed; 7 were approved by the House but not acted upon in the Senate, and 8 remained on the House Calendar upon the sine die adjournment of the 86th Congress.

As a result of the extensive investigation of the Special Subcommittee on Legislative Oversight into certain practices in the broadcasting industry, a bill which passed the Senate, S. 1898, limited to a revision of section 309 of the Communications Act, was substantially amended in committee to carry out several recommendations of the Legislative Oversight Subcommittee. The principal House amendments would provide the following:

Section 2 would repeal that portion of section 4(b) of the Communications Act which permits Commissioners to accept reasonable honorariums or compensation for the presentation or delivery of papers.

Section 3 would amend section 307 of the Communications Act to make clear that the Commission can and on appropriate occasion should issue broadcast station licenses for terms shorter than three years.

Section 5 would amend section 311 of the act to require applicants for most instruments of authorization in the broadcasting service to give notice of the filing of their applications, and if any such application is designated for hearing, to give notice of such hearing. The amendment would also authorize the Commission to hold hearings at a place in, or in the vicinity of, the principal area to be served by the station involved.

This section also deals with the problem of "payoffs" or compromise of applications. The amendment would make it unlawful, without approval of the Commission in any case where two or more applications for a construction permit for a broadcasting station are pending and only one application can be granted, for the applicants to effectuate an agreement whereby one or more such applicants withdraws his or their application or applications. The Commission may approve such agreement only if it determines that it is consistent with the public interest, convenience, or necessity.

Section 6 of the amended bill authorized the Commission to suspend station licenses for a period not in excess of 10 days. This amendment was later rejected by the Senate.

Section 7 authorized the Commission to impose forfeitures on broadcast stations of not to exceed $1,000 per day of certain violations. The Senate further amended this provision by providing that in no event shall the forfeiture exceed $10,000.

Section 8 requires announcements to be made with respect to certain matter which is broadcast. This amendment would also require the disclosure of certain payments made to persons other than station licensees for broadcast matter.

Section 9 of S. 1898, as amended, would prohibit certain practices in cases of contests of intellectual knowledge or skill. It is intended to curb the broadcast of deceptive contests or fixed quiz shows.

The amended bill was approved by the House and returned to the Senate for concurrence. The Senate then approved two additional amendments, the first of which was designed to eliminate completely the power to suspend licenses and to place a ceiling of $10,000 on any forfeiture imposed.

The second Senate amendment provides that the Notice of Apparent Liability, which the Commission is required to send to the licensee, shall set forth the date, facts, and nature of the act or omission with which the licensee is charged and shall specifically identify the particular provisions of law, rule, or regulation, or the particular provision of the license or cease-and-desist order involved so that the licensee is advised with respect to the violation with which he is charged.

The Senate amendment substitutes the words "willfully or repeatedly" for the words "negligently or intentionally" contained in the bill as passed by the House.

The House agreed to the further Senate amendments and the bill was approved by the President—Public Law 86–752. More detailed information on the amendments will be found in the committee report—House Report No. 1800, filed June 13, 1960.

Extensive hearings by the Special Subcommittee on Legislative Oversight of this committee over a period of some 2½ years also resulted in legislative recommendations contained in H.R. 12731, a bill to strengthen the independence and effectiveness of six of the Government's regulatory agencies which administer laws that are within the legislative jurisdiction of this committee—Civil Aeronautics Board, Federal Communications Commission, Federal Power Commission, Federal Trade Commission, Interstate Commerce Commission, and Securities and Exchange Commission.

The major provisions: First, prescribe congressional policies on the basis of which the agencies are directed to issue regulations to prevent the exercise of improper influence upon and improper conduct by members and employees of such agencies; second, require the establishment of proper procedures by such agencies for considering and acting on complaints with regard to such improper influence and improper conduct; third, protect the integrity of on-the-record proceedings through the imposition of criminal penalties for improper ex parte communications made in connection with such proceedings; fourth, strengthen existing requirements with respect to intra-agency separation of functions for the purpose of protecting the integrity of the decision-making processes in on-the-record proceedings; and, fifth, provide that agency members may be removed for neglect of duty or malfeasance in office, but for no other cause.

The bill was reported to the House on July 1 of this year—House Report No. 2070—but time for full discussion of the issues connected with this highly controversial and complex problem was not available in the remaining days of the session. A complete explanation of the bill is contained in the committee report.

A bill designed to accelerate the establishment of additional educational television stations by assisting the States through Federal matching grants in the construction of facilities was reported to the House—House Report No. 1466, filed April 7, 1960.

This committee held extensive hearings on several bills dealing with this subject in Washington, D.C., Birmingham, Ala., San Francisco, Calif., Denver, Colo., Tampa and Miami, Fla., Atlanta, Ga., Topeka, Kans., New Orleans, La., Raleigh, N.C., and Seattle, Wash.

The bill reported from the committee—H.R. 10609—failed to receive the approval of the House Rules Committee and was, therefore, not brought to the House floor for a vote.

Two other measures to amend the Communications Act were reported from the committee. One would grant the Federal Communications Commission discretion in waiving the operation requirement with respect to television booster stations—S. 1886, Public Law 86–609.

The other, S. 1740, was introduced at the request of the Federal Communications Commission and would serve to remove any questions concerning the Commission's regulatory authority over charges and services furnished by common carriers insofar as radio facilities are concerned. The committee and House approved a clarifying amendment—agreed to by the Federal Communications Commission—to more clearly carry out the legislative intent. The Senate concurred in the House amendment—Public Law 86–751.

A legislative proposal to provide for the comprehensive power resources of the United States was incorporated in H.R. 7201. Public hearings were held on this and similar bills by the Subcommittee on Communications and Power. Subsequently, the full committee reported the bill with two amendments—House Report No. 1414, filed March 23, 1960. The House took no final action on the measure prior to the adjournment of the Congress.

Early in the first session of the present Congress the administration proposed

amendments to the War Claims Act of 1948 to provide compensation to American war damage claimants in areas in Europe and Asia not heretofore covered—H.R. 2485. Categories of war claims authorized by this legislation would be paid out of proceeds resulting from the sale of German and Japanese assets located in the United States which were taken over—vested—by the Alien Property Custodian.

The Subcommittee on Commerce and Finance conducted extensive public hearings on this subject. Committee amendments were adopted to change the definition of "national of the United States" with respect to corporations; to authorize two additional categories of property damage claims; and to add to the claims of insurers of ships where the ships were indirectly owned by nationals of the United States. Other committee amendments explained in detail in House Report No. 1279, filed February 18, 1960, deal with stockholder claims, tax credits of corporate claimants, and internal organization of the Foreign Claims Settlement Commission. The amended bill also provides that claims arising out of Japanese action will be paid out of the war claims fund rather than out of an appropriation, as provided in the introduced bill.

The House approved the legislation and the bill was further amended by the Senate Judiciary Committee. It was reported to the Senate in the closing days of the session and remained on the Senate Calendar at the adjournment of the Congress.

The committee also approved a bill to amend section 5 of the War Claims Act to provide benefits to certain Guamanians killed or captured by the Japanese at Wake Island—H.R. 6392, House Report No. 1299. It passed the House without amendment but was not acted upon by the Senate.

H.R. 404, a bill to amend section 9(a) of the Trading With the Enemy Act to authorize the sale of certain vested property—General Aniline & Film Corp.—was ordered reported to the House in the closing days of the second session. However, the Congress adjourned before the report could be filed.

The Department of Health, Education, and Welfare proposed legislation to establish safe tolerances for the use of color additives in foods, drugs, and cosmetics—H.R. 7624. Extensive hearings were held by the committee on this legislation and testimony was also heard from a group of scientific experts selected by the President of the National Academy of Sciences which discussed the scientific problems involved.

Seven principal committee amendments dealt with agricultural chemicals affecting color; color additives exempted under food additives amendments; analytical method for color additives; Ad Hoc Scientific Advisory Committee on Carcinogenicity of Additive; color additive deemed to be safe under the proviso in section 706(b)(4) need not be certified; time schedule governing action on a petition; and review of regulation by Secretary terminating or placing a tolerance limitation on a provisional listing. A detailed explanation of the committee amendments is contained in House Report No. 1761, dated June 7, 1960. The Senate passed a companion bill—S. 2197—which was amended in the House incorporating the committee amendments. The Senate agreed to the House language and the bill was signed by the President—Public Law 86–618.

H.R. 7480, a bill to amend the Food and Drug Act with respect to labeling of pesticide chemicals on raw agricultural commodities, was approved by the House and Senate without amendment and was signed into public law—Public Law 86–537.

The need for legislation requiring better labeling of poisonous and hazardous materials that are brought into the home resulted in the approval of S. 1283, a bill to regulate the interstate distribution and sale of packages of hazardous substances intended or suitable for household use. The bill covers substances which are toxicants, corrosives, irritants, strong sensitizers, flammable, and also substances which generate pressure.

The labeling requirements will advise the user of these hazardous substances in the use of the product and make available immediate information for physicians who are called upon to treat cases of accidental injury. House amendments to S. 1283 were agreed to by the Senate and the bill became Public Law 86–613.

The subject of international health research received extensive consideration by the Subcommittee on Health and Safety. As a result, House Joint Resolution 649 was introduced, the principal purpose of which was to provide international cooperation in health research and research training. Senate Joint Resolution 41, a similar proposal of a much broader scope as approved by the Senate, was amended on the House floor, substituting the language of House Joint Resolution 649 with committee amendments—House Report No. 1915, June 17, 1960. The Senate resolution, as amended, was approved by the President—Public Law 86–610.

Another bill relating to public health, providing for a public health training program, was reported from the committee with an amendment in the form of a substitute—H.R. 6871. The amended bill authorizes a new 5-year program of project grants totaling not to exceed $2 million annually to schools of public health and to those schools of nursing and engineering which provide graduate or specialized training in public health; and extends without time limit the present authority of the Surgeon General to make grants-in-aid totaling not to exceed $1 million annually to schools of public health—House Report No. 1780, filed June 9, 1960. The bill passed both Houses of Congress and is now Public Law 86–720.

The Department of Health, Education, and Welfare also recommended legislation to amend the Public Health Training Act to give the Surgeon General authority to make grants for the general support of the research programs of institutions, as well as the grants now authorized to support specific projects proposed by individual applicants—H.R. 10341. The proposal was approved by the committee, passed the House and Senate, and has been signed by the President—Public Law 86–798.

H.R. 11545, relating to payments to Bernalillo County, N. Mex., for furnishing hospital care for certain Indians, after having passed both Houses was vetoed by the President.

S. 1508, providing for economic regulation of the Alaska Railroad under the Interstate Commerce Act, was also vetoed.

Another bill dealing with transportation in Alaska was reported from the committee. S. 1509 amends the Interstate Commerce Act to provide grandfather rights for certain motor carriers and freight forwarders operating in Alaska and Hawaii. Committee amendments to the bill are contained in House Report No. 1914, of June 17, 1960. The Senate agreed to the House amendments and the bill became Public Law 86–615.

The Federal Aviation Act of 1958 was amended to authorize free or reduced-rate transportation for certain additional persons. H.R. 4049 was considered and approved by this committee; passed both Houses of the Congress and signed by the President—Public Law 86–627.

The committee also approved legislation giving the Civil Aeronautics Board temporary authority to permit 25 supplemental air carriers to conduct limited operations for 1 year despite a ruling of the U.S. Court of Appeals for the District of Columbia Circuit. H.R. 7593, as amended, will give the Congress an opportunity to explore in more detail important policy problems raised by the court decision. The legislation was introduced at the request of the Civil Aeronautics Board. It received approval of the House, Senate, and Chief Executive—Public Law 86–661.

The Civil Aeronautics Board also recommended an amendment to the Federal Aviation Act to authorize elimination of a hearing in certain cases under section 408—S. 1545. The committee adopted a clarifying amendment to the Senate bill which was approved by the House and concurred in by the Senate. It is now Public Law 86–758.

H.R. 2467 authorizes the Secretary of Commerce to reimburse owners and tenants of lands acquired for Chantilly—Dulles International—Airport for their moving expenses. The committee amended the bill in the nature of a substitute which the House approved. The measure was not acted upon by the Senate.

Five legislative recommendations of the Securities and Exchange Commission received extensive consideration by the Subcommittee on Commerce and Finance. Hearings were conducted by the subcommittee during the months March to August, 1959. The bills reported from the committee are:

H.R. 2480, amendments to the Securities Exchange Act of 1934—a detailed explanation of the committee amendments is contained in House Report No. 2177, dated August 26, 1960.

H.R. 2481, amendments to the Investment Company Act of 1940—a detailed

explanation of the committee amendments is contained in House Report No. 2178, dated August 26, 1960. A companion bill (S. 3772) passed the House amended to include the text of amended H.R. 2481. The Senate did not take final action on the House amendments to S. 3772.

H.R. 2482, amendments to the Investment Advisers Act of 1940—a detailed explanation of the committee amendments is contained in House Report No. 2179 of August 26, 1960. A companion bill, S. 3773, passed the House and is now Public Law 86–750.

H.R. 5001, amendments to the Securities Act of 1933—a detailed explanation of the committee amendments is contained in House Report No. 2180 of August 26, 1960.

S. 3771, amendments to the Trust Indenture Act of 1939. The bill would extend the time within which certain applications for exemption from the act might be filed. It was reported from the committee without amendment and approved by the House. The President signed the bill and it is now Public Law 86–760.

H.R. 2480 and H.R. 5001 were not called up for consideration by the House prior to the adjournment of the second session.

The Subcommittee on Transportation and Aeronautics conducted some 3 weeks of public hearings on three identical bills relating to the competitive situation between D.C. Transit System, Inc., and other companies in the sightseeing and charter field. Subsequently, H.R. 4815 was reported to the House—House Report No. 1557, dated April 27, 1960. This bill provides that all assets and personnel of D.C. Transit System, Inc., used in providing mass transportation service shall be so used exclusively and shall not be used in any other service in competition with the service of any other company. This proposal was debated in the House on one occasion but was never brought to a final vote.

As a further indication of the Committee's continuing interest in traffic safety, a bill to establish a national register of revoked motor vehicle operator licenses was approved by the committee, both Houses of Congress, and the President—Public Law 86–660. This law provides for a register in the Department of Commerce which would include the names of those whose permits have been revoked for driving while intoxicated or conviction of a violation of a highway traffic code involving loss of life. State licensing authorities may call on the Department of Commerce for information regarding names on the list, thus enabling them to check the status of applicants before issuing driver licenses.

An amendment to the Accidents Reports Act was enacted—S. 1964, Public Law 86–762. This legislation is designed to improve the quality of accident reporting by railroads so that railroad accident statistics will be more nearly in line with accident statistics of other industries.

S. 1965—to make uniform provisions of law with respect to the terms of office of the members of certain regulatory agencies—was also considered by the committee and subsequently enacted—Public Law 86–619. The public law amends the Federal Power Act, the Communications Act, and the Securities Exchange Act to provide that members of the respective commissions shall continue to serve in office until their successors are appointed and have qualified.

During the course of enactment of S. 1965, two errors were made which required corrective legislation. H.R. 13066 and H.R. 13067 were introduced to clarify the public law. The first received Presidential approval and is Public Law 86–771. H.R. 13067 passed the House but was not reported from the Senate committee.

A more comprehensive activity report of the Committee on Interstate and Foreign Commerce was filed in the House, House Report No. 2225, and is available to those desiring more information on the work of the committee during the 86th Congress.

Henry N. Taylor

EXTENSION OF REMARKS

OF

HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MINSHALL. Mr. Speaker, like a good newspaper story, the life of Henry N. Taylor packed a lot of action in a small amount of space. As a Scripps-Howard correspondent and a representative of one of my hometown papers, the Cleveland Press, Harry Taylor's star soared. In the brief 6 years he was a member of the working press, this amazing young man's talents sent him with the Marines when they landed in Lebanon; to the Castro revolution in Cuba; across the United States on Khrushchev's tour; with President Eisenhower through Latin America and the Far East. He was returning from Moscow and the Powers' trial when he stopped to cover the African crisis. If there was a trouble spot in the world, you could count on Harry Taylor's being there.

Knowing Harry Taylor well, as I did, it is not difficult to imagine the sheer relish with which he approached the obscure Congolese village of Tchelenge where Prime Minister Lumumba's army was battling Baluba tribesmen. Harry could no more resist a news break than he could help writing colorfully and well or reporting the facts accurately. Nor was he a stranger to personal hazards: he had sent back dispatches from the heart of the riots which precluded President Eisenhower's visit to Japan. Now he shrugged off reports of dangers lurking in the turbulent Kasai province. If there was a story there, Harry Taylor meant to get it.

The last dispatch he filed was typical of the reporting which won him the Ernie Pyle Memorial Award last winter. In it he captured the tragic-comic aspects of a primitive revolt, ending it with the warning:

> Every indication is that as independence gets less and less comfortable for the people of the Congo, Lumumba will resort to ever more rash and preposterous diversions. This means more outcries against American and United Nations imperialism and ever widening opportunities for communism to rescue Congolese nations.

When the shocking news of Harry's death at the hands of an excited tribesman reached the White House, President Eisenhower said:

> As a foreign correspondent Mr. Taylor traveled throughout the world reporting the news developments of our times for the American people. He traveled with me on many of the visits I made to many countries. Killed in the line of duty, his name joins the honor roll of other American reporters who have given their lives to the cause of a free press and increased public knowledge of world affairs.

Harry Taylor would have modestly deprecated these remarks. He was, after all, a man with printer's ink in his blood, a born newsman, son of another distinguished foreign correspondent. Reporting was food and drink to him. It is hard to imagine death coming to this high spirited, very alive young man—he was only 31—at the beginning of a brilliant career. It is not hard to place him in the company of Ernie Pyle, who lost his life on Ie Shima, or Raymond Clapper, who died in the Marshall Islands, or Bill Newton, who was lost over India.

The loss to the newspaper world of a skillful craftsman is a personal loss to me. We spent many hours in one another's homes. Now his body has been brought back to rest in the shadow of the school both he and I attended, the University of Virginia, at Charlottesville. His byline will be seen no more. He has gone on his last great assignment, and I think he would grin to hear me recite a few lines of doggerel written by another newspaperman, Ben Scoville, a long time ago:

"Some day I'll pass by the great gates of gold
And see a man pass through, unquestioned and bold.
'A saint?' I'll ask, and old Peter'll reply:
'No, he carries a pass—he's a newspaper guy.'"

Statement by Senator Wiley on Activities During the 2d Session of the 86th Congress

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. WILEY. Mr. President, I request unanimous consent to have printed in the CONGRESSIONAL RECORD a review of legislative highlights, including my own activities, during the 2d session of the 86th Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SENATOR WILEY'S RECORD IN THE 2D SESSION OF THE 86TH CONGRESS

During the 2d session of the 86th Congress, a great many programs were considered for dealing with the challenges confronting our people and country.

Following the adjournment of Congress, I, as senior Senator from Wisconsin, am taking this opportunity to review the highlights of legislative action.

The résumé will include:

1. Legislation which I sponsored, cosponsored and/or supported, and

2. My efforts to oppose legislation which I felt were against the best interests of Wisconsin and the country.

Unfortunately, it is not possible to touch upon all the issues considered in this session of Congress. I will, however, attempt to include the highlights, as well as a general survey of my efforts either to support, or oppose, such legislation—as considered to be in the best interests of my country.

MAINTAINING THE PEACE

The maintenance of peace—or, conversely, preventing world war III—is a major challenge confronting us and the world. As a free nation, confronted by a threat to its life from communism, we recognize that complex tasks lie ahead, including:

1. Preventing a further expansion of aggressive, totalitarian ideology—communism.

2. Establishing a sound foundation for peace.

3. Creating a kind of world in which manpower and resources can be dedicated to benefiting—not threatening to destroy—mankind.

NEEDED: A SOUND DEFENSE

The United States—as a world leader—must maintain and further strengthen our arsenal of peace. In our fast-advancing age, this includes a "muscular," hard-hitting, jet-missile-nuclear-space defense capable of striking a deadly retaliatory blow at any aggressor.

During the session, I supported—for the most part—the Eisenhower administration's recommendations for strengthening the Army, Navy, and Air Force, and missile program; procurement of more modern warships and submarines and modernizing weapons and equipment of all forces; cooperation with our allies to provide a global chain of free nations to withstand the spread of communism; and other programs designed to strengthen our security.

FORWARD-MOVING DOMESTIC ECONOMY

A strong, forward-moving domestic economy is essential, not only to support a strong defense, but to serve as the foundation for domestic progress.

To further strengthen our economy, we must combat inflation; establish a pay-as-you-go system for governmental operations (incidentally, the dramatic slowdown of the inflationary spiral and the approximately $1 billion surplus in the 1960 fiscal budget reflects that it can be done); expand the housing program; carry forward public works improvements, such as port and harbor development projects, flood control; and reclamation; increase the flow of international trade and commerce on a mutually beneficial basis; protect domestic industry from unfair competition from imports; although employment is at an all-time high of over 68,300,000 people, the expanding economy must also provide job opportunities for the more than 3.8 million unemployed. We cannot overlook the fact now that of the 3,800,000 unemployed, 1 out of every 2 unemployed in August was out of work less than a month; and one-fifth of the unemployed were teenagers, mostly looking for summer jobs; also, some unemployment is noted in distressed areas. As late as May 1960, however, the administration submitted legislation to Congress calling for a realistic, distressed area bill, but the Democrats, with a 2 to 1 majority in Congress, failed to act.

In addition, effort is needed to improve wage scales for low-pay workers; as well as assure adequate pension and unemployment compensation benefits for the workers of the Nation.

Tax reform is of high priority. Consequently, I again urged the establishment of a Hoover-type commission to carry out a complete review of the tax structure. This would include plugging loopholes, ironing out inequities, if possible, more equitably distributing the tax burden and in other ways improving the tax system. The objective would be to provide more fair tax laws aimed at encouraging—not stunting—economic growth and progress.

During this session of Congress, I supported these and other objectives for improving and strengthening our U.S. economy.

EXPANDING TRADE AND COMMERCE THROUGH ST. LAWRENCE SEAWAY

The St. Lawrence Seaway—completed in 1959—offers a new trade and commerce lifeline for Wisconsin and the Great Lakes region to other parts of the world.

As a sponsor of the original Seaway law, I naturally feel it essential now to assure maximum flow of cargo-passenger traffic through the waterway. Accordingly, I have:

1. Recommended a comprehensive study by the Department of Commerce to further promote trade and commerce through the Seaway.

2. Urged appropriation of adequate funds to complete the Great Lakes connecting channels at the earliest possible date so as to bring greater benefits and deep-sea shipping to Wisconsin and other States of the lakes region.

3. Supported appropriations for further development of ports and harbors to handle deep sea shipping; and other projects.

FIGHTING AGAINST WATER STEAL BILL

During this session of Congress, a renewed effort was made to authorize the diversion of dangerously large volumes of water from Lake Michigan. Although the bill, H.R. 1, was reported from the Senate Public Works Committee, we were successful in having it recommitted to the Foreign Relations Committee. Why? Because, if enacted, the bill could well jeopardize our relations with our good neighbor, Canada. Moreover, it would not serve the overall public interest domestically. Overall, it is a bad bill. Fortunately, we were successful in preventing enactment of the measure.

IMPROVING THE DAIRY OUTLOOK

Unfortunately, this Congress did not enact any far-reaching legislation to substantially improve the farm outlook.

However, minimum measures for dairying were enacted, including:

Public Law 86–799—which I cosponsored—to lift price supports to improve the economic health of the dairy industry.

Public Law 86–10—along the line of legislation I cosponsored—to carry forward the special school milk program benefiting thousands of students in Wisconsin and throughout the country.

In addition, I opposed the liberalizing of tariffs and quotas on imports of dairy products to compete with products of our domestic industry. Again, also, I urged enactment of the Wiley bill to establish a dairy research laboratory at Madison, Wis. Among other things, the purpose would be to find ways and means to utilize the constituent parts of milk for industrial purposes.

ESTABLISHMENT OF AN ICE-AGE NATIONAL PARK IN WISCONSIN

As proposed in the Wiley bill, S. 894, a study—initiated by the Department of the Interior—has been too long delayed relating to the establishment of an ice-age national park in Wisconsin. The preservation of our moraines—of unique scenic and scientific significance—would be of great State and national interest. Consequently, I began to urge the Department to move ahead on this study for carrying out such a project.

SPACE EXPLORATION

The exploration of space offers new challenges, adventures, problems, and promises for all of us—and for mankind. In these fast-advancing times, man's thinking, ingenuity, imagination—and, yes, his perspective—must extend to the new horizons. The home, fireside, community, and the national and international boundaries can no longer be the limits of our planning, dreaming, and vision.

To cope with the emerging challenges, man must attain a satellite's-eye view, not only of his progress, but of the new interrelationships of men and nations on the globe—and of our planet, earth, to the universe.

In looking ahead in space, the practical rewards will be just as dramatic and exciting as the idea of manned flights into space and to and from other planets.

Although it's difficult to predict all the ultimate rewards of space, there are a number of foreseeable benefits, including:

1. Improved radio, telephone, teletype, and television communications.

2. More effective weather forecasting to minimize loss from tornadoes, hurricanes, and other storms and benefit agriculture and conservation programs for preservation of our natural resources.

3. A stronger defense.

4. Further man's efforts to utilize heat and light from the sun and other natural forces of the universe.

5. Generally gather other data and information about the elements and forces of space for harnessing them to serve mankind.

As a member of the Senate Space and Aeronautics Committee, I have supported realistic efforts to move ahead rapidly in space exploration.

OTHER ACTIVITIES

Supported nomination of James R. Durfee, of Antigo, Wis., to be judge of the U.S. Court of Claims.

Protection of civil rights: As ranking Republican of the Senate Judiciary Committee handling the civil rights legislation, I have supported constructive efforts to protect the constitutional rights of all our citizens, regardless of race, creed, or national origin. Although successful action was taken to further strengthen laws in this field, there is still a good deal of work to be done. The ultimate objective is, of course, to preserve these precious privileges and rights for all our citizens under the Constitution.

Veterans: Extension for a 1-year period during which certain veterans may be eligible for the national service life insurance; extension of veterans home loan program.

Voting: Sponsored legislation for establishment of a National Voters Day to encourage greater voter participation in elections. Passed the Senate, but not the House of Representatives.

Anticommunism: Initiated the updating and republishing of the Internal Security Manual—a compendium of laws, Federal orders, and acts relating to the internal security of the country to strengthen our domestic security program.

Menominee Indians: Sponsored legislation to extend the time for termination of Federal control over the Menominee Indian Tribe—for which State of Wisconsin has created a 72d county.

Manpower: Proposed resolution to set up special Commission To Study Manpower Needs of Space Age.

Protection from imports: Cosponsored resolution to set up study to determine impact of foreign competition on American industry.

Social security: Introduced legislation for liberalizing the "extra earnings" provision of social security law; as well as supported a bill to provide medical care for the aging.

Conservation: Cosponsored legislation to make sea or brackish water utilizable for human or industrial purposes; as well as supported broadscope effort to conserve soil, water, and forest resources.

Recess appointments to Supreme Court: Opposed legislative branch efforts to interfere with powers of executive branch by voting—and speaking—against Senate Resolution 334, opposing recess appointments to Supreme Court.

Tougher laws to combat obscenity: Urged enactment of tougher laws to combat the distributing of obscene literature, with its bad effect on the morality and conduct—particularly of our youth.

And others.

MEMBERSHIP ON COMMITTEES

Although the final "ayes or nays" on legislation are registered in the Senate, the "spadework" of Congress, to a large degree, is performed in its committees. During this session, I served as ranking minority member in the following bodies:

1. Foreign Relations including membership on Subcommittees on Far Eastern Affairs, European Affairs, African Affairs, and Canadian Affairs.

2. Judiciary—including Subcommittees on Patents, Trademarks and Copyrights; Revision and Codification; Antitrust and Monopoly, Constitutional Rights, and Juvenile Delinquency.

3. A member of the Senate Aeronautical and Space Sciences Committee.

Medical Care for the Aged

EXTENSION OF REMARKS

OF

HON. JOHN W. BYRNES

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BYRNES of Wisconsin. Mr. Speaker, improved health for our aged population through improved medical care is assured under the Social Security Act Amendments of 1960, H.R. 12580, which has recently passed the Congress.

I would like to discuss the new medical assistance program provided under the 1960 amendments and examine into some of the considerations that bear on this important issue.

At the outset I would observe that the Congress in a new social program, as in any other actions that it takes, must be motivated by the best interest of all Americans and must obtain knowledge and understanding of all the relevant facts. These essential criteria for legislating were particularly applicable in developing an improved medical care program for the aged. If the Congress had not followed these criteria, an unwise action could have occurred that substituted quantity for quality in medical service that would have been unpredictably costly, that would have overcrowded our hospitals, that would have weakened our entire social security system, and that would have made the heavy hand of bureaucratic Federal Government the unwelcomed and bungling arbiter in the physician-patient relationship. Fortunately, Congress did not take an unwise course of action. Instead, the Congress prepared a program that will give the right kind of help at the right place to the people who need help without the imposition of wasteful cost burdens on the American taxpayer.

Mr. Speaker, the 1960 amendments contain two important phases in dealing with medical care for the aged. The first phase is the establishment of a new Federal-State program of medical assistance for aged persons who are able to finance their general living costs but who are not able to bear the additional burden of the cost of illness. These self-reliant citizens might be termed the potentially medical needy. The second phase of the 1960 amendments affecting medical care is a significant increase in the Federal financial participation in State medical care programs for recipients of old-age assistance. Thus the two phases of this new program will give opportunity for Federal assistance to those aged needing help with their medical bills who reside in States participating in a Federal-State program.

A more detailed amplification of these two phases of the medical program of the 1960 amendments seems appropriate and is as follows:

I. MEDICAL ASSISTANCE FOR MEDICALLY NEEDY AGED

The 1960 act amends title I of the Social Security Act to set up a new Federal-State program of medical assistance for aged persons. Such assistance will take the form of payments under State programs of part or all of the costs of medical services incurred by State residents aged 65 or over who are not recipients of old-age assistance but whose income and resources are found by the State to be insufficient to meet the cost of necessary medical services. Eligibility for medical assistance for the aged will be determined by the States on a more liberal basis than eligibility is determined for old-age assistance.

Federal financial participation is provided for medical and remedial services that may be provided under State programs. Such services may include first, inpatient hospital services; second, skilled nursing-home services; third, physicians' services; fourth, outpatient hospital or clinic services; fifth, home health care services; sixth, private duty nursing services; seventh, physical therapy and related services; eighth, dental services; ninth, laboratory and X-ray services; tenth, prescribed drugs, eyeglasses, dentures, and prosthetic devices; eleventh, diagnostic, screening, and preventive services; and twelfth, any other medical care or remedial care recognized under State law.

No aged resident of a State may be found ineligible because he has not resided in the State sufficiently long. The share of the Federal Government in expenditures made under State programs will vary from 50 to 80 percent, according to each State's per capita income. The Federal program becomes effective as of October 1, 1960. Discretion is left to the individual States as to the extent of participation in this new program. It is currently estimated on the basis of the adoption of fairly comprehensive programs by the States that as many as 1 million persons may receive medical assistance during a year and that the annual cost will be $325 million comprised of $165 million Federal funds and $160 million State and local funds.

II. MEDICAL CARE FOR OLD-AGE ASSISTANCE RECIPIENTS

To encourage the States to extend comprehensive medical services to old-age assistance recipients, the 1960 amendments increase Federal participation in the financing of State payments to suppliers of medical care for such persons. A provision has been added to existing law which provides for Federal financial participation in expenditures for payments to vendors of medical service up to $12 per month, in addition to the existing $65 maximum for Federal participation in cash benefits. Under the 1960 amendments where the average old-age assistance payment of a State is over $65 per month, the Federal share in respect to medical-services costs will be a minimum of 50 percent and a maximum of 80 percent, depending upon the State's per capita income. Where the State average payment is $65 a month or less, or it is to a State's advantage, the Federal share in respect to medical-services costs will be 15 percentage points in addition to the existing Federal percentages—50 to 65 percent. Thus, for this latter group of States, the Federal percent applicable to medical-services costs will range from 65 to 80 percent. The increased availability of Federal funds to establish or strengthen State programs of medical care for the needy aged will result in significantly improved medical programs in all States if the States act to take advantage of this opportunity. This change becomes effective October 1, 1960, and it is expected to result in an additional $142 million a year in Federal funds being available to the States for medical care of old-age assistance recipients.

Mr. Speaker, it might be well at this point to examine the way in which the medical care changes in the 1960 amendments will affect the individual States. To facilitate this inquiry I will include as a part of my remarks some statistical tables as follows:

Table I shows the existing Federal matching percentages and the percentages that would be applicable under H.R. 12580.

Table II shows the old-age assistance expenditures by source of funds for calendar year December 31, 1959.

Table III shows the average payment to old-age assistance recipients in June 1960.

Table IV shows the estimated first-year costs of the two phases of medical care under the 1960 amendments.

Table V shows the additional old-age assistance funds that are expected to be available under the second phase of the previously described 1960 amendments affecting medical care.

TABLE I.—*Existing and proposed Federal matching percentages (effective for October 1960 through June 1961)*

State	Federal matching percentages currently applicable under old-age assistance (I)	Federal medical matching percentages under bill [1] (II)	Total Federal matching percentage applicable to medical expenses of old-age assistance recipients for States with average total payment of under $65 (III)
Alabama	65.00	79.15	80.00

Wyoming	50.92	50.92	[2]

[1] These are applicable to the new program of medical assistance for the aged and to vendor medical costs under the old-age assistance program when State average total assistance payment is over $65 per month (when average is $65 or under, percentages shown in next column are applicable).

[2] Average total assistance payment in May 1960 was over $65, so no figure is shown in this table. In all other studies, the average payment was $65 or less, and under these conditions the Federal matching percentage as shown in this column would be applicable.

TABLE II.—*Old-age assistance: Expenditures for assistance to recipients, by source of funds, calendar year ended Dec. 31, 1959*

[Amounts in thousands]

State	Total assistance including vendor payments for medical care	Vendor payments for medical care		Total including vendor payments for medical care

[1] Because of the newness of this program, it is extremely difficult to estimate exactly which States will participate and to what extent, especially in the 1st year after enactment.

NOTE.—Estimates were not made for Guam, Puerto Rico, and Virgin Islands, which can participate in these programs; any additional expenditures for these jurisdictions would probably be relatively small.

TABLE V.—*Old-age assistance (OAA) funds for medical care payments: Additional funds anticipated to be available under OAA medical care provisions of the Social Security Amendments of 1960 (Public Law 86-778); additional funds needed to bring medical payments to anticipated levels; and additional funds available to States—expected to be used for program improvement in OAA or medical assistance for the aged*

[1] An average of $12 per month per recipient except as footnoted otherwise.
[2] More than $6 but less than $12, utilizing all additional Federal funds available under the amendments.
[3] $6 per month per recipient.

Mr. Speaker, using the information and data now at hand I would like to present to my colleagues in the House an explanation of the way in which the 1960 medical care amendments affect the States. For purposes of illustration I have selected my own State of Wisconsin and the State of Tennessee.

First, Wisconsin: By reference to tables I and II we determine that Wisconsin had total old-age assistance payments in calendar year 1959 of $34.9 million, including $16.6 million for medical care with almost 55 percent of the total being Federal funds. From table III it is evident that Wisconsin in June 1960 made an average old-age assistance payment of $82.72, of which $43.86 was a vendor payment for medical care. Reference to table IV and table V discloses that because Wisconsin's present old-age assistance program is above the limits of Federal matching, the State will receive $2.77 million in additional Federal matching for old-age assistance vendor medical costs without the payment of any additional State funds for this purpose. As a consequence, Wisconsin could utilize these additional funds to effect a savings in State expenditures. The State savings could then be used to finance the State share of the new medical program under the first phase of the 1960 amendments, which I previously described. If the State savings were so used, the State would receive in additional Federal matching funds an amount so that the Federal Government would be paying 54.6 percent of the total so spent.

Second, Tennessee: Tables I and II indicate that $29.2 million was spent in Tennessee for old-age assistance in 1959, including $1.275 million for medical care with Federal matching participation amounting to 75.5 percent of the total funds spent. Table III indicates that the average old-age assistance payment in June 1960 was $43.44, of which $2.20 was vendor payment for medical care. Table IV indicates that under the second phase of the 1960 medical amendments Tennessee will receive $1.9 million additional Federal funds for old-age assistance vendor payments without the expenditure of additional State funds. Table V indicates that because Tennessee is low in vendor payments, the State could get even more in Federal funds by the expenditure of some State funds on the basis of 4 Federal dollars for every State dollar until the medical payments averaged $12 per person per month. Alternatively, as in the case of Wisconsin, Tennessee could utilize part of the additional $1.9 million I previously referred to as a means of saving State money to finance the new medical program for nonrecipients of old-age assistance. Whatever Tennessee spends for the new medical care program that I have described as phase 1 would be matched by Federal funds at a rate of 76.55 percent of the total so spent.

Mr. Speaker, a study of the data and information I have presented in regard to the medical care provisions indicates that the 1960 amendments to the Social Security Act contain a sound and efficient solution to the problem of providing for the health needs of those aged citizens who for one reason or another are unable to obtain suitable medical care. The medical care provisions of the 1960 amendments would:

First. Emphasize Government help where such help is needed and necessary by providing medical care to those persons who cannot make their own provision for medical needs; in this way the governmental effort can be more effective and less costly without adding to the personal health costs of other citizens.

Second. Help in the areas of medical treatment for those persons who are least likely to have private health insurance.

Third. Recognize that human rights and needs are best served in governmental activity when the agency is situated as close as possible to the individual which is accomplished by placing administrative responsibility at the State level instead of vesting control in the Federal Government.

Fourth. Continue voluntary action in the health protection field by the great majority of our 16 million citizens aged 65 and over who do not want Federal dictation in medical care.

Fifth. Safeguard against overutilization and overcrowding of hospital facilities by the proper emphasis it places on preventive medicine and the broad range of health services authorized.

Sixth. Avoid the costly impression of "free" hospitalization whether necessary or not which is in fact free only to the extent it is paid for by the taxpayers.

Seventh. Permit our free enterprise system to continue operation in providing our Nation with the highest medical and health standards in the world.

Eighth. Preserve the traditional Federal-State organization structure of our Nation and maintain local autonomy.

Mr. Speaker, these many advantages that are to be found in the approach to medical care for the aged that is provided by the Social Security Amendments of 1960, H.R. 12580, would not exist under a compulsory health insurance approach such as was advocated by some during our deliberations on these amendments. In fact by adopting the Federal-State voluntary approach contained in H.R. 12580 we have avoided many of the disadvantages inherent in a compulsory system. For example in the context of comparing the compulsory approach with the voluntary approach we find that the medical care provisions of the 1960 amendments would not:

First. Discriminate against the 4 million Americans who are over age 65 but are not covered by the OASDI program and who would not, therefore, be entitled to medical care under a compulsory social security approach financed by payroll taxes.

Second. Purport to provide health protection to millions of aged who neither need nor want Government medical care at the expense of 60 million workers who in many cases find it more difficult to meet family medical needs than do the aged.

Third. Violate the traditional cash benefit concept of the OASDI program by instituting a program of service benefits irrespective of need for the particular services offered.

Fourth. Impose unpredictable costs on the OASDI trust funds possibly thereby impairing the ability of those funds to meet the cash benefit obligations.

Fifth. Require higher payroll taxes which would mean a smaller paycheck in terms of take-home pay for everyone under social security.

Sixth. Encourage expensive hospitalization and institutional care when other forms of medical treatment would be more efficacious.

Seventh. Limit medical care to certain arbitrary types of service such as surgical care, hospitalization, and nursing home care but would instead allow a broad scope of benefits so that the type of care could be prescribed according to the individual requirement.

Eighth. Restrict beneficiaries in their choice of physician and hospital through Government controls.

Ninth. Encourage the demands by the nonaged for governmentally provided health care with the eventual consequence being a massive Government national health system.

Tenth. Provide a political solution to a medical problem.

It will be vividly recalled by all concerned that during the preparation of the Social Security Amendments of 1960 the instigated and well-organized political pressure was great for the establishment of a costly but ineffectual program of compulsory health insurance for the aged within the framework of the old-age, survivors, and disability insurance program of the social security system. This endeavor was categorically rejected by a vote of 17 to 8 in the House Committee on Ways and Means, by a vote of 12 to 5 in the Senate Finance Committee, and by a vote of 51 to 44 in the U.S. Senate. In short, the compulsory approach to health care for the aged was specifically defeated three times during the consideration of the Social Security Amendments of 1960, H.R. 12580.

The legislation as finally approved in conference did not contain a compulsory health insurance plan and for that reason it was denounced by some leaders in the Democratic Party as being a paupers' bill, a fraud, and a mere sop. These denouncements must not have contained much merit for it will be recalled that the conference report was adopted in the House by a vote of 368 to 17 and in the Senate by a vote of 74 to 11. Indeed even the detractors of the 1960 amendments who favored a compulsory medical care plan could not have been too persuaded by their own criticism because almost to a man they wound up supporting the passage of the bill they had criticized.

Mr. Speaker, to the people who for political or other reasons reprehend the medical care provisions of H.R. 12580 as being not enough, I would point out that unpredictable cost, massive governmental intervention, compulsion, ineffectuality, and discrimination have never been the criteria for good or adequate legislation but they are definite shortcomings of the alternative proposal they supported.

The subject of health care for the aged will be an important consideration for study by the White House Conference on Aging to be held early in 1961. Legislation was passed during the 85th Congress providing for this White House Conference and the Congress will appropriate close to $2 million of Federal funds for the purpose of this conference. State conferences are scheduled for the current year preliminary to the White House Conference. Participating in the White House Conference will be 2,800 delegates including some of the foremost specialists in the field of aging. It is required by law that a report including recommendations be made to the President by April 9, 1961. Many Members of Congress in considering medical care proposals in connection with the 1960 Social Security Amendments were of the view that Congress should not preempt the activities of the White House Conference on Aging by committing the Federal Government to a brand new program of compulsory medical care for the aged under the OASDI title of the Social Security Act.

In conclusion, Mr. Speaker, I would commend my colleagues on the Committee on Ways and Means and other Members of the Congress for the important contribution they made to the development of the new medical care provisions provided in the Social Security Amendments of 1960. These provisions under Federal-State partnership will, I am confident, provide meaningful help to those deserving aged American citizens who are unable to provide for their own health care needs. This worthy objective will be accomplished without socializing medicine, without impairment of the right of individual choice of physician, without jeopardizing the OASDI program, and without needless expense to the American taxpayer. Instead, under the 1960 amendments we will spend the tax dollar on the people who need it the most in a way that will do the most medical good. Under this approach the Federal Government will stimulate and supplement rather than replace State, local, and private action. Better health and greater security for our aged will inevitably be the result.

The Way Volunteer Organizations Advance Political Ideas

EXTENSION OF REMARKS

OF

HON. CLEM MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CLEM MILLER. Mr. Speaker, down through our history there have been volunteer organizations to help us set our political facts. In colonial Boston, seeds of the American Revolution were sown by the Sons of Liberty. A century later, a crusade to end slavery was waged by antislavery societies throughout New England.

Today in California, a vigorous organization is engaged in formulating a constructive response to pressing current problems. This organization is the California Democratic Council. Formed in 1953 in the wake of the great electoral debate of 1952, the California Democratic Council today remains dedicated to the free exchange of opinion.

A political party as dynamic as the Democratic Party needs organizations such as the California Democratic Council. With the wide-based support of these organizations, it can continually replenish itself with fresh thinking. The bewildering pace, the rapid growth, the wrenching technological changes which mark contemporary civilization make this process of critical examination and renewal an imperative need.

New ideas sometimes are unpalatable. Needless people often greet free, bold political discussion with cynicism and scorn. It is edifying to watch these scoffers gradually become the stentorian defenders of ideas so conceived which in time enter the sanctum of conventional wisdom.

The volunteer groups such as the CDC help to give shape and meaning to our changing civilization. These organizations, nurtured on care and conscience, can make mistakes, of course, and some of the ideas to come out of their sessions are stillborn. But many come to dominate the thinking of all of us. In its regional and statewide conferences, the CDC brings into focus the aspirations of thousands of California citizens. As with any bringing together of diverse

ideas, these conferences seethe with controversy, with activity, with questing. In the melee, ineffectual ideas sometimes emerge, but this is the price of any act of creativity. It is discouraging sometimes that in our present system of communication-by-scare headlines the sensational rather than the sound ideas first win public attention.

The California Democratic Council is doing a job of reconnaissance, a thankless and dangerous but essential job of scouting the unknown. If this job were not done, and done well, by the CDC and other groups of similar intent throughout the United States, the American political structure would atrophy. Thus, the 40,000 men and women who comprise the California Democratic Council are fulfilling a vital function.

It would be appropriate here to quote an editorial which appeared in the Independent Journal of San Rafael, California on Tuesday, February 16, 1960:

ISSUES, CONFERENCES, CAN BE NEW WAY VOTER SPEAKS

Most hostesses have experienced that sinking sensation when she hears the conversation of her guests turn to politics. Often she will try to change the subject, for fear of bloodshed.

Can you imagine the problems then, of gathering 2,500 together just for the purpose of talking politics? If you can't, you might ask Mrs. Samuel Swadesh of Mill Valley who did the job last weekend in Fresno.

It doesn't help much that all the participants are from one party—Democrats, in this instance. Somehow, there fails to be unanimity of thought there, either.

Last weekend was the second annual issues conference of the CDC.

Conferences such as this have great merit. They provide a forum for many people with many ideas. They let people talk and think about politics, the basis of our republican form of government. They can be helpful in organizing effective political parties.

But we believe the system needs perfecting before it begins to establish policy or to pass resolutions. This can be done, and then the voter will have an improved way of making his voice heard.

This year, because it is a presidential election year, it had an added feature—the appearance of three presidential candidates, Senators SYMINGTON, HUMPHREY, and KENNEDY.

But the main business of the convention was to discuss political issues and reach policy agreement on which the CDC could base its actions and political endorsements.

All day Saturday was taken up in discussion of the six issues. More than 80 small groups of delegates discussed one of the issues. That night small groups of leaders attempted to consolidate all that had been discussed in the 80 groups into six reports for adoption as policy statements. This consolidation job was finished in five of the sections by about 6 a.m., after an all-night effort. The sixth was not completed until morning because the group itself couldn't agree upon a summary of their ideas until about 9 a.m.

Thus it was that when the entire convention convened Sunday morning to pass on their "policies," they had to consider the results of a rush job, by a group of tired men and women. The fact that they had anything before them at all was a tribute to those men and women.

But to saddle a large organization like the CDC, and even the whole Democratic Party, with policies so hurriedly drawn, seems unfair to the public, to the party, and to the CDC.

As Senator SYMINGTON told the group, in general he could go along with the policies, "but some of the details worry me."

It is on the details that the policies stand or fall. Yet, some of the details were contradictory; some did not clearly express the intent; some of the typographical errors were classics; some of the statements, we are sure, would have been challenged by the delegates had they had more than a few minutes to examine them.

The Real Story About REA

EXTENSION OF REMARKS
OF
HON. KARL E. MUNDT
OF SOUTH DAKOTA
IN THE SENATE OF THE UNITED STATES
Thursday, September 1, 1960

Mr. MUNDT. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by me on the record of progress and accomplishments of the Rural Electrification Administration.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MUNDT

THE REAL STORY ABOUT REA

In this the first year of a new decade, we hear much talk of "new horizons," "new frontiers," and the "challenge of the sixties." This is as it should be, and I am gratified that the national leaders of both our major political parties are looking ahead and are seeking ways and means of solving those moral and economic problems which still continue to confound our free society.

I think, however, to assure that there is balance in our thinking and to guarantee that our programs and plans for the future are in harmony with our free traditions and institutions, we must of necessity review our accomplishments and achievements of the past. In so doing we come to a greater awareness and a more profound understanding of the many elements and factors within our constitutional republican society which contribute to the successful solution of problems and the real advancement of our society.

I shall not, of course, attempt today to make a total review of the progress and achievements of our great Nation; but I would like to discuss briefly our record of progress and accomplishment in one area; namely, the electrification of our rural United States. It is quite appropriate that we review the record of achievement in the field of rural electrification as of 1960; for, as my colleagues know, this year marks the 25th anniversary of the creation of the Rural Electrification Administration.

I think it can be said, without fear of contradiction, that no single program has contributed more to the improved standard of living of America's farm families than REA—the bringing of good dependable electric and telephone service into the rural homes and communities of this Nation. It has been my great privilege and pleasure to have served in the Congress of the United States during 22 of the 25 years in which REA has been in operation. We in South Dakota are deeply grateful for this program, and we are especially proud of the outstanding job which has been accomplished in our State by this progressive program. As one who has had the opportunity of working in the Congress—first in the House of Representatives, where I assisted in the formulation of the program resulting in the construction of our great hydropower projects on the Missouri River, and now in the Senate, where I serve on the Appropriations Subcommittee handling all the money for REA and RTA developments I, too, feel a gratifying sense of accomplishment in knowing that my efforts have contributed to the advancement of REA in my own State of South Dakota and throughout America.

When I first went to Washington representing South Dakota farmers in 1939, only 585 people in our State were obtaining electric service through REA. At that time only three of our REA co-ops had received approval of their first loan applications—Clay-Union Electric Corp. at Vermillion, Union County Electric Co-op at Elk Point, and Lincoln-Union Electric Co. at Alcester. In the years since, I have taken quiet pride in the fact that 31 additional REA co-ops in South Dakota have become energized and through the 34 hard-working South Dakota co-ops, spread across the length and breadth of our large State, REA electric service was made available to 21,207 consumers by 1949 and as of June 30, 1960, the number of REA consumers has risen dramatically to 72,628.

In 1935 only 2,939 South Dakota farms, or 3.5 percent of our farms, were served by central station electric service of any kind. But by patient and cooperative effort, by working together, we have succeeded in extending central station electric service to over 52,000 more South Dakota farms. We shall, of course, not be satisfied until we have reached the 100 percent mark.

It is the function of the Congress to appropriate the necessary funds to finance an active and expanding rural electrification program, and I am mighty pleased that my seniority in the Senate has afforded me the opportunity to become the fourth-ranking minority member of the Senate Appropriations Committee, from which position I am able to take a personal part in assuring that the Rural Electrification Administration receives proper recognition in the annual budgeting of Federal expenditures. Serving also on the subcommittee of our Appropriations Committee which has direct control of all Federal funds advanced to REA, I take a special pride in reporting no South Dakota REA or RTA loan has been rejected for lack of funds during my term of service.

During my 22 years of service in the House of Representatives and the U.S. Senate it has been my privilege and pleasure to assist South Dakota REA co-ops in obtaining over $120 million in loans for rural electric and telephone service. In addition to working for funds in the Congress, I have participated with South Dakota's able REA leaders in conferences with officials from the Rural Electrification Administration and the Bureau of Reclamation on a variety of problems and matters which are important to the future growth of REA in my home State. It is easy to support a worthwhile program like REA, for one has only to travel the highways of South Dakota at night and note the many lighted farmhouses dotting the countryside to understand how this low-interest loan program has benefited rural America. I have always vigorously and openly opposed any proposal from any source to increase REA interest rates.

A sound power program, of course, requires energetic and sensible leadership at the local level, and South Dakota has been

blessed with an abundance of outstanding REA directors and managers. A sound power program also requires consumers, who are willing to make broad utilization of electric service, and in this respect South Dakota's REA users have responded to the availability of electric and telephone service in a magnificent manner. To make a very poor pun, it has been "electrifying" to observe the wide variety of tasks to which our farmers have put "Willie Wirehand." Feed is mixed by electric devices; eggs are graded by electric graders; power-driven pumps have replaced the windmill; many brooders are heated electrically; and of great importance, REA electric service is now assisting the farm wife in carrying out many of her burdensome household tasks. In the last 10 years electric usage on South Dakota's farms has doubled.

REA REDUCES RATES

During a period when farmers in my State have been experiencing serious income problems due to declining farm prices and increased costs for goods and services, REA can hold its head high as the one service supplier that has cut rather than increased its cost to consumers. When I was first elected to Congress the average cost of electricity to a South Dakota farmer was about 7 cents for each kilowatt-hour. The cost today—some 20 years later—is about 3.32 cents per kilowatt-hour or over a 50-percent reduction in cost of service. The credit for this dramatic reduction in the cost of electric service to South Dakota farmers must in great measure go to the efficient management and operation of our local REA co-ops and to the East River generating and transmission co-op located in my hometown of Madison, S. Dak.

RTA—A SISTER SERVICE TO REA

No less amazing is the progress made by the rural telephone program in South Dakota over the past decade. In discussing the remarkable progress which has been achieved in providing telephone service to South Dakota's rural residents, I would be gravely remiss if I did not pay high tribute to ANCHER NELSEN, the first Eisenhower-appointed Administrator of REA, and David Hamil, the present REA Administrator. It will be recalled that the legislation authorizing loans for rural telephone systems was approved in 1949; however, it was not until the forceful ANCHER NELSEN, of Minnesota, assumed the helm at REA that this program really began to move, and it has continued to move impressively under the steady guidance of Colorado's Dave Hamil.

South Dakota serves as a good example of what these two public servants have done to pep up the RTA program. As of January 1, 1953, there was not a single consumer obtaining rural telephone service through the RTA in South Dakota; but 7½ years later there were 19,470 RTA consumers in South Dakota. I do not cite this tremendous growth of RTA in South Dakota in any attempt to strike a partisan political contrast, but I do it merely for the purpose of paying well-deserved tribute to two able gentlemen from "my neck of the woods," who have rendered distinguished service in the demanding job of Administrator of the Rural Electrification Administration. I vigorously supported the Rural Telephone Act, which was adopted during my first year of service in the U.S. Senate; and it is a real source of satisfaction to me to know that this program is providing our farmers with another aid to more comfortable living—the telephone. In this connection I cherish dearly a copy of a resolution adopted by the directors of the Sully-Buttes RTA Cooperative, expressing thanks and appreciation for my assistance in obtaining a $1.7 million RTA loan to provide modern dial telephone service for the more than 2,000 members of that co-op.

It is very encouraging to me to note that REA has been and continues to be a Federal program that has genuine bipartisan support. That this is true is amply demonstrated by the gross-loan figures for the past 14 years. During the first 6 of these years, 1947–52, we had a Democrat President and the gross loans for electric and telephone service totaled $1,873.3 million. During the last 8 of these years, 1953–60, we have had a Republican President and the gross loans for electric and telephone service have totaled $2,253.8 million. Thus both political parties have contributed mightily to REA. Once again we must pay credit to local leadership for having attained this bi-partisan support, for there are literally dozens of States like my own of South Dakota, where the leaders of the individual co-ops have steadfastly refused to allow their REA's to become involved in partisan political activity. The wisdom of these individuals has certainly been vindicated when one views the record of progress under both Republican and Democrat administrations. REA plays no political favorites and both political parties favor REA. Those few self-serving politicians who have tried to use REA as a political device have always met with disappointment.

I stated in my opening remarks that a variety of elements and factors always contribute to real and lasting progress; and I think there is no better example of the truth of this statement than REA. The REA record of accomplishment in a State like South Dakota represents a great deal of hard work and untiring effort on the part of individuals at the Federal, State, and local levels. With the ever-increasing demand for electricity on our farms and in our rural communities the local REA co-ops have been assuming an ever-enlarging responsibility for the success of this program. These co-ops are constantly surveying the power needs and the power potential in their areas, and they are literally working day and night to provide their users with dependable low-cost electric service.

TENTH ANNIVERSARY OF EAST RIVER CO-OP

East River Electric Power Co-op, which headquarters in my hometown of Madison, S. Dak., is typical of the local endeavor which keeps REA moving forward. The first loan for East River was approved on November 16, 1950, and since that date this co-op has borrowed over $12 million in Federal funds to construct the necessary transmission facilities in order that its member co-ops can meet the growing demand for electric power. Throughout these 10 years I have worked with East River Co-op officials whenever asked to help expedite these many loans.

UNCLE SAM GIVES US A BOOST

In recent years our Federal Government has made a magnificent contribution to the growth and improvement of REA service in South Dakota. As of June 30, 1953, our South Dakota co-ops received 22,454,922 kilowatt-hours of power from the Bureau of Reclamation. By June 30, 1959—just 6 years later—South Dakota co-ops were receiving 383,455,000 kilowatt-hours of Bureau power, which means this Federal power contribution has increased 17-fold in that short period. Big Bend reservoir when completed and the finalizing of construction at Oahe will add vastly to our supply of low-cost river power for REA.

EISENHOWER-NIXON RECORD IS OUTSTANDING

Since this year, 1960, marks the eighth and final year of Dwight D. Eisenhower's distinguished tenure as President of the United States, I would like—before closing—to call attention to the fine record of growth which REA has enjoyed under his administration.

Since January 1, 1953, the Rural Electrification Administration has approved loans for rural electric and telephone facilities totaling more than $2.1 billion. This amount represents 44.4 percent of the total REA loans approved since the REA program was initiated in 1935.

Since January 1, 1953, more than $511 million in electric loans have been approved for generation and transmission purposes. This represents 53 percent of the total of $964 million approved for G. & T. purposes since REA began 25 years ago. In other words, more generation and transmission loans have been approved during the 7½ years of Eisenhower-Nixon administration than were approved during the first 17½ years of the electrification loan program. By June 30, 1953, generation loans had been approved to provide an installed capacity of 1,153,171 kilowatts. Seven years later, on June 30, 1960, loans had been approved to provide a capacity of 2,419,530 kilowatts. I take some pardonable pride in the fact I have voted for every dollar advanced to both the REA and RTA in South Dakota during my 22 years in Congress.

In REA's newer telephone program, 88 percent of all loans approved have been made during the Eisenhower-Nixon administration. A total of $511 million in telephone loans has been approved since January 1, 1953, out of a total of $670 million approved since the program began on October 28, 1949. Under this program, the one millionth rural subscriber received new or improved telephone service this summer.

This concludes my review of REA's record of achievement over its first 25 years of service to rural America. The preparation of this statement has provided me with many warm memories of those countless occasions over the past 22 years when it has been my great privilege to work with the REA leaders of South Dakota in bringing "Willie Wirehand" to the service and assistance of an ever-growing number of South Dakota's rural residents. My part in this grand log of accomplishment has been spread over 22 years in the House and Senate and I daresay no activity in my congressional service has given me such a keen sense of worthwhile personal endeavor as my unwavering support of those programs and proposals which will assure REA's continued healthy growth in South Dakota.

Statement Concerning the Activities of the Special Subcommittee on Oceanography, Committee on Merchant Marine and Fisheries, House of Representatives, 86th Congress

EXTENSION OF REMARKS

OF

HON. GEORGE P. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. GEORGE P. MILLER. Mr. Speaker, I am pleased to submit a résumé of the activities of the Special Subcommittee on Oceanography of the House Committee on Merchant Marine and Fisheries.

GENERAL AND HISTORICAL

On February 17, 1959, the chairman of the Committee on Merchant Marine and Fisheries, Hon. HERBERT C. BONNER, appointed a Special Subcommittee on Oceanography as a result of presentations made to the chairman by the Committee on Oceanography of the National Academy of Sciences. For many years the Merchant Marine and Fisheries Committee has been vested by the House

of Representatives with jurisdiction over matters pertaining to the merchant marine, fisheries, Coast and Geodetic Survey and the Coast Guard. Frequently the many separate aspects of the broad field of oceanography have been of concern to this committee and as a result of the successes of the International Geophysical Year the importance of coordinated study of problems of this nature has been demonstrated.

The subcommittee at the outset of its deliberations decided to conduct comprehensive surveys in the studies of the environment of the oceans, their boundaries, their productivity with respect to life and minerals, the various properties of the sea surface which influence the efficiency of our maritime operation and the influence of tides and currents upon the economics resulting from the environment of the seas of the world.

The subcommittee held hearings on March 3, 1959, March 10, 1959, March 12, 1959, March 17, 1959, April 21, 1959, April 23, 1959, April 24, 1959, June 1, 1959, June 23, 1959, and July 13, 1959, in the 1st session of the 86th Congress, and in the 2d session of the 86th Congress hearings were held on February 9, 1960. The purpose of this set of hearings was to determine our oceanographic assets to ascertain the problem areas which could necessitate legislation and thus to arrive at a sound basis for such legislative action as the subcommittee decided was necessary. These hearings have been published and widely distributed.

In addition, on January 22, 1960, hearings were held on specific legislation, introduced by the Senate as S. 2482 and S. 2483, which had as its purpose the removal of geographical limitations on the activities of the Coast and Geodetic Survey and a provision for flexibility in the performance of certain functions of the Coast and Geodetic Survey and of the Weather Bureau. After amendment by the subcommittee and approval by the full committee and the House, the legislation above described was agreed to by the Senate and are now Public Law 86–409—S. 2482—and Public Law 86–397—S. 2483. In the 2d session of the 86th Congress, I introduced H.R. 10412, and identical companion bills were introduced by Mr. PELLY, of Washington—H.R. 10581—and Mr. OLIVER, of Maine—H.R. 10546. These bills sought to establish a public policy with respect to oceanographic surveys and to provide for coordination of the efforts of Federal agencies with respect to oceanographic surveys.

Mr. PELLY, of Washington, introduced H.R. 9361 with the purpose as stated "to advance the marine sciences, to establish a comprehensive 10-year program of oceanographic research and surveys; to promote commerce and navigation, to secure the national defense, to expand ocean resources; to authorize the construction of research and surveys ships and facilities; to assure systematic studies of effects of radioactive materials in marine environments; to enhance the general welfare; and for other purposes."

I further introduced H.R. 12018 with the purpose "to establish within the U.S. Coast and Geodetic Survey a national oceanographic data center and a national instrumentation test and calibration center." Hearings on the aforementioned bills were held by the subcommittee on May 17, 1960, May 19, 1960, May 20, 1960, and May 24, 1960. These hearings have been published and widely distributed.

In addition to the hearings referred to above, the committee and staff visited the Woods Hole Oceanographic Institution at Woods Hole, Mass., the Scripps Institution of Oceanography at La Jolla, Calif., the University of Washington, Texas A. & M. at College Station, Tex., and the Bureau of Commercial Fisheries Radiation Laboratory at Beaufort, N.C. Members of the committee and the staff have attended various oceanographic meetings, such as the International Oceanographic Congress held at New York in September 1959, meetings of the National Academy of Sciences-National Research Council held in California and in Washington, and monthly meetings of an unofficial working level coordinating committee held in Washington. Correspondence requesting suggestions and opinions was initiated with all known Government agencies concerned with the environment of the oceans, various State agencies concerned with their particular problems of the oceans, and outstanding marine scientists of both this country and abroad.

ANALYSIS OF THE HEARINGS

The hearings, although extremely exhaustive in their scope, produced basically two fundamental problems. The first problem is one of funding adequately to insure that the maximum utilization of existing facilities and ships and personnel are used to the fullest extent possible. The second problem can broadly be said to be one of insuring that coordination between the various agencies involved in studies of the environment of the sea are effectually carrying out long-range planning with the minimum of overlapping of function, and properly expressing to the Congress requests for such needed legislation as should be apparent to a coordinated study of the problems of the oceans. To the end that a solution to these two problems may be attained, certain expansion of these problems is important. It should in general be realized that at the current moment the only coordination of effort with respect to studies of the environment of the oceans is being attempted by the Subcommittee of the Federal Council of Science and Technology. This is not a statutorily created body and it is not responsible to the Congress for congressional oversight. In view of the fact that the existence of the Federal Council of Science and Technology depends solely upon Executive direction no permanency of planning can be assured. The problems posed earlier will be considered in more detail.

COORDINATION OF OCEANOGRAPHIC ACTIVITIES OF THE GOVERNMENT OF THE UNITED STATES

As a result of the hearings before described, it was manifest at the outset that some means of formal coordination of the various Government bureaus and agencies concerned with the study and development of the environment of the sea is necessary. Our subcommittee regards the establishment of a means of statutorily required coordination to be the most important facet resulting from its hearings.

The Subcommittee on Oceanography of the House Committee on Merchant Marine and Fisheries does not feel that a new agency should be created at the present time to acquire the functions and responsibilities of the aquatic environment which are vested in the various departments and agencies of the Government. This feeling is prompted by the realization that the various departments whose agencies are concerned with the environment of the oceans must of necessity in carrying out their basic function as a department, continue their departmental interest in the oceans. The subcommittee and its staff have under study proposed legislation which will be introduced in the forthcoming Congress to achieve a solution of this pressing problem. The solution of necessity must provide for a continual examination on the part of the Congress as to the performance of the executive department, thereby giving the coordinating means the benefit of congressional oversight.

PROBLEM OF FINANCING

The subcommittee, through its hearings, developed that although the executive department had increased its budget request in many directions it was extremely difficult to ascertain how much of each department or agency budget request was to be devoted to the fullest exploitation of the marine environment.

One thing that did develop was the tendency on the part of the departmental heads to arbitrarily apply a blanket cut when the appropriated funds or the funds to be requested were cut by the executive department to all facets of their department without regard to the immediate problems of the oceans, rivers and lakes. Further it has developed in the case of the Department of the Interior that the Bureau of Commercial Fisheries has been compelled to spend heavily from its Saltonstall-Kennedy funds moneys for purposes other than research. I do not believe this was the contemplation of the Congress. In other words, the Bureau of Commercial Fisheries, having received an increase of moneys from the Saltonstall-Kennedy funds, is in a position of having its operating budget cut by the amount of increase with the net result that research in the productivity of the fisheries has been reduced.

Legislation to correct this situation and to insure that the Congress knows at all times the amount of money being spent in the development of the oceanic environment will be introduced in the next session.

S. 2692

On June 25, 1960, a Senate bill was received by the Committee on Merchant Marine and Fisheries (S. 2692) after having passed the Senate. This bill originally in scope was similar to the bill introduced by Mr. PELLY (H.R. 9361). Owing to the controversial approach in the thinking of these two bills and to the material developed in the hearings on H.R. 9361, together with the unanimous disfavor of both bills received from all

executive departments and agencies concerned, insufficient time was available to rectify the differences of opinion. It is believed that the legislation contemplated by the subcommittee and referred to above will accomplish the necessary congressional action and will be presented at the next session of the Congress.

Accomplishments of the 86th Congress

EXTENSION OF REMARKS
OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. McCORMACK. Mr. Speaker, the 86th Congress has served during a period of world-shaking developments, uncertainty, and changes in the international climate—and of growth and widening horizons at home.

In the 19 months since we first convened on January 7, 1959, we have heard the howling winds of threatened war and felt the soft, inviting breezes of peaceful coexistence designed by the Soviets to lull us to sleep.

Now, again, the hands of the clock of destiny have come full circle: The dulcet tones of Soviet Minister Khrushchev have risen to a hysterical shriek, the smiling mask has dropped, and the true face of communism's aggressive intent stands exposed in all its cruel malevolence.

History will record that this Democratic Congress neither succumbed to the wiles of the Red peace line, nor quailed before its threats. Rather have we hewed to a steadfast course, proclaiming by deeds that speak more loudly than words, the credo of America: Our love of liberty, our determination to defend it, the sincerity of our aims for peace and of our desire for the attainment by all peoples of the freedom we ourselves enjoy, and for the elevation not only of their living standards but of their status to one of respected individual human dignity.

Even before the debacle at Paris interposed new obstacles to these goals, this Congress was at work on measures to provide the United States with the strongest possible military defense, which—should even that fail to deter an enemy attack—would at the same time supply ample means for instant and irresistible retaliation. We supplied the President with more defense funds than he was willing to use.

This is neither the time nor the place to assess how much or little the inaction of the administration may have contributed to the present sad state of our foreign affairs.

We face the hard facts that the longings, hopes, and aspirations of mankind were shattered at the summit, that our allies and friends are restive and under pressure, and that even a problem child of the Caribbean, heaping indignities upon us at will, has furnished communism with a base on this hemisphere for which the present Republican administration is responsible.

Much more important than how these things were permitted to come about, and who is to blame, is the task of restoring the strength and influence of America's position of leadership in the free world.

To that great cause this Congress has dedicated its efforts. As we know, the Constitution reposed in the President the duty to formulate and execute our foreign policy. It devolved upon this Congress, however, to demonstrate by action that we practice at home what we preach abroad.

Today, we near the completion of that solemn task. In its broad scope and high motivation, in the spirit of the preamble of our Constitution, the program enacted by this 86th Congress is a shining example to all people everywhere of the blessings of liberty:

First. For the first time in our history we have extended a helping hand to the Nation's senior citizens in meeting the problem of mounting costs of medical care in their declining years. We have only made a start, additional legislation is necessary, and with the election of Senator KENNEDY as President and Senator JOHNSON as Vice President, such legislation will be enacted into law.

Second. For the first time in our history this year's national election will be conducted under laws designed to enforce the voting rights of all citizens as guaranteed by the 14th amendment to the Constitution.

Third. For the first time in our history Congress has acknowledged by a constitutional amendment, the rights of the citizens of the District of Columbia to exercise the franchise as American citizens in national elections.

Fourth. For the first time in our history, this Congress has carried on its membership rolls the Representatives and Senators of the sovereign 49th and 50th States of the Union—Alaska and Hawaii, outposts of freedom in the Far North and in the South Pacific. For both of these new States were admitted to the Union by Democratic-controlled Congresses.

These are historic landmarks of a record of solid accomplishment, and a Congress is remembered for its contributions to American history. Not only have we opened new horizons in the fields of social security and civil rights affecting the welfare of millions of citizens of every race, color, and creed, which will be further improved, but we have legislated in the encouragement of small business, in the development of our natural resources, highways and public works, and in many ways met our obligation to the veterans who served our Nation in time of war.

This is not to say that all goals have been fully attained. We have, however, taken the first steps toward the beckoning new frontier. Mankind's upward striving toward the ultimate of his earthly aspirations has always been upon a rocky road that is long and hard.

And so it is, too, under the processes and procedures of a representative parliament of free citizens such as ours. We achieve only what is possible under agreement of the majority, the synthesis and amalgam of conflicting individual, regional, and party viewpoints. And even the will of the majority can be temporarily frustrated in the face and threat of a Presidential veto of one-third plus one.

The very real and impressive record of this Congress has been written over the whole period from its inception, more than a year and a half ago—not in the politically charged atmosphere of the last 3 weeks alone, as some would have the public believe.

That record, in the form of substantial and constructive legislation now embodied in our statute books, is one of which the Members of this body may well be proud.

The legislation is substantial in that it affects every area of our national life.

The legislation is constructive in that it was accomplished under the conditions of a divided Government—a Republican President and a Democratic Congress, a situation prevailing throughout the present administration with the exception of its first 2 years in office.

Democratic majorities, elected and reelected to the 84th, 85th, and 86th Congresses in succession, obviously must have functioned to the overwhelming satisfaction of the voters.

It would seem that the President, even though of opposite political party, would recognize the actions of a Democratic Congress as reflecting and responsive to the will of the people whom they represent, and thus would be less prone to thwart it.

On the contrary, however, the President, usually on specious grounds, has vetoed several vital and progressive measures of this Congress, and adversely affected numerous others by his threats of veto.

To the credit of the Democratic leadership of the Congress, its actions were directed to the attainment of legislation for the good of the country rather than the creation of political issues.

There will always be minorities who may feel that progress is either too slow or too fast. In this election year of 1960 it will be for the voters in November to determine the pace of the next Congress.

The people can confidently expect that with a Democratic President in the White House, exercising his powers of moral leadership, and working hand in hand with a Democratic Congress, the great problems of world relationships, national security, economic progress and domestic welfare will be tackled with renewed vigor.

NATIONAL DEFENSE

A total of nearly $80 billion for national defense was appropriated by this 86th Congress in its 1st and 2d sessions.

The General Accounting Office in a number of reports, and committees of Congress, have shown that considerable waste through unnecessary duplication and purchases has taken place. And the surface has only been scratched. While in the preparation for national defense a certain amount of duplication and excess purchases is necessary which, in all fairness, should be recognized, unneces-

sary duplication and purchases should be eliminated, because such savings could be used for additional real and necessary defense purposes. The present administration has been lax in giving the leadership to avoid such unnecessary expenditures in a field which covers at least one-half of the appropriations for the Department of Defense.

While our overall defense picture is at present strong, we should not and cannot ignore the fact that certain weaknesses exist that Democratic-controlled Congresses have tried to remove.

For example, we feel that our standing Army and Marine Corps should be larger; that our weapon systems, the U.S. Army, in particular, should be modernized, for which funds were appropriated to start such modernization, the most of which by order of the Chief Executive, was not used; that authorization and construction of Polaris atomic-type submarines should be increased, and the construction accelerated of those authorized; that a more adequate defense should be established against attack by intercontinental ballistic missiles and by intercontinental bombers; that funds for military research and development should be increased, having in mind the importance of basic research, and that in the field of which is referred to as outer space in which the military as well as the civilian agency (NASA) are deeply interested, and in which field we are 4 to 5 years behind the Soviet Union in propulsion power, instead of the policy of catching up the Democratic Party's policy is to go ahead of the Soviet Union.

For we have the brains and the facilities to do this in all aspects of research and development, whether military or civilian.

What is needed is the leadership that will coordinate these brains and facilities to obtain the desired and necessary result.

For the Democratic Party recognizes that in the war of survival, which the Republican administration now recognizes after 7½ years, that America cannot be second best in any important field, particularly military, to the Soviet Union.

The disagreement in the field of national defense between the Democratic Congress and the President is not that the administration has gone too far, but that it has not gone far enough. And recent events have clearly supported the position of the Democratic Party in Congress.

The evidence of internal administration conflicts and disagreements, and alleged influence and favoritism among some manufacturers competing for defense contracts, with other factors, such as the established fact of wastefulness of countless of millions of dollars, led the committees of Congress to shift the purposes of some of the funds requested by the budget of the President. Such action was to assure as far as Congress could go the use of appropriated funds for more effective military strength and power.

For example, last year, for fiscal 1960, minimum personnel figures were fixed for each branch of the Armed Forces, increased funds over the budget were allowed for Army modernization and antisubmarine activities. Funds were provided for a second nuclear-propelled aircraft carrier. All of these changes were made within the total figure asked by the President.

For fiscal 1961, Congress again increased, this year by more than $162 million, the President's program for Army modernization; refused to cut the Army National Guard and Army Reserve, and fixed strengths of 400,000 and 300,000 respectively rather than 360,000 and 270,000 he recommended.

One of the more significant actions was provision of $250 million above the budget to provide additional airlift capability for quick transfer of fighting men to any emergency spot. This was done, in the words of the subcommittee chairman, Mr. MAHON, of Texas, after "key officials of the Department of Defense confessed that our airlift is inadequate."

Another vital move was the addition of $145 million above the budget for the Air Force to speed the perfection of unmanned military satellites: the Samos of reconnaissance and intelligence, the Midas for early warning of attack, and the exploratory satellite, the Discoverer.

Other specific fields in which the Congress provided funds in excess of the President's budget were for the accelerated development of the B–70, increased number of planes for airborne alert, a stepped-up fleet ballistic missile program for 12 Polaris submarines.

Much of the increase was balanced by cuts in other sections of the Defense budget, with the net total above the President's requests amounting to $600 million.

Apart from appropriations the Congress took these other actions defensewise:

Extended the draft to July 1, 1963.

Extended the Renegotiation Act for 3 years to December 31, 1962, to provide for recovery of excessive profits on defense contracts and authorizing a study of procurement and renegotiation policies.

Enacted measures authorizing involuntary retirement of officers in the various services to raise the quality of officer personnel and increase efficiency.

Authorizes $1.1 billion of construction projects for fiscal 1961 at Army, Navy, and Air Force installations here and abroad.

Authorizes construction of 4 modern naval vessels at cost of $157.9 million as part of 1961 program involving 57 vessels.

CIVIL RIGHTS

When the historic move was made in the 85th Congress to enforce by appropriate legislation the voting rights guarantee of the 14th amendment, 90 years after its ratification, the life of the new Civil Rights Commission was to expire in November 1959.

Two measures enacted by this 86th Congress will make possible the functioning of the Commission for the first time under the actual conditions of a national election this year.

In the 2d session of the 86th Congress under the Civil Rights Act of 1957, that which, in brief, provides the following:

First. After a finding in a suit brought under the Cnvil Rights Act of 1957, that Negroes have been disqualified from voting on racial grounds, Federal courts have the authority to appoint referees who may, if a Negro fails in a new attempt to register, grant voting certificates binding on State officials under penalty of contempt of court; second, the records of State election officers must be preserved for 22 months after each primary or general election, and inspection by the Department of Justice is authorized; third, one who obstructs a Federal court order will be guilty of a Federal crime; fourth, persons who cross State lines to avoid prosecution for "hate bombings" are also guilty of a Federal crime; and fifth, the Government may provide temporary schooling for servicemen's children in areas where public schools are closed by integration disputes.

Thus the forthcoming presidential election will be the crucible in which this effort to protect a great number of citizens against disfranchisement will be tested. It will be a test likewise of the newly established legal machinery and procedures designed to that end. The administration has the responsibility of enforcing the provisions of this law to see that Americans of the colored race can exercise their constitutional right to register and vote.

For it was the 85th Congress, followed by important amendments in the present Congress, both Democratic controlled, that enacted in close to 90 years civil-rights legislation. This is a record the Democratic Party can be proud of, particularly when it is known that the 83d Congress, Republican controlled and with President Eisenhower in the White House, did not even report, in either branch of the Congress, a civil rights bill out of committee.

With this experience behind us—and not before—it will be time again in the 87th Congress to look at the whole picture and determine what improvements may be needed in the laws, and what other facets of civil rights require action.

Statehood for Hawaii, one of the earliest actions of the 86th Congress, not only added a 50th star to the American flag—following Alaska as the 49th—but it demonstrated to the world the diversity within the unity of our democracy. People of many races of the Far East comprise the citizenship of this new State, and their elected Members of Congress include men of Japanese and Chinese origin, taking their seats in the Capitol along with a native of India and Negroes from our large cities—Americans all.

It was peculiarly appropriate that the last State admitted to the Union should be the first to ratify the proposed constitutional amendment adopted by this Congress, and submitted to the States for approval, to give the citizens of our own District of Columbia the right to vote in national elections.

This action of the Congress not only was a matter of justice to the people of

Washington, but cleared up an anomaly which was beyond the understanding of our friends abroad: that the citizens of our Nation's Capital, among all Americans, should not have the right to participate in the election of their President.

SOCIAL SECURITY, HEALTH, AND WELFARE

The first halting step toward a program of adequate medical care for the aged was made by this Congress.

That it will not suffice the needs of a growing number of elderly citizens to meet increasing costs of medical service, hospitalization, drugs, and so forth, will become evident when the program goes into effect.

Such aid as the measure will provide to a limited number of persons, estimated at 1,300,000 of the 16 million men and women over 65 years of age, is pitifully small. A program of greater benefit to more people could, of course, have been enacted if the President and Vice President had lent support instead of opposition to the principle of self-financing as part of the social security system.

Nevertheless, it is a start, with the prospect that the next Congress, working with a Democratic President who will give leadership instead of lip service on this issue, will fight for expansion of the program. And with a Democrat in the White House, this expansion will take place.

As enacted the law provides for Federal contributions to those States which agree to put up funds to help pay medical costs for eligible individuals. Estimated cost of the program in its first year, starting October 1, is $260 million of which the States would pay about one-third.

Immediately eligible are approximately 2,400,000 needy aged now receiving old-age assistance from their States, under a relief program to which the Federal Government now contributes on a sliding scale up to $65 per person. Under the new act the Federal contribution will be on the basis of an additional $12 per month for the estimated 15 percent of these individuals, or 300,000 needing medical care.

Other potential beneficiaries are 10 million aged not on State welfare rolls but whose incomes are insufficient to pay the full costs of medical care, particularly should a catastrophic illness strike. It is estimated about 10 percent or 1 million of these would need help in any 1 year.

The extent of aid given to persons in this latter group will vary in accordance with standards set up by each State, as to what items of expense the State will help to pay, how much of the obligation it will share, and the income level beyond which persons will not be eligible.

Liens on a beneficiary's property could be required by the States from those on its assistance rolls but not from others.

However, a humiliating feature for our senior citizens will be the necessity of going hat in hand to welfare offices to prove the insufficiency of their income to meet an overwhelming financial crisis in their lives by virtually a "pauper's oath." How much more humane, sensible and self-respecting for the individual is proposal to incorporate health insurance into the social security system under which the individual, by contributing through withdrawal tax, builds up protection against old age ills by paying his own way—and sparing his pride.

The medical care feature is one of a series of other amendments to the Social Security Act which:

Increases from $1,200 to $1,350 the limit retirees may earn without losing OASI pension payments.

Permits disability benefits for the insured and his dependents regardless of age. Previously these payments could not begin before the age of 50.

Reduces the work period required to qualify for old age pensions, thereby making approximately 300,000 additional persons eligible for immediate benefits.

Increases benefits to approximately 400,000 children of deceased workers in families with more than one child up to a maximum per family of $254 monthly.

Extends pension benefits for the first time to widows of qualified workers who died before 1940.

In the whole broad range of social welfare, health and education the 86th Congress enacted more than a score of important measures.

The Federal contribution to the land-grant colleges was increased.

Higher benefits were provided under the Federal Employees Compensation Act.

Increases of the authorized maximum expenditures under the special school milk program for 1959, 1960, and 1961.

Railroad retirement benefits and unemployment compensation were raised.

In further protection of the health and safety of the public and consumers a national register of persons whose driver's licenses were revoked was established in the Department of Commerce.

Control over use of coal-tar coloring in food, drugs, and cosmetics was tightened, regulation provided over distribution of hazardous substances sold for household use, and a system of licensing and control over manufacture of narcotic drugs.

The Federal Air Pollution Control Act was extended and studies authorized of the effects of automobile exhaust fumes.

Health insurance programs for Federal employees as well as civil service workers were established and increases in annuities for retired Foreign Service officers and their survivors were authorized.

Bill providing pay increases of 8.4 percent for postal employees, and 7½ percent for classified and other employees. This bill was vetoed, and the Democratic controlled Congress passed it over the veto of President Eisenhower.

The Comprehensive Housing Act of 1959—which the President finally approved after vetoing two earlier measures as well as one in 1958—fortunately provided 2-year authorizations for FHA loans and urban redevelopment. However the opposition of the administration was sufficient to prevent the passage of a broader and much needed Housing Act.

A new Democratic administration will be able to take a fresh look at these problems. Meanwhile the Congress provided for those programs which will either expire or require additional appropriations authorizations. These were for home repair and improvement, and loans for college housing and community facilities.

Much more serious was the failure to enact a school construction program. Even though the Democratic majority scaled down its legislation to conform with the President's own proposals in an earlier administration bill neither he nor his party leaders would raise a finger to produce one vote in the Rules Committee to get conflicting Senate and House bills to a conference.

Here again we may expect that the election of a Democratic President will make the difference in 1961.

INTERNATIONAL AFFAIRS

In spite of the difficulty of the Congress in following the vacillating and uncertain policies of the administration in foreign affairs we have provided the President with the machinery and the funds to do the job.

Approximately $8 billion has been appropriated by this Congress in the past 2 years for expenditure under the Mutual Security Act to aid our allies in strengthening our common defense efforts and to help underdeveloped nations overcome the poverty, disease, and illiteracy which makes them vulnerable prey to communism.

The annual battle over these funds raged again, thanks to the refusal of the President to put this vital program on a long-range basis. Although the Draper Committee which he appointed to study the whole problem of free-world survival urged him to drop the hand-to-mouth shortsighted method of its treatment, he rejected the first step in that direction—a congressional plan to 5-year financing of the Development Loan Fund.

The proposal called for direct financing from the Treasury instead of annual appropriations, which the President resorting to a political shibboleth labeled back-door financing. This is a method to which he has in the past resorted when it suited his own purposes.

This chicken came home to roost this year when $75 million in Development Loan funds were not included in a last-minute supplemental appropriation he sought.

Another ill-timed appropriation asked by the President, for $500 million additional mutual security funds for Latin American countries, was provided by the Congress, along with $100 million to rehabilitate earthquake-stricken Chile. The passage of this bill by itself justified the adjourned session that followed the two national conventions. If Congress had adjourned sine die before the national conventions, in the light of the situation existing in South American countries, the President would have been faced with the question of calling Congress back in a special session.

For the last few years it had been quite apparent that our good neighbors to the south felt we had been neglecting them while concentrating our interest on other parts of the world. Various high administration officials, and even the President's brother, Dr. Milton Eisenhower, had made trips there, come back and made recommendations which were usually pigeonholed.

However, it was not until the Cuban situation became serious and the Dominican issue flared before the meeting of the Organization of American States that the President belatedly came forward, toward the close of the session, with his request.

The Congress earlier, in its first session, enacted legislation providing for the establishment of, and our participation in, the Inter-American Development Bank, to give the Latin American nations an institution long needed to aid their economies through development of their resources.

Another major action by the Congress was provision for American participation in the International Development Association to help provide assistance to underdeveloped countries.

A whole series of treaties were ratified by the U.S. Senate including the vital one to assure mutual cooperation and security with Japan, and the Antarctica Treaty dedicating the use of that continent to peaceful purposes only.

Other major achievements were the bill authorizing $500 million to help South American countries in social and economic development, and a $100 million authorization for Chilean earthquake rehabilitation. If the Congress had adjourned prior to the two national conventions, the importance of early passage of such legislation was such that the President would have been faced with the question of calling Congress back in special session.

A $162 million supplemental appropriation bill restoring $65 million of the reduction previously made to the mutual assistance appropriation bill.

Other matters of importance are:

A $3.9 billion appropriation bill for public works projects. The result of such appropriations will be the marshaling and utilization of additional natural resources located in all parts of our country.

Suspension of the Federal Communications Act equal time requirement so that the 1960 presidential and vice-presidential candidates can stage TV-radio debates without obliging broadcasting networks to give corresponding time to fringe-party nominees for those offices.

A measure setting Federal criminal penalties for persons convicted of payola dealings, rigging quiz shows and other abuses in the TV-radio industry.

Providing for admission of approximately 5,000 nonquota immigrants as part of international program for resettlement of European refugees.

Amending antikickback statute now covering cost-plus contracts to apply to all negotiated Government contracts.

Amending various Federal statutes in view of transition of Hawaii from territorial to statehood status.

Permitting personal income tax deductions of all medical expenses incurred by any taxpayer in care of dependent parent over 65 years of age.

Authorizing $1 billion a year for fiscal 1962 and 1963 in Federal aid for primary and secondary highway systems and their urban extensions.

Bill reducing cabaret tax from 20 percent to 10 percent.

Revising method for treatment of railroad corporation income resulting from discharge of indebtedness in receivership or under bankruptcy proceedings.

Requiring bank mergers to have approval of Federal Reserve Board, Comptroller of Currency, or Federal Deposit Insurance Corporation to assure against monopoly.

Permitting tax credit on foreign income by corporations to be taken on overall instead of country-by-country basis.

Increasing payment for domestic ship construction, for 2 years, to 55 percent of cost in foreign yards.

Providing $2½ million a year for 3 years to aid fishing industry to meet foreign competition in the construction of trawlers.

Amending Investment Advisers Act of 1940 to make enforcement by the SEC more effective.

Amending Investment Company Act of 1940 to strengthen regulation by the Securities and Exchange Commission.

Authorizing $1.5 billion public works projects on rivers and harbors for flood control and improvement of harbors.

Created an Office of Coal Research to find new uses for coal to encourage production and conservation, and to otherwise stimulate this industry.

Of great importance is the bill authorizing $500 million for the construction of the San Luis unit of the Central Valley, Calif., water supply project.

Authorizing Federal cooperation with educational institutions and private organizations in research and training programs on fish and wildlife resources.

Extending special milk program for children to June 30, 1961, and authorizing maximum expenditures of $85 million in fiscal year 1960 and $95 million in fiscal year 1961.

Providing for regulation of interstate distribution of hazardous substances sold for household use.

Clarifying special postal rates for educational, cultural, and library materials.

Also of major importance bill authorizing Post Office Department to seek court orders to curb the use of mails for the distribution of obscene or fraudulent matters.

Establishing a system of licensing and control over the manufacture of narcotic drugs.

Resolution of the House of Representatives expressing the sense of the House that the President should call a White House conference on narcotics.

Authorization and appropriations of over $900 million for the National Aeronautics and Space Administration.

Authorization for adequate appropriations for the Atomic Energy Commission, and the making of such appropriations.

NATIONAL ECONOMY

After nearly 8 years of Republican administration of the executive branch of the Government the state of the national economy is ominous:

Unemployment is at 4,500,000; steel production is lower than at any time in the past 10 years; business profits have dropped; the stock market is down in anticipation of lower earnings; consumer buying and consumer credit while both high are rising at diminishing rates, and the rate of increase in personal income likewise has slowed down. Farm income, too, is down.

If elected, Mr. NIXON recently said he would solve the plight of the farmers during the next 4 years. That statement naturally raises the question "Where have Mr. NIXON and the Republican administration been the past 7½ years?"

The administration which not so many months ago was trying to persuade the Congress to raise the interest rate on long-term Treasury securities above the 4½-percent limit is now, though the Federal Reserve Board is cutting rediscount rates, reducing required bank reserves to get credit flowing.

A Congress is to be judged not only by what it does, but what it refuses to do. The Democratic controlled Congress refused to accede to aggressive position, repeatedly stated, of the President to completely lift the 4½-percent ceiling on long-term Federal Government bonds.

The Democratic controlled Congress thereby rendered an inestimable service to the American people.

As a result of the high-interest policy of the Republican administration, put into operation administratively, it is conservatively estimated on public and private indebtedness the taxpayers and the people are paying at least $12 billion more a year now than they did under preceding Democratic administrations. For example, the increase on payments of interest on the Federal debt is over $4 billion a year more now than the payment was as recently as 1952.

There are reliable reports that the administration, which, for a few months put a check on expenditures in order to end the fiscal year June 30 with a surplus, is now accelerating them in order to revive conditions before the November election.

Had the administration not opposed school construction and housing legislation in the last 2 years the economy would today be in better condition.

Had the President not vetoed earlier public works legislation of this Congress those projects would be under way today.

Had the President not vetoed the depressed areas bill the loans and grants provided under that legislation would have been at work helping to redevelop those sections of the Nation burdened with surplus labor of a chronic nature.

Had the President not refused to go along on the $1.25 minimum wage legislation with expanded coverage, which died, the money spent by these wage-earners would be giving the economy a lift.

In spite of Republican obstruction the Congress did manage to enact some legislation helpful to our economic situation:

The lending authority of the Small Business Administration was increased from $150 million to $575 million.

The ceiling on the amount of loans the SEA may have outstanding was lifted by $150 million to $725 million.

The Small Business Investment Act, under which private investment corporations to operate in this field are created,

was amended to make their extension of credit more readily available.

The Clayton Antitrust Act was amended to expedite procedures for enforcement of orders of the Federal Trade Commission.

Highways and airport construction authorizations were enacted and these should make a favorable impact throughout 1961.

Enactment of a measure curbing undemocratic and racketeering practices should have a stabilizing effect on labor-management relations.

The existing 52-percent corporate income-tax rate and the temporary schedule of excise taxes were again twice extended by this Congress, to run now to July 1, 1961.

Likewise, a temporary increase in the limit on the national debt to $293 billion to the end of fiscal 1961 was enacted. The statutory limit was lifted in the first session from $283 billion to $285 billion.

With the administration approaching the end of its 8-year tenure, it might be well to note that the Republicans who ran for office on promises to reduce the debt have now brought it to a peacetime record high.

VETERANS' LEGISLATION

Ever mindful of the contributions made in time of war and in time of peace by the veterans of our country, the 86th Democratic-controlled Congress passed a number of bills important to their best interests and also to the widows and dependents of deceased veterans.

Legislation was enacted into law—

Authorizing $100 million for direct housing loans to veterans.

Increasing non-service-connected pensions to veterans and equalizing pensions of World War II and widows of the Korean conflict with those of World War I.

Extending special enlistment programs under the Reserve Act.

Providing for control of estates of incompetent veterans.

Providing grants to aid totally disabled veterans to acquire specially equipped housing.

Extending for 2 years, to July 25, 1962, authority for direct and guaranteed loans to veterans for homes, farms, or business.

Waiving payment of premiums on national life insurance policies for certain totally disabled veterans.

Permitting conversion or exchange of national life insurance policies to a new modified plan.

Providing education and training for children of veterans dying of service-connected disability after January 1, 1955.

Providing additional compensation for disabled veterans with more than three children.

Increasing payments for support of disabled veterans in State soldiers' homes.

Providing for additional compensation for certain disabled veterans.

Providing for services of optometrists to veterans with service-connected eye conditions.

Clarifying reemployment provisions affecting draftees and reservists.

Providing for free medical service for veterans with nonservice ills requiring treatment preparatory to admission to a veterans hospital.

Providing for $100-a-month pension for holders of the Congressional Medal of Honor.

Extending to March 1, 1964, the period during which families of veterans have preference for admission to public housing projects.

Authorizing the posthumous award of appropriate medals to the four chaplains.

The agricultural community of our country is one of the greatest assets we have, not only as a prominent factor in our gross national economy, but as an important element of our national defense.

For a nation that cannot grow farm products to feed its people could, in time of war, be forced to capitulate to an enemy capable of blockading its shores.

Our farmers and their families are vitally important as sound, substantial citizens.

Agriculture in the United States is in the broad situation of buying necessities for the farm and family in a protected market, and selling surpluses in an unprotected market, and pretty much at world prices.

A broad and dynamic agriculture, with the family-type farm preserved, is a matter of national importance.

The Democratic Party has recognized that in a great industrial Nation like ours, unless our agricultural community—our farmers—receive compensatory consideration for the tariff protection given business and industry, that a broad and dynamic agricultural life, with the family-type farmer properly recognized, will be difficult to exist.

Under past Democratic administrations legislation was enacted into law of great benefit to the farmers of our country, and through a strong agricultural community, of great benefit to the national interest of our country.

During the past 7½ years, under the Republican Party, with the veto power of the President, and his boast and threat of one-third plus one, farm income has materially dropped, at a time when purchases for farm and family, as well as other expenses, have sharply increased. As a result, tens of thousands of family-type farms have disappeared—the farmer owners unable to obtain a living, and the corporate-type farm has sharply increased.

It is not too late for the farmers of our country to reverse this situation. To do so requires understanding the lack of visionary leadership during the past 7½ years, and action on their part at the polls to repose complete control of our Government, the White House, and the Congress, in the hands of the Democratic Party.

With a Democrat in the White House, and a Democratic Congress, which seems to be assured, teamwork and a coordinated leadership will exist that will restore vitality to agriculture and to farm life in our country.

The only promise the Republicans, through their candidate for President, makes is that they will solve the farm problem during the next 4 years.

But where have the Republicans been during the past 7½ years?

During this period several excellent bills passed by Democratic Congresses met with Presidential veto.

The last one was as recently as 1959, providing for a referendum by wheat farmers on 25 percent reduction on planting acreage and 90 percent of parity price support, and failing approval by a two-thirds majority, acreage controls would be removed and price supports reduced.

I might also observe that the Republican Party in 1953–54—83d Congress—was in control of the White House and of both branches of the Congress, and failed to act.

Despite the noncooperation of President Eisenhower who followed the advice of Hon. Ezra Taft Benson, Secretary of Agriculture, Democratic-controlled Congresses have passed legislation of importance to our farming community.

Confining myself to the 86th Congress which has just adjourned sine die, the following bills are some that were enacted into law:

Extending for 2 years to December 31, 1962, Agricultural Trade Development and Assistance Act for sale of surplus commodities abroad; permits a trial food-stamp plan for distribution to needy at home; authorizes $4.5 billion.

Broadening power of Crop Insurance Board to extend program into additional counties.

Authorizing leasing of cotton acreage allotments during crop-years 1959 through 1961.

Authorizing Commodity Credit Corporation to sell food for livestock in emergency areas.

Transferring responsibility for making appraisals from Farm Credit Administration to Federal land banks.

Extending to June 30, 1961, provisions of Bankhead-Jones Farm Tenant Act authorizing refinancing of loans on family-sized farms.

Permitting continuance of established coloring practices in orange industry.

Extending for 3 months, to March 31, 1961, the Sugar Act of 1948, fixing quotas of domestic and foreign producers; gives President authority to readjust Cuba's quota.

Requiring marketing quotas for rice be established when total supply exceeds normal.

Permitting application of loan provisions of Watershed Protection and Flood Prevention Act to other soil-conservation projects.

Extending minimum national marketing quota for extra-long-staple cotton to the 1961 crop.

Fixing price supports for butterfat and for milk sold for manufacturing purposes.

Authorizing donation of Federal surplus property to cooperative agricultural extension agencies of States and counties.

A bill of great importance to tobacco producers to stabilize price supports for

tobacco was passed by the second session of this Congress, and is now law.

And yet a bill passed by the first session of this Congress to stabilize and protect the level of tobacco price supports was vetoed by President Eisenhower.

Final Report—2d Session, 86th Congress

EXTENSION OF REMARKS
OF

HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MINSHALL. Mr. Speaker, at the conclusion of this session of the 86th Congress, it is my privilege to bring to the voters of the 23d Congressional District a final report of the 1960 session's accomplishments. Early "do something Congress" promises of the majority leadership wilted in the heat of their own partisan sound-and-fury. More than one-fourth of the total 264 legislative days in which the House and Senate met were tied up in intra-majority-party wrangling over civil rights. The special postconvention session, which ended at 11:52 p.m., September 1, fizzled out with many major issues unresolved. Of the 6,327 bills introduced at the start of the session, 511 were enacted into law, and 244 of these were private bills. Major legislation shelved by the 86th Congress in the second session included an omnibus housing bill, a minimum wage increase, a costly water pollution measure, an extravagant area redevelopment program, increased veterans' benefits, Federal aid to school construction, general tax revision. The following major legislation was enacted into law:

NATIONAL DEFENSE

Defense appropriations proved a boomerang to partisan detractors of President Eisenhower's defense planning. Even many members of the majority party could not go along with their leaders' exorbitant demands, with the result that despite pressure from all sides the President's original request for $39.335 billion was upped by only $661 million, for a total of $39.996 billion.

Military construction money requests were almost halved by Congress, which chopped the Executive's request $1.188 billion down to $994 million.

Space research and development was given a fiscal shot in the arm with a supplemental appropriation to NASA of $23 million.

Four modern naval vessels were authorized at a cost of $157.9 million as part of the vast naval expansion program which calls for 57 new vessels.

Atomic Energy Commission funds totaling $211 million were voted for new construction projects affecting all aspects of the AEC programs—manufacture of atomic weapons, production of special nuclear materials, reactor development, physical research, and biology and medicines.

FOREIGN AFFAIRS

Mutual security funds were reduced by $559 million, with Congress rejecting a request for $4.281 billion and giving a final nod to $3.722 billion. However, the mutual security contingency fund was padded with an increased authorization of $100 million to meet emergency needs in Africa and other areas of the world.

Latin-American development aid was set at $500 million for good neighbor assistance, with another $100 million earmarked to help earthquake-ravaged Chile in her reconstruction efforts.

Sugar imports from both Cuba and the Dominican Republic were sharply reduced when the Congress voted the President authority to readjust sugar quotas.

NATO citizens convention will have a U.S. Citizens Commission participating as a result of congressional approval. The convention's aim: Exploration of means of developing democratic freedom through economic and political means.

International cooperative health program: Congress authorized the President, the Secretary of Health, Education, and Welfare, and the Surgeon General to conduct an international cooperative program in health training and planning.

NATIONAL AFFAIRS

Medical care to the aged was provided under a new program calling for Federal-State matching funds. State participation in the plan is discretionary, with aid available to persons over age 65 whose resources are determined by their resident State to be insufficient to meet costs of necessary medical services and those States taking part may determine eligibility for medical assistance on a far more liberal basis than for old-age assistance. Some noninstitutional, as well as institutional, care is permissible under the new law, effective October 1. The Federal Government will grant funds anywhere from $1 for each $1 put up by a State all the way to $4 in Federal money for each $1 of State funds. Estimates are that the program will cost the Federal Government some $202 million the first year, with the total additional cost to the States running about $60 million.

Other social security revisions voted by the 86th Congress in its 2d session extended unemployment compensation coverage to an additional 60,000 to 70,000 employees; payments were increased for children of deceased workers; all age limits on total disability benefits were dropped, bringing 250,000 more persons under such coverage; the income retirement test was revised to permit greater outside earnings for social security retirees: Under the new amendment there will be a $1 reduction in benefits for each $2 earned in outside income between $1,200 and $1,500. A dollar-for-dollar reduction will be made on earnings above $1,500, instead of withholding full benefits for each $80 of earnings over $1,200. This means working beneficiaries no longer will lose in total income as a result of working at jobs paying more than $1,200 annually.

Payola and allied abuses were outlawed when the Federal Communications Act was amended to fix penalties for such offenses.

The Housing Act was extended, continuing the home repair and improvement program and lifting the ceiling on FHA insurance. The revolving fund for college housing loans was increased by $500 million, and the revolving fund for community facility loans was upped $50 million.

Excise taxes on telephone and transportation services were extended another year.

Small business was given a break when Congress changed the Small Business Investment Act to improve effectiveness of the program by making it easier for the small business investment companies to loan money to businessmen. Many restrictions on granting equity capital for small business growth were removed.

An Office of Coal Research was created to investigate new uses for coal, encourage production and conservation of the product, and otherwise stimulate a lagging industry.

Civil rights were further safeguarded by authorizing Federal courts, through appointed referees, to protect voting rights. The 1960 act fixed penalties for obstruction of court orders and for flight to avoid prosecution for vandalism, requires preservation of Federal election records for 22 months, and authorizes funds for education of servicemen's children in areas where public schools are closed by integration disputes.

Health service and research programs were granted a record $715 million for fiscal year 1961.

PUBLIC WORKS

Highway grants of $1 billion for fiscal 1962 and 1963 assured continuance of construction of primary and secondary highway systems and their urban extensions.

Veterans' loans, both direct and guaranteed, were extended another year for homes, farms, and businesses.

Flood control, resources and conservation, and other public-works projects, received $3 billion for the coming fiscal year.

Postal employees and Federal workers were granted a 7½-percent increase in pay.

The preceding summary is necessarily brief. If I can provide you with further information on these—or any other—measures, please do not hesitate to contact me at my Washington office.

Communism: A Threat to Freedom

EXTENSION OF REMARKS
OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RABAUT. Mr. Speaker, to every God-fearing, freedom-loving person in the United States, communism, with all that it stands for, is an odious and abhorrent monster. It is the antithesis of the principles upon which this Nation

was founded. Under communism there can be no religion because communism denies that there is a God. Under communism there can be no individual liberty because the individual is the slave-servant of the state. There can be no Bill of Rights, for only the state has any rights; the individual has none. In short, none of the precepts that we in this country so fundamentally believe in are even possible in the Communist system.

I believe that practically everyone is aware of the truth of what I have just said. But I am fearful, Mr. Speaker, that for far too many people this awareness is wholly academic. By that I mean that there is a vast difference between an awareness or knowledge of what communism is and how it works and an awareness of the grave threat it poses to our continued freedom. For communism is not something that simply exists in far off countries and can be looked at in curiosity or with pure academic interest as just another way of living or as some sort of alien philosophy that we dislike but do not worry about because it really does not concern us anyway. Yet I fear this is exactly what all too many people are doing. It is quite natural for the human mind to close its eyes and turn away from things it finds distasteful or revolting. Communism cannot, must not be treated in this fashion. For the highest goal of communism is communization of the whole world. This is what we must realize. We must constantly remind ourselves of this. We must keep before us constant everyday reminders of the things we believe. And we must recondition our thinking so as to maintain always an acute consciousness of what these reminders stand for—what they actually mean. Indeed, we have many such reminders around us in our daily living. As a reminder of the individual liberty and the democracy we believe in we have but to fix our gaze on the nearest American flag flying above and reflect upon the principles it symbolizes. We immediately realize that everything it stands for is diametrically opposed to the Communist doctrine. We have around us also many reminders that this is a Christian nation which believes in God; a nation founded upon and imbued with a fundamental faith in our Creator; a nation which prays to that God in his infinite wisdom for help and guidance. This faith and such prayer are repugnant in the extreme to communism. Reminders of this are around day after day in various forms.

There are, for example, the words "Under God" in the pledge of allegiance to our flag. This phrase, I am happy to say, was inserted in the pledge as a result of legislation which I was privileged to introduce and which became Public Law 396 of the 83d Congress. There is also the inscription on our currency of our national motto "In God We Trust" placed on the money as a result of legislation authored by the Honorable CHARLES E. BENNETT, of Florida. This inscription also appears on the 3-cent liberty stamp and on the 8-cent stamp. Further, there is the official cancellation mark "Pray for Peace" used on the U.S. mails. This also, I am happy to say, is the result of my efforts.

Perhaps not as widely known but close to the hearts of all Members of Congress is the prayer room in the U.S. Capitol. As a result of House Concurrent Resolution 60, passed by the House, July 17, 1953, and by the Senate May 4, 1954, the Honorable JOSEPH W. MARTIN, Jr., then Speaker of the House of Representatives, set aside a room near the Rotunda of the Capitol to be known as the prayer room, where individual Senators and Representatives could withdraw a while to seek Divine strength and guidance. There is a single stained glass window in the room. The window has a picture of George Washington kneeling at Valley Forge. If I may quote from Public Document 234, 84th Congress, 1st session:

> The single window speaks of that religious faith which has always been a part of the greatness of our Nation. The central figure is of the kneeling Washington, reminding us of the words from his first inaugural:
>
> "It would be peculiarly improper to omit in this first official act, my fervent supplications to that Almighty Being who rules over the universe, who presides in the councils of nations, and whose providential aids can supply every human defect, that His benediction may consecrate to the liberties and happiness of the people of the United States, a Government instituted by themselves for these essential purposes, and may enable every instrument employed in its administration to execute with success the functions allotted to His charge."

Also depicted on the window is the phrase from Lincoln's immortal Gettysburg address, "This Nation Under God."

These and more, Mr. Speaker, are the reminders we have around us every day of what our great Nation is, of what it stands for, of what its people believe and hold dear. What we need to do is to sharpen our awareness of these reminders and to deepen our concentration and reflection on the full meaning of each of them. Doing this, Mr. Speaker, is the surest and most basic way of combating the Communist threat on a day-to-day basis. If this is done, communism cannot prevail.

Report to the People of the 12th Congressional District of New York

EXTENSION OF REMARKS

OF

HON. FRANCIS E. DORN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. DORN of New York. Mr. Speaker, each year, since my election to Congress in 1952, it has been my custom to submit to the people of the 12th Congressional District of New York, whom I have the honor to serve, a questionnaire setting forth various questions being considered by the Congress of the United States and upon which I, in all probability, would have to vote during the ensuing session.

I have always appreciated the fine response to the questionnaire. It gratifies me to realize the intense interest in their Government shown by the people of the 12th Congressional District, their thoughtful answers and comments, their willingness to give the time necessary to answer the questionnaire. Their opinions and advice have been helpful to me in my work as their Representative.

The following is the 1960 questionnaire and the results and percentages:

Do you favor:

1. Continuation of our general foreign policy? Yes, 49 percent; no, 33 percent; blank, 18 percent.

2. (a) Ending of nuclear bomb tests? Yes, 33 percent; no, 36 percent; blank, 31 percent.

(b) Leaving this decision in the hands of the President? Yes, 42 percent; no, 28 percent; blank, 30 percent.

3. Reduction of the Federal debt before reducing taxes? Yes, 63 percent; no, 26 percent; blank, 11 percent.

4. Reduction in nondefense Government spending even if existing functions are curtailed? Yes, 64 percent; no, 26 percent; blank, 10 percent.

5. Raising the minimum wage to $1.25 per hour? Yes, 73 percent; no, 21 percent; blank, 6 percent.

6. The enactment of a strong civil rights program to enforce the voting rights of all citizens? Yes, 83 percent; no, 11 percent; blank, 6 percent.

7. Making it a Federal crime to bomb or desecrate churches and synagogues? Yes, 85 percent; no, 10 percent; blank, 5 percent.

8. Further reduction in the age at which persons shall be eligible for social security benefits? Yes, 70 percent; no, 23 percent; blank, 7 percent.

9. An increase in social security benefits? Yes, 71 percent; no, 22 percent; blank, 7 percent.

10. (a) Increasing the amount of limitation on earnings for those receiving social security benefits? Yes, 69 percent; no, 18 percent; blank, 13 percent.

(b) Abolishing the $1,200 annual limitation on earnings for those receiving social security benefits? Yes, 69 percent; no, 18 percent; blank 13 percent.

11. Direct Federal grants to States for education? Yes, 60 percent; no, 33 percent; blank, 7 percent.

12. Direct Federal grants to States for teachers' salaries? Yes, 50 percent; no, 44 percent; blank, 6 percent.

13. More liberal credit and lower interest rates for small business? Yes, 77 percent; no, 14 percent; blank, 9 percent.

14. A congressional investigation of the administration of the title I housing program? Yes, 78 percent; no, 8 percent; blank, 14 percent.

Whom would you prefer for President? Nixon, 42 percent; Kennedy, 10.1 percent, Stevenson, 8.5 percent; undecided, 30.6 percent; others, 8.8 percent (Republican: Rockefeller; Democrat: Symington, Humphrey).

In my endeavor to keep in constant close touch with my constituents, I have taken my trailer office around the district, to make myself and my office more easily available to those who have problems or to those who wish to discuss fully the vital questions of the day.

I have been particularly impressed by the sagacity of our senior citizens, by their anxiety to be of continuous service to the community and to themselves.

I have found older people who have devoted their life to hard work and saved to the best of their ability, in need in their old age, archaic social security laws preventing them from helping

themselves. For instance, there is the unrealistic limitation on earnings.

Legislation has been enacted in the past, which only scratches the surface of major problems of the aged. Additional legislation is needed so that the country may take advantage of this valuable source of knowledge and power.

President Eisenhower's White House Conference on the Aging, to be held in January 1961, is but the beginning of what should result in much improved understanding of the steps necessary to be taken.

I have an intense interest along this line of endeavor and will continue my efforts to remove the unrealistic social security limitation on earnings and to obtain legislation which will provide adequate and proper medical care for the aged.

I have been deeply grateful for the privilege of hearing from and discussing these matters with such a large segment of the people of the 12th Congressional District, which has assisted me to more ably represent them in Congress.

If there is any way in which I can be of service to them, I hope they will not hesitate to call upon me. Both my Washington and Brooklyn offices are open every weekday. I have a competent staff and my services and theirs are always available to my constituents. I want them to know that even when Congress is not in session, I am on the job.

Louis Kossuth: A Voice Through the Ages

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RODINO. Mr. Speaker, those who raise their voices in the cause of freedom belong to all men and to all time. Louis Kossuth, who devoted his life and his extraordinary abilities to the defense of the ideal of freedom is such a man of the ages.

A few years more than a century ago he came to our shores, a patriot from Hungary, pleading the cause of universal freedom and seeking help for his beleagured homeland.

Under his leadership Hungary had gained a brief state of independence from Austria only to be cruelly overrun by an intervening Russia. From the position of head of state he was reduced to prison. After a trial for treason he was sentenced to exile.

Despite the trial he had emerged in his homeland as the honored champion of freedom of the press, freedom of trade, freedom of conscience, and hero of the people. His influence on Hungary persisted. His ideals, inscribed on the hearts of his countrymen, shaped their destiny and spread abroad.

From country to country he spoke in the cause of freedom. In the United States in 1852, traveling from coast to coast, he gave some 200 speeches. His eloquence and his magnetic personality lent strength to a plea that fell on sympathetic ears. Although the aid and official support which he sought were not tendered because of American reluctance to become entangled in European conflict, he was received with wide acclaim wherever he went.

His voice has echoed down the decades with the force of prophecy. It is interesting to recall one of his speeches, in which he said:

> Republican America and all-overwhelming Russian absolutism cannot much longer subsist together on earth. Russia active, America passive—there is danger in that fact. I cannot but believe it were high time to do as old Cato did, and finish every speech with these words, "However, the law of nations should be maintained, and absolutism not permitted to become omnipotent." I could not forbear to make these remarks, and the answer I got was, "That is all true and right, and will be attended to when the election is over; but, after all, the party must come into power, and you know there are so many considerations—men want to be managed, and even prejudices spared." And it is true, but it is sorrowful that it is true.

Louis Kossuth, a man of the ages, has become a symbol and a synonym of freedom, and today he reminds Americans that while we must attend to our domestic business of choosing our leaders, the world abroad continues to demand our attention.

Procedural Reform of House Rules To Assure Majority Rule Is Necessary

EXTENSION OF REMARKS
OF
HON. CHET HOLIFIELD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HOLIFIELD. Mr. Speaker, it is obvious that procedural reform of the House rules is necessary to assure majority rule, responsive to the needs of our time. The platform committee on which I had the privilege to serve at the recent Democratic Convention in Los Angeles, wrote the following plank on congressional procedures, subsequently adopted by the Convention:

> In order that the will of the American people may be expressed upon all legislative proposals, we urge that action be taken at the beginning of the 87th Congress to improve congressional procedures so that majority rule prevails and decisions can be made after reasonable debate without being blocked by a minority in either House.
>
> The Rules of the House of Representatives should be so amended as to make sure that bills reported by legislative committees reach the floor for consideration without undue delay.

Under leave to extend my remarks, I include two studies on this subject prepared by the Legislative Reference Service of the Library of Congress at my request. One discusses the operation of the 21-day rule in effect during the 81st Congress; the other study discusses proposed Rules Committee reforms, classified according to their relation to various concepts of Rules Committee functions. They follow:

OPERATION OF 21-DAY RULE DURING 81ST CONGRESS

The 21-day rule remained in effect throughout the 81st Congress (1949–50), despite a determined effort to repeal it early in the 2d session. A coalition led by Congressman COX, of Georgia, was defeated on January 20, 1950, by a vote of 236 to 183. The rule proved effective in preventing a permanent blockade of important legislation by the Rules Committee. During the 1st session of the 81st Congress it brought an anti-poll-tax bill and a rivers and harbors bill to the House floor for a successful vote and forced action on housing and minimum wage bills. During the 2d session it enabled the House to vote for the National Science Foundation, Alaska and Hawaii statehood legislation, the national minerals act, a veterans' hospital bill, and a joint resolution for U.S. participation in certain international organizations. Altogether, during the 81st Congress eight measures were brought to the floor of the House and passed by resort to the 21-day rule, and its existence forced the Rules Committee to act in other cases. (House Calendar, final edition, 81st Cong., p. 114.)

On January 3, 1951, a bipartisan coalition regained control of the situation and obtained repeal of the 21-day rule by a vote of 247 to 179 after a bitter fight. As a result, the power of the Rules Committee to obstruct bills was restored and exercised during the 82d and later Congresses. For example, a bill authorizing the shipment of wheat to India was held up by the committee for many weeks in 1951 until it had been amended to conform to committee views. "Until the 21-day rule is restored," said Representative HOLLIFIELD, "we can expect further situations in which a few men, strategically situated in the Rules Committee, can impose their will on the Congress and prevent the enactment of legislation deemed by the House majority to be essential to the security and welfare of this Nation." (Hearings before the Senate Committee on Expenditures in the Executive Departments, on the Organization and Operation of Congress, June 1951, p. 52.)

CASES OF ACTUAL USE OF NEW PROCEDURES

1. The first use of the new procedure was in connection with the bill (H.R. 3199) prohibiting the payment of poll taxes as a condition of voting in elections for national officers. The anti-poll-tax bill was favorably reported by the Committee on House Administration on June 24, 1949 (Rept. No. 912). On July 1, Chairman Norton filed a resolution (H. Res. 276) providing for the consideration of H.R. 3199. Thereafter the resolution was never discussed in the Rules Committee, and after a lapse of 21 days the poll-tax bill was called up on the floor of the House on July 25 and passed on July 25, 1949.

2. The second instance of the use of the new procedure was in connection with the rivers and harbors bill (H.R. 5472). This bill was favorably reported from the Committee on Public Works on July 6, 1949 (Rept. No. 969). Chairman Whittington immediately applied to the Rules Committee for a rule allowing floor consideration of the bill, but after a delay of 22 days it was apparent that no rule would be granted. On July 28, therefore, Mr. Whittington, by direction of the unanimous vote of his committee, filed a resolution (H. Res. 302) providing for the consideration of H.R. 5472 under the new 21-day rule. On August 29, the House approved the resolution and passed the bill.

During the consideration of the resolution three members of the Rules Committee explained its refusal to grant a rule on this bill. Mr. Sabath stated it was "because of the belief that it was purely a pork-barrel

bill." Mr. Cox stated that "it was their feeling the condition of the Treasury and the financial condition of the country were such as to make it not advisable for the granting of authorizations or the commitments which the bill permits." Mr. Wadsworth explained that the Rules Committee had become deeply concerned over "the general tendency of legislation as it might affect the future financial commitments of the Government. * * * The poor old Rules Committee," he said, "is the only committee that has apparently been interested in understanding and measuring this trend. * * * If we keep on this way the Government will be bankrupt."

3. The third case involved a bill (H.R. 331) for statehood for Alaska. This bill was reported from the Public Lands Committee on March 10, 1949 (Rept. No. 255). After failing to get a rule, Mr. Peterson, chairman of Public Lands, by direction of that committee, called up House Resolution 217 on January 23, 1950, a resolution providing for the consideration of H.R. 331. After debate, the resolution was agreed to on the same day by a vote of 373 to 25. (CONGRESSIONAL RECORD, vol. 96, pt. 1, pp. 772–782.) Subsequently, H.R. 331 passed the House on March 3, 1950.

4. The fourth instance also occurred on January 23, 1950, and involved a bill (H.R. 49) to enable the people of Hawaii to form a constitution and State government and to be admitted into the Union. This bill had been reported from the Public Lands Committee on March 10, 1949 (Rept. No. 254). After failing to get a rule, Mr. Peterson, chairman of Public Lands, by direction of that committee, called up House Resolution 218 on January 23, 1950, a resolution providing for the consideration of H.R. 49. After debate, the resolution was agreed to on the same day. (CONGRESSIONAL RECORD, vol. 96, pt. 1, pp. 782–785.) Subsequently H.R. 49 passed the House on March 7, 1950.

5. The fifth case concerned a bill (H.R. 4846) to establish the National Science Foundation. This bill was reported from the Interstate and Foreign Commerce Committee on June 14, 1949 (Rept. No. 796). After remaining in the Committee on Rules for more than 21 days without being reported, Mr. Crosser called up House Resolution 321 on February 27, 1950, a resolution providing for the consideration of H.R. 4846. After debate, the resolution was agreed to on the same day. (CONGRESSIONAL RECORD, vol. 96, pt. 2, pp. 2406–2410.) Subsequently, H.R. 4846 was laid on the table on March 1, 1950, and S. 247 was passed in lieu thereof.

6. The sixth instance related to a bill (H.R. 5965) to provide for the construction of certain Veterans' Administration hospitals. This bill was reported from the Committee on Veterans' Affairs on August 24, 1949 (Rept. No. 1315). After remaining in the Committee on Rules for more than 21 days without being reported, Chairman Rankin called up House Resolution 348 on April 24, 1950, a resolution providing for the consideration of H.R. 5965. After debate, the resolution and bill were agreed to on the same day. (CONGRESSIONAL RECORD, vol. 96, pt. 4, pp. 5604–5620.)

7. The seventh case involved a joint resolution (H.J. Res. 334) to amend certain laws providing for membership and participation by the United States in certain international organizations. This resolution was reported from the Foreign Affairs Committee on August 11, 1949 (Rept. No. 1257). Chairman Kee of Foreign Affairs, called up House Resolution 350, a resolution providing for the consideration of the joint resolution, under the 21-day rule. After debate, the resolution passed the House on June 12, 1950. (CONGRESSIONAL RECORD, vol. 96, pt. 6, pp. 8471–8473.) Subsequently, House Joint Resolution 334 passed the House on June 22, 1950.

8. The eighth and last case concerned a bill (S. 2105) (H.R. 5725) to stimulate exploration for and conservation of strategic and critical ores, metals, and minerals. This bill was reported from the Public Lands Committee on October 11, 1949 (Rept. No. 1416). After remaining in the Committee on Rules for more than 21 days without being reported or acted on, Chairman Peterson called up House Resolution 419 on March 13, 1950, a resolution providing for the consideration of S. 2105. After debate, the resolution passed the House on the same day. (CONGRESSIONAL RECORD, vol. 96, pt. 3, pp. 3227–3229.) The bill had failed under suspensions, October 17, 1949; and failed of passage, March 16, 1950.

CASES IN WHICH THREAT OF NEW PROCEDURE FORCED ACTION

1. One case in which the "antibottlenecking" rule passed by the House apparently had a forceful effect on the Rules Committee was in connection with the housing and slum clearance bill (H.R. 4009). This bill was reported from Banking and Currency on May 16, 1949, by a vote of 14 to 7. A similar bill (S. 1070) had passed the Senate by a vote of 57 to 13. Chairman SPENCE applied to the Rules Committee for a rule, but the committee delayed, held hearings for 3 days, and delayed some more. On June 7 the Rules Committee voted 7 to 5 to table the housing bill, whereupon Mr. SPENCE filed a resolution to bypass Rules. Responding to this move and to pressure from the House leadership and in part, perhaps, to public opinion, the Rules Committee finally reversed itself and cleared the housing measure for floor consideration by a vote of 8 to 4. And on June 29, 1949, the House passed the Housing Act of 1949.

In explaining his final vote to report a rule for the consideration of the national housing bill, Mr. Cox voiced his belief that "considering it under a special rule will afford better opportunity for resistance than would be the case if considered under the new discharge rule." (CONGRESSIONAL RECORD, vol. 95, pt. 6, p. 7833.)

2. Another case in which the new discharge procedure forced action by the Rules Committee was in connection with the Fair Labor Standards Act of 1949. A minimum-wage bill (H.R. 3190) was reported from the Committee on Education and Labor on March 16, 1949. Chairman LESINSKI asked for a rule on this bill, but was informed by Mr. Sabath, chairman of Rules, that "I could not see my way clear whereby I could obtain favorable action on his resolution" because of the opposition of the four Republican and three Democratic members of the Rules Committee." (CONGRESSIONAL RECORD, vol. 95, pt. 8, p. 11208.) Thereafter, on April 7, Mr. LESINSKI filed House Resolution 183 to discharge the Rules Committee under the 21-day rule.

Four months later, on August 5, Chairman LESINSKI appeared before the Rules Committee at its invitation and requested a rule on H.R. 5856, a revised version of the original minimum-wage bill which, he stated, "was developed and passed by a majority of the Committee" on Education and Labor. After considerable confusion, the Rules Committee on August 8 reported House Resolution 183 which provided for the consideration of the revised minimum-wage bill (H.R. 5856). After debate, the Lucas substitute for this bill, as amended, passed the House on August 11.

It was evident from the debate on the House floor on August 8 that the Rules Committee would not have granted a rule on the Lesinski bill had it not been for the new 21-day discharge procedure. Chairman Sabath admitted as much himself when he told the House that—

"Had we not adopted House Resolution 5 on the first day of the session, this bill never would be here before us today, because the Committee on Rules, as constituted, would not have granted a rule on the original Lesinski bill. * * *

"I wish to state that had the chairman's bill not been in order today under House Resolution 5, this rule never would have been granted. But the majority of the Committee on Rules, the Republicans who were working closely with the three Democrats, did not want it to come up; they did not want the bill called up under the change in rules today. They wanted a rule, and in desperation I succeeded in obtaining a majority in favor of the amended rule now before us." (CONGRESSIONAL RECORD, vol. 98, pt. 8, p. 11210.)

Two other statements made in the course of the debate on this rule are of collateral interest. The first was a statement by Mr. Wadsworth, himself a member of Rules, in which he said that "I am convinced we should not establish the precedent under which the Rules Committee may ignore the legislative committees and thrust before the House bills which have had no consideration in those committees.' (CONGRESSIONAL RECORD, vol. 98, pt. 8, p. 11206.)

The other significant statement was that of Mr. COLMER, also a member of Rules, who raised the question "whether there should be a Rules Committee, * * * if it is going to be bypassed" under the new rules of the House. (CONGRESSIONAL RECORD, vol. 98, pt. 8, p. 11207.)

CRITICISMS OF THE 21-DAY RULE

During the two debates on the repeal of the 21-day rule in 1950 and 1951, its opponents made a number of criticisms of its operation. Thus, Representative HALLECK (Republican of Indiana), said that the "Rules Committee was designed to be the creature of responsible leadership. I am worried," he said, "about a flood of bills that are not desired by the administration or by majority party leadership which may bankrupt the country." (CONGRESSIONAL RECORD, vol. 96, pt. 1, p. 718.)

Mr. KILDAY (Democrat of Texas), took a similar view. The experience of a year, he felt, had proved that the 21-day rule was of minor value in securing consideration of bills pending before the Rules Committee more than 21 days:

"On the other hand, it has resulted in an intolerable condition in the House. The Speaker and the leadership have been deprived of all control of the program and procedure of the House. Pressure groups have assumed control. Any pressure group which can secure favorable consideration by any committee can now secure final favorable action in the House by applying pressure to the chairman of the committee reporting the bill, and such chairman's motion must be entertained by the Speaker." (CONGRESSIONAL RECORD, vol. 96, pt. 1, p. 712.)

Another alleged weakness in the 21-day rule was that, in giving the Speaker the right to recognize a committee chairman, the rule placed responsibility on one man, the elected leader of the majority party, and not on any other embodiment of the majority, of deciding what bills should come before the House, the Rules Committee notwithstanding. The question was raised whether or not some system could be found by which leadership can be sufficiently centralized without completely isolating the responsibility for its exercise.

Although the adoption of the 21-day rule in 1949 was widely interpreted as greatly expanding the powers and prerogatives of the Speaker, it was surmised that Mr. RAYBURN was not disappointed when the rule was repealed in 1951. As one who preferred to exercise his influence on a personal basis behind the scenes, he was perhaps never entirely happy with the way in which the 21-day rule could be used to pin responsibility on him.

The Brown-Allen school of thought attacked the 21-day rule as transferring the power of deciding what bills should be considered from the 12-man Rules Committee

to one man, the Speaker. This, they alleged, was a throwback to the dictatorship of Cannonism.

Representative Herter (Republican, of Massachusetts), calling for the repeal of the 21-day rule, pointed out that it had been adopted because the majority, through the operation of the seniority rule, were "distrustful of their own membership in steering their own party policy. That is a situation, Mr. Speaker, that should not be remedied by a change of rules. That is a situation that ought to be changed by the majority party in selecting its own members of the Rules Committee." (CONGRESSIONAL RECORD, vol. 97, pt. 1, p. 14.)

By curbing the power of the Rules Committee, the 21-day rule enhanced the position of the Speaker and individual committee chairmen, but it weakened the role of the Committee on Rules as an agent of majority party control. Two primary dangers were inherent in the revised system: first, that with the Rules Committee funnel rendered ineffective, undesirable special interest bills, which formerly could have been filtered out of the legislative process, might be unwillingly forced upon politically self-conscious legislators; and, secondly, that by giving the Speaker the power to decide which chairman to recognize, the Presiding Officer might use his prerogative to the detriment of the party, or in any event, might discover that the rule constantly placed him on the political spot, a condition which would weaken his position either as party leader or as representative of his constituency at home.

NOVEMBER 24, 1958.

PROPOSED REFORMS AFFECTING THE HOUSE RULES COMMITTEE CLASSIFIED ACCORDING TO THEIR RELATION TO THE ROLES OF THE RULES COMMITTEE

ROLE OF TRAFFIC DIRECTOR

If the Rules Committee is regarded merely as a traffic director, then its function would be defined in the standing rules of the House as the assignment of priorities to the floor consideration of bills reported from the legislative committees and the determination of the time to be allotted for debate on these bills. Rule XI would be amended to provide (a) that the committee may not consider the substantive merits of legislation and (b) that the committee may not deny special orders for the consideration by the House of favorable committee reports.

Other proposed changes that fit in with this traffic director concept are the following:

1. Require the committee to report a rule favorably or adversely within a specified time.

2. Restore the 21-day rule which allowed the chairmen of legislative committees to bring their bills to the House floor after the Rules Committee had failed to act upon them.

3. Require the Rules Committee to grant a rule if a legislative committee reports a bill favorably a second time.

4. Reduce the number of signatures required on discharge petitions so that the Rules Committee could be discharged from the further consideration of bills it has held up.

5. Provide for a regular weekly meeting day of the committee.

6. Make motions to send House-passed bills to conference highly privileged, so that they cannot be held up by denial of a rule.

AGENT OF BIPARTISAN BLOCS IN HOUSE

If the Rules Committee is regarded as the agent of bipartisan blocs on the floor of the House, with the primary function of reflecting their sentiments, then it is fitting that it should be bipartisan in its composition and control and that it should operate in such a manner as to promote the interests of bipartisan coalitions on the floor. Its existing powers to grant or deny rules providing the times and methods for the consideration of particular bills appear to be adequate to enable it to function in this fashion.

AGENT OF MAJORITY PARTY

If the Rules Committee is regarded as the responsible agent of the majority party in the House—which was its traditional function prior to 1937—then it should be so composed and empowered that it can use its powers to facilitate enactment of the legislative program of the majority party leadership, and of the administration when the Presidency and the House are controlled by the same political party. This concept would involve the following steps:

1. Provide that the Rules Committee shall include only members of the majority party.

2. Elect the members of the committee biennially in the open party caucus at the beginning of each Congress in such a manner as to give the major geographical sections of the country representation on Rules commensurate with their majority party strength.

3. Integrate the Rules Committee with the House leadership by making the Speaker the 13th member of the committee, thus preventing tie votes.

The purpose of these steps would be to convert the Rules Committee into a genuine majority policy committee. If this concept of the committee as the responsible agent of the majority party is accepted, then the aim would be to strengthen the committee and to preserve its traditional powers. In this event the changes outlined above under "Role of Traffic Director" would not be advisable, for they are designed to weaken the committee.

JULY 8, 1960.

Legislation Considered by the Committee on Banking and Currency During the 86th Congress

---

EXTENSION OF REMARKS

OF

HON. BRENT SPENCE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. SPENCE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following report on legislation considered by the Committee on Banking and Currency during the 86th Congress:

SUMMARY OF LEGISLATION CONSIDERED BY THE HOUSE COMMITTEE ON BANKING AND CURRENCY

LAWS ENACTED, FIRST SESSION

Member bank reserve requirements

Public Law 86–114—House Reports 403 and 651; S. 1120 (H.R. 5237)

This act made three changes in the law relating to the reserves that Federal Reserve member banks must maintain against their demand deposits.

First, the act authorizes the Federal Reserve Board to treat vault cash as reserves. This amendment was effective upon enactment of this act. The Board testified before the committee, however, that it would put this change into effect gradually, so as to avoid the disturbing effect upon our economy that would result from suddenly increasing reserves by the $2 billion in vault cash held by banks. The first steps toward counting vault cash as reserves were taken in December of 1959, when the Board permitted country banks to treat as reserves vault cash they held in excess of 4 percent of their net demand deposits; Reserve city banks and central Reserve city banks were authorized to count their vault cash to the extent it exceeded 2 percent of net demand deposits. Effective August 25, 1960, the figure for country banks was lowered to 2½ percent. Effective September 1, 1960, the figure for reserve city and central Reserve city banks was lowered to 2 percent.

Second, the act provides for gradually eliminating the "central Reserve city" classification, so as to divide all member banks into two classifications (Reserve city banks and country banks). The Board was given 3 years to make the necessary adjustments to eliminate this classification. During the 3 years in which the "central Reserve city" classification continues, the statutory floor and ceiling on reserve requirements for these cities will be 10 percent and 22 percent, the same as for Reserve cities. During these 3 years, the Board will have authority to continue higher requirements for New York and Chicago banks (within the 22-percent limit, of course) than for Reserve city banks. But after the 3 years expire, New York and Chicago will be treated the same as other Reserve cities. On September 1, 1960, the Board reduced reserve requirements from 18 percent to 17½ percent for banks in New York and Chicago, thereby taking the first step toward treating them the same as other Reserve cities, for which the requirement was then 16½ percent.

Third, the Board's authority to allow individual banks in central Reserve cities and Reserve cities to carry lower reserves is broadened. This authority was previously limited to banks geographically situated in outlying districts of cities. The act allows adjustments according to the nature of the bank's business, rather than according to where the bank is located physically.

In addition, the act amends section 5144 of the Revised Statutes, which requires bank holding companies to maintain reserves of readily marketable assets amounting to at least 12 percent of the aggregate par value of the stock of Federal Reserve member banks they control. The amendment applies in cases where there are several bank holding companies superimposed upon each other. In such cases, under the amendment, the Federal Reserve Board may designate one of the tier of holding companies as the only one required to maintain the 12-percent reserve.

S. 1120 passed the Senate on May 13, and passed the House with an amendment on July 1. The conference report on the bill was adopted by the House on July 14 and the Senate on July 15. The bill became law on July 28, 1959.

Lending powers of national banks

Public Law 86–251—House Report 693; H.R. 8160

This act made four basic changes in the laws relating to national banks.

The first section relates to the Office of the Comptroller of the Currency, which supervises national banks. It provides for an additional Deputy Comptroller and increases the surety bonds for the Comptroller (from $100,000 to $250,000) and the Deputy Comptroller (from $50,000 to $100,000).

Section 2 increases the limit on borrowing by national banks from 100 percent of capital to 100 percent of capital plus 50 percent of surplus.

Section 3 relates to the limit on credit a bank may extend to one borrower. For national banks, such credit is generally limited to 10 percent of the bank's capital and surplus, but there are several exceptions. The new act makes four changes in this limit for national banks, and in one case makes a conforming change for State member banks. Section 3(a) of the new act permits national banks to extend credit up to 25 percent of capital and surplus where the amount of the credit over the normal

10 percent limit is secured by readily marketable refrigerated or frozen staples, fully covered by insurance. Section 3(b) grants corresponding authority as to discounting paper covering purchases of dairy cattle. Section 3(c) permits both national banks and State member banks (insofar as Federal law is concerned) to lend up to 25 percent of capital and surplus where the loan is secured by U.S. obligations, without regard to a former requirement that the transaction be in the form of a note from the borrower to the bank. Section 3(d) imposes a limit of 25 percent of capital and surplus on the purchase of consumer installment paper by a national bank from a single dealer, where the bank is relying primarily on the dealer. This eliminates the former distinction between negotiable and nonnegotiable consumer paper; under the old law there was no limit on such purchases if the paper was negotiable, but a 10-percent limit if it was not. If the bank relies primarily on the maker of the obligation (that is, the buyer of the automobile or whatever other item may be involved) rather than the dealer, the transaction is not subject to the 25-percent limit on credit to the dealer.

Section 4 liberalizes some of the restrictions on real estate loans by national banks. Section 4(a) permits loans on leaseholds that run at least 10 years beyond the loan maturity (the former requirement was that the lease run 99 years and be renewable, or run 50 years from the date the loan was made or acquired by the bank). Section 4(b)(1) allows national banks to make real estate loans up to 20 years, covering up to 75 percent of the appraised value of the real estate, if the loans are fully amortized so as to avoid balloon payments. Section 4(b)(2) exempts from the usual real estate loan restrictions any loan fully guaranteed by a State (either directly or through a State authority). Section 4(c) permits national banks to make construction loans on industrial or commercial buildings up to 18 months' maturity where there is a takeout commitment by a responsible lender to provide permanent financing upon completion of construction; in such a case, the loan will be treated as a commercial loan rather than a real estate loan. In view of this change, section 4(c) also raises the limit on construction loans to 100 percent of capital and surplus (formerly 50 percent). Section 4(d) permits national banks to take mortgages as additional security on working-capital loans to manufacturing or industrial enterprises, without subjecting the loans to the real estate loan restrictions.

H.R. 8160 passed the House on July 30 and passed the Senate with an amendment on August 24. The House agreed to the Senate amendment on August 26, and the bill became law on September 9, 1959.

Technical amendments to national bank laws

Public Law 86-230—House Report 694; H.R. 8159

This law repeals various obsolete provisions of the national banking laws and clarifies and eliminates ambiguities that existed. In five instances, however, it makes substantive changes. (1) Section 3 of the act requires approval of the Comptroller of the Currency before a national bank may move its main office inside the city where located. The old law required such approval before the main office could be moved outside the city, and before a branch office could be moved inside or outside the city. (2) Section 10 exempts loans by the Federal Deposit Insurance Corporation from the limit on borrowings by national banks. This simply restores an exemption which was in the law many years and was inadvertently repealed in 1950. (3) Section 11 allows a longer time (10 days instead of 5 days) for national banks to file reports of condition with the Comptroller after he calls for them. (4) Section 21 requires the Comptroller's approval before a national bank may declare dividends in any year that exceed the total of its net profits for that year combined with retained net profits for the preceding 2 years. A similar limit is placed on dividends by State banks that are members of the Federal Reserve System, except that in such cases approval of the Federal Reserve Board is required. Also the new act repeals a requirement as to dividend reports which had served no practical purpose, and replaces it with authority to require such dividend reports as may be necessary to carry out the national bank laws. (5) Section 23 prohibits any firm from receiving deposits unless it is subject to examination and regulation by State or Federal authority.

The House passed H.R. 8159 on July 30; it was passed by the Senate on August 24, and became Public Law 86-230 on September 8, 1959.

Technical correction in section 5136 of the Revised Statutes

Public Law 86-278—House Report 884; House Joint Resolution 493

This law makes a technical amendment needed because two bills were signed into law at almost the same time, both of them amending the same provision of law. The two acts involved are Public Law 86-137 (relating to financing of TVA power programs) and Public Law 86-147 (relating to U.S. participation in the Inter-American Development Bank). Both acts amended section 5136 of the Revised Statutes and inserted new language covering obligations of TVA (in the first instance) and the new Inter-American Development Bank (in the second instance). Because the TVA bill was signed into law on August 6, 1 day before the Inter-American Bank bill was signed, the amendment made by the second bill was technically deficient. This law corrects the deficiency.

House Joint Resolution 493 passed the House August 17, passed the Senate September 9, and became Public Law 86-278 on September 16, 1959.

International Wheat Agreement Act extension

Public Law 86-336—House Report 883; H.R. 8409

This act extends for an additional 3 years the necessary implementing legislation to carry out U.S. participation in the International Wheat Agreement. This agreement was originally signed in 1949 and since has been extended at 3-year intervals, the latest extension having been ratified by the Senate on July 15, 1959. Under the 1959 agreement, some 30 participating wheat-importing countries have agreed to buy on the average of 70 percent of their commercial wheat imports from the United States and 8 other wheat-exporting countries, at prices within a specified range. This act extends the Commodity Credit Corporation's authority to make wheat and wheat flour available for export to exercise our rights and fulfill our obligations under the agreement.

H.R. 8409 passed the House August 17, passed the Senate September 11, and became Public Law 86-336 on September 21, 1959.

Use of surplus grains to prevent waterfowl depredations

Public Law 86-133—House Report 571; H.R. 7631

This act repeals the expiration date (July 3, 1959) contained in Public Law 654 of the 84th Congress, thereby making permanent the authorization in that law for the Secretary of the Interior to use surplus grains of the Commodity Credit Corporation to feed migratory waterfowl to prevent crop damage. Feeding is done in cooperation with State and local officials as well as private groups, and is accomplished in such a way as to lure waterfowl away from farmers' fields where they are causing crop damage, yet not expose them to shooting.

The bill passed the House July 20, passed the Senate July 24, and was approved August 4, 1959.

Federal Credit Union Act

Public Law 86-354—House Report 696; H.R. 8305

This act rewrites the Federal Credit Union Act of 1934. It incorporates a number of amendments. Some of these are designed only to clarify and modernize existing law. Others are intended to increase the scope and efficiency of Federal credit union operations.

The substantive changes include the following:

1. An increase in the maximum maturity of loans from 3 to 5 years.

2. An increase in the unsecured loan limit from $400 to $750.

3. Authority to pay dividends semiannually and to allow dividend credit for savings received in the first 5 days of a month. Also, the board of directors is authorized to declare dividends (formerly dividends were declared by the members at the annual meeting).

4. An authorization for Federal credit unions to cash and sell checks to members for a reasonable fee.

5. A liberalization of borrowing restrictions on Federal credit union officials. Previously such officials were allowed to borrow from their credit union only up to the amount of their shareholdings. The new act allows loans in additional amounts if secured by shareholdings of other members.

6. Changes in the organizational and administrative provisions to make the operations of the Federal credit unions more efficient. These include—

(a) Appointment of supervisory committees by the board of directors. Under the old law these committees were elected by the members.

(b) Appointment of one or more loan officers by the credit committee. The loan officer may be authorized to approve certain loans formerly requiring approval by the credit committee.

(c) Authority for the board of directors to appoint an executive committee which may buy and sell securities, make loans to other credit unions, or approve applications for membership—functions formerly carried out by the full board of directors.

(d) Authority for the board of directors to appoint a membership officer who may approve applications for membership.

7. Inclusion of Federal credit unions within the criminal laws prohibiting bank robbery and incidental crimes.
